- 44 The inference from the premise, A, to the conclusion, B, depends, as we have seen, on the guiding principle that if a fact of the class A is true, a fact of the class B is true. The probability consists of the fraction whose numerator is the number of times in which both A and B are true, and whose denominator is the total number of times in which A is true, whether B is so or not. Instead of speaking of this as the probability of the inference, there is not the slightest objection to calling it the probability that if A happens, B happens. But to speak of the probability of the event B, without naming the condition, really has no meaning at all. It is true that when it is perfectly obvious what condition is meant, the ellipsis may be permitted. But we should avoid contracting the habit of using language in this way (universal as the habit is), because it gives rise to a vague way of thinking, as if the action of causation might either determine an event to happen or determine it not to happen, or leave it more or less free to happen or not, so as to give rise to an *inherent* chance in regard to its occurrence. It is quite clear to me that some of the worst and most persistent

errors in the use of the doctrine of chances have arisen from this vicious mode of expression.

C. S. Peirce, The Red and the Black

45 The idea of probability essentially belongs to a kind of inference which is repeated indefinitely. An individual inference must be either true or false, and can show no effect of probability; and, therefore, in reference to a single case considered in itself, probability can have no meaning. Yet if a man had to choose between drawing a card from a pack containing twenty-five red cards and a black one, or from a pack containing twenty-five black cards and a red one, and if the drawing of a red card were destined to transport him to eternal felicity, and that of a black one to consign him to everlasting woe, it would be folly to deny that he ought to prefer the pack containing the larger portion of red cards, although, from the nature of the risk, it could not be repeated. It is not easy to reconcile this with our analysis of the conception of chance. But suppose he should choose the red pack, and should draw the wrong card, what consolation would he have? He might say that he had acted in accordance with reason, but that would only show that his reason was absolutely worthless. And if he should choose the right card, how could he regard it as anything but a happy accident? He could not say that if he had drawn from other pack, he might have drawn the wrong because a hypothetical proposition such as, "if A, then B," means nothing with reference to a single case. Truth consists in the existence of a fact corresponding to the true proposition. Corresponding to the proposition, "if A, then B," there may be the fact that *whenever* such an event as A happens such an event as B happens. But in the case

supposed, which has no parallel as far as man is concerned, there would be no real fact whose existence could give any truth to the statement that, if he had drawn from the other pack, he might have drawn a black card.

C. S. Peirce, The Red and the Black

- 46 It is an indubitable result of the theory of probabilities that every gambler, if he continues long enough, must ultimately be ruined.

C. S. Peirce, The Red and the Black

- 47 All human affairs rest upon probabilities, and the same thing is true everywhere. If man were immortal he could be perfectly sure of seeing the day when everything in which he had trusted should betray his trust, and, in short, of coming eventually to hopeless misery. He would break down, at last, as every good fortune, as every dynasty, as every civilization does. In place of this we have death.

But what, without death, would happen to every man, with death must happen to some man. At the same time, death makes the number of our risks, of our inferences, finite, and so makes their mean result uncertain. The very idea of probability and of reasoning rests on the assumption that this number is indefinitely great.

C. S. Peirce, The Red and the Black

- 48 No victor believes in chance.

Nietzsche, Gay Science, 258

49 You probably feel that when religious faith expresses itself ... in the language of the gaming table, it is put to its last trumps. Surely Pascal's own personal belief in masses and holy water had far other springs; and this celebrated page of his is but an argument for others, a last desperate snatch at a weapon against the hardness of the unbelieving heart. We feel that a faith in masses and holy water adopted wilfully after such a mechanical calculation would lack the inner soul of faith's reality; and if we were ourselves in the place of the Deity, we should probably take particular pleasure in cutting off believers of this pattern from their infinite reward. It is evident that unless there be some pre-existing tendency to believe in masses and holy water, the option offered to the will by Pascal is not a living option. Certainly no Turk ever took to masses and holy water on its account; and even to us Protestants these means of salvation seem such foregone impossibilities that Pascal's logic, invoked for them specifically, leaves us unmoved. As well might the Mahdi write to us, saying, "I am the Expected One whom God has created in his effulgence. You shall be infinitely happy if you confess me; otherwise you shall be cut off from the light of the sun. Weigh, then, your infinite gain if I am genuine against your finite sacrifice if I am not!" His logic would be that of Pascal; but he would vainly use it on us, for the hypothesis he offers us is dead. No tendency to act on it exists in us to any degree.

William James, Will to Believe

50 It must well be that chance is something other than the name we give our ignorance, that among phenomena whose causes are unknown to us we must distinguish fortuitous phenomena about which the calculus of

probabilities will provisionally give information, from those which are not fortuitous and of which we can say nothing so long as we shall not have determined the laws governing them. For the fortuitous phenomena themselves, it is clear that the information given us by the calculus of probabilities will not cease to be true upon the day when these phenomena shall be better known.

The director of a life insurance company does not know when each of the insured will die, but he relies upon the calculus of probabilities and on the law of great numbers, and he is not deceived, since he distributes dividends to his stockholders. These dividends would not vanish if a very penetrating and very indiscrete physician should, after the policies were signed, reveal to the director the life chances of the insured. This doctor would dissipate the ignorance of the director, but he would have no influence on the dividends, which evidently are not an outcome of this ignorance,

Poincare, Science and Method, 1,4

- 51 The greatest bit of chance is the birth of a great man. It is only by chance that meeting of two germinal cells, of different sex, containing precisely, each on its side, the mysterious elements whose mutual reaction must produce the genius. One will agree that these elements must be rare and that their meeting is still more rare. How slight a thing it would have required to deflect from its route the carrying spermatozoon. It would have sufficed to deflect it a tenth of a millimeter and Napoleon would not have been born and the destinies of a continent would have been changed. No example can better make us understand the veritable characteristics of chance.

19.5 Motion and Change

At the beginning of Western thought, two pre-Socratic philosophers, Heraclitus and Parmenides, went to the opposite extremes of asserting, on the one hand, that everything is always in flux and never for a moment remains unchanged, and, on the other, that permanence or immutability reigns everywhere and that our experience of motion or change is a deceptive illusion. While they are not quoted here, the views of Heraclitus and Parmenides are commented on by later thinkers who regard motion and rest, or change and permanence, as correlatives, neither of which can be understood without the other.

The philosophical consideration of motion and change attempts to discover its principles (that without which motion or change cannot occur); proposes a classification of the kinds of change, such as local motion, change of quality, or alteration, change in quantity, or increase and decrease, and what was called "substantial change," or coming to be and passing away; speculates about whether change or motion ever began and will ever stop or is everlasting, without beginning or end; and asks whether endless motion involves an unmoved mover as its cause.

The modern scientific study of motion— the motion of bodies from place to place— begins with Galileo, and introduces such distinctions as that between natural and violent motion, uniform and variable motion, and such concepts as velocity, acceleration, momentum, and inertia. Employing these concepts, the new sciences of kinematics

and dynamics are applied by Newton to the motion of celestial as well as terrestrial bodies. In addition to formulating the principle of inertia as one of his three laws of motion, Newton introduces the concept of gravity, and the distinction between absolute and relative motion. The reader will be interested to find the existence of absolute motion challenged by Bishop Berkeley, for reasons that anticipate Einstein's views on the same subject.

■ ■ ■

1 Vanity of vanities, saith the Preacher, vanity of vanities; all is vanity.

What profit hath a man of all his labour which he taketh under the sun?

One generation passeth away, and another generation cometh: but the earth abideth for ever.

The sun also ariseth, and the sun goeth down, and hasteth to his place where he arose.

The wind goeth toward the south, and turneth about unto the north; it whirleth about continually, and the wind returneth again according to his circuits.

All the rivers run into the sea; yet the sea is not full; unto the place from whence the rivers come, thither they return again.

All things are full of labour; man cannot utter it: the eye is not satisfied with seeing, nor the ear filled with hearing.

The thing that hath been, it is that which shall be; and that which is done is that which shall be done: and there is no new thing under the sun.

Ecclesiastes 1:2-9

- 2 Can the Ethiopian change his skin, or the leopard his spots?

Jeremiah 13:23

- 3 *Socrates*. Many of our modern philosophers ... in their search after the nature of things, are always getting dizzy from constantly going round and round, and then they imagine that the world is going round and round and moving in all directions; and this appearance, which arises out of their own internal condition, they suppose to be a reality of nature; they think that there is nothing stable or permanent, but only flux and motion, and that the world is always full of every sort of motion and change.

Plato, Cratylus, 411A

- 4 *Socrates*. Only the self-moving, never-leaving self, never ceases to move, and is the fountain and beginning of motion to all that moves besides. Now, the beginning is unbegotten, for that which is begotten has a beginning; but the beginning is begotten of nothing, for if it were begotten of something, then the begotten would not come from a beginning. But if unbegotten, it must also be indestructible; for if beginning were destroyed, there could be no beginning out of anything, nor anything out of a beginning; and all things must have a beginning. And therefore the self-moving is the beginning of motion; and this can neither be destroyed nor begotten, else the whole heavens and all creation would collapse and stand still, and never again have motion or birth.

Plato, Phaedrus, 245B

- 5 Nature has been defined as a ‘principle of motion and change’, and it is the subject of our inquiry. We must therefore see that we understand the meaning of ‘motion’; for if it were unknown, the meaning of ‘nature’ too would be unknown. . . .

The fulfilment of what exists potentially, in so far as it exists potentially, is motion—namely, of what is alterable qua alterable, alteration: of what can be increased and its opposite what can be decreased (there is no common name), increase and decrease: of what can come to be and can pass away, coming to be and passing away: of what can be carried along, locomotion.

Aristotle, Physics, 200b11

- 6 We must understand that place would not have been thought of, if there had not been a special kind of motion, namely that with respect to place. It is chiefly for this reason that we suppose the heaven also to be in place, because it is in constant movement. Of this kind of change there are two species—locomotion on the one hand and, on the other, increase and diminution. For these too involve variation of place: what was then in this place has now in turn changed to what is larger or smaller.

Aristotle, Physics, 211a12

- 7 It is a law of nature that earth and all other bodies should remain in their proper places and be moved from them only by violence: from the fact then that some of them are in their proper places it follows that in respect of

place also all things cannot be in motion. These and other similar arguments, then, should convince us that it is impossible either that all things are always in motion or that all things are always at rest.

Aristotle, Physics, 253b33

- 8 Since there must always be motion without intermission, there must necessarily be something, one thing or it may be a plurality, that first imparts motion, and this first mover must be unmoved. Now the question whether each of the things that are unmoved but impart motion is eternal is irrelevant to our present argument: but the following considerations will make it clear that there must necessarily be some such thing, which, while it has the capacity of moving something else, is itself unmoved and exempt from all change, which can affect it neither in an unqualified nor in an accidental sense. Let us suppose, if any one likes, that in the case of certain things it is possible for them at different times to be and not to be, without any process of becoming and perishing (in fact it would seem to be necessary if a thing that has not parts at one time is and at another time is not, that any such thing should without undergoing any process of change at one time be and at another time not be). And let us further suppose it possible that some principles that are unmoved but capable of imparting motion at one time are and at another time are not. Even so, this cannot be true of *all* such principles, since there must clearly be something that *causes* things that move themselves at one time to be and at another not to be. For, since nothing that has not parts can be in motion, that which moves itself must as a whole have magnitude, though nothing that we have said makes this necessarily true of

every movent. So the fact that some things become and others perish, and that this is so continuously, cannot be caused by any one of those things that, though they are unmoved, do not always exist: nor again can it be caused by any of those which move certain particular things, while others move other things. The eternity and continuity of the process cannot be caused either by any one of them singly or by the sum of them, because this causal relation must be eternal and necessary, whereas the sum of these movents is infinite and they do not all exist together. It is clear, then, that though there may be countless instances of the perishing of some principles that are unmoved but impart motion, and though many things that move themselves perish and are succeeded by others that come into being, and though one thing that is unmoved moves one thing while another moves another, nevertheless there is something that comprehends them all, and that as something apart from each one of them, and this it is that is the cause of the fact that some things are and others are not and of the continuous process of change: and this causes the motion of the other movents, while they are the causes of the motion of other things. Motion, then, being eternal, the first movent, if there is but one, will be eternal also: if there are more than one, there will be a plurality of such eternal movents. We ought, however, to suppose that there is one rather than many, and a finite rather than an infinite number. When the consequences of either assumption are the same, we should always assume that things are finite rather than infinite in number, since in things constituted by nature that which is finite and that which is better ought, if possible, to be present rather than the reverse: and here it is sufficient to assume only

one mover, the first of unmoved things, which being eternal will be the principle of motion to everything else.

Aristotle, Physics, 258b10

9 The origin of all other motions [except eternal motion] is that which moves itself, and ... the origin of this is the immovable, and ... the prime mover must of necessity be immovable. And we must grasp this not only generally in theory, but also by reference to individuals in the world of sense, for with these in view we seek general theories, and with these we believe that general theories ought to harmonize. Now in the world of sense too it is plainly impossible for movement to be initiated if there is nothing at rest, and before all else in our present subject-animal life.... But the point of rest in the animal is still quite ineffectual unless there be something without which is absolutely at rest and im-movable. Now it is worth while to pause and consider what has been said, for it involves a speculation which extends beyond animals even to the motion and march of the universe. For just as there must be something immovable within the animal, if it is to be moved, so even mote must there be without it something immovable, by supporting itself upon which that which is moved moves. For were that something always to give way (as it does for mice walking in grain or persons walking in sand) advance would be impossible, and neither would there be any walking unless the ground were to remain still, nor any flying or swimming were not the air and the sea to resist. And this which resists must needs be different from what is moved, the whole of it from the whole of that, and what is thus immovable must be no part of what is moved; otherwise there will be no movement.

Aristotle, On the Motion of Animals, 698a11

- 10 Since changes are of four kinds—either in respect of the ‘what’ or of the quality or of the quantity or of the place, and change in respect of ‘thisness’ is simple generation and destruction, and change in quantity is increase and diminution, and change in respect of an affection is alteration, and change of place is motion, changes will be from given states into those contrary to them in these several respects. The matter, then, which changes must be capable of both states. And since that which ‘is’ has two senses, we must say that everything changes from that which is potentially to that which is actually, e.g. from potentially white to actually white, and similarly in the case of increase and diminution. Therefore not only can a thing come to be, incidentally, out of that which is not, but also all things come to be out of that which is, but is potentially, and is not actually.

Aristotle, Metaphysics, 1069b8

- 11 It is necessary that there should be an eternal unmovable substance. For substances are the first of existing things, and if they are all destructible, all things are destructible. But it is impossible that movement should either have come into being or cease to be (for it must always have existed), or that time should. For there could not be a before and an after if time did not exist. Movement also is continuous, then, in the sense in which time is; for time is either the same thing as movement or an attribute of movement. And there is no continuous movement except movement in place, and of this only that which is circular is continuous.

Aristotle, Metaphysics, 1071b4

12 Atoms move continuously for all time, some of them falling straight down, others swerving, and others recoiling from their collisions. And of the latter, some are borne on, separating to a long distance from one another, while others again recoil and recoil, whenever they chance to be checked by the interlacing with others, or else shut in by atoms interlaced around them. For on the one hand the nature of the void which separates each atom by itself brings this about, as it is not able to afford resistance, and on the other hand the hardness which belongs to the atoms makes them recoil after collision to as great a distance as the interlacing permits separation after the collision. And these motions have no beginning, since the atoms and the void are the cause.

Epicurus, letter to Herodotus

13 If you think that first-beginnings of things can lag and by lagging give birth to new motions of things, you wander far astray from the path of true reason: since they travel about through void, the first-beginnings of things must all move on either by their own weight or haply by the stroke of another. For when during motion they have, as often happens, met and clashed, the result is a sudden rebounding in an opposite direction; and no wonder, since they are most hard and of weight proportioned to their solidity and nothing behind gets in their way. And that you may more clearly see that all bodies of matter are in restless movement, remember that there is no lowest point in the sum of the universe, and that first bodies have not where to take their stand, since space is without end and limit and extends immeasurably in all

directions round, as I have shown in many words and as has been proved by sure reason.

Lucretius, Nature of Things, II

- 14 The earth with good title has gotten and keeps the name of mother, since she of herself gave birth to mankind and at a time nearly fixed shed forth every beast that ranges wildly over the great mountains, and at the same time the fowls of the air with all their varied shapes. But because she must have some limit set to her bearing, she ceased like a woman worn out by length of days.

For time changes the nature of the whole world and all things must pass on from one condition to another, and nothing continues like to itself: all things quit their bounds, all things nature changes and compels to alter. One thing crumbles away and is worn and enfeebled with age, then another comes unto honour and issues out of its state of contempt. In this way then time changes the nature of the whole world and the earth passes out of one condition into another: what once it could, it can bear no more, in order to be able to bear what before it did not bear.

Lucretius, Nature of Things, V

- 15 Often think of the rapidity with which things pass by and disappear, both the things which are and the things which are produced. For substance is like a river in a continual flow, and the activities of things are in constant change, and the causes work in infinite varieties; and there is hardly anything which stands still.

Marcus Aurelius, Meditations, V, 23

16 Some things are hurrying into existence, and others are hurrying out of it; and of that which is coming into existence part is already extinguished. Motions and changes are continually renewing the world, just as the uninterrupted course of time is always renewing the infinite duration of ages. In this flowing stream then, on which there is no abiding, what is there of the things which hurry by on which a man would set a high price? It would be just as if a man should fall in love with one of the sparrows which fly by, but it has already passed out of sight.

Marcus Aurelius, Meditations, VI, 15

17 Is any man afraid of change? Why what can take place without change? What then is more pleasing or more suitable to the universal nature? And canst thou take a bath unless the wood undergoes a change? And canst thou be nourished, unless the food undergoes a change? And can anything else that is useful be accomplished without change? Dost thou not see then that for thyself also to change is just the same, and equally necessary for the universal nature?

Marcus Aurelius, Meditations, VII, 18

18 When... such and such a body undergoes no change from its existing state, we say that it is at rest; but, if it departs from this in any respect we then say that in this respect it undergoes motion. Accordingly, when it departs in various ways from its pre-existing state, it will be said to undergo various kinds of motion. Thus, if that which is white becomes black, or what is black becomes white, it undergoes motion in respect to colour.... And further, it is

not only things which are altered in regard to colour and flavour which, we say, undergo motion; when a warm thing becomes cold, and a cold warm, here too we speak of its undergoing motion; similarly also when anything moist becomes dry, or dry moist. Now, the common term which we apply to all these cases is alteration.

This is one kind of motion. But there is another kind which occurs in bodies which change their position, or as we say, pass from one place to another; the name of this is transference.

These two kinds of motion, then, are simple and primary, while compounded from them we have growth and decay, as when a small thing becomes bigger, or a big thing smaller, each retaining at the same time its particular form. And two other kinds of motion are genesis and destruction, genesis being a coming into existence, and destruction being the opposite.

Galen, Natural Faculties, I, 2

- 19 The Kosmos has had no beginning... and this is warrant for its continued existence. Why should there be in the future a change that has not yet occurred? The elements there are not worn away like beams and rafters: they hold sound for ever, and so the All holds sound. And even supposing these elements to be in ceaseless transmutation, yet the All persists: the ground of all the change must itself be changeless.

Plotinus, Second Ennead, I, 4

- 20 It is certain, and evident to our senses, that in this world some things are in motion. Now whatever is in motion is put in motion by another, for nothing can be in motion

unless it is in potency to that towards which it is in motion. But a thing moves in so far as it is in act. For motion is nothing else than the reduction of something from potency to act. But nothing can be reduced from potency to act except by something in a state of act. Thus that which is actually hot, as fire, makes wood, which is potentially hot, to be actually hot, and thereby moves and changes it. Now it is not possible that the same thing should be at once in act and potency in the same respect, but only in different respects. For what is actually hot cannot simultaneously be potentially hot, though it is simultaneously potentially cold. It is therefore impossible that in the same respect and in the same way a thing should be both mover and moved, that is, that it should move itself. Therefore, whatever is moved must be moved by another. If that by which it is moved be itself moved, then this also must be moved by another, and that by another again. But this cannot go on to infinity, because then there would be no first mover, and, consequently, no other mover, seeing that subsequent movers move only because as they are moved by the first mover, just as the staff moves only because it is moved by the hand. Therefore it is necessary to arrive at a first mover which is moved by no other. And this everyone understands to be God.

Aquinas, Summa Theologica, I, 2, 3

- 21 Now it is manifest that a natural body cannot be actually infinite . . . because every natural body has some natural movement. But an infinite body could not have any natural movement. Neither direct, because nothing moves naturally by a direct movement unless it is out of its place, and this could not happen to an infinite body,

for it would occupy every place, and thus every place would be indifferently its own place. Neither could it move circularly; since circular motion requires that one part of the body is necessarily transferred to a place occupied by another part, and this could not happen as regards an infinite circular body; for if two lines be drawn from the centre the farther they extend from the centre, the farther they are from each other; therefore, if a body were infinite, the lines would be infinitely distant from each other, and thus one could never reach the place belonging to any other.

Aquinas, Summa Theologica, I, 7,3

22 In the sense ... in which understanding is movement, that which understands itself is said to move itself.

Aquinas, Summa Theologica, I, 18,3

23 Rest is, properly speaking, opposed to movement, and consequently to the labour that arises from movement. But although movement, strictly speaking, is a quality of bodies, yet the word is applied also to spiritual things, and in a twofold sense. On the one hand, every operation may be called a movement, and thus the Divine goodness is said to move and go forth to the thing in communicating itself to that thing.... On the other hand, the desire that tends to another, is said to move towards it. Hence rest is taken in two senses, in one sense meaning a cessation from work, in the other, the fulfilling of desire.

Aquinas, Summa Theologica, I, 73, 2

24 I myself think that gravity or heaviness is nothing except a certain natural appetency implanted in the parts by the divine providence of the universal Artisan, in order that they should unite with one another in their oneness and wholeness and come together in the form of a globe. It is believable that this affect is present in the sun, moon, and the other bright planets and that through its efficacy they remain in the spherical figure in which they are visible, though they nevertheless accomplish their circular movements in many different ways.

Copernicus, De Revolutionibus, 1,9

25 In all things except those that are simply bad, change is to be feared: change of seasons, winds, food, and humors. And no laws are held in their true honor except those to which God has given some ancient duration, so that no one knows their origin or that they were ever different.

Montaigne, Essays, 43, Of Sumptuary Laws

26 When I bethinke me on that speech where
Of Mutability, and well it may,
Me seemes. that though she all unworthy were
Of the heav'ns rule, yet, very sooth to say, In all things
else she beares the greatest sway:
Which makes me loath this state of life so tickle,
And love of things so vaine to cast away;
Whose flowing pride, so fading and so fickle,
Short Time shall soon cut down with his consuming
sickle.

Then gin I thinke on that which Nature sayd,
Of that same time when no more change shall be,
But stedfast rest of all things, firmly stayd

Upon the pillours of eternity.
That is contrayr to Mutabilitie:
For all that moveth doth in change delight:
But thence-forth all shall rest eternally
With Him that is the God of Sabbaoth hight:
O that great Sabbaoth God graunt me that Sabbaoths
sight!

Spenser, Faerie Queene, Bk. VII, VIII, 1-2

27 As regards movement: the sun is the first cause of the movement of the planets and the first mover of the universe, even by reason of its own body. In the intermediate space the movables, i.e., the globes of the planets, are laid out. The region of the fixed stars supplies the movables with a place and a base upon which the movables are, as it were, supported; and movement is understood as taking place relative to its absolute immobility. So in animals the cerebellum is the seat of the motor faculty, and the body and its members are that which is moved. The Earth is the base of an animal body; the body, the base of the arm or head, and the arm, the base of the finger. And the movement of each part takes place upon this base as upon something immovable.

Kepler, Epitome of Copernican Astronomy, Bk. IV, I, 1

28 *Ariel*. [Sings] Full fathom five thy father lies;
Of his bones are coral made;
Those are pearls that were his eyes:
Nothing of him that doth fade
But doth suffer a sea-change
Into something rich and strange.
Sea-nymphs hourly ring his knell.

Shakespeare, Tempest, I, ii, 396

29 When I have seen by Time's fell hand defaced
The rich proud cost of outworn buried age;
When sometime lofty towers I see down-razed
And brass eternal slave to mortal rage;
When I have seen the hungry ocean gain
Advantage on the kingdom of the shore,
And the firm soil win of the watery main,
Increasing store with loss and loss with store;
When I have seen such interchange of state,
Or state itself confounded to decay;
Ruin hath taught me thus to ruminare,
That Time will come and take my love away.

Shakespeare, Sonnet LXIV

30 To think the Affairs of this Life are always to remain in the same State, is an erroneous Fancy. The Face of Things rather seems continually to change and roll with a circular Motion; Summer succeeds the Spring; Autumn the Summer; Winter the Autumn; and then Spring again: So Time proceeds in this perpetual Round; only the Life of Man is ever hastening to it's End, swifter than Time it self, without Hopes to be renew'd, unless in the next, that is unlimited and infinite.

Cervantes, Don Quixote, II, 53

31 All motion or natural action takes place in time, more or less rapidly, but still in determined moments well ascertained by nature. Even those actions which appear to take effect suddenly, and in the twinkling of an eye (as we express it), are found to admit of greater or less rapidity.

Bacon, Novum Organum, II, 46

32 One which can scarcely be termed a motion, and yet is one... we may call the motion of repose, or of abhorrence of motion. It is by this motion that the earth stands by its own weight, whilst its extremes move towards the middle, not to an imaginary centre, but in order to unite. It is owing to the same tendency, that all bodies of considerable density abhor motion, and their only tendency is not to move, which nature they preserve, although excited and urged in a variety of ways to motion. But if they be compelled to move, yet do they always appear anxious to recover their former state, and to cease from motion, in which respect they certainly appear active, and attempt it with sufficient swiftness and rapidity, as if fatigued, and impatient of delay.

Bacon, Novum Organum, II, 48

33 As the births of living creatures at first are ill-shapen, so are all innovations, which are the births of time.

Bacon, Of Innovations

34 It were good... that men in their innovations would follow the example of time itself, which indeed innovateth greatly, but quietly and by degrees scarce to be perceived.

Bacon, Of Innovations

35 It is a secret, both in nature and state, that it is safer to change many things than one.

Bacon, Of Regiment of Health

36 The variation of speed observed in bodies of different specific gravities is not caused by the difference of specific gravity but depends upon external circumstances and, in particular, upon the resistance of the medium, so that if this is removed all bodies would fall with the same velocity.

Galileo, Two New Sciences, I

37 There is, in nature, perhaps nothing older than motion, concerning which the books written by philosophers are neither few nor small; nevertheless, I have discovered by experiment some properties of it which are worth knowing and which have not hitherto been either observed or demonstrated. Some superficial observations have been made, as, for instance, that the free motion of a heavy falling body is continuously accelerated; but to just what extent this acceleration occurs has not yet been announced; for so far as I know, no one has yet pointed out that the distances traversed, during equal intervals of time, by a body falling from rest, stand to one another in the same ratio as the odd numbers beginning with unity.

It has been observed that missiles and projectiles describe a curved path of some sort; however, no one has pointed out the fact that this path is a parabola. But this and other facts, not few in number or less worth knowing, I have succeeded in proving; and what I consider more important, there have been opened up to this vast and most excellent science, of which my work is merely the beginning, ways and means by which other minds more acute than mine will explore its remote corners.

Galileo, Two New Sciences, III

38 Any velocity once imparted to a moving body will be rigidly maintained as long as the external causes of acceleration or retardation are removed, a condition which is found only on horizontal planes; for in the case of planes which slope downwards there is already present a cause of acceleration, while on planes sloping upward there is retardation; from this it follows that motion along a horizontal plane is perpetual; for, if the velocity be uniform, it cannot be diminished or slackened, much less destroyed.

Galileo, Two New Sciences, III

39 That when a thing lies still, unless somewhat else stir it, it will lie still for ever, is a truth that no man doubts of. But that when a thing is in motion, it will eternally be in motion, unless somewhat else stay it, though the reason be the same (namely, that nothing can change itself), is not so easily assented to.

Hobbes, Leviathan, I, 2

40 He no longer loves the person whom he loved ten years ago. I quite believe it. She is no longer the same, nor is he. He was young, and she also; she is quite different. He would perhaps love her yet, if she were what she was then.

Pascal, Pensées, 11, 123

41 Geometry supposes... that we know what thing is meant by the words: *motion, number, space*; and without stopping uselessly to define them it penetrates their nature and lays bare their marvelous properties.

These three things, which comprise the entire universe... are reciprocally and necessarily related. For we cannot imagine a motion without something which moves, and this thing being one that unity is the origin of all number. Finally, since motion is impossible without space, we see that these three things are contained in the first. Even time is included there too, for motion and time are correlative (fast and slow, which differentiate motion, having a necessary reference to time).

Pascal, Geometrical Demonstration

- 42 However fast a motion may be, we can conceive a faster, and make that still faster, and thus forever to infinity without ever reaching a motion so fast that we can no longer add to it. And on the contrary, however slow a motion may be, we can make it slower, and that still slower, and so to infinity without ever reaching such a degree of slowness that we cannot still descend to an infinity of lower degrees without falling into rest.

Pascal, Geometrical Demonstration

- 43 If two contrary actions be excited in the same subject, a change must necessarily take place in both, or in one alone, until they cease to be contrary.

Spinoza, Ethics, V, Axiom 1

- 44 It is inconceivable to doubt that light consists in the motion of some sort of matter. For whether one considers its production, one sees that here upon the earth it is chiefly engendered by fire and flame which contain without doubt bodies that are in rapid motion, since they dissolve and melt many other bodies, even the most

solid; or whether one considers its effects, one sees that when light is collected, as by concave mirrors, it has the property of burning as a fire does, that is to say, it disunites the particles of bodies. This is assuredly the mark of motion, at least in the true philosophy, in which one conceives the causes of all natural effects in terms of mechanical motions. This, in my opinion, we must necessarily do, or else renounce all hopes of ever comprehending anything in physics.

Huygens, Treatise on Light, I

- 45 The *vis insita*, or innate force of matter, is a power of resisting, by which every body, as much as in it lies, continues in its present state, whether it be of rest, or of moving uniformly forwards in a right line. This force is always proportional to the body whose force it is and differs nothing from the inactivity of the mass, but in our manner of conceiving it. A body, from the inert nature of matter, is not without difficulty put out of its state of rest or motion. Upon which account, this *vis insita* may, by a most significant name, be called inertia or force of inactivity. But a body only exerts this force when another force, impressed upon it, endeavors to change its condition; and the exercise of this force may be considered as both resistance and impulse; it is resistance so far as the body, for maintaining its present state, opposes the force impressed; it is impulse so far as the body, by not easily giving way to the impressed force of another, endeavors to change the state of that other. Resistance is usually ascribed to bodies at rest, and impulse to those in motion; but motion and rest, as commonly conceived, are only relatively distinguished;

nor are those bodies always truly at rest, which commonly are taken to be so.

Newton, Principia, Definition III

46 Absolute motion is the translation of a body from one absolute place into another; and relative motion, the translation from one relative place into another. Thus in a ship under sail, the relative place of a body is that part of the ship which the body possesses; or that part of the cavity which the body fills, and which therefore moves together with the ship: and relative rest is the continuance of the body in the same part of the ship, or of its cavity. But real, absolute rest, is the continuance of the body in the same part of that immovable space, in which the ship itself, its cavity, and all that it contains, is moved. Wherefore, if the earth is really at rest, the body, which relatively rests in the ship, will really and absolutely move with the same velocity which the ship has on the earth. But if the earth also moves, the true and absolute motion of the body will arise, partly from the true motion of the earth, in immovable space, partly from the relative motion of the ship on the earth; and if the body moves also relatively in the ship, its true motion will arise, partly from the true motion of the earth, in immovable space, and partly from the relative motions as well of the ship on the earth, as of the body in the ship; and from these relative motions will arise the relative motion of the body on the earth. As if that part of the earth, where the ship is, was truly moved towards the east, with a velocity of 10,010 parts; while the ship itself, with a fresh gale, and full sails, is carried towards the west, with a velocity expressed by 10 of those parts; but a sailor walks in the ship towards the east, with 1 part of

the said velocity; then the sailor will be moved truly in immovable space towards the east, with a velocity of 10,001 parts, and relatively on the earth towards the west, with a velocity of 9 of those parts.

Newton. Principia, Definitions, Scholium

47 Every body continues in its state of rest, or of uniform motion in a right line, unless it is compelled to change that state by forces impressed upon it. Projectiles continue in their motions, so far as they are not retarded by the resistance of the air, or impelled downwards by the force of gravity. A top, whose parts by their cohesion are continually drawn aside from rectilinear motions, does not cease its rotation, otherwise than as it is retarded by the air. The greater bodies of the planets and comets, meeting with less resistance in freer spaces, preserve their motions both progressive and circular for a much longer time.

The change of motion is proportional to the motive force impressed; and is made in the direction of the right line in which that force is impressed. If any force generates a motion, a double force will generate double the motion, a triple force triple the motion, whether that force be impressed altogether and at once, or gradually and successively. And this motion (being always directed the same way with the generating force), if the body moved before, is added to or subtracted from the former motion, according as they directly conspire with or are directly contrary to each other; or obliquely joined, when they are oblique, so as to produce a new motion compounded from the determination of both.

To every action there is always opposed an equal reaction: or, the mutual actions of two bodies upon each

other are always equal, and directed to contrary parts. Whatever draws or presses another is as much drawn or pressed by that other. If you press a stone with your finger, the finger is also pressed by the stone. If a horse draws a stone tied to a rope, the horse (if I may so say) will be equally drawn back towards the stone; for the distended rope, by the same endeavor to relax or unbend itself, will draw the horse as much towards the stone as it does the stone towards the horse, and will obstruct the progress of the one as much as it advances that of the other. If a body impinge upon another, and by its force change the motion of the other, that body also (because of the equality of the mutual pressure) will undergo an equal change, in its own motion, towards the contrary part. The changes made by these actions are equal, not in the velocities but in the motions of bodies; that is to say, if the bodies are not hindered by any other impediments. For, because the motions are equally changed, the changes of the velocities made towards contrary parts are inversely proportional to the bodies. This law takes place also in attractions, as will be proved in the next Scholium.

Newton, Principia, Axioms I-III

- 48 If spheres be however dissimilar (as to density of matter and attractive force) in the same ratio onwards from the centre to the circumference; but everywhere similar, at every given distance from the centre, on all sides round about; and the attractive force of every point decreases as the square of the distance of the body attracted: I say, that the whole force with which one of these spheres attracts the other will be inversely proportional to the square of the distance of the centres.

Newton, Principia, I, 12

49 If it universally appears, by experiments and astronomical observations, that all bodies about the earth gravitate towards the earth, and that in proportion to the quantity of matter which they severally contain; that the moon likewise, according to the quantity of its matter, gravitates towards the earth; that, on the other hand, our sea gravitates towards the moon; and all the planets one towards another; and the comets in like manner towards the sun; we must, in consequence of this rule, universally allow that all bodies whatsoever are endowed with a principle of mutual gravitation. For the argument from the appearances concludes with more force for the universal gravitation of all bodies than for their impenetrability; of which, among those in the celestial regions, we have no experiments, nor any manner of observation. Not that I affirm gravity to be essential to bodies: by their *vis insita* I mean nothing but their inertia. This is immutable. Their gravity is diminished as they recede from the earth.

Newton, Principia, III, Rule III

50 There is... {an] idea, which, though suggested by our senses, yet is more constantly offered to us by what passes in our minds; and that is the idea of *succession*. For if we look immediately into ourselves, and reflect on what is observable there, we shall find our ideas always, whilst we are awake, or have any thought, passing in train, one going and another coming, without intermission.

Locke, Concerning Human Understanding, Bk. II, VII, 9

51 Modes of motion answer those of extension; swift and slow are two different ideas of motion, the measures whereof are made of the distances of time and space put together; so they are complex ideas, comprehending time and space with motion.

Locke, Concerning Human Understanding, Bk. II, XVIII, 2

52 We have ideas but of two sorts of action, viz. motion and thinking. These, in truth, though called and counted actions, yet, if nearly considered, will not be found to be always perfectly so. For, if I mistake not, there are instances of both kinds, which, upon due consideration, will be found rather passions than actions; and consequently so far the effects barely of *passive powers* in those subjects, which yet on their accounts are thought agents. For, in these instances, the substance that hath motion or thought receives the impression, whereby it is put into that action, purely from without, and so acts merely by the capacity it has to receive such an impression from some external agent; and such power is not properly an active power, but a mere passive capacity in the subject. Sometimes the substance or agent puts itself into action by its own power, and this is properly *active power*. Whatsoever modification a substance has, whereby it produces any effect, that is called action: v.g. a solid substance, by motion, operates on or alters the sensible ideas of another substance, and therefore this modification of motion we call action. But yet this motion in that solid substance is, when rightly considered, but a passion, if it received it only from some external agent. So that the active power of motion is in no substance which cannot begin motion in itself or in another substance when at rest.

53 It does not appear to me that there can be any motion other than *relative*; so that to conceive motion there must be at least conceived two bodies, whereof the distance or position in regard to each other is varied. Hence, if there was one only body in being it could not possibly be moved. This seems evident, in that the idea I have of motion doth necessarily include relation.

But, though in every motion it be necessary to conceive more bodies than one, yet it may be that one only is moved, namely, that on which the force causing the change in the distance or situation of the bodies, is impressed. For, however some may define relative motion, so as to term that body *moved* which changes its distance from some other body, whether the force or action causing that change were impressed on it or no, yet as relative motion is that which is perceived by sense, and regarded in the ordinary affairs of life, it should seem that every man of common sense knows what it is as well as the best philosopher. Now, I ask any one whether, in his sense of motion as he walks along the streets, the stones he passes over may be said to *move*, because they change distance with his feet? To me it appears that though motion includes a relation of one thing to another, yet it is not necessary that each term of the relation be denominated from it. As a man may think of somewhat which does not think, so a body may be moved to or from another body which is not therefore itself in motion.

As the place happens to be variously defined, the motion which is related to it varies. A man in a ship may be said to be quiescent with relation to the sides of the

vessel, and yet move with relation to the land. Or he may move eastward in respect of the one, and westward in respect of the other. In the common affairs of life men never go beyond the earth to define the place of any body; and what is quiescent in respect of that is accounted *absolutely* to be so. But philosophers, who have a greater extent of thought, and juster notions of the system of things, discover even the earth itself to be moved. In order therefore to fix their notions they seem to conceive the corporeal world as finite, and the utmost unmoved walls or shell thereof to be the place whereby they estimate true motions. If we sound our own conceptions, I believe we may find all the absolute motion we can frame an idea of to be at bottom no other than relative motion thus defined. For, as hath been already observed, absolute motion, exclusive of all external relation, is incomprehensible; and to this kind of relative motion all the above-mentioned properties, causes, and effects ascribed to absolute motion will, if I mistake not, be found to agree.

Berkeley, Principles of Human Knowledge, 112-114

54 Be not the first by whom the new are tried,
Nor yet the last to lay the old aside.

Pope, Essay on Criticism, II, 335

55 The more communicative a people are, the more easily they change their habits, because each is in a greater degree a spectacle to the other and the singularities of individuals are better observed. The climate which influences one nation to take pleasure in being

communicative, makes it also delight in change, and that which makes it delight in change forms its taste.

Montesquieu, Spirit of Laws, XIX, 8

56 To begin with the examination of motion; 'tis evident this is a quality altogether inconceivable alone, and without a reference to some other object. The idea of motion necessarily supposes that of a body moving. Now what is our idea of the moving body, without which motion is incomprehensible? It must resolve itself into the idea of extension or of solidity; and consequently the reality of motion depends upon that of these other qualities.

Hume, Treatise of Human Nature, Bk. I, IV, 4

57 A man used to vicissitudes is not easily dejected.

Johnson, Rasselas, XII

58 Such, said Nekayah, is the state of life, that none are happy but by the anticipation of change: the change itself is nothing; when we have made it, the next wish is to change again.

Johnson, Rasselas, XLVII

59 *Johnson*. When I was a young man, being anxious to distinguish myself, I was perpetually starting new propositions. But I soon gave this over; for, I found that generally what was new was false.

Boswell, Life of Johnson (Mar. 26, 1779)

60 The permanent in phenomena must be regarded as the substratum of all determination of time, and consequently also as the condition of the possibility of all

synthetical unity of perceptions, that is, of experience; and all existence and all change in time can only be regarded as a mode in the existence of that which abides unchangeably. Therefore, in all phenomena, the permanent is the object *in itself*, that is, the substance; but all that changes or can change belongs only to the mode of the existence of this substance or substances, consequently to its determinations.

I find that in all ages not only the philosopher, but even the common understanding, has preposited this permanence as a substratum of all change in phenomena; indeed, I am compelled to believe that they will always accept this as an indubitable fact. Only the philosopher expresses himself in a more precise and definite manner, when he says: "In all changes in the world, the *substance* remains, and the *accidents* alone are changeable." But of this decidedly synthetical proposition, I nowhere meet with even an attempt at proof; nay, it very rarely has the good fortune to stand, as it deserves to do, at the head of the pure and entirely *a priori* laws of nature. In truth, the statement that substance is permanent, is tautological. For this very permanence is The ground on which we apply the category of substance to the phenomenon; and we should have been obliged to prove that in all phenomena there is something permanent, of the existence of which the changeable is nothing but a determination. But because a proof of this nature cannot be dogmatical, that is cannot be drawn from conceptions, inasmuch as it concerns a synthetical proposition *a priori*, and as philosophers never reflected that such propositions are valid only in relation to possible experience, and therefore cannot be proved except by means of a

deduction of the possibility of experience, it is no wonder that while it has served as the foundation of all experience (for we feel the need of it in empirical cognition), it has never been supported by proof.

Kant, Critique of Pure Reason, Transcendental Analytic

61 In order to represent change as the intuition corresponding to the conception of causality, we require the representation of motion as change in space; in fact, it is through it alone that changes, the possibility of which no pure understanding can perceive, are capable of being intuited. Change is the connection of determinations contradictorily opposed to each other in the existence of one and the same thing. Now, how it is possible that out of a given state one quite opposite to it in the same thing should follow, reason without an example can not only not conceive, but cannot even make intelligible without intuition; and this intuition is the motion of a point in space; the existence of which in different spaces (as a consequence of opposite determinations) alone makes the intuition of change possible. For, in order to make even internal change cognitable, we require to represent time, as the form of the internal sense, figuratively by a line, and the internal change by the drawing of that line (motion), and consequently are obliged to employ external intuition to be able to represent the successive existence of ourselves in different states. The proper ground of this fact is that all change to be perceived as change presupposes something permanent in intuition, while in the internal sense no permanent intuition is to be found.

Kant, Critique of Pure Reason, Transcendental Analytic

62 The changes that take place in nature—how infinitely manifold soever they may be—exhibit only a perpetually self-repeating cycle; in nature there happens "nothing new under the sun," and the multiform play of its phenomena so far induces a feeling of *ennui*; only in those changes which take place in the region of spirit does anything new arise.

Hegel, Philosophy of History, Introduction, 3

63 Let the great world spin for ever down the ringing grooves of change.

Tennyson, Locksley Hall, 182

64 *Arthur*. The old order changeth, yielding place to new.
And God fulfils himself in many ways,
Lest one good custom should corrupt the world.

Tennyson, The Passing of Arthur, 408

65 All change is a miracle to contemplate; but it is a miracle which is taking place every instant.

Thoreau, Walden: Economy

66 Suppose we were able, within the length of a second, to note 10,000 events distinctly, instead of barely 10, as now; if our life were then destined to hold the same number of impressions, it might be 1000 times as short. We should live less than a month, and personally know nothing of the change of seasons. If born in winter, we should believe in summer as we now believe in the heats of the Carboniferous era. The motions of organic beings would be so slow to our senses as to be inferred, not seen. The sun would stand still in the sky, the moon be almost

free from change, and so on. But now reverse the hypothesis and suppose a being to get only one 1000th part of the sensations that we get in a given time, and consequently to live 1000 times as long. Winters and summers be to him like quarters of an hour. Mushrooms and the swifter-growing plants will shoot into being so rapidly as to appear instantaneous creations; annual shrubs will rise and fall from the earth like restlessly boiling-water springs; the motions of animals will be as invisible as are to us the movements of bullets and cannon-balls; the sun will scour through the sky like a meteor, leaving a fiery trail behind him, etc. That such imaginary cases (barring the superhuman longevity) may be realized somewhere in the animal kingdom it would be rash to deny.

William James, Psychology, XV

67 Newton in his description of space and time has confused what is 'real' potentiality with what is actual fact. He has thereby been led to diverge from the judgment of 'the vulgar' who 'conceive those quantities under no other notions but from the relation they bear to sensible objects.' The philosophy of organism starts by agreeing with 'the vulgar' except that the term 'sensible object' is replaced by 'actual entity'; so as to free our notions from participation in an epistemological theory as to sense-perception. When we further consider how to adjust Newton's other descriptions to the organic theory, the surprising fact emerges that we must identify the atomized quantum of extension correlative to an actual entity, with Newton's absolute place and absolute duration. Newton's proof that motion does not apply to absolute place, which in its nature is immovable, also

holds. Thus an actual entity never moves: it is where it is and what it is. In order to emphasize this characteristic by a phrase connecting the notion of 'actual entity' more closely with our ordinary habits of thought, I will also use the term 'actual occasion' in the place of the term 'actual entity.' Thus the actual world is built up of actual occasions; and by the ontological principle whatever things there are in any sense of 'existence,' are derived by abstraction from actual occasions. I shall use the term 'event' in the more general sense of a nexus of actual occasions, interrelated in some determinate fashion in one extensive quantum. An actual occasion is the limiting type of an event with only one member.

It is quite obvious that meanings have to be found for the notions of 'motion' and of 'moving bodies'.... It is sufficient to say that a molecule in the sense of a moving body, with a history of local change, is not an actual occasion; it must therefore be some kind of nexus of actual occasions. In this sense it is an event, but not an actual occasion. The fundamental meaning of the notion of 'change' is 'the difference between actual occasions comprised in some determinate event.'

Whitehead, Process and Reality, 11, 2

68 This subject of the formation of the three laws of motion and of the law of gravitation deserves critical attention. The whole development of thought occupied exactly two generations. It commenced with Galileo and ended with Newton's *Principia*; and Newton was born in the year that Galileo died. Also the lives of Descartes and Huygens fall within the period occupied by these great terminal figures. The issue of the combined labours of these four men has some right to be considered as the greatest

single intellectual success which mankind has achieved. In estimating its size, we must consider the completeness of its range. It constructs for us a vision of the material universe, and it enables us to calculate the minutest detail of a particular occurrence. Galileo took the first step in hitting on the right line of thought. He noted that the critical point to attend to was not the motion of bodies but the changes of their motions. Galileo's discovery is formularised by Newton in his first law of motion:—'Every body continues in its state of rest, or of uniform motion in a straight line, except so far as it may be compelled by force to change that state.'

This formula contains the repudiation of a belief which had blocked the progress of physics for two thousand years.

Whitehead, Science and the Modern World, III

69 Perhaps the most powerful solvent of the pre-scientific outlook has been the first law of motion, which the world owes to Galileo, though to some extent he was anticipated by Leonardo da Vinci.

The first law of motion says that a body which is moving will go on moving in the same direction with the same velocity until something stops it. Before Galileo it had been thought that a lifeless body will not move of itself, and if it is in motion it will gradually come to rest. Only living beings, it was thought, could move without help of some external agency. Aristotle thought that the heavenly bodies were pushed by gods. Here on earth, animals can set themselves in motion and can cause motion in dead matter. There are, it was conceded, certain kinds of motion which are "natural" to dead matter: earth and water naturally move downwards, air

and fire upwards; but beyond these simple “natural” motions everything depends upon impulsion from the souls of living beings.

So long as this view prevailed, physics as an independent science was impossible, since the physical world was thought to be not causally self-contained. But Galileo and Newton between them proved that all the movements of the planets, and of dead matter on the earth, proceed according to the laws of physics, and once started, will continue indefinitely. There is no need of mind in this process. Newton still thought that a Creator was necessary to get the process going, but that after that He left it to work according to its own laws.

Russell, Science and Tradition

70 Motion consists merely in the fact that bodies are sometimes in one place and sometimes in another, and that they are at intermediate places at intermediate times. Only those who have waded through the quagmire of philosophic speculation on this subject can realize what a liberation from antique prejudices is involved in this simple and straightforward commonplace.

Russell, Mathematics and the Metaphysicians

71 With slight exaggeration, it may be said that the thoroughgoing way in which Aristotle defined, distinguished and classified rest and movement, the finished and the incomplete, the actual and potential, did more to fix tradition, the genteel tradition one is tempted to add, which identifies the fixed and regular with reality of Being and the changing and hazardous with deficiency

of Being than ever was accomplished by those who took the shorter path of asserting that change is illusory.

Dewey, Experience and Nature, II

72 I believe that if one were convinced of the reality of change and if one made an effort to grasp it, everything would become simplified, philosophical difficulties, considered insurmountable, would fall away. Not only would philosophy gain by it, but our everyday life—I mean the impression things make upon us and the reaction of our intelligence, our sensibility and our will upon things— would perhaps be transformed and, as it were, transfigured. The point is that usually we look at change but we do not see it. We speak of change, but we do not think about it. We say that change exists, that everything changes, that change is the very law of things: yes, we say it and we repeat it; but those are only words, and we reason and philosophise as though change did not exist.

Bergson, The Creative Mind, V

73 Only haste and lack of circumspection in conceiving what spirit is and how it moves could assign to it the origin of change. On the contrary, while spirit is extraordinarily mobile in its existence, it borrows this mobility from the hair-trigger organisation and unstable equilibrium of its organs, and of the stimulations which excite them incessantly. In its own nature, spirit arrests the flux of things, as best it may, in its intuitions, and turns it into a store of synthetic pictures and symbols, sensuous and intellectual. We may therefore say with more reason that the world imposes movement on a spirit which by its own

genius would rather be addressed to the eternal, than say that reality seems successive only to a flighty spirit, turning distractedly the leaves of a book written in eternity. Matter, not spirit, is the seat and principle of the flux. Spirit, being an emanation of this flux, seems indeed a pilgrim wandering and almost lost in the wilderness of essence and in the dark treasure-house of truth; but in respect to the realm of matter, spirit is like a child asking questions and making pause, and often brutally run over and crushed by a rush of changes which it cannot understand.

Santayana, Realm of Matter, V

74 If it is true that we cannot bathe twice in the same river, because the water has flowed on, it is true also that the same water which was formerly here is now farther down; so that we might bathe in it again if only we ran down the bank with greater celerity than the water. But our second plunge, though into the same water, would be at another point in the stream: and it is this combination of continuity with instability that we indicate when we speak of a river or a flux. The dialectic of continuity—whether it may be analysed into an infinite number of discrete points or into an indefinite number of intervals—was probably not considered by nature before she began to exist: there is therefore no need to consider it in describing existence.

Santayana, Realm of Matter, V

19.6 Space

Philosophers, physicists, and geometers are all interested in space, but from somewhat different points of view. The mathematical treatment of space is too technical to be more than briefly indicated here in a few passages that talk of points and lines. The treatment of space by the mathematical physicist is, for the same reason, also touched on lightly—in a passage from Newton on the distinction between absolute and relative space (a distinction challenged by Berkeley), and in a passage from Einstein on the absolute four-dimensional, space-time matrix. The major portion of the quotations reflect the controversial questions about space that have occupied the philosophers.

One of these is the question about the infinite extent of space—whether space has an edge or boundary. Another is the question about the infinite divisibility of space—whether between any two points in space chosen at random there is always an infinite number of intermediate points. Still another is the question about the void—about the existence in nature of totally empty space, space devoid of matter. This must not be confused with the question of whether or not a vacuum can be produced by human contrivance. If empty space or void does exist in nature, then a question is raised about action at a distance; if it does not, then a question is raised concerning the possibility of motion.

Among the philosophers, two introduce variants on the idea of space. Aristotle discusses place as the envelope that contains a body, in contradistinction to the space through which a body moves from place to place. Descartes discusses extension as the property distinctive of matter, just as, in his view, thought is the property distinctive of mind. Kant, William James, and Russell discuss the perception of space and disagree about whether it is

developed from experience or is an *a priori* form of intuition constitutive of our experience.

■ ■ ■

- 1 *Timaeus*. This new beginning of our discussion of the universe requires a fuller division than the former; for then we made two classes, now a third must be revealed. The two sufficed for the former discussion: one, which we assumed, was a pattern intelligible and always the same; and the second was only the imitation of the pattern, generated and visible. There is also a third kind which we did not distinguish at the time, conceiving that the two would be enough. But now the argument seems to require that we should set forth in words another kind, which is difficult of explanation and dimly seen. What nature are we to attribute to this new kind of being? We reply, that it is the receptacle, and in a manner the nurse, of all generation.

Plato, Timaeus, 48B

- 2 We must acknowledge that there is one kind of being which is always the same, uncreated and indestructible, never receiving anything into itself from without, nor itself going out to any other, but invisible and imperceptible by any sense, and of which the contemplation is granted to intelligence only. And there is another nature of the same name with it, and like to it, perceived by sense, created, always in motion, becoming in place and again vanishing out of place, which is apprehended by opinion and sense. And there is a third

nature, which is space, and is eternal, and admits not of destruction and provides a home for all created things, and is apprehended without the help of sense, by a kind of spurious reason, and is hardly real; which we beholding as in a dream, say of all existence that it must of necessity be in some place and occupy a space, but that what is neither in heaven nor in earth has no existence. Of these and other things of the same kind, relating to the true and waking reality of nature, we have only this dreamlike sense, and we are unable to cast off sleep and determine the truth about them. For an image, since the reality, after which it is modelled, does not belong to it, and it exists ever as the fleeting shadow of some other, must be inferred to be in another [i.e. in space], grasping existence in some way or other, or it could not be at all. But true and exact reason, vindicating the nature of true being, maintains that while two things [i.e. the image and space] are different they cannot exist one of them in the other and so be one and also two at the same time.

Thus have I concisely given the result of my thoughts; and my verdict is that being and space and generation, these three, existed in their three ways before the heaven.

Plato, Timaeus, 51B

- 3 If place is what *primarily* contains each body, it would be a limit, so that the place would be the form or shape of each body by which the magnitude or the matter of the magnitude is defined: for this is the limit of each body.

If, then, we look at the question in this way the place of a thing is its form. But, if we regard the place as the *extension* of the magnitude, it is the matter. For this is

different from the magnitude: it is what is contained and defined by the form, as by a bounding plane. Matter or the indeterminate is of this nature; when the boundary and attributes of a sphere are taken away, nothing but the matter is left.

This is why Plato in the *Timaeus* says that matter and space are the same; for the 'participant' and space are identical. (It is true, indeed, that the account he gives there of the 'participant' is different from what he says in his so-called 'unwritten teaching'. Nevertheless, he did identify place and space.) I mention Plato because, while all hold place to be something, he alone tried to say what it is.

In view of these facts we should naturally expect to find difficulty in determining what place is, if indeed it *is* one of these two things, matter or form. They demand a very close scrutiny, especially as it is not easy to recognize them apart.

But it is at any rate not difficult to see that place cannot be either of them. The form and the matter are not separate from the thing, whereas the place can be separated.... Where air was, water in turn comes to be, the one replacing the other; and similarly with other bodies. Hence the place of a thing is neither a part nor a state of it, but is separable from it. For place is supposed to be something like a vessel—the vessel being a transportable place. But the vessel is no part of the thing.

Aristotle, Physics, 209b1

- 4 Place is thought to be something important and hard to grasp, both because the matter and the shape present themselves along with it, and because the displacement of the body that is moved takes place in a stationary

container, for it seems possible that there should be an interval which is other than the bodies which are moved. The air, too, which is thought to be incorporeal, contributes something to the belief: it is not only the boundaries of the vessel which seem to be place, but also what is between them, regarded as empty. Just, in fact, as the vessel is transportable place, so place is a non-portable vessel. So when what is within a thing which is moved, is moved and changes its place, as a boat on a river, what contains plays the part of a vessel rather than that of place. Place on the other hand is rather what is motionless: so it is rather the whole river that is place, because as a whole it is motionless.

Hence we conclude that *the innermost motionless boundary of what contains is place.*

Aristotle, Physics, 212a8

- 5 Let us explain...that there is no void existing separately, as some maintain. If each of the simple bodies has a natural locomotion, e.g. fire upward and earth downward and towards the middle of the universe, it is clear that it cannot be the void that is the condition of locomotion. What, then, will the void be the condition of? It is thought to be the condition of movement in respect of place, and it is not the condition of this.

Again, if void is a sort of place deprived of body, when there is a void where will a body placed in it move to? It certainly cannot move into the whole of the void. The same argument applies as against those who think that place is something separate, into which things are carried; viz. how will what is placed in it move, or rest? Much the same argument will apply to the void as to the

'up' and 'down' in place, as is natural enough since those who maintain the existence of the void make it a place.

And in what way will things be present either in place or in the void? For the expected result does not take place when a body is placed as a whole in a place conceived of as separate and permanent; for a part of it, unless it be placed apart, will not be in a place but in the whole. Further, if separate place does not exist, neither will void.

If people say that the void must exist, as being necessary if there is to be movement, what rather turns out to be the case, if one studies the matter, is the opposite, that not a single thing can be moved if there is a void; for as with those who for a like reason say the earth is at rest, so, too, in the void things must be at rest; for there is no place to which things can move more or less than to another; since the void in so far as it is void admits no difference.

Aristotle, Physics, 214b12

- 6 All things are not on all sides jammed together and kept in by body; there is also void in things. To have learned this will be good for you on many accounts; it will not suffer you to wander in doubt and be to seek in the sum of things and distrustful of our words. If there were not void, things could not move at all; for that which is the property of body, to let and hinder, would be present to all things at all times; nothing therefore could go on, since no other thing would be the first to give way.

Lucretius, Nature of Things, I

7 If room and space which we call void did not exist, bodies could not be placed anywhere nor move about at all to any side; as we have demonstrated to you a little before. Moreover there is nothing which you can affirm to be at once separate from all body and quite distinct from void, which would so to say count as the discovery of a third nature.

Lucretius, Nature of Things, I

8 If all the space of the whole sum were enclosed within fixed borders and were bounded, in that case the store of matter by its solid weights would have streamed together from all sides to the lowest point nor could anything have gone on under the canopy of heaven, no nor would there have been a heaven nor sunlight at all, inasmuch as all matter settling down through infinite time past, would lie together in a heap. But as it is, sure enough no rest is given to the bodies of the first-beginnings, because there is no lowest point at all, to which they might stream together as it were, and where they might take up their positions. All things are ever going on in ceaseless motion on all sides and bodies of matter stirred to action are supplied from beneath out of infinite space. Therefore the nature of room and the space of the unfathomable void are such as bright thunderbolts cannot race through in their course though gliding on through endless tract of time, no nor lessen one jot the journey that remains to go by all their travel: so huge a room is spread out on all sides for things without any bounds in all directions round.

Lucretius, Nature of Things, I

9 Space being infinite, matter. . . must also be infinite, lest after the winged fashion of flames the walls of the world should suddenly break up and fly abroad along the mighty void, and all other things follow for like reasons and the innermost quarters of heaven tumble in from above and the earth in an instant withdraw from beneath our feet and amid the commingled ruins of things in it and of heaven, ruins unloosing the first bodies, should wholly pass away along the unfathomable void, so that in a moment of time not a wrack should be left behind, nothing save untenanted space and viewless first-beginnings. For on whatever side you shall first determine first bodies to be wanting, this side will be the gate of death for things, through this the whole crowd of matter will fling itself abroad.

Lucretius, Nature of Things, I

10 The first dimension is called "line," for "line" is that which is extended in one direction. Two dimensions are called "surface," for a "surface" is that which is extended in two directions. Three dimensions are called "solid," for a "solid" is that which is extended in three directions, and it is by no means possible to conceive of a solid which has more than three dimensions, depth, breadth, and length. By these are defined the six directions which are said to exist in connection with every body and by which motions in space are distinguished, forward, backward, up, down, right and left; for of necessity two directions opposite to each other follow upon each dimension, up and down upon one, forward and backward upon the second, and right and left upon the third.

Nicomachus, Arithmetic, II, 6

- 11 The notion of a vacuum not only implies that in which nothing is, but also requires a space capable of holding a body and in which there is not a body. . . . We hold however that before the world was there was no place or space.

Aquinas, Summa Theologica, I, 46, 1

- 12 Between every two points there are infinite intermediate points, since "no two points follow one another without a middle".... And the same must of necessity be said of divisible places, and this is shown from the continuous motion of a body. For a body is not moved from place to place except in time. But in the whole time which measures the motion of a body, there are not two *nows* in which the body moved is not in one place and in another; for if it were in one and the same place in two *nows*, it would follow that it would be at rest there, since to be at rest is nothing else than to be in the same place now and previously. Therefore, since there are infinite *nows* between the first and the last *now* of the time which measures the motion, there must be infinite places between the first from which the motion begins, and the last where the motion ceases.

Aquinas, Summa Theologica, I, 53, 2

- 13 A body is not related to place except through the medium of its proper dimensions, in respect of which a located body is confined through contact with the locating body. Hence it is not possible for a body to occupy a place smaller than its quantity, unless its proper quantity be made in some way less than itself.

Aquinas, Summa Theologica, III Suppl., 83, 5

- 14 Local movement changes nothing that is intrinsic to a thing, but only that which is without, namely place. Hence that which is moved locally is perfect as to those things which are within, although it has an imperfection as to place, because while it is in one place it is in potency with regard to another place, since it cannot be in several places at the same time.

Aquinas, Summa Theologica, III Suppl., 84, 2

- 15 We cannot with certainty determine whether there be a vacuum, either extensive or intermixed with matter. Of one thing, however, we are satisfied, that the reason assigned by Leucippus and Democritus for the introduction of a vacuum (namely, that the same bodies could not otherwise comprehend, and fill greater and less spaces) is false. For there is clearly a folding of matter, by which it wraps and unwraps itself in space within certain limits, without the intervention of a vacuum. Nor is there two thousand times more of vacuum in air than in gold, as there should be on this hypothesis.

Bacon, Novum Organum, II, 48

- 16 By extension we understand whatever has length, breadth, and depth, not inquiring whether it be a real body or merely space; nor does it appear to require further explanation, since there is nothing more easily perceived by our imagination.... Hence we announce that by extension we do not here mean anything distinct and separate from the extended object itself; and we make it a rule not to recognize those metaphysical entities which really cannot be presented to the imagination. For even though someone could persuade himself, for example,

that supposing every extended object in the universe were annihilated, that would not prevent extension in itself alone existing, this conception of his would not involve the use of any corporeal image, but would be based on a false judgment of the intellect working by itself.

Descartes, Rules for Direction of the Mind, XIV

- 17 Although there are spaces in which I find nothing which excites my senses, I must not from that conclude that these spaces contain no body.

Descartes, Meditations on First Philosophy, VI

- 18 My conception of the superficies by which I believe our senses are affected, is not different from that employed (or which ought to be employed) by all mathematicians and philosophers; they distinguish it from body and assume it to be wholly devoid of depth. But the term superficies is taken in two ways by mathematicians: viz. in the sense of a body, to the length and breadth of which they attend and which is viewed altogether apart from its depth, although depth be not denied of it; or only as a mode of body, when straightway all depth is denied of it. Consequently for the sake of avoiding ambiguity I said that I spoke of that superficies which, being only a mode, can be no part of body; for a body is a substance, and a mode cannot be a part of substance. Yet I did not deny that it was the extremity of a body; nay, on the contrary, I said that it could with the greatest propriety be called the extremity of the contained body as much as of the containing, in the sense in which one says that bodies are contiguous when their extremities are together. For

certainly when two bodies touch each other, the extremity of each is one and the same, and this is part of neither but the same mode of both, and can even remain although these bodies are removed, provided only that others of accurately the same size and figure succeed to their place. Nay that space which the Aristotelians call the superficies of the surrounding body can be understood to be no other superficies than that which is no substance but a mode. For neither is the place of a town changed, although the surrounding air be changed or some other substance be substituted for it, nor consequently does the superficies which is here taken for a place form any part of the surrounding air or of the town.

Descartes, Objections and Replies, VI

- 19 No man... can conceive anything, but he must conceive it in some place; and endued with some determinate magnitude; and which may be divided into parts; nor that anything is all in this place, and all in another place at the same time; nor that two or more things can be in one and the same place at once: for none of these things ever have or can be incident to sense, but are absurd speeches.

Hobbes, Leviathan, I, 3

- 20 The world (I mean not the earth only, that denominates the lovers of it "worldly men," but the *universe*, that is, the whole mass of all things that are) is corporeal, that is to say, body; and hath the dimensions of magnitude, namely, length, breadth, and depth: also every part of body is likewise body, and hath the like dimensions; and

consequently every part of the universe is body, and that which is not body is no part of the universe: and because the universe is all, that which is no part of it is nothing, and consequently nowhere.

Hobbes, Leviathan, IV, 46

21 I had always held that the vacuum was not a thing impossible in nature and that she did not flee it with such horror as many imagine.

I was forced to this opinion by seeing how slight was the foundation of the maxim so widely accepted that nature does not permit a vacuum, a maxim based only on experiments of which the greater number are false though considered most certain; and of the rest, some are so far from contributing to its proof that they show nature abhors too much fulness rather than flees a vacuum, and the most favorable do not bring anything more to light than that nature abhors a vacuum; they do not show that she cannot suffer it to be.

Pascal, Concerning the Vacuum

22 The essential difference between empty space and body, which has length, breadth, and depth, is that one is immobile and the other is mobile, and that one can receive within itself a body which penetrates its dimensions, whereas the other cannot; for the maxim on the impenetrability of dimensions is to be understood only of the dimensions of two material bodies; otherwise it would not be universally accepted. Whence it can be seen that there is as much difference between nothingness and empty space as there is between empty

space and material body, and that thus empty space is a mean between material body and nothingness.

Pascal, Concerning the Vacuum

23 There is no geometer who does not believe that space is infinitely divisible. One can no more be a geometer without this principle than one can be a man without a soul. And yet there is no geometer who understands an infinite division. We are sure of that truth only for the reason, certainly sufficient, that we perfectly grasp the falsity of the statement that by dividing a space we can reach an indivisible part, a part, that is, having no extension.

Pascal, Geometrical Demonstration

24 When I consider the short duration of my life, swallowed up in the eternity before and after the little space which I fill and even can see, engulfed in the infinite immensity of spaces of which I am ignorant and which know me not, I am frightened and am astonished at being here rather than there; for there is no reason why here rather than there, why now rather than then. Who has put me here? By whose order and direction have this place and time been allotted to me?... The eternal silence of these infinite spaces frightens me.

Pascal, Pensées, III, 205-206

25 Before thir eyes in sudden view appear
The secrets of the hoarie deep, a dark
Illimitable Ocean without bound.
Without dimension, where length, breadth, and highth.
And time and place are lost; where eldest Night

And Chaos, Ancestors of Nature, hold
Eternal *Anarchie*, amidst the noise
Of endless warrs, and by confusion stand.
For hot, cold, moist, and dry, four Champions fierce
Strive here for Maistrie, and to Battel bring
Thir embryon Atoms; they around the flag
Of each his faction, in thir several Clanns,
Light-arm'd or heavy, sharp, smooth, swift or slow,
Swarm populous, unnumber'd as the Sands
Of Barca or Cyrene's torrid soil,
Levied to side with warring Winds, and poise
Thir lighter wings. To whom these most adhere,
Hee rules a moment; *Chaos* Umpire sits,
And by decision more imbroiles the fray
By which he Reigns: next him high Arbiter
Chance governs all. Into this wilde Abyss,
The Womb of nature and perhaps her Grave,
Of neither Sea, nor Shore, nor Air, nor Fire,
But all these in thir pregnant causes mixt
Confus'dly, and which thus must ever fight,
Unless th' Almighty Maker them ordain
His dark materials to create more Worlds,
Into this wild Abyss the warie fiend
Stood on the brink of Hell and look'd a while,
Pondering his Voyage: for no narrow frith
He had to cross.

Milton, Paradise Lost, II, 890

- 26 If corporeal substance could be so divided that its parts could be really distinct, why could not one part be annihilated, the rest remaining, as before, connected with one another? Any why must all be so fitted together that there can be no vacuum? For of things which are really

distinct the one from the other, one can be and remain in its own position without the other. Since, therefore, it is supposed that there is no vacuum in nature... but that all the parts must be united, so that no vacuum can exist, it follows that they cannot be really separated; that is to say, that corporeal substance, insofar as it is substance, cannot be divided. If, nevertheless, any one should now ask why there is a natural tendency to consider quantity as capable of division, I reply that quantity is conceived by us in two ways; either abstractly or superficially; that is to say, as we imagine it, or else as substance, in which way it is conceived by the intellect alone. If, therefore, we regard quantity (as we do very often and easily) as it exists in the imagination, we find it to be finite, divisible, and composed of parts; but if we regard it as it exists in the intellect, and conceive it insofar as it is substance, which is very difficult, then, as we have already sufficiently demonstrated, we find it to be infinite, one, and indivisible.

Spinoza, Ethics, I, Prop. 15, Schol.

- 27 Absolute space, in its own nature, without relation to anything external, remains always similar and immovable. Relative space is some movable dimension or measure of the absolute spaces; which our senses determine by its position to bodies; and which is commonly taken for immovable space; such is the dimension of a subterraneous, an aerial, or celestial space, determined by its position in respect of the earth. Absolute and relative space are the same in figure and magnitude; but they do not remain always numerically the same. For if the earth, for instance, moves, a space of our air, which relatively and in respect of the earth

remains always the same, will at one time be one part of the absolute space into which the air passes; at another time it will be another part of the same, and so, absolutely understood, it will be continually changed.

Place is a part of space which a body takes up, and is according to the space, either absolute or relative. I say, a part of space; not the situation, nor the external surface of the body. For the places of equal solids are always equal; but their surfaces, by reason of their dissimilar figures, are often unequal. Positions properly have no quantity, nor are they so much the places themselves, as the properties of places. The motion of the whole is the same with the sum of the motions of the parts; that is, the translation of the whole, out of its place, is the same thing with the sum of the translations of the parts out of their places; and therefore the place of the whole is the same as the sum of the places of the parts, and for that reason, it is internal, and in the whole body.

Newton, Principia, Definitions, Scholium

28 As the order of the parts of time is immutable, so also is the order of the parts of space. Suppose those parts to be moved out of their places, and they will be moved (if the expression may be allowed) out of themselves. For times and spaces are, as it were, the places as well of themselves as of all other things. All things are placed in time as to order of succession; and in space as to order of situation. It is from their essence or nature that they are places; and that the primary places of things should be movable, is absurd. These are therefore the absolute places; and translations out of those places, are the only absolute motions.

But because the parts of space cannot be seen, or distinguished from one another by our senses, therefore in their stead we use sensible measures of them. For from the positions and distances of things from any body considered as immovable, we define all places; and then with respect to such places, we estimate all motions, considering bodies as transferred from some of those places into others. And so, instead of absolute places and motions, we use relative ones; and that without any inconvenience in common affairs; but in philosophical disquisitions, we ought to abstract from our senses, and consider things themselves, distinct from what are only sensible measures of them. For it may be that there is no body really at rest, to which the places and motions of others may be referred.

Newton, Principia, Definitions, Scholium

29 I will here show how men come to form to themselves the notion of space. They consider that many things exist at once and they observe in them a certain order of co-existence, according to which the relation of one thing to another is more or less simple. This order, is their situation or distance. When it happens that one of those co-existent things changes its relation to a multitude of others, which do not change their relation among themselves; and that another thing, newly come, acquires the same relation to the others, as the former had; we then say it is come into the place of the former.... And supposing, or feigning, that among those co-existents, there is a sufficient number of them, which have undergone no change; then we may say, that those which have such a relation to those fixed existents, as others had to them before, have now the same place

which those others had. And that which comprehends all those places, is called *space*.

Leibniz, Letters to Samuel Clarke, V

30 By this idea of solidity is the extension of body distinguished from the extension of space:—the extension of body being nothing but the cohesion or continuity of solid, separable, movable parts; and the extension of space, the continuity of unsolid, inseparable, and immovable parts. Upon the solidity of bodies also depend their mutual impulse, resistance, and protrusion. Of pure space then, and solidity, there are several (amongst which I confess myself one) who persuade themselves they have clear and distinct ideas; and that they can think on space, without anything in it that resists or is protruded by body. This is the idea of pure space, which they think they have as clear as any idea they can have of the extension of body: the idea of the distance between the opposite parts of a concave superficies being equally as clear without as with the idea of any solid parts between: and on the other side, they persuade themselves that they have, distinct from that of pure space, the idea of *something that fills space*, that can be protruded by the impulse of other bodies or resist their motion.

Locke, Concerning Human Understanding, Bk. II, IV, 5

31 We can have no idea of the place of the universe, though we can of all the parts of it; because beyond that we have not the idea of any fixed, distinct, particular beings, in reference to which we can imagine it to have any relation of distance; but all beyond it is one uniform space or

expansion, wherein the mind finds no variety, no marks. For to say that the world is somewhere, means no more than that it does exist; this, though a phrase borrowed from place, signifying only its existence, not location: and when one can find out, and frame in his mind, clearly and distinctly, the place of the universe, he will be able to tell us whether it moves or stands still in the undistinguishable inane of infinite space: though it be true that the word place has sometimes a more confused sense, and stands for that space which anybody takes up; and so the universe is in a place.

Locke, Concerning Human Understanding, Bk. II, XIII, 10

- 32 The philosophic consideration of motion does not imply the being of an *absolute Space*, distinct from that which is perceived by sense and related bodies; which that it cannot exist without the mind is clear upon the same principles that demonstrate the like of all other objects of sense. And perhaps, if we inquire narrowly, we shall find we cannot even frame an idea of *pure Space* exclusive of all body. This I must confess seems impossible, as being a most abstract idea. When I excite a motion in some part of my body if it be free or without resistance, I say there is *Space*; but if I find a resistance, then I say there is *Body*; and in proportion. as the resistance to motion is lesser or greater, I say the space is more or less *pure*. So that when I speak of pure or empty space, it is not to be sup-posed that the word "space" stands for an idea distinct from or conceivable without body and motion—though indeed we are apt to think every noun substantive stands for a distinct idea that may be separated from all others; which has occasioned infinite mistakes. When, therefore, supposing all the world to be annihilated besides my own

body, I say there still remains *pure Space*, thereby nothing else is meant but only That I conceive it possible for the limbs of my body to be moved on all sides without the least resistance, but if that too, were annihilated then there could be no motion, and consequently no Space. Some, perhaps, may think the sense of seeing doth furnish them with the idea of pure space; but it is plain from what we have elsewhere shewn, that the ideas of space and distance are not obtained by that sense. . . ,

What is here laid down seems to put an end to all those disputes and difficulties that have sprung up amongst the learned concerning the nature of *pure Space*.

Berkeley, Principles of Human Knowledge, 116-117

- 33 The idea of space is convey'd to the mind by two senses, the sight and touch; nor does any thing ever appear extended, that is not either visible or tangible. That compound impression, which represents extension, consists of several lesser impressions, that are indivisible to the eye or feeling, and may be call'd impressions of atoms or corpuscles endow'd with colour and solidity. But this is not all. 'Tis not only requisite, that these atoms shou'd be colour'd or tangible, in order to discover themselves to our senses; 'tis also necessary we shou'd preserve the idea of their colour or tangibility in order to comprehend them by our imagination. There is nothing but the idea of their colour or tangibility, which can render them conceivable by the mind. Upon the removal of the ideas of these sensible qualities, they are utterly annihilated to the thought or imagination.

Now such as the parts are, such is the whole. If a point be not consider'd as colour'd or tangible, it can convey to

us no idea; and consequently the idea of extension, which is compos'd of the ideas of these points, can never possibly exist. But if the idea of extension really can exist, as we are conscious it does, its parts must also exist; and in order to that, must be consider'd as colour'd or tangible. We have therefore no idea of space or extension, but when we regard it as an object either of our sight or feeling.

Hume, Treatise of Human Nature, Bk. I, II, 3

34 Our system concernitig space and time consists of two parts, which are intimately connected together. The first depends on this chain of reasoning. The capacity of the mind is not infinite; consequently no idea of extension or duration consists of an infinite number of parts or inferior ideas, but of a finite number, and these simple and indivisible: 'Tis therefore possible for space and time to exist conformable to this idea: And if it be possible, 'tis certain they actually do exist conformable to it; since their infinite divisibility is utterly impossible and contradictory.

The other part of our system is a consequence of this. The parts, into which the ideas of space and time resolve themselves, become at last indivisible; and these indivisible parts, being nothing in themselves, are inconceivable when not fill'd with something real and existent. The ideas of space and time are therefore no separate or distinct ideas, but merely those of the manner or order, in which objects exist: Or, in other words, 'tis impossible to conceive either a vacuum and extension without matter, or a time, when there was no succession or change in any real existence.

Hume, Treatise of Human Nature, Bk. I, II, 4

35 Space is not a conception which has been derived from outward experiences. For, in order that certain sensations may relate to something without me (that is, to something which occupies a different part of space from that in which I am); in like manner, in order that I may represent them not merely as without, of, and near to each other, but also in separate places, the representation of space must already exist as a foundation. Consequently, the representation of space cannot be borrowed from the relations of external phenomena through experience; but, on the contrary, this external experience is itself only possible through the said antecedent representation.

Space then is a necessary representation *a priori*, which serves for the foundation of all external intuitions. We never can imagine or make a representation to ourselves of the non-existence of space, though we may easily enough think that no objects are found in it.

Kant, Critique of Pure Reason, Transcendental Aesthetic

36 Space does not represent any property of objects as things in themselves, nor does it represent them in their relations to each other; in other words, space does not represent to us any determination of objects such as attaches to the objects themselves, and would remain, even though all subjective conditions of the intuition were abstracted. For neither absolute nor relative determinations of objects can be intuited prior to the existence of the things to which they belong, and therefore not *a priori* ,... It is therefore from the human point of view only that we can speak of space, extended

objects, etc. If we depart from the subjective condition, under which alone we can obtain external intuition, or, in other words, by means of which we are affected by objects, the representation of space has no meaning whatsoever.

Kant, Critique of Pure Reason, Transcendental Aesthetic

37 Let no one be surprised [that]... there may be a space without order just as there may be an order without space. And the primitive perceptions of space are certainly of an unordered kind. The order which the spaces first perceived potentially include must, before being distinctly apprehended by the mind, be woven into those spaces by a rather complicated set of intellectual acts. The primordial largenesses which the sensations yield must be *measured and subdivided* by consciousness, and *added* together, before they can form by their synthesis what we know as the real Space of the objective world.

William James, Psychology, XX

38 Whatever sensible data can be attended to together we locate together. Their several extents seem one extent. The place at which each appears is held to be the same with the place at which the others appear. They become, in short, so many properties of one and the same real thing. This is the first and great commandment, the fundamental "act" by which our world gets spatially arranged.

William James, Psychology, XX

- 39 The imagined aggregate of positions occupied by all the actual or possible, moving or stationary, things which we know, is our notion of "real" space—a very incomplete and vague conception in all minds.

William James, Psychology, XX

- 40 The essence of the Kantian contention is that there are not *spaces*, but *Space* —one infinite continuous *Unit* — and that our knowledge of *this* cannot be a piecemeal sensational affair, produced by summation and abstraction. To which the obvious reply is that, if any known thing bears on its front the *appearance* of piecemeal construction and abstraction, it is this very notion of the infinite unitary space of the world. It is a *notion*, if ever there was one; and no intuition. Most of us apprehend it in the barest symbolic abridgment: and if perchance we ever do try to make it more adequate, we just add one image of sensible extension to another until we are tired. Most of us are obliged to turn round and drop the thought of the space in front of us when we think of that behind. And the space represented as near to us seems more minutely subdivisible than that we think of as lying far away.

William James, Psychology, XX

- 41 It is often said the images of external objects are localized in space, even That they can not be formed except on this condition. It is also said that this space, which serves thus as a ready prepared *frame* for our sensations and our representations, is identical with that of the geometers, of which it possesses all the properties.

. , . But let us see Whether they are not subject to an illusion that a more profound analysis would dissipate.

What, first of all, are the properties of space, properly so called? I mean of that space which is the object of geometry and which I shall call *geometric space*. The following are some of the most essential;

1° It is continuous;

2° It is infinite;

3° It has three dimensions;

4° It is homogeneous, that is to say, all its points are identical one with another;

5° It is isotropic, that is to say, all the straights which pass through the same point are identical one with another.

Compare it now to the frame of our representations and our sensations, which I may call *perceptual space*.

Visual Space.—Consider first a purely visual impression, due to an image formed on the bottom of the retina.

A cursory analysis shows us this image as continuous, but as possessing only two dimensions; this already distinguishes from geometric space what we may call *pure visual space*.

Besides, this image is enclosed in a limited frame.

Finally, there is another difference not less important: *this pure visual space is not homogeneous*. All the points of the retina, aside from the images which may there be formed, do not play the same role. The yellow spot can in no way be regarded as identical with a point on the border of the retina. In fact, not only does the same object produce there much more vivid impressions, but in every limited frame the point occupying the center of the

frame will never appear as equivalent to a point near one of the borders.

No doubt a more profound analysis would show us that this continuity of visual space and its two dimensions are only an illusion; it would separate it therefore still more from geometric space, but we shall not dwell on this remark.

Poincare, Science and Hypothesis, II, 4

42 Perceptual space, under its triple form, visual, tactile and motor, is essentially different from geometric space.

It is neither homogeneous, nor isotropic; one can not even say that it has three dimensions.

It is often said that we 'project' into geometric space the objects of our external perception; that we 'localize' them.

Has this a meaning, and if so what?

Does it mean that we *represent* to ourselves external objects in geometric space?

Our representations are only the reproduction of our sensations; they can therefore be ranged only in the same frame as these, that is to say, in perceptual space.

It is as impossible for us to represent to ourselves external bodies in geometric space, as it is for a painter to paint on a plane canvas objects with their three dimensions.

Perceptual space is only an image of geometric space, an image altered in shape by a sort of perspective, and we can represent to ourselves objects only by bringing them under the laws of this perspective.

Therefore we do not *represent* to ourselves external bodies in geometric space, but we reason on these bodies as if they were situated in geometric space.

43 We speak in the singular of *The Universe*, of Nature, of [physis] which can be translated as Process. There is the one all-embracing fact which is the advancing history of the one Universe. This community of the world, which is the matrix for all begetting, and whose essence is process with retention of connectedness,—this community is what Plato terms The Receptacle. In our effort to divine his meaning, we must remember that Plato says that it is an obscure and difficult concept, and that in its own essence the Receptacle is devoid of all forms. It is thus certainly not the ordinary geometrical space with its mathematical relations. Plato calls his Receptacle, 'The foster-mother of all becoming'. He evidently conceived it as a necessary notion without which our analysis of Nature is defective. It is dangerous to neglect Plato's intuitions. He carefully varies his phrases in referring to it, and implies that what he says is to be taken in its most abstract sense. The Receptacle imposes a common relationship on all that happens, but does not impose what that relationship shall be. It seems to be a somewhat more subtle notion than Aristotle's 'matter' which, of course, is not the 'matter' of Galileo and Newton. Plato's Receptacle may be conceived as the necessary community within which the course of history is set, in abstraction from all the particular historical facts. I have directed attention to Plato's doctrine of The Receptacle because, at the present moment, physical science is nearer to it than at any period since Plato's death. The space-time of modern mathematical physics, conceived in abstraction from the particular mathematical formula which applies to the happenings in it, is almost exactly Plato's Receptacle. It is

to be noted that mathematical physicists are extremely uncertain as to what these formula are exactly, nor do they believe that any such formula can be derived from the mere notion of space-time. Thus, as Plato declares, space-time in itself is bare of all forms.

Whitehead, Adventures of Ideas, IX, 4

- 44 Psychology is concerned with space, not as a system of relations among material objects but as a feature of our perceptions. If we could accept naive realism, this distinction would have little importance: we should perceive material objects and their spatial relations, and the space that characterizes our perceptions would be identical with the space of physics. But in fact naive realism cannot be accepted, percepts are not identical with material objects, and the relation of perceptual to physical space is not identity.

Russell, Human Knowledge, III, 6

- 45 The construction of one space in which all our perceptual experiences are located is a triumph of pre-scientific common sense. Its merit lies in its convenience, not in any ultimate truth that it may be supposed to possess. Common sense, in attributing to it a degree of nonconventional truth beyond what it actually has a right to claim, is in error, and this error, uncorrected, adds greatly to the difficulty of a sound philosophy of space.

Russell, Human Knowledge, III, 6

- 46 It is a wide-spread error that the special theory of relativity is supposed to have, to a certain extent, first discovered, or at any rate, newly introduced, the four-

dimensionality of the physical continuum. This, of course, is not the case. Classical mechanics, too, is based on the four-dimensional continuum of space and time. But in the four-dimensional continuum of classical physics the subspaces with constant time value have an absolute reality, independent of the choice of the reference system. Because of this [fact], the four-dimensional continuum falls naturally into a three-dimensional and a one-dimensional (time), so that the four-dimensional point of view does not force itself upon one as *necessary*. The special theory of relativity, on the other hand, creates a formal dependence between the way in which the spatial co-ordinates, on the one hand, and the temporal co-ordinates, on the other, have to enter into the natural laws.

Einstein, Autobiographical Notes

- 47 It is scarcely possible to give any other definition of space: space is what enables us to distinguish a number of identical and simultaneous sensations from one another; it is thus a principle of differentiation other than that of qualitative differentiation, and consequently it is a reality with no quality.

Bergson, Time and Free Will, 11

- 48 What... physical space or time may properly be, we could know perfectly only by knowing perfectly the intimate movement and ultimate ranges of matter—not a human task. We know matter, as it behoves us to know it, in the measure in which our highly selective action and mental chronicle of action penetrate into its meshes.... Physical space and time are integral elements in this realm of

matter: they are *physical*, which is as much as to say that they are contingent, to be explored by experiment rather than by reasoning, to be shared by us rather than contemplated. They may change their form if they choose, like any existence, and may manifest a different essence in their new instances.

It is therefore a problem never to be solved except provisionally and locally, how far a human sensation of sentimental time or of pictorial space, or how far any geometrical model of a pure space or time, may fitly express the temporal and spatial dimensions of nature, or be a true measure for them.

Santayana, Realm of Matter, IV

49 Pictorial space is one of the dearest possessions of the human spirit: it would be thankless of us to be impatient because it is subjective, as if it ought not to have been so. It might no doubt have had a different sensuous texture, and /night have conveyed much the same practical information in that other guise; but it could hardly have been more beautiful than, to the human eye, are the colours of the spectrum, the forms of motion, and the spheres of shadow and of light.

Santayana, Realm of Matter, IV

19.7 Time

Unlike space, which elicits no comment from the poets, time is a subject about which they wax eloquent, indeed. It is also one that puzzles the philosophers even more than space does. Just as the quotations from Shakespeare's sonnets represent the range of the poetic response to time, so the quotations from Augustine's *Confessions* represent different aspects of the philosopher's puzzlement about time—about its definition; about its division into past, present, and future; about its beginning and end, or its endlessness; and about its relation to eternity or timelessness. In this last connection, the reader should observe that the word "eternity" is sometimes used for time everlasting, time without beginning or end, and sometimes for the transcendence of time, or timelessness. It is only in the second of these two meanings that one can make sense of the statement by Plato and others that time is the moving image of eternity.

Another point of dispute concerns the relation of time to motion, Aristotle asserting and Locke denying that time is the measure of motion. Philosophers apart, the physicists find time as indispensable as distance in the measurement of motion. But they in turn dispute about such matters as the existence of absolute time as opposed to relative or local time, and about the separability or inseparability of time and space.

The issue touched on in Section 19.5, about the eternity of motion, without beginning or end, recurs here in a related

question about time. Did time ever begin and will it ever end? One theologian, Augustine, explains the folly of asking what God was doing before the beginning of time; another, Aquinas, insists that if we affirm that the world and time did have a beginning, we must do so by faith in God's own revelation in the opening sentence of *Genesis*, for in no other way can we know an answer to the question. Aquinas takes a similar view of the end of the world and of time.

As in the case of space, so here too the reader will find a disagreement between Kant and James about the perception of time. In addition, the reader will find some interesting psychological observations by James concerning the experience of what he calls "the specious present," and concerning the difference between empty and filled time, as something experienced and as something remembered.

■ ■ ■

1 For a thousand years in thy sight are but as yesterday
when it is past, and as a watch in the night.

Psalms 90:4

2 To every thing there is a season, and a time to every
purpose under the heaven:

A time to be born, and a time to die; a time to plant,
and a time to pluck up that which is planted;

A time to kill, and a time to heal; a time to break
down, and a time to build up;

A time to weep, and a time to laugh; a time to mourn,
and a time to dance;

A time to cast away stones, and a time to gather stones together; a time to embrace, and a time to refrain from embracing;

A time to get, and a time to lose; a time to keep, and a time to cast away;

A time to rend, and a time to sew; a time to keep silence, and a time to speak;

A time to love, and a time to hate; a time of war, and a time of peace.

Ecclesiastes 3:1-8

3 *Chorus*. Time brings all things to pass.

Aeschylus, Libation Bearers, 965

4 *Timaeus*. When the father and creator saw the creature which he had made moving and living, the created image of the eternal gods, he rejoiced, and in his joy determined to make the copy still more like the original; and as this was eternal, he sought to make the universe eternal, so far as might be. Now the nature of the ideal being was everlasting, but to bestow this attribute in its fulness upon a creature was impossible. Wherefore he resolved to have a moving image of eternity, and when he set in order the heaven, he made this image eternal but moving according to number, while eternity itself rests in unity; and this image we call time. For there were no days and nights and months and years before the heaven was created, but when he constructed the heaven he created them also. They are all parts of time, and the past and future are created species of time, which we unconsciously but wrongly transfer to the eternal essence; for we say that he "was," he "is," he "will be,"

but the truth is that "is" alone is properly attributed to him, and that "was" and "will be" are only to be spoken of becoming in time, for they are motions, but that which is immovably the same cannot become older or younger by time, nor ever did or has become, or hereafter will be, older or younger, nor is subject at all to any of those states which affect moving and sensible things and of which generation is the cause. These are the forms of time, which imitates eternity and revolves according to a law of number. Moreover, when we say that what has become is become and what becomes is becoming, and that what will become is about to become and that the non-existent is non-existent—all these are inaccurate modes of expression....

Time, then, and the heaven came into being at the same instant in order that, having been created together, if ever there was to be a dissolution of them, they might be dissolved together. It was framed after the pattern of the eternal nature, that it might resemble this as far as was possible; for the pattern exists from eternity, and the created heaven has been, and is, and will be, in all time. Such was the mind and thought of God in the creation of time.

Plato, Timaeus, 37B

- 5 Time is a measure of motion and of being moved, and it measures the motion by determining a motion which will measure exactly the whole motion, as the cubit does the length by determining an amount which will measure out the whole. Further 'to be in time' means, for movement, that both it and its essence are measured by time (for simultaneously it measures both the movement and its

essence, and this is what being in time means for it, that its essence should be measured).

Aristotle, Physics, 221a1

- 6 Will time then fail? Surely not, if motion always exists. Is time then always different or does the same time recur? Clearly time is, in the same way as motion is. For if one and the same motion sometimes recurs, it will be one and the same time, and if not, not.

Since the 'now' is an end and a beginning of time, not of the same time however, but the end of that which is past and the beginning of that which is to come, it follows that, as the circle has its convexity and its concavity, in a sense, in the same thing, so time is always at a beginning and at an end. And for this reason it seems to be always different; for the 'now' is not the beginning and the end of the same thing; if it were, it would be at the same time and in the same respect two opposites. And time will not fail; for it is always at a beginning.

Aristotle, Physics, 222a29

- 7 Time . . . exists not by itself, but simply from the things which happen the sense apprehends what has been done in time past, as well as what is present and what is to follow after. And we must admit that no one feels time by itself abstracted from the motion and calm rest of things. So when they say that the daughter of Tyndarus was ravished and the Trojan nations were subdued in war, we must mind that they do not force us to admit that these things are by themselves, since those generations of men, of whom these things were accidents, time now gone by has irrevocably swept away.

Lucretius, Nature of Things, I

- 8 See you not that even stones are conquered by time, that high towers fall and rocks moulder away, that shrines and idols of gods are worn out with decay, and that the holy divinity cannot prolong the bounds of fate or struggle against the fixed laws of nature?

Lucretius, Nature of Things, V

- 9 But time is lost, which never will renew,
While we too far the pleasing path pursue,
Surveying nature with too nice a view.

Virgil, Georgics, III

- 10 Ev'n as we speak, grim Time speeds swift away;
Seize now and here the hour that is, nor trust some later day!

Horace, Odes, I, 11

- 11 No round of hopes for us! So speaks the year.
And Time that steals our day.

Horace, Odes, IV, 7

- 12 Time flies.

Ovid, Fasti, VI, 5

- 13 Nothing is constant in the whole world. Everything is in a state of flux, and comes into being as a transient appearance. Time itself flows on with constant motion, just like a river: for no more than a river can the fleeting hour stand still. As wave is driven on by wave, and, itself

pursued, pursues the one before, so the moments of time at once flee and follow, and are ever new.

Ovid, Metamorphoses, XV

- 14 Our life is most short and unhappy,
Fading away like a flower, and even while we are
drinking,
Calling for garlands and girls and perfumes, old age
steals upon us,
Always, before we know.

Juvenal, Satire IX

- 15 Time is like a river made up of the events which happen,
and a violent stream; for as soon as a thing has been
seen, it is carried away, and another comes in its place,
and this will be carried away too.

Marcus Aurelius, Meditations, IV, 43

- 16 What is in time is of a lower order than time itself: time is
folded around what is in time exactly as—we read—it is
folded about what is in place and in number.

Plotinus, Fourth Ennead, IV, 15

- 17 Time takes no holiday. It does not roll idly by, but through
our senses works its own wonders in the mind. Time came
and went from one day to the next; in its coming and its
passing it brought me other hopes and other memories,
and little by little patched me up again with the kind of
delights which had once been mine.

Augustine, Confessions, IV, 8

18 Before God made heaven and earth. He did not make anything. For if He had made something, what would it have been but a creature? And I wish I knew all that it would be profitable for me to know, as well as I know that no creature was made before any creature was made.

But a lighter mind, adrift among images of time and its passing, might wonder that You, O God almighty and all-creating and all-conserving, Maker of heaven and earth, should have abstained from so vast a work for the countless ages that passed before You actually wrought it. Such a mind should awaken and realize how ill-grounded is his wonder.

How could countless ages pass when You, the Author and Creator of all ages, had not yet made them? What time could there be that You had not created? or how could ages pass, if they never were?

Thus, since You are the Maker of all times, if there actually was any time before You made heaven and earth, how can it be said that You were not at work? If there was time, You made it, for time could not pass before You made time. On the other hand, if before heaven and earth were made there was no time, then what is meant by the question "What were You doing *then*?" If there was not any time, there was not any "then". ...

You are the Maker of all time, and before all time You are, nor was there ever a time when there was no time!

Augustine, Confessions, XI, 12-13

19 If we conceive of some point of time which cannot be divided into even the minutest parts of moments, that is the only point that can be called present; and that point flees at such lightning speed from being future to being past, that it has no extent of duration at all.

Augustine, Confessions, XI, 15

20 If the future and the past exist, I want to know where they are. And if I cannot yet know this, at least I do know that wherever they are, they are there not as future or past, but present. If wherever they are they are future, then in that place they are not yet; if past, then they are there no more. Thus wherever they are and whatever they are, they *are* only as present. When we relate the past truly, it is not the things themselves that are brought forth from our memory—for these have passed away: but words conceived from the images of the things: for the things stamped their prints upon the mind as they passed through it by way of the senses. Thus for example my boyhood, which no longer exists, is in time past, which no longer exists; but the likeness of my boyhood, when I recall it and talk of it, I look upon in time present, because it is still present in my memory.

Augustine, Confessions, XI, 18

21 Whatever may be the mode of this mysterious foreseeing of things to come, unless the thing is it cannot be seen. But what now is, is not future but present. Therefore when we speak of seeing the future, obviously what is seen is not the things which are not yet because they are still to come, but their causes or perhaps the signs that foretell them, for these causes and signs do exist here and now. Thus to those who see them now, they are not future but present, and from them things to come are conceived by the mind and foretold. These concepts already exist, and those who foretell are gazing upon them, present within themselves.

Augustine, Confessions, XI, 18

22 At any rate it is now quite clear that neither future nor past actually exists. Nor is it right to say there are three times, past, present and future. Perhaps it would be more correct to say: there are three times, a present of things past, a present of things present, a present of things future. For these three exist in the mind, and I find them nowhere else: the present of things past is memory the present of things present is sight, the present of things future is expectation.

Augustine, Confessions, XI, 20

23 Where does time come from, and by what way does it pass, and where does it go, while we are measuring it? Where is it from?—obviously from the future. But what way does it pass?—by the present. Where does it go?—into the past. In other words it passes from that which does not yet exist, by way of that which lacks extension, into that which is no longer.

Augustine, Confessions, XI, 21

24 I confess to You, Lord, that I still do not know what time is. And again I confess to You, Lord, that I know that I am uttering these things in time: I have been talking of time for a long time, and this long time would not be a long time unless time had passed. But how do I know this, since I do not know what time is? Or perhaps I do know, but simply do not know how to express what I know. Alas for me, I do not even know what I do not know!

Augustine, Confessions, XI, 25

25 If eternity and time are rightly distinguished by this, that time does not exist without some movement and transition, while in eternity there is no change, who does not see that there could have been no time had not some creature been made, which by some motion could give birth to change—the various parts of which motion and change, as they cannot be simultaneous, succeed one another—and thus, in these shorter or longer intervals of duration, time would begin? Since then, God, in Whose eternity is no change at all, is the Creator and Ordainer of time, I do not see how He can be said to have created the world after spaces of time had elapsed, unless it be said that prior to the world there was some creature by whose movement time could pass.

Augustine, City of God, XI, 6

26 We can reasonably say there was a time when Rome was not; there was a time when Jerusalem was not; there was a time when Abraham was not; there was a time when man was not, and so on: in fine, if the world was not made at the commencement of time, but after some time had elapsed, we can say there was a time when the world was not. But to say there was a time when time was not, is as absurd as to say there was a man when there was no man; or, this world was when this world was not.

Augustine, City of God, XII, 15

27 It is manifest that time and eternity are not the same. Some have founded the nature of this difference on the fact that eternity lacks beginning and end, whereas time has a beginning and an end. This, however, is an accidental and not an absolute difference, because,

granted that time always was and always will be, according to the idea of those who think the movement of the heavens goes on for ever, there would yet remain a difference between eternity and time . . . arising from the fact that eternity is simultaneously whole, which cannot be applied to time; for eternity is the measure of a permanent being, while time is the measure of movement.

Supposing, however, that this difference be considered on the part of the things measured, and not as regards the measures, then there is another reason for it, since that alone is measured by time which has beginning and end in time.. . . Hence, if the movement of the heavens lasted always, time would not be its measure as regards the whole of its duration, since the infinite is not measurable; but it would measure any revolution whatsoever which has beginning and end in time.

Aquinas, Summa Theologica, I, 10, 4

28 As eternity is the proper measure of being itself, so time is the proper measure of movement; and hence, according as any being recedes from permanence of being, and undergoes change, it recedes from eternity, and is subject to time. Therefore the being of things corruptible, because it is changeable, is not measured by eternity, but by time; for time measures not only things actually changed, but also things changeable. Hence it not only measures movement, but it also measures repose, which belongs to whatever is naturally movable, but is not actually in motion.

Aquinas, Summa Theologica, I, 10, 4

29 In time there is something indivisible—namely, the instant; and there is something else which endures—namely, time. But in eternity the indivisible now stands always still.

Aquinas, Summa Theologica, I, 42, 2

30 Even supposing that the world always was, it would not be equal to God in eternity... because the divine Being is all being simultaneously without succession; but with the world it is otherwise.

Aquinas, Summa Theologica, I, 46, 2

31 *Beatrice*. The nature of the universe which stilleth the centre and moveth all the rest around, hence doth begin as from its starting point.

And this heaven hath no other *where* than the divine mind wherein is kindled the love which rolleth it and the pow'er which it sheddeth.

Light and love grasp it in one circle, as doth it the others, and this engirdment he only who doth gird it understandeth.

Its movement by no other is marked out; but by it all the rest are measured, as ten by half and fifth.

And how Time in this same vessel hath its roots, and in the rest its leaves, may now be manifest to thee.

Dante, Paradiso, XXVII, 106

32 And well may Seneca, and many more.

Bewail lost time far more than gold in store.

'For chattels lost may yet recovered be,

But time lost ruins us for aye,' says he.

It will not come again, once it has fled,

Not any more than will Mag's maidenhead
When she has lost it in her wantonness;
Let's not grow mouldy thus in idleness.

Chaucer, Canterbury Tales: Man of Law's Prologue, Intro.

33 What really *is*? That which is eternal: that is to say, what never had birth, nor will ever have an end; to which time never brings any change. For time is a mobile thing, which appears as in a shadow, together with matter, which is ever running and flowing, without ever remaining stable or permanent. To which belong the words *before* and *after*, and *has been* or *will be*, which at the very first sight show very evidently that time is not a thing that is; for it would be a great stupidity and a perfectly apparent falsehood to say that that which is not yet in being, or which already has ceased to be. And as for these words, *present*, *immediate*, *now*, on which it seems that we chiefly found and support our understanding of time, reason discovering this immediately destroys it; for she at once splits and divides it into future and past, as though wanting to see it necessarily divided in two.

The same thing happens to nature that is measured, as to time that measures it. For there is nothing in it either that abides or is stable; but all things in it are either born, or being born, or dying. For which reason it would be a sin to say of God, who is the only one that *is*, that he *was* or *will be*. For those terms represent declinings, transitions, or vicissitudes of what cannot endure or remain in being. Wherefore we must conclude that God alone *is* —not at all according to any measure of time, but according to an eternity immutable and immobile, not measured by time or subject to any

decline; before whom there is nothing, nor will there be after, nor is there anything more new or more recent; but one who really is— who by one single *now* fills the *ever*; and there is nothing that really is but he alone—nor can we say "He has been," or "He will be"—without beginning and without end.

Montaigne, Essays, II, 12, Apology for Raymond Sebond

34 Goe to my love, where she is carelesse layd,
Yet in her winters bowre, not well awake;
Tell her the joyous time wil not be staid.
Unlesse she doe him by the forelock take.

Spenser, Amoretti, LXX

35 *King Richard*. I wasted time, and now doth time waste me.

Shakespeare, Richard II, V, v, 49

36 *The Bastard*. Old Time the clock-setter, that bald sexton Time,
Is it as he will?

Shakespeare, King John, III, i, 324

37 *Jaques*. He drew a dial from his poke,
And, looking on it with lack-lustre eye,
Says very wisely, "It is ten o'clock:
Thus we may see," quoth he, "how the world wags;
'Tis but an hour ago since it was nine,
And after one hour more 'twill be eleven;
And so, from hour to hour, we ripe and ripe,
And then, from hour to hour, we rot and rot;
And thereby hangs a tale."

Shakespeare, As You Like It, II, vii, 20

38 *Rosalind*. Time travels in divers paces with divers persons. I'll tell you who Time ambles withal, who Time trots withal, who Time gallops withal, and who he stands still withal.

Shakespeare, As You Like It, III, ii, 326

39 *Clown*. The whirligig of time brings in his revenges.

Shakespeare, Twelfth Night, V, i, 385

40 *Hector*. The end crowns all,
And that old common arbitrator. Time,
Will one day end it.

Shakespeare, Troilus and Cressida, IV, v, 224

41 *Macbeth*. Come what come may,
Time and the hour runs through the roughest day.

Shakespeare, Macbeth, I, iii, 146

42 *Prospero*. How is it
That this lives in thy mind? What seest thou else
In the dark backward and abysm of time?

Shakespeare, Tempest, I, ii, 48

43 Devouring Time, blunt thou the lion's paws.
And make the earth devour her own sweet brood;
Pluck the keen teeth from the fierce tiger's jaws,
And burn the long-lived phoenix in her blood.

Shakespeare, Sonnet XIX

- 44 The present time has no causal dependence on the time immediately preceding it. Hence, in order to secure the continued existence of a thing, no less a cause is required than that needed to produce it at the first.

Descartes, Arguments Demonstrating the Existence of God and the Distinction Between Soul and Body, Axiom

2

- 45 Restless inquietude for the diuturnity of our memories unto present considerations seems a vanity almost out of date, and superannuated piece of folly. We cannot hope to live so long in our names as some have done in their persons; one face of Janus holds no proportion unto the other. 'Tis too late to be ambitious. The great mutations of the world are acted, or time may be too short for our designs. To extend our memories by monuments, whose death we daily pray for, and whose duration we cannot hope, without injury to our expectations in the advent of the last day, were a contradiction to our beliefs. We whose generations are ordained in this setting part of time are providentially taken off from such imaginations; and, being necessitated to eye the remaining particle of futurity, are naturally constituted unto thoughts of the next world, and cannot excusably decline the consideration of that duration, which maketh pyramids pillars of snow, and all that's past a moment.

Sir Thomas Browne, Urn~Burial, V

- 46 Oblivion is not to be hired: the greater part must be content to be as though they had not been, to be found in the register of God, not in the record of man. Twenty-seven names make up the first story, and the recorded

names ever since contain not one living century. The number of the dead long exceedeth all that shall live. The night of time far surpasseth the day, and who knows when was the equinox? Every hour adds unto that current arithmetic, which scarce stands one moment. And since death must be the Lucina of life, and even pagans could doubt whether thus to live were to die; since our longest sun sets at right descensions, and makes but winter arches, and therefore it cannot be long before we lie down in darkness, and have our light in ashes; since the brother of death daily haunts us with dying mementos, and time that grows old in itself bids us hope no long duration; diuturnity is a dream and folly of expectation.

Sir Thomas Browne, Urn-Burial, V

47 Time heals griefs and quarrels, for we change and are no longer the same persons.

Pascal, Pensées, II, 122

48 Fly envious *Time*, till thou run out thy race,
Call on the lazy leaden-stepping hours,
Whose speed is but the heavy Plummets pace;
And glut thy self with what thy womb devours,
Which is no more then what is false and vain,
And meerly mortal dross;
So little is our loss,
So little is thy gain.

Milton, On Time

49 By eternity, I understand existence itself, so far as it is conceived necessarily to follow from the definition alone of the eternal thing.

Spinoza, Ethics, I, Def. 8

50 Duration is the indefinite continuation of existence.

Spinoza, Ethics, II, Def. 5

51 Eternity cannot be defined by time, or have any relationship to it.

Spinoza, Ethics, V, Prop. 23, Schol.

52 If we look at the common opinion of men, we shall see that they are indeed conscious of the eternity of their minds, but they confound it with duration, and attribute it to imagination or memory, which they believe remain after death.

Spinoza, Ethics, V, Prop. 34, Schol.

53 Absolute, true, and mathematical time, of itself, and from its own nature, flows equably without relation to anything external, and by another name is called duration: relative, apparent, and common time, is some sensible and external (whether accurate or unequable) measure of duration by the means of motion, which is commonly used instead of true time; such as an hour, a day, a month, a year.

Newton, Principia, Definitions, Scholium

54 It may be, that there is no such thing as an equable motion, whereby time may be accurately measured. All motions may be accelerated and retarded, but the flowing of absolute time is not liable to any change. The duration of perseverance of the existence of things remains the same, whether the motions are swift or slow,

or none at all: and therefore this duration ought to be distinguished from what are only sensible measures thereof.

Newton, Principia, Definitions, Scholium

55 One thing seems strange to me,—that whilst all men manifestly measured time by the motion of the great and visible bodies of the world, time yet should be defined to be the "measure of motion": whereas it is obvious to every one who reflects ever so little on it, that to measure motion, space is as necessary to be considered as time; and those who look a little farther will find also the bulk of the thing moved necessary to be taken into the computation, by any one who will estimate or measure motion so as to Judge right of it. Nor indeed does motion any otherwise conduce to the measuring of duration, than as it constantly brings about the return of certain sensible ideas, in seeming equidistant periods. For if the motion of the sun were as unequal as of a ship driven by unsteady winds, sometimes very slow, and at others irregularly very swift; or if, being constantly equally swift, it yet was not circular, and produced not the same appearances,— it would not at all help us to measure time, any more than the seeming unequal motion of a comet does.

Locke, Concerning Human Understanding, Bk. II, XIV, 22

56 Having frequently in our mouths the name Eternity, we are apt to think we have a positive comprehensive idea of it, which is as much as to say, that there is no part of that duration which is not clearly contained in our idea. It is true that he that thinks so may have a clear idea of

duration; he may also have a clear idea of a very great length of duration; he may also have a clear idea of the comparison of that great one with still a greater: but it not being possible for him to include in his idea of any duration, let it be as great as it will, *the whole extent together of a duration, where he supposes no end*, that part of his idea, which is still beyond the bounds of that large duration he represents to his own thoughts, is very obscure and undetermined. And hence it is that in disputes and reasonings concerning eternity, or any other infinite, we are very apt to blunder, and involve ourselves in manifest absurdities.

Locke, Concerning Human Understanding, Bk. II, XXIX,
15

57 Whenever I attempt to frame a simple idea of *time*, abstracted from the succession of ideas in my mind, which flows uniformly and is participated by all beings, I am lost and embrangled in inextricable difficulties. I have no notion of it at all, only I hear others say it is infinitely divisible, and speak of it in such a manner as leads me to entertain odd thoughts of my existence; since that doctrine lays one under an absolute necessity of thinking, either that he passes away innumerable ages without a thought, or else that he is annihilated every moment of his life, both which seem equally absurd. Time therefore being nothing, abstracted from the succession of ideas in our minds, it follows that the duration of any finite spirit must be estimated by the number of ideas or actions succeeding each other in that same spirit or mind. Hence, it is a plain consequence that the soul always thinks; and in truth whoever shall go about to

divide in his thoughts, or abstract the *existence* of a spirit from its *cogitation*, will, I believe, find it no easy task.

Berkeley, Principles of Human Knowledge, 98

58 Ever eating, never cloying,
All-devouring, all-destroying,
Never finding full repast.
Till I eat the world at last.

Swift, On Time

59 No Preacher is listened to but Time, which gives us the same Train and Turn of Thought that elder People have tried in vain to put into our Heads before.

Swift, Thoughts on Various Subjects

60 'Tis a property inseparable from time, and which in a manner constitutes its essence, that each of its parts succeeds another, and that none of them, however contiguous, can ever be co-existent. For the same reason, that the year 1737 cannot concur with the present year 1738, every moment must be distinct from, and posterior or antecedent to another. 'Tis certain then, that time, as it exists must be compos'd of indivisible moments. For if in time we could never arrive at an end of division and if each moment, as it succeeds another, were not perfectly single and indivisible, there would be an infinite number of co-existent moments, or parts of time; which I believe will be allow'd to be an arrant contradiction.

Hume, Treatise of Human Nature, Bk. 1, 11, 2

61 To understand what time is aright, without which we never can comprehend infinity, insomuch as one is a

portion of the other— ns'c ought seriously to sit down and consider what idea it is we have of duration, so as to give a satisfactory account how we came by it. What is that to any body? quoth my uncle Toby. For if you will turn your eyes inwards upon your mind, continued my father, and observe attentively, you will perceive, brother, that whilst you and I are talking together, and thinking, and smoking our pipes, or whilst we receive successively ideas in our minds, we know that we do exist, and so we estimate the existence, or the continuation of the existence of ourselves, or any thing else, commensurate to the succession of any ideas in our minds, the duration of ourselves, or any such other thing co-existing with our thinking—and so according to that preconceived—You puzzle me to death, cried my uncle Toby.

--'Tis owing to this, replied my father, that in our computations of time, we are so used to minute, hours, weeks, and months—and of clocks (I wish there was not a clock in the kingdom) to measure out their several portions to us, and to those who belong to us—that 'twill be well, if in time to come, the succession of our ideas be of any use or service to us at all.

Now, whether we observe it or no, continued my father, in every sound man's head, there is a regular succession of ideas of one sort or other, which follow each other in train just like—A train of artillery? said my uncle Toby—A train of a fiddle-stick!—quoth my father—which follow and succeed one another in our minds at certain distances, just like the images in the inside of a lanthorn turned round by the heat of a candle.—I declare, quoth my uncle Toby, mine are more like a smoke-jack. Then,

brother Toby, I have nothing more to say to you upon the subject, said my father.

Sterne, Tristram Shandy, III, 18

62 Time wastes too fast: every letter I trace tells me with what rapidity Life follows my pen; the days and hours of it, more precious, my dear Jenny! than the rubies about thy neck, are flying over our heads like light clouds of a windy day, never to return more—every thing presses on—whilst thou art twisting that lock,—see! it grows grey; and every time I kiss thy hand to bid adieu, and every absence which follows it, are preludes to that eternal separation which we are shortly to make.

Sterne, Tristram Shandy, IX, 8

63 I was exceedingly uneasy at the awkward appearance I supposed I should make to Johnson and the other gentlemen whom I had invited, not being able to receive them at home, and being obliged to order supper at the Mitre. I went to Johnson in the morning, and talked of it as a serious distress. He laughed, and said, "Consider, Sir, how insignificant this will appear a twelvemonth hence."— Were this consideration to be applied to most of the little vexatious incidents of life, by which our quiet is too often disturbed, it would prevent many painful sensations. I have tried it frequently, with good effect.

Boswell, Life of Johnson (July 6, 1763)

64 Nae man can tether time or tide.

Burns, Tam O'Shanter

65 Time is not an empirical conception. For neither coexistence nor succession would be perceived by us, if the representation of time did not exist as a foundation *a priori*. Without this presupposition we could not represent to ourselves that things exist together at one and the same time, or at different times, that is, contemporaneously, or in succession.

Time is a necessary representation, lying at the foundation of all our intuitions. With regard to phenomena in general, we cannot think away time from them, and represent them to ourselves as out of and unconnected with time, but we can quite well represent to ourselves time void of phenomena. Time is therefore given *a priori*. In it alone is all reality of phenomena possible. These may all be annihilated in thought, but time itself, as the universal condition of their possibility, cannot be so annulled.

Kant, Critique of Pure Reason, Transcendental Aesthetic

66 The infinity of time signifies nothing more than that every determined quantity of time is possible only through limitations of one time lying at the foundation. Consequently, the original representation, time, must be given as unlimited. But as the determinate representation of the parts of time and of every quantity of an object can only be obtained by limitation, the complete representation of time must not be furnished by means of conceptions, for these contain only partial representations. Conceptions, on the contrary, must have immediate intuition for their basis.

Kant, Critique of Pure Reason, Transcendental Aesthetic

67 Time is the formal condition *a priori* of all phenomena whatsoever. Space, as the pure form of external intuition, is limited as a condition *a priori* to external phenomena alone. On the other hand, because all representations, whether they have or have not external things for their objects, still in themselves, as determinations of the mind, belong to our internal state; and because this internal state is subject to the formal condition of the internal intuition, that is, to time—time is a condition *a priori* of all phenomena whatsoever—the *immediate* condition of all internal, and thereby the *mediate* condition of all external phenomena.

Kant, Critique of Pure Reason, Transcendental Aesthetic

68 I met a traveller from an antique land
Who said: 'Two vast and trunkless legs of stone
Stand in the desert. Near them, on the sand,
Half sunk, a shattered visage lies, whose frown,
And wrinkled lip, and sneer of cold command,
Tell that its sculptor well those passions read
Which yet survive, stamped on these lifeless things,
The hand that mocked them and the heart that fed.
And on the pedestal these words appear—
"My name is Ozymandias, king of kings;
Look on my works, ye Mighty, and despair!"
Nothing beside remains. Round the decay
Of that colossal wreck, boundless and bare
The lone and level sands stretch far away.'

Shelley, Ozymandias

69 Oh, Time! the beautifier of the dead,
Adorner of the ruin, comforter

And only healer when the heart hath bled—
Time! the corrector where our judgments err,
The test of truth, love,—sole philosopher.

Byron, Childe Harold's Pilgrimage, IV, 130

70 Time is the negative element in the sensuous world.

Hegel, Philosophy of History, Intro., 3

71 Length of time is something entirely relative, and the element of spirit is eternity. Duration, properly speaking, cannot be said to belong to it.

Hegel, Philosophy of History, Intro.

72 Time is that in which all things pass away; it is merely the form under which the will to live—the thing-in-itself and therefore imperishable—has revealed to it that its efforts are in vain; it is that agent by which at every moment all things in our hands become as nothing, and lose any real value they possess.

Schopenhauer, Vanity of Existence

73 A man finds himself, to his great astonishment, suddenly existing, after thousands and thousands of years of non-existence: he lives for a little while; and then, again, comes an equally long period when he must exist no more. The heart rebels against this, and feels that it cannot be true. The crudest intellect cannot speculate on such a subject without having a presentiment that Time is something ideal in its nature. This ideality of Time and Space is the key to every true system of metaphysics; because it provides for quite another order of things than

is to be met with in the domain of nature. This is why Kant is so great.

Schopenhauer, Vanity of Existence

74 The illimitable, silent, never-resting thing called Time, rolling, rushing on, swift, silent, like an all-embracing ocean-tide, on which we and all the Universe swim like exhalations, like apparitions which *are*, and then *are not*: this is forever very literally a miracle; a thing to strike us dumb.

Carlyle, The Hero as Divinity

75 Let us alone. Time driveth onward fast,
And in a little while our lips are dumb.
Let us alone. What is it that will last?
All things are taken from us, and become
Portions and parcels of the dreadful past.

Tennyson, The Lotos-Eaters, IV

76 Time is but the stream I go a-fishing in. I drink at it; but while I drink I see the sandy bottom and detect how shallow it is. Its thin current slides away, but eternity remains. I would drink deeper; fish in the sky, whose bottom is pebbly with stars, I cannot count one. I know not the first letter of the alphabet. I have always been regretting that I was not as wise as the day I was born. The intellect is a cleaver; it discerns and rifts its way into the secret of things. I do not wish to be any more busy with my hands than is necessary. My head is hands and feet. I feel all my best faculties concentrated in it. My instinct tells me that my' head is an organ for burrowing, as some creatures use their snout and fore paws, and with

it I would mine and burrow my way through these hills. I think that the richest vein is somewhere hereabouts; so by the divining-rod and thin rising vapors I judge; and here I will begin to mine.

Thoreau, Walden: Where I Lived, and What I Lived For

77 Come, fill the Cup, and in the fire of Spring
Your Winter-garment of Repentance fling;
The Bird of Time has but a little way
To flutter—and the Bird is on the Wing.

FitzGerald, Rubaiyat, VII

78 What's time? Leave Now for dogs and apes!
Man has Forever.

Browning, A Grammarian's Funeral

79 Time is infinite motion without a moment of rest and is unthinkable otherwise.

Tolstoy, War and Peace, II Epilogue, X

80 The practically cognized present is no knife-edge, but a saddle-back, with a certain breadth of its own on which we sit perched, and from which we look in two directions into time. The unit of composition of our perception of time is a *duration*, with a bow and a stern, as it were—a rearward-and a forward-looking end. It is only as parts of this *duration-block* that the relation of *succession* of one end to the other is perceived. We do not first feel one end and then feel the other after it, and from the perception of the succession infer an interval of time between, but we seem to feel the interval of time as a whole, with its two ends embedded in it. The experience is from the

outset a synthetic datum, not a simple one; and to sensible perception its elements are inseparable, although attention looking back may easily decompose the experience, and distinguish its beginning from its end.

William James, Psychology, XV

81 In the experience of watching empty time flow . . . , we tell it off in pulses. We say "now! now! now!" or we count "more! more! more!" as we feel it bud. This composition out of units of duration is called the law of time's *discrete flow*. The discreteness is, however, merely due to the fact that our successive acts of *recognition* or *apperception* of *what* it is are discrete. The sensation is as continuous as any sensation can be. All continuous sensations are *named* in beats, we notice that a certain finite "more" of them is passing or already past....

After a small number of beats our impression of the amount we have told off becomes quite vague. Our only way of knowing it accurately is by counting, or noticing the clock, or through some other symbolic conception. When the times exceed hours or days, the conception is absolutely symbolic. We think of the amount we mean either solely as a *name*, or by running over a few salient *dates* therein, with no pretence of imagining the full durations that lie between them. No one has anything like a *perception* of the greater length of the time between now and the first century than of that between now and the tenth. To an historian, it is true, the longer interval will suggest a host of additional dates and events, and so appear a more *multitudinous* thing. And for the same reason most people will think they directly perceive the length of the past fortnight to exceed that of

the past week. But there is properly no comparative time *intuition* in these cases at all. It is but dates and events, *representing* time, their abundance *symbolizing* its length. I am sure that this is so, even where the times compared are no more than an hour or so in length.

William James, Psychology, XV

- 82 The specious present, the intuited duration, stands permanent, like the rainbow on the waterfall, with its own quality unchanged by the events that stream through it. Each of these, as it slips out, retains the power of being reproduced; and when reproduced, is reproduced with the duration and neighbors which it originally had. Please observe, however, that the reproduction of an event, *after* it has once completely dropped out of the rearward end of the specious present, is an entirely different psychic fact from its direct perception in the specious present as a thing immediately past. A creature might be entirely devoid of *reproductive* memory, and yet have the time-sense; but the latter would be limited, in his case, to the few seconds immediately passing by. Time older than that he would never recall.

William James, Psychology, XV

- 83 We cannot point to a time itself, but only to some event occurring at that time. There is therefore no reason in experience to suppose that there are times as opposed to events: the events, ordered by the relations of simultaneity and succession, are all that experience provides.

Russell, World of Physics and the World of Sense

84 The contention that time is unreal and that the world of sense is illusory must, I think, be regarded as based upon fallacious reasoning. Nevertheless, there is some sense—easier to feel than to state—in which time is an unimportant and superficial characteristic of reality. Past and future must be acknowledged to be as real as the present, and a certain emancipation from slavery to time is essential to philosophic thought. The importance of time is rather practical than theoretical, rather in relation to our desires than in relation to truth. A truer image of the world, I think, is obtained by picturing things as entering into the stream of time from an eternal world outside, than from a view which regards time as the devouring tyrant of all that is. Both in thought and in feeling, to realize the unimportance of time is the gate of wisdom.

Russell, Problem of Infinity

85 Most people will be inclined to agree with St. Augustine: "What, then, is time? If no one asks of me, I know; if I wish to explain to him who asks, I know not." Philosophers, of course, have learned to be glib about time, but the rest of mankind, although the subject feels familiar, are apt to be aware that a few questions can reduce them to hopeless confusion. "Does the past exist? No. Does the future exist? No. Then only the present exists? Yes. But within the present there is no lapse of time? Quite so. Then time does not exist? Oh, I wish you wouldn't be so tiresome." Any philosopher can elicit this dialogue by a suitable choice of interlocuter.

Russell, Human Knowledge, IV, 5

86 Since Einstein, we know that... each piece of matter has its own local time. There is very little difference between the local time of one piece of matter and that of another unless their relative velocity is an appreciable fraction of the velocity of light. The local time of a given piece of matter is that which will be shown by a perfectly accurate chronometer which travels with it. Beta particles travel with velocities that do not fall very far short of that of light. If we could place a chronometer on a beta particle and make the particle travel in a closed path, we should find, when it returned, that the chronometer would not agree with one that had remained throughout stationary in the laboratory. A more curious illustration (which I owe to Professor Reichenbach) is connected with the possibility of travel to the stars. Suppose we invented a rocket apparatus which could send a projectile to Sirius with a velocity ten-elevenths of that of light. From the point of view of the terrestrial observer the journey would take about 55 years, and one might therefore suppose that if the projectile carried passengers who were young when they started, they would be old when they arrived. But from their point of view the journey will only have taken about 11 years. This will not only be the time taken as measured by their clocks, but also the time as measured by their physiological processes—decay of teeth, loss of hair, etc. If they looked and felt like men of 20 when they started, they will look and feel like men of 31 when they arrive. It is only because we do not habitually come across bodies traveling with a speed approaching that of light that such odd facts remain unnoticed except by men of science.

Russell, Human Knowledge, IV, 5

87 The non-mathematician is seized by a mysterious shuddering when he hears of "four-dimensional" things, by a feeling not unlike that awakened by thoughts of the occult. And yet there is no more common-place statement than that the world in which we live is a four-dimensional space-time continuum.

Space is a three-dimensional continuum. By this we mean that it is possible to describe the position of a point (at rest) by means of three numbers (co-ordinates) x , y , z , and that there is an indefinite number of points in the neighbourhood of this one, the position of which can be described by co-ordinates such as x_1 , y_1 , z_1 , which may be as near as we choose to the respective values of the co-ordinates x , y , z of the first point. In virtue of the latter property we speak of a "continuum," and owing to the fact that there are three co-ordinates we speak of it as being "three-dimensional."

Similarly, the world of physical phenomena which was briefly called "world" by Minkowski is naturally four-dimensional in the space-time sense. For it is composed of individual events, each of which is described by four numbers, namely, three space co-ordinates x , y , z and a time co-ordinate, the time-value t . The "world" is in this sense also a continuum; for to every event there are as many "neighbouring" events (realised or at least thinkable) as we care to choose, the co-ordinates x_1 , y_1 , z_1 , t_1 of which differ by an indefinitely small amount from those of the event x , y , z , t originally considered. That we have not been accustomed to regard the world in this sense as a four-dimensional continuum is due to the fact that in physics, before the advent of the theory of relativity, time played a different and more independent role, as compared with the space co-ordinates. It is for

this reason that we have been in the habit of treating time as an independent continuum. As a matter of fact, according to classical mechanics, time is absolute, i.e. it is independent of the position and the condition of motion of the system of co-ordinates. We see this expressed in the last equation of the Galileian transformation ($t' = t$).

The four-dimensional mode of consideration of the "world" is natural on the theory' of relativity, since according to this theory time is robbed of its independence.

Einstein, Relativity, I, 17

88 When I follow with my eyes on the dial of a clock the movement of the hand which corresponds to the oscillations of the pendulum, I do not measure duration, as seems to be thought; I merely count simultaneities, which is very different. Outside of me, in space, there is never more than a single position of the hand and the pendulum, for nothing is left of the past positions. Within myself a process of organization or interpenetration of conscious states is going on, which constitutes true duration. It is because I *endure* in this way that I picture to myself what I call the past oscillations of the pendulum at the same time as I perceive the present oscillation. Now, let us withdraw for a moment the ego which thinks these so-called successive oscillations: there will never be more than a single oscillation, and indeed only a single position, of the pendulum, and hence no duration. Withdraw, on the other hand, the pendulum and its oscillations; there will no longer be anything but the heterogeneous duration of the ego, without moments external to one another, without relation to number.

Bergson, Time and Free Will, II

89 To announce that something will take place at the end of a time t is to declare that consciousness will note between now and then a number t of simultaneities of a certain kind. And we must not be led astray by the words "between now and then," for the interval of duration exists only for us and on account of the interpenetration of our conscious states. Outside ourselves we should find only space, and consequently nothing but simultaneities, of which we could not even say that they are objectively successive, since succession can only be thought through *comparing* the present with the past.—That the interval of duration itself cannot be taken into account by science is proved by the fact that, if all the motions of the universe took place twice or thrice as quickly, there would be nothing to alter either in our formulae or in the figures which are to be found in them. Consciousness would have an indefinable and as it were qualitative impression of the change, but the change would not make itself felt outside consciousness, since the same number of simultaneities would go on taking place in space.

Bergson, Time and Free Will, H

90 What precisely is the present? If it is a question of the present instant,—I mean, of a mathematical instant which would be to time what the mathematical point is to the line,—it is clear that such an instant is a pure abstraction, an aspect of the mind; it cannot have real existence. You could never create time out of such instants any more than you could make a line out of mathematical points. Even if it does exist, how could there be an instant

anterior to it? The two instants could not be separated by an interval of time since, by hypothesis, you reduce time to a juxtaposition of instants. Therefore they would not be separated by anything, and consequently they would be only one: two mathematical points which touch are identical.

Bergson, The Creative Mind, V

91 By physical time I understand an order of derivation integral to the flux of matter; so that if two worlds had no material connection, and neither was in any of its parts derived from the other, they could not possibly have positions in the same physical time. The same essence of succession might be exhibited in both; the same kind of temporal vistas might perplex the sentimental inhabitants of each of them; but no date in one would coincide with a date in the other, nor would their respective temporal scales and rates of precipitation have any common measure.

The notion that there is and can be but one time, and that half of it is always intrinsically past and the other half always intrinsically future, belongs to the normal pathology of an animal mind: it marks the egotistical outlook of an active being endowed with imagination. Such a being will project the moral contrast produced by his momentary absorption in action upon the conditions and history of that action, and upon the universe at large. A perspective of hope and one of reminiscence continually divide for him a specious eternity; and for him the dramatic center of existence, though always at a different point in physical time, will always be precisely in himself.

Santayana, Realm of Matter, IV

92 Sentimental time is a genuine, if poetical, version of the march of existence, even as pictorial space is a genuine, if poetical, version of its distribution. The views taken are short, especially towards the future, but being extensible they suggest well enough the unfathomable depths of physical time in both directions; and if the views, being views, must be taken from some arbitrary point, they may be exchanged for one another, thus annulling the bias of each, in so far as the others contradict it. I am far from wishing to assert that the remainder or resultant will be the essence of physical time; but for human purposes a just view enough is obtained if we remember that each now and *here* is called so only by one voice, and that all other voices call it a *then* and a *there*. ...

The least sentimental term in sentimental time is the term *now*, because it marks the junction of fancy with action. *Now* is often a word of command; it leans towards the future, and seems to be the voice of the present summoning the next moment to arise, and pouncing upon it when it does so. For *now* has in it emotionally all the cheeriness of material change: it comes out of the past as if impatient at not having come sooner, and it passes into the future with alacrity, as if confident of losing nothing by moving on. For it is evident that actual succession can contain nothing but *nows*, so that *now* in a certain way is immortal. But this immortality is only a continual reiteration, a series of moments each without self-possession and without assurance of any other moment; so that if ever the *now* loses its indicative practical force and becomes introspective, it becomes

acutely sentimental, a perpetual hope unrealised and a perpetual dying.

Santayana, Realm of Matter, IV

93 October began as months do; their entrance is, in itself, an unostentatious and soundless affair, without outward signs and tokens; they, as it were, steal in softly and, unless you are keeping close watch, escape your notice altogether. Time has no divisions to mark its passage, there is never a thunder-storm or blare of trumpets to announce the beginning of a new month or year. Even when a new century begins it is only we mortals who ring bells and fire off pistols.

Mann, Magic Mountain, V

94 If Time is considered by itself, it immediately dissolves into an absolute multiplicity of instants which considered separately lose all temporal nature and are reduced purely and simply to the total a-temporality of the *this*. Thus Time is pure nothingness in-itself, which can seem to have a being only by the very act in which the For-itself overleaps it in order to utilize it. This being, however, is that of a particular figure which is raised on the undifferentiated ground of time and which we call the lapse of time. In fact our first apprehension of objective time is practical: it is while being my possibilities beyond co-present being that I discover objective time as the worldly correlate of nothingness which separates me from my possible. From this point of view time appears as a finite, organized form in the heart of an indefinite dispersion. The lapse of time is the result of a compression of time at the heart of an absolute

decompression, and it is the project of ourselves toward our possibilities which realizes the compression. This compression of time is certainly a form of dispersion and of separation, for it expresses in the world the distance which separates me from myself. But on the other hand, since I project myself toward a possible only across an organized series of dependent possibles which are what I have to be in order to—, and since their non-thematic and non-positional revelation is given in the non-positional revelation of the major possible toward which I project myself, time is revealed to me as an objective, temporal form, as an organized echeloning of probabilities. This objective form or lapse is like the trajectory of my act.

Thus time appears through trajectories. But just as spatial trajectories decompose and collapse into pure static spatiality, so the temporal trajectory collapses as soon as it is not simply lived as that which objectively implies our expectation of ourselves. In fact the probables which are revealed to me tend naturally to be isolated as in-itself probables and to occupy a strictly separated fraction of objective time. Then the lapse of time disappears, and time is revealed as the shimmer of nothingness on the surface of a strictly a-temporal being.

Sartre, Being and Nothingness, Pt. II, III, 4

19.8 The Universe or Cosmos

Many of the questions that have appeared in earlier sections of this chapter, especially the sections on cause, motion and change, space, and time, reappear here in the form of questions about the beginning and end of the world, its

infinity or boundlessness, and its creation or origin.

Similarly, the question raised in the section on nature, about God's immanence in nature or his transcendence of it, recurs here as a question about the relation of God to the universe or cosmos.

New questions do appear here. Is there only one universe or is there a multiplicity of worlds, even an infinity of them? Is this the best of all possible worlds, in which everything that happens has a sufficient reason? The affirmative answer, as given by Leibniz, has always been taken as the hallmark of philosophical optimism. It is opposed on rational grounds by Aquinas, who argues that a better world than this is possible; and it is laughed out of court by the ridicule that Voltaire heaps upon it. Related questions are discussed by others: whether the universe is intrinsically rational or intelligible, and whether God's creation of the world was an act of free choice on his part or something entirely necessitated.

Another point of dispute is the conception of a world-soul—an indwelling principle animating the universe and giving it intelligent direction. This conception, proposed by philosophers in antiquity, is rejected by later Christian theologians.

It is generally agreed that cosmos is the opposite of chaos; even those who conceive the universe as resulting from a fortuitous concourse of atoms find order in its structure and its processes. But the extent and character of its order are disputed. As opposed to the vision of a universe that is a thoroughly integrated whole, in which there are no loose ends or independent threads, William James proposed what he calls a "pluralistic universe," one in which there are many loosely concatenated strands, operating with some degree of independence of one another.

■ ■ ■

- 1 In the beginning God created the heaven and the earth.
And the earth was without form, and void; and darkness was upon the face of the deep. And the Spirit of God moved upon the face of the waters.
And God said, Let there be light: and there was light.
And God saw the light, that it was good: and God divided the light from the darkness.
And God called the light Day, and the darkness he called Night. And the evening and the morning were the first day.

Genesis 1:1-5

- 2 The earth is the Lord's, and the fulness thereof; the world, and they that dwell therein.

Psalms 24:1

- 3 One generation passeth away, and another generation cometh: but the earth abideth for ever.

Ecclesiastes 1:4

- 4 *Timaeus*. Let me tell you... why the creator made this world of generation. He was good, and the good can never have any jealousy of anything. And being free from Jealousy, he desired that all things should be as like himself as they could be. This is in the truest sense the origin of creation and of the world, as we shall do well in believing on the testimony of wise men: God desired that all things should be good and nothing bad, so far as this was attainable. Wherefore also finding the whole visible

sphere not at rest, but moving in an irregular and disorderly fashion, out of disorder he brought order, considering that this was in every way better than the other. Now the deeds of the best could never be or have been other than the fairest; and the creator, reflecting on the things which are by nature visible, found that no unintelligent creature taken as a whole was fairer than the intelligent taken as a whole; and that intelligence could not be present in anything which was devoid of soul. For which reason, when he was framing the universe, he put intelligence in soul, and soul in body, that he might be the creator of a work which was by nature fairest and best. Wherefore, using the language of probability, we may say that the world became a living creature truly endowed with soul and intelligence by the providence of God.

This being supposed, let us proceed to the next stage: In the likeness of what animal did the Creator make the world? It would be an unworthy thing to liken it to any nature which exists as a part only; for nothing can be beautiful which is like any imperfect thing; but let us suppose the world to be the very image of that whole of which all other animals both individually and in their tribes are portions. For the original of the universe contains in itself all intelligible beings, just as this world comprehends us and all other visible creatures, For the Deity, intending to make this world like the fairest and most perfect of intelligible beings, framed one visible animal comprehending within itself all other animals of a kindred nature. are we right in saying that there is one world, or that they are many and infinite? There must be one only, if the created copy is to accord with the original. For that which includes all other intelligible

creatures cannot have a second or companion; in that case there would be need of another living being which would include both, and of which they would be parts, and the likeness would be more truly said to resemble not them, but that other which included them. In order then that the world might be solitary, like the perfect animal, the creator made not two worlds or an infinite number of them; but there is and ever will be one only-begotten and created heaven.

Plato, Timaeus, 29B

- 5 *Timaeus*. And he [the Creator] gave to the world the figure which was suitable and also natural. Now to the animal which was to comprehend all animals, that figure was suitable which comprehends within itself all other figures. Wherefore he made the world in the form of a globe, round as from a lathe, having its extremes in every direction equidistant from the centre, the most perfect and the most like itself of all figures; for he considered that the like is infinitely fairer than the unlike. This he finished off, making the surface smooth all around for many reasons; in the first place, because the living being had no need of eyes when there was nothing remaining outside him to be seen; nor of ears when there was nothing to be heard; and there was no surrounding atmosphere to be breathed; nor would there have been any use of organs by the help of which he might receive his food or get rid of what he had already digested, since there was nothing which went from him or came into him: for there was nothing beside him. Of design he was created thus, his own waste providing his own food, and all that he did or suffered taking place in and by himself. For the Creator conceived that a being which was self-

sufficient would be far more excellent than one which lacked anything; and, as he had no need to take anything or defend himself against any one, the Creator did not think it necessary to bestow upon him hands: nor had he any need of feet, nor of the whole apparatus of walking; but the movement suited to his spherical form was assigned to him, being of all the seven that which is most appropriate to mind and intelligence; and he was made to move in the same manner and on the same spot, within his own limits revolving in a circle. All the other six motions were taken away from him, and he was made not to partake of their deviations. And as this circular movement required no feet, the universe was created without legs and without feet.

Plato, Timaeus, 33A

- 6 *Timaeus*. When all things were in disorder God created in each thing in relation to itself, and in all things in relation to each other, all the measures and harmonies which they could possibly receive. For in those days nothing had any proportion except by accident; nor did any of the things which now have names deserve to be named at all—as, for example, fire, water, and the rest of the elements. All these the creator first set in order, and out of them he constructed the universe, which was a single animal comprehending in itself all other animals, mortal and immortal. Now of the divine, he himself was the creator, but the creation of the mortal he committed to his offspring. And they, imitating him, received from him the immortal principle of the soul; and around this they proceeded to fashion a mortal body, and made it to be the vehicle of the soul, and constructed within the body a soul of another nature which was mortal, subject to

terrible and irresistible affections—first of all, pleasure, the greatest incitement to evil; then, pain, which deters from good; also rashness and fear, two foolish counsellors, anger hard to be appeased, and hope easily led astray—these they mingled with irrational sense and with all-daring love according to necessary laws, and so framed man.

Plato, Timaeus, 69A

- 7 It is evident not only that there is not, but also that there could never come to be, any bodily mass whatever outside the circumference. The world as a whole, therefore, includes *all* its appropriate matter, which is, as we saw, natural perceptible body. So that neither are there now, nor have there ever been, nor can there ever be formed more heavens than one, but this heaven of ours is one and unique and complete.

Aristotle, On the Heavens, 279a7

- 8 Everything which has a function exists for its function. The activity of God is immortality, i.e. eternal life. Therefore the movement of that which is divine must be eternal. But such is the heaven, viz. a divine body, and for that reason to it is given the circular body whose nature it is to move always in a circle. Why, then, is not the whole body of the heaven of the same character as that part? Because there must be something at rest at the centre of the revolving body; and of that body no part can be at rest, either elsewhere or at the centre. It could do so only if the body's natural movement were towards the centre. But the circular movement is natural, since otherwise it could not be eternal: for nothing unnatural is eternal. The

unnatural is subsequent to the natural, being a derangement of the natural which occurs in the course of its generation. Earth then has to exist; for it is earth which is at rest at the centre.

Aristotle, On the Heavens, 286a9

- 9 The sun and the stars and the whole heaven are ever active, and there is no fear that they may sometime stand still, as the natural philosophers fear they may. Nor do they tire in this activity; for movement is not for them, as it is for perishable things, connected with the potentiality for opposites, so that the continuity of the movement should be laborious; for it is that kind of substance which is matter and potency, not actuality, that causes this.

Aristotle, Metaphysics, 1050b23

- 10 There are infinite worlds both like and unlike this world of ours. For the atoms being infinite in number, as was proved already, are borne on far out into space. For those atoms, which are of such nature that a world could be created out of them or made by them, have not been used up either on one world or on a limited number of worlds, nor again on all the worlds which are alike, or on those which are different from these. So that there nowhere exists an obstacle to the infinite number of the worlds.

Epicurus, Letter to Herodotus

- 11 We must believe that worlds, and indeed every limited compound body which continuously exhibits a similar appearance to the things we see, were created from the infinite, and that all such things, greater and less alike,

were separated off from individual agglomerations of matter; and that all are again dissolved, some more quickly, some more slowly, some suffering from one set of causes, others from another. And further we must believe that these worlds were neither created all of necessity with one configuration nor yet with every kind of shape. Furthermore, we must believe that in all worlds there are living creatures and plants and other things we see in this world; for indeed no one could prove that in a world of one kind there might or might not have been in. eluded the kinds of seeds from which living things and plants and all the rest of the things we see are composed, and that in a world of another kind they could not have been.

Epicurus, Letter la Herodotus

- 12 There are some... who think that the number of the sand is infinite in multitude; and I mean by the sand not only that which exists about Syracuse and the rest of Sicily but also that which is found in every region whether inhabited or uninhabited. Again there are some who, without regarding it as infinite, yet think that no number has been named which is great enough to exceed its multitude. And it is clear that they who hold this view, if they imagined a mass made up of sand in other respects as large as the mass of the earth, including in it all the seas and the hollows of the earth filled up to a height equal to that of the highest of the mountains, would be many times further still from recognising that any number could be expressed which exceeded the multitude of the sand so taken. But I will try to show you by means of geometrical proofs, which you will be able to follow, that, of the numbers named by me and given in

the work which I sent to Zeuxippus, some exceed not only the number of the mass of sand equal in magnitude to the earth filled up in the way described, but also that of a mass equal in magnitude to the universe.

Archimedes, Sand-Reckoner

- 13 Be far from believing this, that all things as they say press to the centre of the sum, and that for this reason the nature of the world stands fast without any strokes from the outside and the uppermost and lowest parts cannot part asunder in any direction, because all things have been always pressing towards the centre.... Groundless error has devised such dreams for fools, because they have embraced false principles of reason. For there can be no centre where the universe is infinite; no nor, even if there were a centre, could anything take up a position there any more on that account than for some quite different reason be driven away. For all room and space, which we term void, must through centre, through no-centre alike give place to heavy bodies, in whatever directions their motions tend. Nor is there any spot of such a sort that when bodies have reached it, they can lose their force of gravity and stand upon void; and that again which is void must not serve to support anything, but must, as its nature craves, continually give place. Things cannot therefore in such a way be held in union, o'ermastered by love of a centre.

Lucretius, Nature of Things, I

- 14 Since the body of the earth and water and the light breath of air and burning heats, out of which this sum of things is seen to be formed, do all consist of a body that

had a birth and is mortal, the whole nature of the world must be reckoned of a like body. For those things whose parts and members we see to be of a body that had a birth and of forms that are mortal, we perceive to be likewise without exception mortal, and at the same time to have had a birth. Since therefore I see that the chiefest members and parts of the world are destroyed and begotten anew, I may be sure that for heaven and earth as well there has been a time of beginning and there will be a time of destruction.

Lucretius, Nature of Things, V

- 15 Whether the world is a soul, or a body under the government of nature, like trees and crops, it embraces in its constitution all that it is destined to experience actively or passively from its beginning right on to its end; it resembles a human being, all whose capacities are wrapped up in the embryo before birth. Ere the child has seen the light the principle of beard and grey hairs is innate. Albeit small and hidden, all the features of the whole body and of every succeeding period of life are there. In like manner the creation of the world embraces sun and moon, stars with their successive phases, and the birth of all sentient life; and no less the methods of change in all earthly things.

Seneca, Quaestiones Naturales, III, 29

- 16 Before there was any earth or sea, before the canopy of heaven stretched overhead, Nature presented the same aspect the world over, that to which men have given the name of Chaos. This was a shapeless uncoordinated mass, nothing but a weight of lifeless matter, whose ill-

assorted elements were indiscriminately heaped together in one place. There was no sun, in those days, to provide the world with light, no crescent moon ever filling out her horns: the earth was not poised in the enveloping air, balanced there by its own weight, nor did the sea stretch out its arms along the margins of the shores. Although the elements of land and air and sea were there, the earth had no firmness, the water no fluidity, there was no brightness in the sky. Nothing had any lasting shape, but everything got in the way of everything else; for, within that one body, cold warred with hot, moist with dry, soft with hard, and light with heavy.

This strife was finally resolved by a god, a natural force of a higher kind, who separated the earth from heaven, and the waters from the earth, and set the clear air apart from the cloudy atmosphere. When he had freed these elements, sorting them out from the heap where they had lain, indistinguishable from one another, he bound them fast, each in its separate place, forming a harmonious union. The fiery aether, which has no weight, formed the vault of heaven, flashing upwards to take its place in the highest sphere. The air, next to it in lightness, occupied the neighbouring regions. Earth, heavier than these, attracted to itself the grosser elements, and sank down under its own weight, while the encircling sea took possession of the last place of all, and held the solid earth in its embrace. In this way the god, whichever of the gods it was, set the chaotic mass in order, and, after dividing it up, arranged it in its constituent parts.

Ovid, Metamorphoses, I

17 In the beginning was the Word, and the Word was with God, and the Word was God.

The same was in the beginning with God.

All things were made by him; and without him was not any thing made that was made.

John 1:1—3

18 And when the seven thunders had uttered their voices, I was about to write: and I heard a voice from heaven saying unto me. Seal up those things which the seven thunders uttered, and write them not.

And the angel which I saw stand upon the sea and upon the earth lifted up his hand to heaven,

And swore by him that liveth for ever and ever, who created heaven, and the things that therein are, and the earth, and the things that therein are, and the sea, and the things which are therein, that there should be time no longer:

But in the days of the voice of the seventh angel, when he shall begin to sound, the mystery of God should be finished, as he hath declared to his servants the prophets.

Revelation 10:4-7

19 And he saith unto me. Seal not the sayings of the prophecy of this book: for the time is at hand.

He that is unjust, let him be unjust still: and he which is filthy, let him be filthy still: and he that is righteous, let him be righteous still: and he that is holy, let him be holy still.

And, behold, I come quickly; and my reward is with me, to give every man according as his work shall be.

I am Alpha and Omega, the beginning and the end,
the first and the last.

Blessed are they that do his commandments, that they
may have right to the tree of life, and may enter in
through the gates into the city.

For without are dogs, and sorcerers, and
whoremongers, and murderers, and idolaters, and
whosoever loveth and maketh a lie.

I Jesus have sent mine angel to testify unto you these
things in the churches. I am the root and the offspring of
David, and the bright and morning star.

And the Spirit and the bride say, Come. And let him
that heareth say, Come. And let him that is athirst come.
And whosoever will, let him take the water of life freely.

For I testify unto every man that heareth the words of
the prophecy of this book. If any man shall add unto
these things, God shall add unto him the plagues that are
written in this book:

And if any man shall take away from the words of the
book of this prophecy, God shall take away his part out of
the book of life, and out of the holy city, and from the
things which are written in this book.

He which testifieth these things saith. Surely I come
quickly. Amen. Even so, come, Lord Jesus.

Revelation 22:10-20

20 All that has by nature with systematic method been
arranged in the universe seems both in part and as a
whole to have been determined and ordered in
accordance with number, by the forethought and the
mind of him that created all things; for the pattern was
fixed, like a preliminary sketch, by the domination of
number preexistent in the mind of the world-creating

God, number conceptual only and immaterial in every way, but at the same time the true and the eternal essence, so that with reference to it, as to an artistic plan, should be created all these things, time, motion, the heavens, the stars, all sorts of revolutions.

Nicomachus, Arithmetic, I, 6

- 21 Either it is a well-arranged universe or a chaos huddled together, but still a universe. But can a certain order subsist in thee, and disorder in the All?

Marcus Aurelius, Meditations, IV, 27

- 22 The universe is either a confusion, and a mutual involution of things, and a dispersion; or it is unity and order and providence. If then it is the former, why do I desire to tarry in a fortuitous combination of things and such a disorder? And why do I care about anything else than how I shall at last become earth?... But if the other supposition is true, I venerate, and I am firm, and I trust in him who governs.

Marcus Aurelius, Meditations, VI, 10

- 23 We hold that the ordered universe, in its material mass, has existed for ever and will for ever endure.

Plotinus, Second Ennead, I, 1

- 24 Where there is motion within but not outwards and the total remains unchanged, there is neither growth nor decline, and thus the Kosmos never ages.

Plotinus, Second Ennead, I, 3

25 The administration of the universe entails neither labour nor loss.

Plotinus, Second Ennead, 1,4

26 We cannot but recognize from what we observe in this universe that some such principle of order prevails throughout the entire of existence—the minutest of things a tributary to the vast total; the marvellous art shown not merely in the mightiest works and sublimest members of the All, but even amid such littleness as one would think Providence must disdain: the varied workmanship of wonder in any and every animal form; the world of vegetation, too; the grace of fruits and even of leaves, the lavishness, the delicacy, the diversity of exquisite bloom; and all this not issuing once, and then to die out, but made ever and ever anew as the Transcendent Beings move variously over this earth.

Plotinus, Third Ennead, II, 13

27 If You fill heaven and earth, do they contain You? Or do You fill them, and yet have much over since they cannot contain You? Is there some other place into which that overplus of You pours that heaven and earth cannot hold? Surely You have no need of any place to contain You since You contain all things, and fill them indeed precisely by containing them. The vessels thus filled with You do not render You any support: for though they perished utterly, You would not be spilt out. And in pouring Yourself out upon us, You do not come down to us but rather elevate us to You: You are not scattered over us, but we are gathered into one by You. You fill all things: but with Your whole being? It is true that all things cannot wholly

contain You: but does this mean that they contain part of You? and do they all contain the same part at the same time? or do different parts of creation contain different parts of You—greater parts or smaller according to their own magnitude? But are there in You parts greater and smaller? Or are You not in every place at once in the totality of Your being, while yet nothing contains You wholly?

Augustine, Confessions, 1,3

28 How, O God, did You create heaven and earth? Obviously it was not in heaven or on earth that You made heaven and earth; nor in the air nor in the waters, since these belong to heaven and earth; nor did You make the universe in the universe, because there was no place for it to be made in until it was made. Nor had You any material in Your hand when You were making heaven and earth: for where should You have got what You had not yet made to use as material? What exists, save because You exist? You spoke and heaven and earth were created; in Your word You created them.

Augustine, Confessions, XI, 5

29 Thus Lord, You who do not change as things and circumstances change but are the Self-same, and the Self-same and the Self-same, Holy, Holy, Holy, Lord God Almighty—You, Lord, in the Beginning, which is from You, in Your wisdom, which is born of Your substance, made something and made it of nothing.

You created *heaven and earth*, but not of Your own substance: for in that event they would have been equal to Your only-begotten Son and hence to Yourself; and it

would have been altogether unjust that something not proceeding from You should be equal to You. But, apart from You there was no other thing existent to make them of, O God, Trinity that is One, Unity that is Three.

Therefore it was of nothing that You made heaven and earth, the great thing and the small thing: for You are almighty and good and must make all things good, the great heaven and the small earth. You were and nothing else was, and of nothing You made *heaven [the heaven of heaven] and earth*, these two, one close to You, the other close to nothing, one than which You alone are higher, the other than which nothing is lower.

Augustine, Confessions, XII, 7

30 If God is the soul of the world, and the world is as a body to Him, who is the soul, He must be one living being consisting of soul and body, and... this same God is a kind of womb of nature containing all things in Himself, so that the lives and souls of all living things are taken, according to the manner of each one's birth, out of His soul which vivifies that whole mass, and therefore nothing at all remains which is not a part of God. And if this is so, who cannot see what impious and irreligious consequences follow such as that whatever one may trample, he must trample a part of God, and in slaying any living creature, a part of God must be slaughtered? But I am unwilling to utter all that may occur to those who think of it, yet cannot be spoken without irreverence.

Augustine, City of God, IV, 12

31 There are some... who, though they do not suppose that this world is eternal, are of opinion either that this is not

the only world, but that there are numberless worlds, or that indeed it is the only one, but that it dies, and is born again at fixed intervals, and this times without number; but they must acknowledge that the human race existed before there were other men to beget them. For they cannot suppose that, if the whole world perish, some men would be left alive in the world, as they might survive in floods and conflagrations, which those other speculators suppose to be partial, and from which they can therefore reasonably argue that a few men survived whose posterity would renew the population; but as they believe that the world itself is renewed out of its own material, so they must believe that out of its elements the human race was produced, and then that the progeny of mortals sprang like that of other animals from their parents.

Augustine, City of God, XII, 11

32 As to those who are always asking why man was not created during these countless ages of the infinitely extended past, and came into being so lately that, according to Scripture, less than GOOD years have elapsed since He began to be, I would reply to them regarding the creation of man, just as I replied regarding the origin of the world to those who will not believe that it is not eternal, but had a beginning, which even Plato himself most plainly declares, though some think his statement was not consistent with his real opinion. If it offends them that the time that has elapsed since the creation of man is so short, and his years so few according to our authorities, let them take this into consideration, that nothing that has a limit is long, and that all the ages of time being finite, are very little, or indeed nothing at all, when compared to the interminable

eternity. Consequently, if there had elapsed since the creation of man, I do not say five or six, but even sixty or six hundred thousand years, or sixty times as many, or six hundred or six hundred thousand times as many, or this sum multiplied until it could no longer be expressed in numbers, the same question could still be put, "Why was he not made before?" For the past and boundless eternity during which God abstained from creating man is so great that, compare it with what vast and untold number of ages you please, so long as there is a definite conclusion of this term of time, it is not even as if you compared the minutest drop of water with the ocean that everywhere flows around the globe. For of these two, one indeed is very small, the other incomparably vast, yet both are finite; but that space of time which starts from some beginning, and is limited by some termination, be it of what extent it may, if you compare it with that which has no beginning, I know not whether to say we should count it the very minutest thing, or nothing at all.

Augustine, City of God, XII, 12

33 In vain ... do we attempt to compute definitely the years that may remain to this world, when we may hear from the mouth of the Truth that it is not for us to know this. Yet some have said that four hundred, some five hundred, others a thousand years, may be completed from the ascension of the Lord up to His final coming. But to point out how each of them supports his own opinion would take too long, and is not necessary; for indeed they use human conjectures, and bring forward nothing certain from the authority of the canonical Scriptures. But on this subject He puts aside the figures of the calculators, and

orders silence, Who says, "It is not for you to know the times, which the Father hath put in His own power."

Augustine, City of God, XVIII, 53

34 As... the world was not made by chance, but by God acting by His intellect . . . , there must exist in the divine mind a form to the likeness of which the world was made.

Aquinas, Summa Theologica, I, 15, 1

35 The universe, the things that exist now being supposed, cannot be better, on account of the most noble order given to these things by God, in which the good of the universe consists. For if any one thing were bettered, the proportion of order would be destroyed, just as if one string were stretched more than it ought to be, the melody of the harp would be destroyed. Yet God could make other things, or add something to those things that are made, and then that universe would be better.

Aquinas, Summa Theologica, I, 25, 6

36 One God produced one world by reason of His love for Himself.

Aquinas, Summa Theologica, I, 32, 1

37 Nothing except God can be from eternity. And this statement is not impossible to uphold, for... the will of God is the cause of things. Therefore things are necessary according as it is necessary for God to will them, since the necessity of the effect depends on the necessity of the cause.... Absolutely speaking, it is not necessary that God should will anything except Himself, It is not therefore necessary for God to will that the world should

always exist; but the world is eternal to the extent that God wills it to be eternal, since the being of the world depends on the will of God, as on its cause. It is not therefore necessary for the world to be always,

Aquinas, Summa Theologica, I, 46, 1

- 38 We hold by faith alone, and it cannot be proved by demonstration, that the world did not always exist. . . . The reason of this is that the newness of the world cannot be demonstrated from the world itself. For the principle of demonstration is the essence of a thing. Now everything according to the notion of its species abstracts from here and now; hence it is said that "universals are everywhere and always." Hence it cannot be demonstrated that man, or heaven, or a stone did not always exist.

Likewise neither can it be demonstrated on the part of the efficient cause, which acts by will. For the will of God cannot be investigated by reason, except as regards those things which God must will of necessity, and what He wills about creatures is not among these.... But the divine will can be manifested to man by revelation, on which faith rests. Hence that the world began to exist is an object of faith, but not of demonstration or science. And it is useful to consider this, lest any-one, presuming to demonstrate what is of faith should bring-forward reasons that are not cogent, so as to give occasion to unbelievers to laugh thinking that on such reasons we believe things that are of faith.

Aquinas, Summa Theologica, I, 46 2

- 39 As the end of a thing corresponds to its beginning, it is not possible to be ignorant of the end of things if we

know their beginning. Therefore, since the beginning of all things is something outside the universe, namely, God ... we must conclude that the end of all things is some extrinsic good. This can be proved by reason. For it is clear that good has the nature of an end; therefore, a particular end of anything consists in some particular good, while the universal end of all things is the universal good. But the universal good is that which is good of itself by virtue of its essence, which is the very essence of goodness, whereas a particular good is good by participation. Now it is manifest that in the whole created universe there is not a good which is not such by participation. Therefore that good which is the end of the whole universe must be a good outside the universe.

Aquinas, Summa Theologica, I, 103, 2

40 Not to have gain of any good unto himself, which may not be, but that his splendour might, as it glowed, declare, *I am*.

In his eternity beyond time, beyond all other comprehension, as was his pleasure, the eternal love revealed him in new loves.

Nor did he lie, as slumbering, before; for nor before nor after was the process of God's outflowing over these waters.

Form and matter, united and in purity, issued into being which had no flaw, as from a threestringed bow three arrows;

and as in glass, in amber, or in crystal, a ray so gloweth that from its coming to its pervading all, there is no interval.

Dante, Paradiso, XXIX, 13

41 Oh grace abounding, wherein I presumed to fix my look
on the eternal light so long that I consumed my sight
thereon!

Within its depths I saw ingathered, bound by love in
one volume, the scattered leaves of all the universe;

substance and accidents and their relations, as though
together fused, after such fashion that what I tell of is one
simple flame.

The universal form of this complex I think that I
beheld, because more largely, as I say this, I feel that I
rejoice.

A single moment maketh a deeper lethargy for me
than twenty and five centuries have wrought on the
emprise that erst threw Neptune in amaze at Argo's
shadow.

Dante, Paradiso, XXXIII, 82

42 Aristotle says that the movement of a body which is one
and simple is simple, and the simple movements are the
rectilinear and the circular. And of rectilinear movements,
one is upward, and the other is downward. As a
consequence, every simple movement is either toward
the centre, i.e., downward, or away from the centre, i.e.,
upward, or around the centre, i.e., circular. Now it belongs
to earth and water, which are considered heavy, to be
borne downward, i.e., to seek the centre; for air and fire,
which are endowed with lightness, move upward, i.e.,
away from the centre. It seems fitting to grant rectilinear
movement to these four elements and to give the
heavenly bodies a circular movement around the centre.
So Aristotle. Therefore, said Ptolemy of Alexandria, if the
Earth moved, even if only by its daily rotation, the
contrary of what was said above would necessarily take

place. For this movement which would traverse the total circuit of the Earth in twenty-four hours would necessarily be very headlong and of an unsurpassable velocity. Now things which are suddenly and violently whirled around are seen to be utterly unfitted for reuniting, and the more unified are seen to become dispersed, unless some constant force constrains them to stick together. And a long time ago, he says, the scattered Earth would have passed beyond the heavens, as is certainly ridiculous; and *a fortiori* so would all the living creatures and all the other separate masses which could by no means remain unshaken. Moreover, freely falling bodies would not arrive at the places appointed them, and certainly not along the perpendicular line which they assume so quickly. And we would see clouds and other things floating in the air always borne toward the west....

For these and similar reasons they say that the Earth remains at rest at the middle of the world and that there is no doubt about this. But if someone opines that the Earth revolves, he will also say that the movement is natural and not violent. Now things which are according to nature produce effects contrary to those which are violent. For things to which force or violence is applied get broken up and are unable to subsist for a long time. But things which are caused by nature are in a right condition and are kept in their best organization. Therefore Ptolemy had no reason to fear that the Earth and all things on the Earth would be scattered in a revolution caused by the efficacy of nature, which is greatly different from that of art or from that which can result from the genius of man. But why did he not feel anxiety about the world instead, whose movement must necessarily be of greater velocity, the greater the

heavens are than the Earth? Or have the heavens become so immense, because an unspeakably vehement motion has pulled them away from the centre, and because the heavens would fall if they came to rest anywhere else?

Surely if this reasoning were tenable, the magnitude of the heavens would extend infinitely. For the farther the movement is borne upward by the vehement force, the faster will the movement be, on account of the ever-increasing circumference which must be traversed every twenty-four hours: and conversely, the immensity of the sky would increase with the increase in movement. In this way, the velocity would make the magnitude increase infinitely, and the magnitude the velocity. And in accordance with the axiom of physics that *that which is infinite cannot be traversed or moved in any way*, then the heavens will necessarily come to rest.

But they say that beyond the heavens there is not any body or place or void or anything at all; and accordingly it is not possible for the heavens to move outward: in that case it is rather surprising that something can be held together by nothing. But if the heavens were infinite and were finite only with respect to a hollow space inside, then it will be said with more truth that there is nothing outside the heavens, since anything which occupied any space would be in them; but the heavens will remain immobile. For movement is the most powerful reason wherewith they try to conclude that the universe is finite.

But let us leave to the philosophers of nature the dispute as to whether the world is finite or infinite, and let us hold as certain that the Earth is held together between its two poles and terminates in a spherical surface. Why therefore should we hesitate any longer to

grant to it the movement which accords naturally with its form, rather than put the whole world in a commotion—the world whose limits we do not and cannot know? And why not admit that the appearance of daily resolution belongs to the heavens but the reality belongs to the Earth?

Copernicus, De Revolutionibus, I, 7-8

43 Pitiableness is the state of the stars, abject the lot of earth, if this high dignity of soul is denied them, while it is granted to the worm, the ant, the roach, to plants and morels; for in that case worms, roaches, moths, were more beautiful objects in nature and more perfect, inasmuch as nothing is excellent, nor precious, nor eminent, that hath not soul. But since living bodies spring from earth and sun and by them are animate, and since in the earth herbage springs up without sowing of seeds (e.g., when soil is taken out of the bowels of the earth and carried to some great elevation or to the top of a lofty tower and there exposed to the sunshine, after a little while a miscellaneous herbage springs up in it unbidden), it is not likely that they (sun and earth) can do that which is not in themselves; but they awaken souls, and consequently are themselves possessed of souls. Therefore the bodies of the globes, as being the foremost parts of the universe, to the end they might be in themselves and in their state endure, had need of souls to be conjoined to them, for else there were neither life, nor prime act, nor movement, nor union, nor order, nor coherence, nor *conactus*, nor *sympathia*, nor any generation, nor alternation of seasons, and no propagation; but all were in confusion and the entire

world lapse into chaos, and, in fine, the earth were void and dead and without any use.

William Gilbert, On the Loadstone, V, 12

44 The world ... is alone, having nothing outside, resting on itself immobile as a whole; and it alone is all things.

Kepler, Epitome of Copernican Astronomy, Bk. IV, I, 2

45 If it was Tycho Brahe's opinion concerning that bare wilderness of globes that it does not exist fruitlessly in the world but is filled with inhabitants: with how much greater probability shall we make a conjecture as to God's works and designs even for the other globes, from that variety which we discern in this globe of the Earth. For He Who created the species which should inhabit the waters, beneath which however there is no room for the air which living things draw in; Who sent birds supported on wings into the wilderness of the air; Who gave white bears and white wolves to the snowy regions of the North, and as food for the bears the whale, and for the wolves, birds' eggs; Who gave lions to the deserts of burning Libya and camels to the wide-spread plains of Syria, and to the lions an endurance of hunger, and to the camels an endurance of thirst: did He use up every art in the globe of the Earth so that He was unable, every goodness so that he did not wish, to adorn the other globes too with their fitting creatures, as either the long or short revolutions, or the nearness or removal of the sun, or the variety of eccentricities or the shine or darkness of the bodies, or the properties of the figures wherewith any region is supported persuaded?

Kepler, Harmonies of the World, V, 10

46 *Hamlet*. Indeed it goes so heavily with my disposition that this goodly frame, the earth, seems to me a sterile promontory, this most excellent canopy, the air, look you, this brave o'erhanging firmament, this majestical roof fretted with golden fire, why, it appears no other thing to me than a foul and pestilent congregation of vapours.

Shakespeare, Hamlet, II, ii, 308

47 *Ulysses*. The heavens themselves, the planets, and this centre
Observe degree, priority, and place,
Insisture, course, proportion, season, form,
Office, and custom, in all line of order;
And therefore is the glorious planet Sol
In noble eminence enthroned and sphered
Amidst the other; whose medicinable eye
Corrects the ill aspects of planets evil,
And posts, like the commandment of a king,
Sans check, to good and bad. But when the planets
In evil mixture to disorder wander,
What places and what portents! what mutiny!
What raging of the sea! shaking of earth!
Commotion in the winds! frights, changes, horrors,
Divert and crack, rend and deracinate
The unity and married calm of states
Quite from their fixure!

Shakespeare, Troilus and Cressida, I, iii, 85

48 I had rather believe all the fables in the Legend, and the Talmud, and the Alcoran, than that this universal frame is without a mind.

Bacon, Of Atheism

49 I resolved to leave all this world to their disputes, and to speak only of what would happen in a new world if God now created, somewhere in an imaginary space, matter sufficient wherewith to form it, and if He agitated in diverse ways, and without any order, the diverse portions of this matter, so that there resulted a chaos as confused as the poets ever feigned, and concluded His work by merely lending His concurrence to Nature in the usual way, leaving her to act in accordance with the laws which He had established. So, to begin with, I described this matter and tried to represent it in such a way, that it seems to me that nothing in the world could be more clear or intelligible, excepting what has just been said of God and the Soul. For I even went so far as expressly to assume that there was in it none of these forms or qualities which are so debated in the Schools, nor anything at all the knowledge of which is not so natural to our minds that none could even pretend to be ignorant of it. Further, I pointed out what are the laws of Nature, and, without resting my reasons on any other principle than the infinite perfections of God, I tried to demonstrate all those of which one could have any doubt, and to show that they are of such a nature that even if God had created other worlds, He could not have created any in which these laws would fail to be observed. After that, I showed how the greatest part of the matter of which this chaos is constituted, must in accordance with these laws, dispose and arrange itself in such a fashion as to render it similar to our heavens; and how meantime some of its parts must form an earth, some planets and comets, and some others a sun and fixed stars.

Descartes, Discourse on Method, V

50 It... occurs to me that we should not consider one single creature separately, when we inquire as to whether the works of God are perfect, but should regard all his creations together. For the same thing which might possibly seem very imperfect with some semblance of reason if regarded by itself, is found to be very perfect if regarded as part of the whole universe.

Descartes, Meditations on First Philosophy, IV

51 From the mere fact that God, i.e. a supremely perfect being, exists, it follows that if there be a world it must have been created by him.

Descartes, Objections and Replies, III

52 Those philosophers who said [that] the world, or the soul of the world, was God spake unworthily of Him, and denied His existence: for by God is understood the cause of the world; and to say the world is God is to say there is no cause of it, that is, no God.

Hobbes, Leviathan, II, 31

53 To say the world was not created, but eternal, seeing that which is eternal has no cause, is to deny there is a God.

Hobbes, Leviathan, II, 31

54 But while all men doubt, and none can determine how long the World shall last, some may wonder that it hath spun out so long and unto our days. For if the Almighty had not determin'd a fixed duration unto it, according to his mighty and merciful designments in it, if he had not

said unto it, as he did unto a part of it, hitherto shall thou go and no farther; if we consider the incessant and cutting provocations from the Earth, it is not without amazement how his patience hath permitted so long a continuance unto it, how he, who cursed the Earth in the first days of the first Man, and drowned it in the tenth Generation after, should thus lastingly contend with Flesh and yet defer the last flames.

Sir Thomas Browne, Christian Morals, III, 26

55 Think not thy time short in this World since the World it self is not long. The created World is but a small *Parenthesis* in Eternity; and a short interposition for a time between such a state of duration, as was before it and may be after it. And if we should allow of the old Tradition that the world should last Six Thousand years, it could scarce have the name of old, since the first Man lived near a sixth part thereof, and seven Methusela's would exceed its whole duration.

Sir Thomas Browne, Christian Morals, III, 29

56 The whole visible world is only an imperceptible atom in the ample bosom of nature. No idea approaches it. We may enlarge our conceptions beyond all imaginable space; we only produce atoms in comparison with the reality of things. It is an infinite sphere, the centre of which is everywhere, the circumference nowhere. In short, it is the greatest sensible mark of the almighty power of God that imagination loses itself in that thought.

Pascal, Pensées, II, 72

57 *Uriel*. I saw when at his Word the formless Mass,
This worlds material mould, came to a heap:
Confusion heard his voice, and wilde uproar
Stood rul'd, stood vast infinitude confin'd;
Till at his second bidding darkness fled,
Light shon, and order from disorder sprung:
Swift to thir several Quarters hasted then
The cumbrous Elements, Earth, Flood, Aire, Fire,
And this Ethereal quintessence of Heav'n
Flew upward, spirited with various forms,
That rowld orbicular, and turnd to Starrs
Numberless, as thou seest, and how they move;
Each had his place appointed, each his course,
The rest in circuit walles this Universe.
Look downward on that Globe whose hither side
With light from hence, though but reflected, shines;
That place is Earth the seat of Man, that light
His day, which else as th' other Hemisphere
Night would invade, but there the neighbouring Moon
(So call that opposite fair Starr) her aide
Timely interposes, and her monthly round Still ending,
still renewing through mid Heav'n,
With borrowd light her countenance triform
Hence fills and empties to enlighten the Earth,
And in her pale dominion checks the night.

Milton, Paradise Lost, III, 708

58 Let ther be Light, said God, and forthwith Light
Ethereal, first of things, quintessence pure
Sprung from the Deep, and from her Native East
To journie through the aide gloom began,
Sphear'd in a radiant Cloud, for yet the Sun
Was not; shee in a cloudie Tabernacle

Sojourn'd the while. God saw the Light was good;
And light from darkness by the Hemisphere
Divided: Light the Day, and Darkness Night
He nam'd. Thus was the first Day Eev'n and Morn.

Milton, Paradise Lost, VII, 243

59 *Michael*. So shall the World goe on,
To good malignant, to bad men benigne,
Under her own waight groaning, till the day
Appeer of respiration to the just,
And vengeance to the wicked, at return
Of him so lately promiss'd to thy aid,
The Womans seed, obscurely then foretold,
Now amplier known thy Saviour and thy Lord,
Last in the Clouds from Heav'n to be reveald
In glory of the Father, to dissolve
Satan with his perv'erted World, then raise
From the conflagrant mass, purg'd and refin'd,
New Heav'ns, new Earth, Ages of endless date
Founded in righteousness and peace and love,
To bring forth fruits Joy and eternal Bliss.

Milton, Paradise Lost, XII, 537

60 Things could have been produced by God in no other manner and in no other order than that in which they have been produced. All things have necessarily followed from the given nature of God, and from the necessity of His nature have been determined to existence and action in a certain manner. If, therefore, things could have been of another nature, or could have been determined in another manner to action, so that the order of nature would have been different, the nature of God might then

be different to that which it now is, and hence that different nature would necessarily exist, and there might consequently be two or more Gods, which is absurd. Therefore, things could be produced by God in no other manner and in no other order than that in which they have been produced.

Spinoza, Ethics, I, Prop. 33; Demonst.

61 It seems probable to me that God in the beginning formed matter in solid, massy, hard, impenetrable, moveable particles, of such sizes and figures, and with such other properties, and in such proportion to space, as most conduced to the end for which he formed them; and that these primitive particles being solids, are incomparably harder than any porous bodies compounded of them; even so very hard as never to wear or break in pieces; no ordinary power being able to divide what God himself made one in the first creation. While the particles continue entire, they may compose bodies of one and the same nature and texture in all ages; but should they wear away, or break in pieces, the nature of things depending on them would be changed. Water and earth, composed of old worn particles and fragments of particles, would not be of the same nature and texture now, with water and earth composed of entire particles in the beginning. And, therefore, that Nature may be lasting, the changes of corporeal things are to be placed only in the various separations and new associations and motions of these permanent particles.

Newton, Optics, III, 1

62 By the help of these principles [of motion], all material things seem to have been composed of the hard and solid particles above mentioned, variously associated in the first creation by the counsel of an intelligent agent. For it became Him who created them to set them in order. And if He did so, it is unphilosophical to seek for any other origin of the world, or to pretend that it might arise out of a chaos by the mere laws of Nature; though, being once formed, it may continue by those laws for many ages. For while comets move in very eccentric orbs in all manner of positions blind fate could never make all the planets move one and the same way in orbs concentric, some inconsiderable irregularities excepted, which may have risen from the mutual actions of comets and planets upon one another, and which will be apt to increase, till this system wants a reformation. Such a wonderful uniformity in the planetary system must be allowed the effect of choice.

Newton, Optics, III, 1

63 Since space is divisible *in infinitum*, and matter is not necessarily in all places, it may be also allowed that God is able to create particles of matter of several sizes and figures, and in several proportions to space, and perhaps of different densities and forces, and thereby to vary the laws of Nature, and make worlds of several sorts in several parts of the Universe. At least, I see nothing of contradiction in all this.

Newton, Optics, III, 1

64 Although the world is not metaphysically necessary, so that its opposite involves a contradiction or logical

absurdity, it is nevertheless physically necessary' or so determined that its opposite involves imperfection or moral absurdity. And as possibility is the principle of essence, so perfection or degree of essence (through which more things are compossible the greater it is) is the principle of existence. Whence at the same time it is manifest how the Author of the world is free, although He does all things determinately, for He acts from a principle of wisdom or perfection. Indifference springs from ignorance, and the wiser a man is the more is he determined towards that which is most perfect.

Leibniz, On the Ultimate Origination of Things

65 It follows from the supreme perfection of God that in producing the universe He has chosen the best possible plan, in which there is the greatest variety along with the greatest order; ground, place, time being as well arranged as possible; the greatest effect produced by the simplest ways; the most power, knowledge, happiness and goodness in created things that the universe allowed. For as all possible things in the understanding of God claim existence in proportion to their perfections, the result of all these claims must be the most perfect actual world that is possible. And apart from this it would not be possible to give a reason why things have gone thus rather than otherwise.

Leibniz, Principles of Nature and of Grace, 10

66 If we would emancipate ourselves from vulgar notions, and raise our thoughts, as far as they would reach, to a closer contemplation of things, we might be able to aim at some dim and seeming conception how *matter* might

at first be made, and begin to exist, by the power of that eternal first Being: but to give beginning and being to a spirit would be found a more inconceivable effect of omnipotent power. But this being what would perhaps lead us too far from the notions on which the philosophy now in the world is built, it would not be pardonable to deviate so far from them; or to inquire, so far as grammar itself would authorize, if the common settled opinion opposes it: especially in this place, where the received doctrine serves well enough to our present purpose, and leaves this past doubt, that the creation or beginning of any one *substance* out of nothing being once admitted, the creation of all other but the *Creator* himself, may, with the same case, be supposed.

Locke, Concerning Human Understandings Bk. IV, X, 18

67 We must not imagine that the inexplicably fine machine of an animal or vegetable costs the great Creator any more pains or trouble in its production than a pebble does; nothing being more evident than that an Omnipotent Spirit can indifferently produce everything by a mere *fiat* or act of His will. Hence, it is plain that the splendid profusion of natural things should not be interpreted weakness or prodigality in the agent who produces them, but rather be looked on as an argument of the riches of His power.

Berkeley, Principles of Human Knowledge, 152

68 See, thro' this air, this ocean, and this earth,
All matter quick, and bursting into birth.
Above, how high progressive life may go!
Around, how wide! how deep extend below!

Vast chain of being, which from God began,
Natures aethereal, human, angel, man,
Beast, bird, fish, insect! what no eye can see,
No glass can reach! from Infinite to thee,
From thee to Nothing!—On superior pow'rs
Were we to press, inferior might on ours:
Or in the full creation leave a void,
Where, one step broken, the great scale's destroy'd:
From Nature's chain whatever link you strike,
Tenth or ten thousandth, breaks the chain alike.

And if each system in gradation roll,
Alike essential to th' amazing whole;
The least confusion but in one, not all
That system only, but the whole must fall.
Let Earth unbalanc'd from her orbit fly,
Planets and Suns run lawless thro' the sky,
Let ruling Angels from their spheres be hurl'd,
Being on being wreck'd, and world on world,
Heav'n's whole foundations to their centre nod,
And Nature tremble to the throne of God.

Pope, Essay on Man, Epistle I, 233

69 The world may indeed be considered as a vast machine, in which the great wheels are originally set in motion by those which are very minute, and almost imperceptible to any but the strongest eyes.

Fielding, Tom Jones, V, 4

70 There are many philosophers who, after an exact scrutiny of all the phenomena of nature, conclude, that the *whole*, considered as one system, is, in every period of its existence, ordered with perfect benevolence; and that

the utmost possible happiness will, in the end, result to all created beings, without any mixture of positive or absolute ill or misery. Every physical ill, say they, makes an essential part of this benevolent system, and could not possibly be removed, even by the Deity himself, considered as a wise agent, without giving entrance to greater ill, or excluding greater good, which will result from it. From this theory, some philosophers, and the ancient Stoics among the rest, derived a topic of consolation under all afflictions, while they taught their pupils that those ills under which they laboured were, in reality, goods to the universe; and that to an enlarged view, which could comprehend the whole system of nature, every event became an object of Joy and exultation. But though this topic be specious and sublime, it was soon found in practice weak and ineffectual. You would surely more irritate than appease a man lying under the racking pains of the gout by preaching up to him the rectitude of those general laws, which produced the malignant humours in his body, and led them through the proper canals, to the sinews and nerves, where they now excite such acute torments. These enlarged views may, for a moment, please the imagination of a speculative man, who is placed in ease and security; but neither can they dwell with constancy on his mind, even though undisturbed by the emotions of pain or passion; much less can they maintain their ground when attacked by such powerful antagonists.

Hume, Concerning Human Understanding, VIII, 79

- 71 Pangloss taught metaphysico-theologo-cosmoloni-gology. He proved most admirably, that there could not be an effect without a cause; that, in this best of possible

worlds, my Lord the Baron's castle was the most magnificent of castles, and my Lady the best of Baronesses that possibly could be.

"It is demonstrable," said he, "that things cannot be otherwise than they are: for all things having been made for some end, they must necessarily be for the best end. Observe well, that the nose has been made for carrying spectacles; therefore we have spectacles. The legs are visibly designed for stockings, and therefore we have stockings. Stones have been formed to be hewn, and make castles; therefore my Lord has a very fine castle; the greatest baron of the province ought to be the best accommodated. Swine were made to be eaten; therefore we eat pork all the year round: consequently, those who have merely asserted that all is good have said a very foolish thing; they should have said all is the best possible."

Voltaire, Candide, I

72 The day following, having found some provisions, in rummaging through the rubbish, they recruited their strength a little. Afterwards, they employed themselves like others, in administering relief to the inhabitants that had escaped from death. Some citizens that had been relieved by them gave them as good a dinner as could be expected amidst such a disaster. It is true that the repast was mournful, and the guests watered their bread with their tears. But Pangloss consoled them by the assurance that things could not be otherwise; "For," said he, "all this must necessarily be for the best. As this volcano is at Lisbon, it could not be elsewhere; as it is impossible that things should not be what they are, as all is good."

A little man clad in black, who belonged to the inquisition, and sat at his side, took him up very politely, and said: "It seems, sir, you do not believe in original sin; for if all is for the best, then there has been neither fall nor punishment."

"I most humbly ask your excellency's pardon," answered Pangloss, still more politely; "for the fall of man and the curse necessarily entered into the best of worlds possible." "Then, sir, you do not believe there is liberty," said the inquisitor. "Your excellency will excuse me," said Pangloss; "liberty can consist with absolute necessity; for it was necessary we should be free; because, in short, the determinate will—"

Pangloss was in the middle of his proposition, when the inquisitor made a signal with his head to the tall armed footman in a cloak.

Voltaire, Candide, V

73 Candide, affrighted, interdicted, astonished, all bloody, all panting, said to himself: "If this is the best of possible worlds, what then are the rest?"

Voltaire, Candide, VI

74 Why, as we are so miserable, have we imagined that not to be is a great ill, when it is clear that it was not an ill not to be before we were born?... Why do we exist? why is there anything?

Voltaire, Philosophical Dictionary: Why?

75 Every beginning is in time, and all limits to extension are in space. But space and time are in the world of sense. Consequently phenomena *in the world* are conditionally

limited, but *the world* itself is not limited, either conditionally or unconditionally.

Kant, Critique of Pure Reason, Transcendental Dialectic

76 Tiger! Tiger! burning bright
In the forests of the night,
What immortal hand or eye
Could frame thy fearful symmetry?...
When the stars threw down their spears,
And water'd heaven with their tears,
Did he smile his work to see?
Did he who made the Lamb make thee?

Blake, The Tiger

77 *Faust*. 'Tis written: "In the beginning was the Word!"
Here now I'm balked! Who'll put me in accord?
It is impossible, the *Word* so high to prize,
I must translate it otherwise
If I am rightly by the Spirit taught.
'Tis written: In the beginning was the *Thought*!
Consider well that line, the first you see,
That your pen may not write too hastily!
Is it then *Thought* that works, creative, hour by hour?
Thus should it stand: In the beginning was the *Power*!
Yet even while I write this word, I falter,
For something warns me, this too I shall alter.
The Spirit's helping me! I see now what I need
And write assured: In the beginning was the *Deed*!

Goethe, Faust, 1,1224

78 It is not impossible that to some infinitely superior being
the whole universe may be as one plain, the distance

between planet and planet being only as the pores in a grain of sand, and the spaces between system and system no greater than the intervals between one grain and the grain adjacent.

Coleridge, Omniana

79 This world, after all our science and sciences, is still a miracle; wonderful, inscrutable, magical and more, to whosoever will think of it.

Carlyle, The Hero as Divinity

80 There is no chance and no anarchy in the universe. All is system and gradation. Every god is there sitting in his sphere. The young mortal enters the hall of the firmament; there is he alone with them alone, they pouring on him benedictions and gifts, and beckoning him up to their thrones. On the instant, and incessantly, fall snowstorms of illusions. He fancies himself in a vast crowd which sways this way and that and whose movement and doings he must obey: he fancies himself poor, orphaned, insignificant. The mad crowd drives hither and thither, now furiously commanding this thing to be done, now that. What is he that he should resist their will, and think or act for himself? Every moment new changes and new showers of deceptions to baffle and distract him. And when, by and by, for an instant, the air clears and the cloud lifts a little, there are the gods still sitting around him on their thrones—they alone with him alone.

Emerson, Illusions

81 To go into solitude, a man needs to retire as much from his chamber as from society. I am not solitary whilst I read and write, though nobody is with me. But if a man would be alone, let him look at the stars. The rays that come from those heavenly worlds will separate between him and what he touches. One might think the atmosphere was made transparent with this design, to give man, in the heavenly bodies, the perpetual presence of the sublime. Seen in the streets of cities, how great they are! H the stars should appear one night in a thousand years, how would men believe and adore; and preserve for many generations the remembrance of the city of God which had been shown! But every night come out these envoys of beauty, and light the universe with their admonishing smile.

Emerson, Nature, I

82 Many an aeon moulded earth before her highest, man, was born,
Many an aeon loo may pass when earth is man-less and forlorn.

Tennyson, Locksley Hall Sixty Years After, 205

83 This fine old world of ours is but a child
Yet in the go-can. Patience! Give it time
To learn its limbs; there is a hand that guides.

Tennyson, The Princess, Conclusion, 77

84 This may not be the best of all possible worlds, but to say that it is the worst is mere petulant nonsense.

T. H. Huxley, Struggle for Existence in Human Society

85 The year's at the spring
And day's at the morn;
Morning's at seven;
The hillside's dew-pearled;
The lark's on the wing;
The snail's on the thorn:
God's in his heaven—
All's right with the world!

Browning, Pippa Passes, I

86 The bodies and beings on the surface of our earth express the harmonious relation of the cosmic conditions of our planet and our atmosphere with the beings and phenomena whose existence they permit. Other cosmic conditions would necessarily make another world appear in which all the phenomena would occur which found in it their necessary conditions, and from which would disappear all that could not develop in it. But no matter what infinite varieties of phenomena we conceive on the earth, by placing ourselves in thought in all the cosmic conditions that our imagination can bring to birth, we are still forced to admit that this would all take place according to the laws of physics, chemistry and physiology, which have existed without our knowledge from all eternity; and that whatever happens, nothing is created by way either of force or of matter; that only different relations will be produced and through them creation of new beings and phenomena.

Claude Bernard, Experimental Medicine, II, 1

87 *Ivan*. "I tell you that I accept God simply'. But you must note this: if God exists and if He really did create the

world, then, as we all know, He created it according to the geometry of Euclid and the human mind with the conception of only three dimensions in space. Yet there have been and still are geometricians and philosophers, and even some of the most distinguished, who doubt whether the whole universe, or to speak more widely, the whole of being, was only created in Euclid's geometry; they even dare to dream that two parallel lines, which according to Euclid can never meet on earth, may meet somewhere in infinity. I have come to the conclusion that, since I can't understand even that, I can't expect to understand about God. I acknowledge humbly that I have no faculty for settling such questions, I have a Euclidian earthly mind, and how could I solve problems that are not of this world? And I advise you never to think about it either, my dear Alyosha, especially about God, whether He exists or not. All such questions are utterly inappropriate for a mind created with an idea of only three dimensions. And so I accept God and am glad to, and what's more, I accept His wisdom, His purpose—which are utterly beyond our ken; I believe in the underlying order and the meaning of life; I believe in the eternal harmony in which they say we shall one day be blended. I believe in the Word to Which the universe is striving, and Which Itself was 'with God,' and Which Itself is God and so on, and so on, to infinity. There are all sorts of phrases for it. I seem to be on the right path, don't I? Yet would you believe it, in the final result I don't accept this world of God's and, although I know it exists, I don't accept it at all. It's not that I don't accept God, you must understand, it's the world created by Him I don't and cannot accept. Let me make it plain. I believe like a child that suffering will be healed and made up for, that all the

humiliating absurdity of human contradictions will vanish like a pitiful mirage, like the despicable fabrication of the impotent and infinitely small Euclidian mind of man, that in the world's finale, at the moment of eternal harmony, something so precious will come to pass that it will suffice for all hearts, for the comforting of all resentments, for the atonement of all the crimes of humanity, of all the blood they've shed; that it will make it not only possible to forgive but to justify all that has happened with men—but though all that may come to pass, I don't accept it. I won't accept it. Even if parallel lines do meet and I see it myself, I shall see it and say that they've met, but still I won't accept it. That's what's at the root of me, Alyosha; that's my creed. I am in earnest in what I say. I began our talk as stupidly as I could on purpose, but I've led up to my confession, for that's all you want. You didn't want to hear about God, but only to know what the brother you love lives by. And so I've told you."

Ivan concluded his long tirade with marked and unexpected feeling.

Dostoevsky, Brothers Karamazov, Pt. II, V, 3

88 *Father Zossima*. "All creation and all creatures, every leaf is striving to the Word, singing glory to God, weeping to Christ, unconsciously accomplishing this by the mystery of their sinless life. Yonder," said I, "in the forest wanders the dreadful bear, fierce and menacing, and yet innocent in it." And I told him how once a bear came to a great saint who had taken refuge in a tiny cell in the wood. And the great saint pitied him, went up to him without fear and gave him a piece of bread. "Go along," said he, "Christ be with you," and the savage beast walked away meekly and obediently, doing no harm. And the lad was

delighted that the bear had walked away without hurting the saint, and that Christ was with him too. "Ah," said he, "how good that is, how good and beautiful is all God's work!" He sat musing softly and sweetly. I saw he understood. And he slept beside me a light and sinless sleep. May God bless youth! And I prayed for him as I went to sleep. Lord, send peace and light to Thy people!

Dostoevsky, Brothers Karamazov, Pt. II, VI, I

89 Pierre went up to the fire, ate some roast horseflesh, lay down with his back to the fire, and immediately fell asleep. He again slept as he had done at Mozhaysk after the battle of Borodino.

Again real events mingled with dreams and again someone, he or another, gave expression to his thoughts, and even to the same thoughts that had been expressed in his dream at Mozhaysk.

"Life is everything. Life is God. Everything changes and moves and that movement is God. And while there is life there is joy in consciousness of the divine. To love life is to love God. Harder and more blessed than all else is to love this life in one's sufferings, in innocent sufferings."

"Karataev!" came to Pierre's mind.

And suddenly he saw vividly before him a long-forgotten, kindly old man who had given him geography lessons in Switzerland. "Wait a bit," said the old man, and showed Pierre a globe. This globe was alive—a vibrating ball without fixed dimensions. Its whole surface consisted of drops closely pressed together, and all these drops moved and changed places, sometimes several of them merging into one, sometimes one dividing into many. Each drop tried to spread out and occupy as much space as possible, but others striving to do the same

compressed it, sometimes destroyed it, and sometimes merged with it.

"That is life," said the old teacher.

"How simple and clear it is," thought Pierre. "How is it I did not know it before?"

"God is in the midst, and each drop tries to expand so as to reflect Him to the greatest extent And it grows, merges, disappears from the surface, sinks to the depths, and again emerges. There now, Karataev has spread out and disappeared. Do you understand, my child?" said the teacher.

"Do you understand, damn you?" shouted a voice, and Pierre woke up.

Tolstoy, War and Peace, XIV, 15

90 Away with those wearisomely hackneyed terms Optimism and Pessimism! For the occasion for using them becomes less and less from day to day, only the chatterboxes still find them so absolutely necessary. For why in all the world should any one wish to be an optimist unless he had a God to defend who *must* have created the best of worlds if he himself be goodness and perfection,—what thinker, however, still needs the hypothesis of a God? But every occasion for a pessimistic confession of faith is also lacking when one has no interest in being annoyed at the advocates of God (the theologians, or the theologising philosophers), and in energetically defending the opposite view, that evil reigns, that pain is greater than pleasure, that the world is a bungled piece of work, the manifestation of an ill-will to life. But who still bothers about the theologians now—except the theologians? Apart from all theology and its contentions, it is quite clear that the world is not good and not bad (to say

nothing of its being the best or the worst), and that the terms "good" and "bad" have only significance with respect to man, and indeed, perhaps, they are not justified even here in the way they are usually employed; in any case we must get rid of both the calumniating and the glorifying conception of the world.

Nietzsche, Human, All-Too-Human, 28

91 What at bottom is meant by calling the universe many or by calling it one?

Pragmatically interpreted, pluralism or the doctrine that it is many means only that the sundry parts of reality *may be externally related*. Everything you can think of, however vast or inclusive, has on the pluralistic view a genuinely 'external' environment of some sort or amount. Things are 'with' one another in many ways, but nothing includes everything, or dominates over everything. The word 'and' trails along after every sentence. Something always escapes. 'Ever not quite' has to be said of the best attempts made anywhere in the universe at attaining all-inclusiveness. The pluralistic world is thus more like a federal republic than like an empire or a kingdom. However much may be collected, however much may report itself as present at any effective centre of consciousness or action, something else is self-governed and absent and unreduced to unity.

Monism, on the other hand, insists that when you come down to reality as such, to the reality of realities, everything is present to *everything* else in one vast instantaneous co-implicated completeness—nothing can in *any* sense, functional or substantial, be really absent from anything else, all things interpenetrate and telescope together in the great total conflux.

William James, A Pluralistic Universe, VIII

92 There is a hideous fatalism about it [the Darwinian process], a ghastly and damnable reduction of beauty and intelligence, of strength and purpose, of honor and aspiration, to such casually picturesque changes as an avalanche may make in a mountain landscape, or a railway accident in a human figure. To call this Natural Selection is a blasphemy, possible to many for whom Nature is nothing but a casual aggregation of inert and dead matter, but eternally impossible to the spirits and souls of the righteous. If it be no blasphemy, but a truth of science, then the stars of heaven, the showers and dew, the winter and summer, the fire and heat, the mountains and hills, may no longer be called to exalt the Lord with us by praise: their work is to modify all things by blindly starving and murdering everything that is not lucky enough to survive in the universal struggle for hogwash.

Shaw, Back to Matuselah, Pref.

93 The riddle of the universe is not so simple. There is the aspect of permanence in which a given type of attainment is endlessly repeated for its own sake: and there is the aspect of transition to other things—it may be of higher worth, and it may be of lower worth. Also there are its aspects of struggle and of friendly help. But romantic ruthlessness is no nearer to real politics, than is romantic self-abnegation.

Whitehead, Science and the Modern World, VI

94 The universe is an assemblage of solar systems which we have every reason to believe analogous to our own. No

doubt they are not absolutely independent of one another. Our sun radiates heat and light beyond the farthest planet, and, on the other hand, our entire solar system is moving in a definite direction as if it were drawn. There is, then, a bond between the worlds. But this bond may be regarded as infinitely loose in comparison with the mutual dependence which unites the parts of the same world among themselves; so that it is not artificially, for reasons of mere convenience, that we isolate our solar system: nature itself invites us to isolate it. As living beings, we depend on the planet on which we are, and on the sun that provides for it, but on nothing else. As thinking beings, we may apply the laws of our physics to our own world, and extend them to each of the worlds taken separately; but nothing tells us that they apply to the entire universe, nor even that such an affirmation has any meaning; for the universe is not made, but is being made continually. It is growing, perhaps indefinitely, by the addition of new worlds.

Bergson, Creative Evolution, III

95 The world is everything that is the case.

The world is the totality of facts, not of things.

The world is determined by the facts, and by these being *all* the facts.

For the totality of facts determines both what is the case, and also all that is not the case.

The facts in logical space are the world.

The world divides into facts.

Any one can either be the case or not be the case, and everything else remain the same.

Wittgenstein, Tractatus Logico-Philosophicus, 1-1.21

96 Not how the world is, is the mystical, but that it is.

Wittgenstein, Tractatus Logico-Philosophicus, 6.44

Chapter 20

RELIGION

Chapter 20 is divided into fifteen sections: 20.1 The Distinguishing Features of Religion, 20.2 Judaism, 20.3 Christianity, 20.4 Church, 20.5 God, 20.6 Gods and Goddesses, 20.7 Angels and Devils, 20.8 Worship and Service, 20.9 Heresy and Unbelief, 20.10 Prophecy, 20.11 Miracles, 20.12 Superstition, 20.13 Sin and Temptation, 20.14 Redemption and Salvation, and 20.15 Heaven and Hell.

Religion is one of the two largest chapters in this book, the other being a chapter to which it is intimately related—Chapter 9 on Ethics. It might have had an even larger number of sections had we not allocated certain topics or themes to other chapters. We placed the treatment of religious faith in Chapter 6 on Knowledge, Section 6.5 on Opinion, Belief, and Faith. In Chapter 15 on History, we placed discussions of predestination and providence in Section 15.3 on Fate, Fortune, and Destiny. Quotations dealing with the relation of the world to God and its coming to be through divine creation will be found in Section 19.8 on The Universe or Cosmos in Chapter 19 on Nature and the Cosmos; similarly, quotations dealing with man's relation to God or the gods will be found in the opening section of Chapter I on Man. The treatment of sacred or dogmatic theology is associated with the treatment of natural theology in Section 17.1 on Philosophy and Philosophers.

Extensive as it is, both in number of topics covered and the quantity of quotations collected under them, this chapter remains inadequate in its representation of religious thought and theological speculation in the Western tradition. Just as we have eschewed including the technical treatment of certain themes or problems in other fields, such as economics or mathematics, so here we have not included the highly subtle and technical discussion of certain subjects or problems in theology, such as grace and free will, the divine attributes, the problem of evil, the sacraments, immortality and the resurrection of the body, and so on. However, what is presented here is an illustrative sampling of what has been said on a fairly large number of major themes in the sphere of Western religion. In addition to being limited to the West, the materials here are also limited in time, for they are not representative of some new currents in both theology and the philosophy of religion that have emerged in the last fifty years.

The first three sections of the chapter deal with the nature and traits of religion and with two of the three great religions of the West—Judaism and Christianity. Discussion of Mohammedanism and of the Muslim religious community does not occur in the books from which we have drawn quotations. Section 20.4 treats the central religious institution—the organized religious community, whether it be called church, temple, or synagogue. Closely related to Section 20.1 on The Distinguishing Features of Religion is Section 20.12 on Superstition: together they attempt to draw the line between religion and its counterfeit.

Section 20.5 on God and Section 20.6 on Gods and Goddesses, together with Section 20.7 on Angels and Devils, deal with subjects that have inspired the fancy of the poets as well as elicited the speculations and arguments of the

philosophers and theologians. This is true also of Heaven and Hell, treated in Section 20,15.

While not exhaustive of the themes that might have been treated, the remaining sections—20.8 on Worship and Service, 20.9 on Heresy and Unbelief, 20.10 on Prophecy, 20.11 on Miracles, 20.13 on Sin and Temptation, and 20.14 on Redemption and Salvation —represent important topics or problems in Western religious thought and life.

As pointed out at the beginning, the reader will find that Chapter 9 on Ethics covers matters that are also covered here, though in a different context, especially its Sections 9.1, 9.3, 9.5, 9.6, and 9.8. Other cross-references will be pointed out in the opening texts that preface particular sections of this chapter.

...

20.1 The Distinguishing Features of Religion

The religions represented here, limited as they are by the range of the books from which our quotations are drawn, are those reflected in the writings of classical antiquity and in the Old and the New Testament. In addition to the contrast between polytheism and monotheism, the Greek and Roman religions differ from Judaism and Christianity in another crucial respect: the latter are, as they are so often called, "religions of the book," that is, religions which rest their faith upon the word of God as that is revealed to man in Holy Writ.

There is still another difference that is indicated in certain passages quoted below: the pagan attitude toward religion was one of tolerance toward a diversity of creeds; it accepted religious pluralism; but Judaism and Christianity introduced into the world the notion of "the one true religion" and, with it, an intolerance of infidels. This fact is commented on adversely by those who see in religious intolerance one of the most baneful sources of hate and hostility among peoples. The quotations also include satirical diatribes against the abuses of religion as well as attacks that fail to recognize the difference between religion and its perversions and argue for its total rejection or eradication.

The treatment here of the distinguishing features of religion includes comment on the roots or seeds of religion; the institution of state religions and the role that religion plays in society and politics; the distinction between organized or institutionalized religion and humanistic or personal religions; and the psychological aspects of religious experience and the psychogenesis of the religious impulse. It also involves discussion of man's relation to God or the gods—his worship and fear of the divine, his knowledge of God, his trust in or reliance on deity. The reader will find these matters treated also in other sections of this chapter, especially sections 20.2, 20.3, and 20.8. The discussion of man's knowledge of God and of religious faith or belief will be found in Chapter 6 on Knowledge, especially Section 6.5 on Opinion, Belief, and Faith; and for the consideration of theology as an organized body of knowledge, the reader should consult Section 17.1 on Philosophy and Philosophers.

■ ■ ■

- 1 Man doth not live by bread only, but by every word that proceedeth out of the mouth of the Lord doth man live.

Deuteronomy 8:3

- 2 A scrupulous fear of the gods, is the very thing which keeps the Roman commonwealth together. To such an extraordinary height is this carried among them, both in private and public business, that nothing could exceed it. Many people might think this unaccountable; but in my opinion their object is to use it as a check upon the common people. If it were possible to form a state wholly of philosophers, such a custom would perhaps be unnecessary. But seeing that every multitude is fickle, and full of lawless desires, unreasoning anger, and violent passion, the only resource is to keep them in check by mysterious terrors and scenic effects of this sort. Wherefore, to my mind, the ancients were not acting without purpose or at random, when they brought in among the vulgar those opinions about the gods, and the belief in the punishments in Hades: much rather do I think that men nowadays are acting rashly and foolishly in rejecting them.

Polybius, Histories, VI, 56

- 3 And when the tempter came to him, he said, If thou be the Son of God, command that these stones be made bread.
But he answered and said, It is written, Man shall not live by bread alone, but by every word that proceedeth out of the mouth of God.

Matthew 4:3—4

- 4 Neither do men put new wine into old bottles: else the bottles break, and the wine runneth out, and the bottles perish: but they put new wine into new bottles, and both are preserved.

Matthew 9:17

- 5 Pure religion and undefiled before God and the Father is this, To visit the fatherless and widows in their affliction, and to keep himself unspotted from the world.

James 1:27

- 6 Numa . . . wished that his citizens should neither see nor hear any religious service in a perfunctory and inattentive manner, but, laying aside all other occupations, should apply their minds to religion as to a most serious business.

Plutarch, Numa Pompilius

- 7 The first honourable office [Aemilius Paulus] aspired to was that of aedile, which he carried against twelve competitors of such merit that all of them in process of time were consuls. Being afterwards chosen into the number of priests called augurs, appointed amongst the Romans to observe and register divinations made by the flight of birds or prodigies in the air, he so carefully studied the ancient customs of his country, and so thoroughly understood the religion of his ancestors, that this office, which was before only esteemed a title of honour and merely upon that account sought after, by his means rose to the rank of one of the highest arts, and gave a confirmation to the correctness of the definition,

which some philosophers have given of religion, that it is the science of worshipping the gods.

Plutarch, Aemilius Paulus

- 8 So much were all things at Rome made to depend upon religion; they would not allow any contempt of the omens and the ancient rites, even though attended with the highest success, thinking it to be of more importance to the public safety that the magistrates should reverence the gods, than that they should overcome their enemies.

Plutarch, Marcellus

- 9 What folly ... or rather what madness, to submit ourselves through any sentiment of religion to demons, when it belongs to the true religion to deliver us from that depravity which makes us like to them!

Augustine, City of God, VIII, 17

- 10 The true religion commands us to put away all disquietude of heart, and agitation of mind, and also all commotions and tempests of the soul.

Augustine, City of God, VIII, 17

- 11 It is, if I may say so, by spiritually embracing Him that the intellectual soul is filled and impregnated with true virtues. We are enjoined to love this good with all our heart, with all our soul, with all our strength. To this good we ought to be led by those who love us, and to lead those we love. Thus are fulfilled those two commandments on which hang all the law and the prophets: "Thou shall love the Lord thy God with all thy heart, and with all thy mind, and with all thy soul"; and

"Thou shall love thy neighbour as thyself," For, that man might be intelligent in his self-love, there was appointed for him an end to which he might refer all his actions, that he might be blessed. For he who loves himself wishes nothing else than this. And the end set before him is "to draw near to God." And so, when one who has this intelligent self-love is commanded to love his neighbour as himself, what else is enjoined than that he shall do all in his power to commend to him the love of God? This is the worship of God, this is true religion, this right piety, this the service due to God only.

Augustine, City of God, X, 3

- 12 Religion has two kinds of acts. Some are its proper and immediate acts, which it elicits, and by which man is directed to God alone, for instance, sacrifice, adoration and the like. But it has other acts, which it produces through the medium of the virtues which it commands, directing them to the honor of God, because the virtue which is concerned with the end, commands the virtues which are concerned with the means. Accordingly *to visit the fatherless and widows in their tribulation* is an act of religion as commanding and an act of mercy as eliciting; and *to keep oneself unspotted from this world* is an act of religion as commanding, but of temperance or of some similar virtue as eliciting.

Aquinas, Summa Theologica, II-II, 81, 1

- 13 Religion directs man to God not as its object but as its end.

Aquinas, Summa Theologica, II-II, 81, 5

14 Religion is not faith, but a confession of faith by outward signs.

Aquinas, Summa Theologica, II-II, 94, 1

15 He who enters religion does not make profession to be perfect, but he professes to endeavour to attain perfection; even as he who enters the schools does not profess to have knowledge, but to study in order to acquire knowledge.

Aquinas, Summa Theologica, II-II, 186, 2

16 When April with his showers sweet with fruit
The drought of March has pierced unto the root
And bathed each vein with liquor that has power
To generate therein and sire the flower;
When Zephyr also has, with his sweet breath,
Quickened again, in every holt and heath,
The tender shoots and buds, and the young sun
Into the Ram one half his course has run,
And many little birds make melody
That sleep through all the night with open eye
(So Nature pricks them on to ramp and rage)—
Then do folk long to go on pilgrimage,
And palmers to go seeking out strange strands,
To distant shrines well known in sundry lands.
And specially from every shire's end
Of England they to Canterbury wend,
The holy blessed martyr there to seek
Who helped them when they lay so ill and weak.

Chaucer, Canterbury Tales. The Prologue

- 17 I think that the practice I see is bad, of trying to strengthen and support our religion by the good fortune and prosperity of our enterprises. Our belief has enough other foundations; it does not need events to authorize it.

Montaigne, Essays, I, 32, We Should Meddle Soberly

- 18 Of all the ancient human opinions concerning religion, that one, it seems to me, was most probable and most excusable which recognized God as an incomprehensible power, origin and preserver of all things, all goodness, all perfection, accepting and taking in good part the honor and reverence that human beings rendered him, under whatever aspect, under whatever name, in whatever manner.

Montaigne, Essays, II, 12, Apology for Raymond Sebond

- 19 O God, what an obligation do we not have to the benignity of our sovereign creator for having freed our belief from the folly of those vagabond and arbitrary devotions, and having based it on the eternal foundation of his holy word?

Montaigne, Essays, II, 12, Apology for Raymond Sebond

- 20 Seeing there are no signs nor fruit of religion but in man only, there is no cause to doubt but that the seed of religion is also only in man; and consisteth in some peculiar quality, or at least in some eminent degree thereof, not to be found in other living creatures.

Hobbes, Leviathan, I, 12

- 21 In these four things, opinion of ghosts, ignorance of second causes, devotion towards what men fear, and

taking of things casual for prognostics, consisteth the natural seed of religion; which, by reason of the different fancies, judgements, and passions of several men, hath grown up into ceremonies so different that those which are used by one man are for the most part ridiculous to another.

For these seeds have received culture from two sorts of men. One sort have been they that have nourished and ordered them, according to their own invention. The other have done it by God's commandment and direction. But both sorts have done it with a purpose to make those men that relied on them the more apt to obedience, laws, peace, charity, and civil society. So that the religion of the former sort is a part of *human politics*; and teacheth part of the duty which earthly kings require of their subjects. And the religion of the latter sort is *divine politics*; and containeth precepts to those that have yielded themselves subjects in the kingdom of God. Of the former sort were all the founders of Commonwealths, and the lawgivers of the Gentiles: of the latter sort were Abraham, Moses, and our blessed Saviour, by whom have been derived unto us the laws of the kingdom of God.

Hobbes, Leviathan, I, 12

22 Persecution is a bad and indirect way to plant Religion.

Sir Thomas Browne, Religio Medici, I, 25

23 The conduct of God, who disposes all things kindly, is to put religion into the mind by reason, and into the heart by grace. But to will to put it into the mind and heart by force and threats is not to put religion there, but terror.

Pascal, Pensées, III, 185

24 Men despise religion; they hate it and fear it is true. To remedy this, we must begin by showing that religion is not contrary to reason; that it is venerable, to inspire respect for it; then we must make it lovable, to make good men hope it is true; finally, we must prove it is true.

Venerable, because it has perfect knowledge of man; lovable because it promises the true good.

Pascal, Pensées, III, 187

25 Religion is suited to all kinds of minds. Some pay attention only to its establishment, and this religion is such that its very establishment suffices to prove its truth. Others trace it even to the apostles, The more learned go back to the beginning of the world. The angels see it better still, and from a more distant time.

Pascal, Pensées, IV, 285

26 True religion consists in annihilating self before that Universal Being, whom we have so often provoked, and who can justly destroy us at any time; in recognising that we can do nothing without Him, and have deserved nothing from Him but His displeasure. It consists in knowing that there is an unconquerable opposition between us and God, and that without a mediator there can be no communion with Him.

Pascal, Pensées, VII, 470

27 Religion is so great a thing that it is right that those who will not take the trouble to seek it, if it be obscure, should be deprived of it. Why, then do any complain, if it be such as can be found by seeking?

Pascal, Pensées, VIII, 574

28 The easiest conditions to live in according to the world are the most difficult to live in according to God, and vice versa. Nothing is so difficult according to the world as the religious life; nothing is easier than to live it according to God. Nothing is easier, according to the world, than to live in high office and great wealth; nothing is more difficult than to live in them according to God, and without acquiring an interest in them and a liking for them.

Pascal, Pensées, XIV, 906

29 But let my due feet never fail,
To walk the studious Cloysters pale,
And love the high embowed Roof,
With antick Pillars massy proof,
And storied Window's richly dight,
Casting a dimm religious light.
There let the pealing Organ blow,
To the full voic'd Quire below,
In Service high, and Anthems cleer,
As may with sweemes, through mine ear,
Dissolve me into extasies,
And bring all Heav'n before mine eyes.
And may at last my weary age
Find out the peacefull hermitage,
The Hairy Gown and Mossy Cell,
Where I may sit and rightly spell
Of every Star that Heav'n doth shew,
And every Herb that sips the dew;
Till old experience do attain
To somthing like Prophetic strain.

Milton, Il Penseroso, 155

30 There is not any burden that some would gladlier post off to another than the charge and care of their Religion. ... A wealthy man, addicted to his pleasure and to his profits, finds Religion to be a traffic so entangled, and of so many piddling accounts, that of all mysteries he cannot skill to keep a stock going upon that trade. What should he do? fain he would have the name to be religious, fain he would bear up with his neighbours in that. What does he therefore, but resolve to give over toiling, and to find himself out some factor, to whose care and credit he may commit the whole managing of his religious affairs? some Divine of note and estimation that must be. To him he adheres, resigns the whole warehouse of his religion, with all the locks and keys, into his custody; and indeed makes the very person of that man his religion; esteems his associating with him a sufficient evidence and commendatory of his own piety. So that a man may say his religion is now no more within himself, but is become a dividual movable, and goes and comes near him, according as that good man frequents the house. He entertains him, gives him gifts, feasts him, lodges him; his religion comes home at night, prays, is liberally supped, and sumptuously laid to sleep, rises, is saluted, and after the malmsey, or some well-spiced brewage, and better breakfasted than he whose morning appetite would have gladly fed on green figs between Bethany and Jerusalem, his Religion walks abroad at eight, and leaves his kind entertainer in the shop trading all day without his Religion.

Milton, Areopagitica

31 The greatest part of these ceremonies and superstitions consists in the religious use of such things as are in their

own nature indifferent; nor are they sinful upon any other account than because God is not the author of them. The sprinkling of water and the use of bread and wine are both in their own nature and in the ordinary occasions of life altogether indifferent. Will any man, therefore, say that these things could have been introduced into religion and made a part of divine worship if not by divine institution? If any human authority or civil power could have done this, why might it not also enjoin the eating of fish and drinking of ale in the holy banquet as a part of divine worship? Why not the sprinkling of the blood of beasts in churches, and expiations by water or fire, and abundance more of this kind? But these things, how indifferent soever they be in common uses, when they come to be annexed unto divine worship, without divine authority, they are as abominable to God as the sacrifice of a dog. And why is a dog so abominable? What difference is there between a dog and a goat, in respect of the divine nature, equally and infinitely distant from all affinity with matter, unless it be that God required the use of one in His worship and not of the other? We see, therefore, that indifferent things, how much soever they be under the power of the civil magistrate, yet cannot, upon that pretence, be introduced into religion and imposed upon religious assemblies, because, in the worship of God, they wholly cease to be indifferent.

Locke, Letter Concerning Toleration

32 We have just enough Religion to make us hate, but not enough to make us love one another.

Swift, Thoughts on Various Subjects

33 i conceive some scattered Notions about a superior Power to be of singular Use for the common People, as furnishing excellent Materials to keep Children quiet when they grow peevish, and providing Topicks of Amusement in a tedious Winter Night,

Swift, Argument Against Abolishing Christianity

34 Human laws, made to direct the will, ought to give precepts, and not counsels; religion, made to influence the heart, should give many counsels, and few precepts.

Montesquieu, Spirit of Laws, XXIV, 7

35 In a country so unfortunate as to have a religion that God has not revealed, it is necessary for it to be agreeable to morality; because even a false religion is the best security we can have of the probity of men.

Montesquieu, Spirit of Laws XXIV, 8

36 Religion may support a state when the laws themselves are incapable of doing it.

Montesquieu, Spirit of Laws, XXIV, 16

37 The pious man and the atheist always talk of religion; the one speaks of what he loves, and the other of what he fears.

Montesquieu, Spirit of Laws XXV, 1

38 Men are extremely inclined to the passions of hope and fear; a religion, therefore, that had neither a heaven nor a hell could hardly please them.

Montesquieu, Spmt of Laws, XXV, 2

39 Examine the religious principles which have, in fact, prevailed in the world. You will scarcely be persuaded that they are any thing but sick men's dreams: Or perhaps will regard them more as the playsome whimsies of monkeys in human shape, than the serious, positive, dogmatical asseverations of a being, who dignifies himself with the name of rational.

Hume, Natural History of Religion, XV

40 After our holy religion (which is doubtless the only good one) which would be the least bad?

Wouldn't it be the simplest one? Wouldn't it be the one that taught a good deal of morality and very little dogma? The one that tended to make men just, without making them absurd? The one that wouldn't command belief in impossible, contradictory things insulting to the Divinity and pernicious to mankind, and wouldn't dare to threaten with eternal punishment anyone who has common sense? Wouldn't it be the religion that didn't uphold its beliefs with executioners, and didn't inundate the world with blood for the sake of unintelligible sophisms? The one in which an ambiguity, a play on words, or two or three forged charters wouldn't make a sovereign and a god of a priest who is often a man who has committed incest, a murderer, and a poisoner? The one that wouldn't make kings subject to this priest? The one that taught nothing but the worship of a God, justice, tolerance, and humanity?

Voltaire, Philosophical Dictionary: Religion

41 Religion, considered in relation to society, which is either general or particular, may also be divided into two kinds:

the religion of man, and that of the citizen. The first, which has neither temples, nor altars, nor rites, and is confined to the purely internal cult of the supreme God and the eternal obligations of morality, is the religion of the Gospel pure and simple, the true theism, what may be called natural divine right or law. The other, which is codified in a single country, gives it its gods, its own tutelary patrons; it has its dogmas, its rites, and its external cult prescribed by law; outside the single nation that follows it, all the world is in its sight infidel, foreign and barbarous; the duties and rights of man extend for it only as far as its own altars. Of this kind were all the religions of early peoples, which we may define as civil or positive divine right or law.

Rousseau, Social Contract, IV, 8

42 We ought not to speak about religion to children, if we wish them to possess any.

Rousseau, Confessions, 11

43 To be of no church is dangerous. Religion, of which the rewards are distant and which is animated only by Faith and Hope, will glide by degrees out of the mind unless it be invigorated and reimpresed by external ordinances, by stated calls to worship, and the salutary influence of example.

Johnson, Life of Milton

44 The various modes of worship, which prevailed in the Roman world, were all considered by the people, as equally true; by the philosopher, as equally false; and by the magistrate, as equally useful.

Gibbon, Decline and Fall of the Roman Empire, 11

- 45 Every mode of religion, to make a deep and lasting impression on the human mind, must exercise our obedience, by enjoining practices of devotion; and must acquire our esteem, by inculcating moral duties analogous to the dictates of our own hearts.

Gibbon, Decline and Fall of the Roman Empire, VIII

- 46 The theologian may indulge the pleasing task of describing Religion as she descended from Heaven, arrayed in her native purity. A more melancholy duty is imposed on the historian. He must discover the inevitable mixture of error and corruption which she contracted in a long residence upon earth, among a weak and degenerate raced beings.

Gibbon, Decline and Fall of the Roman Empire, XV

- 47 The careless Polytheist, assailed by new and unexpected terrors, against which neither his priests nor his philosophers could afford him any certain protection, was very frequently terrified and subdued by the menace of eternal tortures. His fears might assist the progress of his faith and reason; and if he could once persuade himself to suspect that the Christian religion might possibly be true it became an easy task to convince him that it was the safest and most prudent party that he could possibly embrace.

Gibbon, Decline and Fall of the Roman Empire, XV

- 48 The opinion and practice of the monasteries of Mount Athos will be best represented in the words of an abbot who flourished in the eleventh century. "When thou art

alone in thy cell," says the ascetic teacher, "shut thy door, and seat thyself in a corner: raise thy mind above all things vain and transitory; recline thy beard and chin on thy breast; turn thy eyes and thy thought towards the middle of thy belly, the region of the naval; and search the place of the heart, the seat of the soul. At first all will be dark and comfortless; but if you persevere day and night, you will feel an ineffable joy; and no sooner has the soul discovered the place of the heart, than it is involved in a mystic and ethereal light." This light, the production of a distempered fancy, the creature of an empty stomach and an empty brain, was adored by the Quietists as the pure and perfect essence of God himself.

Gibbon, Decline and Fall of the Roman Empire, LXIII

49 Mock on, mock on, Voltaire, Rousseau;
Mock on, mock on; 'tis all in vain!
You throw the sand against the wind.
And the wind blows it back again.
And every sand becomes a gem
Reflected in the beams divine;
Blown back they blind the mocking eye,
But still in Israel's paths they shine.
The Atoms of Democritus
And Newton's Particles of Light
Are sands upon the Red Sea shore,
Where Israel's tents do shine so bright.

Blake, Mock on, Mock on, Voltaire, Rousseau

50 It is a beauteous evening, calm and free,
The holy time is quiet as a Nun
Breathless with adoration; the broad sun

Is sinking down in its tranquillity;
The gentleness of heaven broods o'er the Sea:
Listen! the mighty Being is awake,
And doth with his eternal motion make
A sound like thunder—everlastingly.
Dear Child! dear Girl! that walkest with me here,
If thou appear untouched by solemn thought,
Thy nature is not therefore less divine:
Thou liest in Abraham's bosom all the year;
And worship'st at the Temple's inner shrine,
God being with thee when we know it not.

Wordsworth, It is a Beautiful Evening, Calm and Free

- 51 Religion [cannot] maintain itself apart from thought, but either advances to the comprehension of the idea, or, compelled by thought itself, becomes intensive belief—or lastly, from despair of finding itself at home in thought, flees back from it in pious horror, and becomes superstition.

Hegel, Philosophy of History, IV, Introduction

- 52 The bad thing about all religions is that, instead of being able to confess their allegorical nature, they have to conceal it; accordingly, they parade their doctrine in all seriousness as true *sensu proprio*, and as absurdities form an essential part of these doctrines, you have the great mischief of a continual fraud.

Schopenhauer, Christian System

- 53 I believe that the sole effectual means which governments can employ in order to have the doctrine of the immortality of the soul duly respected is always to act

as if they believed in it themselves; and I think that it is only by scrupulous conformity to religious morality in great affairs that they can hope to teach the community at large to know, to love, and to observe it in the lesser concerns of life.

Tocqueville, Democracy in America, Vol. II, II, 15

- 54 The thing a man does practically believe (and this is often enough *without* asserting it even to himself, much less to others); the thing a man does practically lay to heart, and know for certain, concerning his vital relations to this mysterious Universe, and his duty and destiny there, that is in all cases the primary thing for him, and creatively determines all the rest. That is his *religion*.

Carlyle, The Hero as Divinity

- 55 If the red slayer think he slays,
Or if the slain think he is slain,
They know not well the subtle ways
I keep, and pass, and turn again.
Far or forgot to me is near;
Shadow and sunlight are the same;
The vanished gods to me appear;
And one to me are shame and fame.
They reckon ill who leave me out;
When me they fly, I am the wings;
I am the doubter and the doubt,
And I the hymn the Brahmin sings.
The strong gods pine for my abode,
And pine in vain the sacred Seven;
But thou, meek lover of the good!
Find me, and turn thy back on heaven.

Emerson, Brahma

56 Religion among the low becomes low. As it loses its truth, it loses credit with the sagacious. They detect the falsehood of the preaching, but when they say so, all good citizens cry, Hush; do not weaken the State, do not take off the strait-jacket from dangerous persons. Every honest fellow must keep up the hoax the best he can; must patronize providence and piety, and wherever he sees anything that will keep men amused, schools or churches or poetry or picture-galleries or music, or what not, he must cry "Hist-a-boy," and urge the game on. What a compliment we pay to the good Spirit with our superserviceable zeal!

Emerson, The Conservative

57 England felt the full heat of the Christianity which fermented Europe, and drew, like the chemistry of fire, a firm line between barbarism and culture. The power of the religious sentiment put an end to human sacrifices, checked appetite, inspired the crusades, inspired resistance to tyrants, inspired self-respect, set bounds to serfdom and slavery% founded liberty, created the religious architecture... inspired the 'English Bible, the liturgy', the monkish histories, the chronicle of Richard of Devizes. The priest translated the Vulgate, and translated the sanctities of old hagiology into English virtues on English ground. It was a certain affirmative or aggressive state of the Caucasian races. Man awoke refreshed by the sleep of ages. The violence of the northern savages exasperated Christianity into power. It lived by the love of the people.

Emerson, English Traits, XIII

58 *Mrs. Skewton.* Say, like those wicked Turks, there is no What's-his-name but Thingummy, and What-you-may-call-it is his prophet!

Dickens, Dombey and Son, XXVII

59 Not yet have we solved the incantation of this whiteness, and learned why it appeals with such power to the soul; and more strange and far more portentous—why, as we have seen, it is at once the most meaning symbol of spiritual things, nay, the very veil of the Christian's Deity; and yet should be as it is, the intensifying agent in things the most appalling to mankind.

Is it that by its indefiniteness it shadows forth the heartless voids and immensities of the universe, and thus stabs us from behind with the thought of annihilation, when beholding the white depths of the milky way? Or is it, that as in essence whiteness is not so much a colour as the visible absence of colour, and at the same time the concrete of all colours; is it for these reasons that there is such a dumb blankness, full of meaning, in a wide landscape of snows—a colourless, allcolour of atheism from which we shrink? And when we consider that other theory of the natural philosophers, that all other earthly hues—every stately or lovely emblazoning—the sweet tinges of sunset skies and woods; yea, and the gilded velvets of butterflies, and the butterfly cheeks of young girls; all these are but subtile deceits, not actually inherent in substance, but only laid on from without; and when we proceed further, and consider that the mystical cosmetic which produces every one of her hues, the great principle of light, for ever remains white or colourless in

itself, and if operating without medium upon matter, would touch all objects, even tulips and roses, with its own blank tinge—pondering all this, the palsied universe lies before us a leper; and like wilful travellers in Lapland, who refuse to wear coloured and colouring glasses upon their eyes, so the wretched infidel gazes himself blind at the monumental white shroud that wraps all the prospect around him. And of all these things the Albino whale was the symbol. Wonder ye then at the fiery hunt?

Melville, Moby Dick, XLII

60 The wisest man preaches no doctrines; he has no scheme; he sees no rafter, not even a cobweb, against the heavens. It is clear sky.

Thoreau, The Christian Fable

61 A man's real faith is never contained in his creed, nor is his creed an article of his faith. The last is never adopted. This it is that permits him to smile ever, and to live even as bravely as he does. And yet he clings anxiously to his creed, as to a straw, thinking that that does him good service because his sheet anchor does not drag,

Thoreau, The Christian Fable

62 The foundation of irreligious criticism is this: man makes religion; religion does not make man. Religion is, in fact, the self-consciousness and self-esteem of man who has either not yet gained himself or has lost himself again. But man is no abstract being squatting outside the world. Man is the world of man, the state, society. This state, this society, produce religion, which is an inverted world-consciousness, because they are an inverted world.

Religion is the general theory of this world, its encyclopedic compendium, its logic in popular form, its spiritualistic *point d'honneur*, its enthusiasm, its moral sanction, its solemn complement its universal basis of consolation and justification It is the fantastic realization of the human being because the human being has attained no true reality. Thus, the struggle against religion is indirectly the struggle against that world of which religion is the spiritual aroma.

The wretchedness of religion is at once an expression of and a protest against real wretchedness. Religion is the sigh of the oppressed creature, the heart of a heartless world and the soul of soulless conditions. It is the opium of the people.

Marx, Contribution to the Critique of Hegel's "Philosophy of Right," Intro.

63 Every established fact which is too bad to admit o! any other defence, is always presented to us as an injunction of religion.

Mill, Subjection of Women, II

64 To make your children *capable of honesty* is the beginning of education. Make them men first, and religious men afterwards, and all will be sound; but a knave's religion is always the rottenest thing about him.

Ruskin, Time and Tide, VIII

65 If it is reasonable to consider medicine, or architecture, or engineering, in a certain sense, divine arts, as being divinely ordained means of our receiving divine benefits, much more may ethics be called divine; while as to

religion, it directly professes to be the method of recommending ourselves to Him and learning His will. If then it be His gracious purpose that we should learn it, the means He gives for learning it, be they promising or not to human eyes, are sufficient because they are His. And what they are at this particular time, or to this person, depends on His disposition. He may have imposed simple prayer and obedience on some men as the instrument of their attaining to the mysteries and precepts of Christianity. He may lead others through the written word, at least for some stages of their course; and if the formal basis on which He has rested His revelations be, as it is, of an historical and philosophical character, then antecedent probabilities, subsequently corroborated by facts, will be sufficient, as in the parallel case of other history, to bring us safely to the matter, or at least to the organ, of those revelations.

*Newman, Essay on the Development of Christian
Doctrine, Pt. I, III, 2*

66 Religion has its own enlargement, and an enlargement, not of tumult, but of peace. It is often remarked of uneducated persons, who have hitherto thought little of the unseen world, that, on their turning to God, looking into themselves, regulating their hearts, reforming their conduct, and meditating on death and judgment, heaven and hell, they seem to become, in point of intellect, different beings from what they were. Before, they took things as they came, and thought no more of one thing than another. But now every event has a meaning; they have their own estimate of whatever happens to them; they are mindful of times and seasons, and compare the present with the past; and the world, no longer dull,

monotonous, unprofitable, and hopeless, is a various and complicated drama, with parts and an object, and an awful moral.

Newman, Idea of a University, Discourse VI

67 Many persons are very sensitive of the difficulties of Religion; I am as sensitive of them as any one; but I have never been able to see a connexion between apprehending those difficulties, however keenly, and multiplying them to any extent, and on the other hand doubting the doctrines to which they are attached. Ten thousand difficulties do not make one doubt, as I understand the subject; difficulty and doubt are incommensurate.

Newman, Apologia Pro Vita Sua, V

68 The object of religion is *conduct*; and conduct is really, however men may overlay it with philosophical disquisitions, the simplest thing in the world. That is to say, it is the simplest thing in the world as far as *understanding* is concerned; as regards doing, it is the hardest thing in the world. Here is the difficulty,—to *do* what we very well know ought to be done; and instead of facing this, men have searched out another with which they occupy themselves by preference,—the origin of what is called the moral sense, the genesis and physiology of conscience, and so on. No one denies that here, too, is difficulty, or that the difficulty is a proper object for the human faculties to be exercised upon; but the difficulty here is speculative. It is not the difficulty of religion, which is a practical one; and it often tends to divert the attention from this. Yet surely the difficulty of

religion is great enough by itself, if men would but consider it, to satisfy the most voracious appetite for difficulties. It extends to rightness in the whole range of what we call conduct; in three-fourths, therefore, at the very lowest computation, of human life.

Arnold, Literature and Dogma, I

69 Religion, if we follow the intention of human thought and human language in the use of the word, is ethics heightened, enkindled, lit up by feeling; the passage from morality to religion is made when to morality is applied emotion.

Arnold, Literature and Dogma, I

70 Religion, the greatest and most important of the efforts by which the human race has manifested its impulse to perfect itself,—religion, that voice of the deepest human experience,—does not only enjoin and sanction the aim which is the great aim of culture, the aim of setting ourselves to ascertain what perfection is and to make it prevail; but also, in determining generally in what human perfection consists, religion comes to a conclusion identical with that which culture,—culture seeking the determination of this question through *all* the voices of human experience which have been heard upon it, of art, science, poetry, philosophy, history, as well as of religion, in order to give a greater fulness and certainty to its solution,—likewise reaches. Religion says: *The Kingdom of God is within you*; and culture, in like manner, places human perfection in an *internal* condition, in the growth and predominance of our humanity proper, as distinguished from our animality. It places it in the ever-

increasing efficacy and in the general harmonious expansion of those gifts of thought and feeling, which make the peculiar dignity, wealth, and happiness of human nature. As I have said on a former occasion: 'It is in making endless additions to itself, in the endless expansion of its powers, in endless growth in wisdom and beauty, that the spirit of the human race finds its ideal. To reach this ideal, culture is an indispensable aid, and that is the true value of culture.' Not a having and a resting, but a growing and a becoming, is the character of perfection as culture conceives it; and here, too, it coincides with religion.

Arnold, Culture and Anarchy, I

71 The essence of religion consists solely in the answer to the question, 'Why do I live, and what is my relation to the infinite universe around me?'

All the metaphysics of religion, all the doctrines about deities and about the origin of the world, and all external worship—which are usually supposed to be religion—are but indications (differing according to geographical, ethnographical, and historical circumstances) of the existence of religion. There is no religion from the most elevated to the coarsest that has not at its root this establishing of man's relation to the surrounding universe or to its first cause. There is no religious rite however coarse, nor any cult however refined, that has not this at its root. Every religious teaching is the expression which the founder of that religion has given of the relation he considered himself (and consequently all other people also) to occupy as a man towards the universe and its origin and first cause.

Tolstoy, Religion and Morality

72 The religious man thinks only of himself.

Nietzsche, Antichrist, LXI

73 Since belief is measured by action, he who forbids us to believe religion to be true, necessarily also forbids us to act as we should if we did believe it to be true. The whole defence of religious faith hinges upon action. If the action required or inspired by the religious hypothesis is in no way different from that dictated by the naturalistic hypothesis, then religious faith is a pure superfluity, better pruned away, and controversy about its legitimacy is a piece of idle trifling, unworthy of serious minds. I myself believe, of course, that the religious hypothesis gives to the world an expression which specifically determines our reactions, and makes them in a large part unlike what they might be on a purely naturalistic scheme of belief.

William James, Will to Believe

74 The peace of rationality may be sought through ecstasy when logic fails. To religious persons of every shade of doctrine moments come when the world, as it is, seems so divinely orderly, and the acceptance of it by the heart so rapturously complete, that intellectual questions vanish; nay, the intellect itself is hushed to sleep—as Wordsworth says, "thought is not; in enjoyment it expires." Ontological emotion so fills the soul that ontological speculation can no longer overlap it and put her girdle of interrogation marks round existence. Even the least religious of men must have felt with Walt Whitman, when loafing on the grass on some transparent

summer morning, that "swiftly arose and spread round him the peace and knowledge that pass all the argument of the earth." At such moments of energetic living we feel as if there were something diseased and contemptible, yea vile, in theoretic grubbing and brooding. In the eye of healthy sense the philosopher is at best a learned fool.

William James, Sentiment of Rationality

75 Overcoming of all the usual barriers between the individual and the Absolute is the great mystic achievement. In mystic states we both become one with the Absolute and we become aware of our oneness. This is the everlasting and triumphant mystical tradition, hardly altered by differences of clime or creed. In Hinduism, in Neoplatonism, in Sufism, in Christian mysticism, in Whitmanism, we find the same recurring note, so that there is about mystical utterances an eternal unanimity which ought to make a critic stop and think, and which brings it about that the mystical classics have, as has been said, neither birthday nor native land. Perpetually telling of the unity of man with God, their speech antedates languages, and they do not grow old.

William James, Varieties of Religious Experience, XVI-XVII

76 The pivot round which the religious life, as we have traced it, revolves, is the interest of the individual in his private personal destiny. Religion, in short, is a monumental chapter in the history of human egotism.

William James, Varieties of Religious Experience, XX

77 The great religious conceptions which haunt the imaginations of civilized mankind are scenes of solitariness: Prometheus chained to his rock Mahomet brooding in the desert, the meditations of the Buddha, the solitary Man on the Cross. It belongs to the depth of the religious spirit to have felt forsaken, even by God.

Whitehead, Religion in the Making, I, 2

78 I am ... a dissenter from all known religions and I hope that every kind of religious belief will die out. I do not believe that, on the balance, religious belief has been a force for good. Although I am prepared to admit that in certain times and places it has had some good effects, I regard it as belonging to the infancy of human reason, and to a stage of development which we are now outgrowing.

Russell, Sceptical Essays, XII

79 A religion, even if it calls itself the religion of love, must be hard and unloving to those who do not belong to it. Fundamentally, indeed, every religion is in this same way a religion of love for all those whom it embraces; while cruelty and intolerance towards those who do not belong to it are natural to every religion.

Freud, Group Psychology and Analysis of the Ego, V

80 In my *Future of an Illusion* I was concerned much less with the deepest sources of religious feeling than with what the ordinary man understands by his religion, that system of doctrines and pledges that on the one hand explains the riddle of this world to him with an enviable completeness, and on the other assures him that a

solicitous Providence is watching over him and will make up to him in a future existence for any shortcomings in this life. The ordinary man cannot imagine this Providence in any other form but that of a greatly exalted father, for only such a one could understand the needs of the sons of men, or be softened by their prayers and placated by the signs of their remorse. The whole thing is so patently infantile, so incongruous with reality, that to one whose attitude to humanity is friendly it is painful to think that the great majority of mortals will never be able to rise above this view of life.

Freud, Civilization and Its Discontents, II

- 81 If one wishes to form a true estimate of the full grandeur of religion, one must keep in mind what it undertakes to do for men. It gives them information about the source and origin of the universe, it assures them of protection and final happiness amid the changing vicissitudes of life, and it guides their thoughts and actions by means of precepts which are backed by the whole force of its authority.

Freud, New Introductory Lectures on Psycho-Analysis, XXXV

- 82 While the different religions wrangle with one another as to which of them is in possession of the truth, in our view the truth of religion may be altogether disregarded.

Freud, New Introductory Lectures on Psycho-Analysis, XXXV

- 83 Religion is an attempt to get control over The sensory world, in which we are placed, by means of the wish-

world, which we have developed inside us as a result of biological and psychological necessities. But it cannot achieve its end. Its doctrines carry with them the stamp of the times in which they originated, the ignorant childhood days of the human race. Its consolations deserve no trust. Experience teaches us that the world is not a nursery. The ethical commands, to which religion seeks to lend its weight, require some other foundations instead, for human society cannot do without them, and it is dangerous to link up obedience to them with religious belief. If one attempts to assign to religion its place in man's evolution, it seems not so much to be a lasting acquisition, as a parallel to the neurosis which the civilized individual must pass through on his way from childhood to maturity.

Freud, Hew Introductory Lectures on Psycho-Analysts, XXXV

- 84 There is such a thing as high-level popularization, which respects the broad outlines of scientific truth, and enables ordinary- cultivated minds to get a general grasp of it until the time comes when a greater effort reveals it to them in detail, and, above all, allows them to penetrate deeply into its significance. The propagation of the mystical through religion seems to us something of the kind. In this sense, religion is to mysticism what popularization is to science.

Bergson, Two Sources of Morality and Religion, III

- 85 Religion no longer reveals divine personalities, future rewards, and tenderer Elysian consolations; nor does it seriously propose a heaven to be reached by a ladder nor

a purgatory to be shortened by prescribed devotions. It merely gives the real world an ideal status and teaches men to accept a natural life on supernatural grounds.

Santayana, Life of Reason, I, Introduction

8G Religion, after all, is the serious business of the human race.

Toynbee, Civilization on Trial, V

20.2 Judaism

As the reader would expect, this section is dominated by quotations from the books of the Old Testament. These are the passages that exhibit or expound the religion of Judaism—its rituals and observances, its credal commitments, its events in the history of "the chosen people," its reception and development of the Mosaic law, and its inspiration and influence of the prophets.

Quotations here represent a wide diversity of secular comments on Judaism and on the relation of the Jews to the gentiles. The reader will find striking observations made by such historians as Tacitus and Gibbon, as well as by a philosopher of history, Hegel. The reader will find discussions of Judaism, and especially of the difference between the Old Law and the New, by such theologians as Augustine and Aquinas, as well as by one of the most interesting of Christian apologists, Pascal, who stresses the Christian fulfillment of Old Testament prophecies. The philosophers—Hobbes, Spinoza, and J. S. Mill—consider the theocratic institutions of Judaism, and Mill dwells on the contribution of the Jews along with the Greeks as the twin

fountainheads of Western civilization. Freud gives the discussion a psychological turn by his speculations concerning the psychogenesis of Jewish monotheism. And, in certain quotations, anti-Semitism manifests itself more or less explicitly.

■ ■ ■

1 Now the Lord had said unto Abram, Get thee out of thy country, and from thy kindred, and from thy father's house, unto a land that I will shew thee;

And I will make of thee a great nation, and I will bless thee, and make thy name great; and thou shalt be a blessing:

And I will bless them that bless thee, and curse him that curseth thee: and in thee shall all families of the earth be blessed.

Genesis 12:1-3

2 And the Lord said unto Abram, after that Lot was separated from him. Lift up now thine eyes, and look from the place where thou art northward, and southward, and eastward, and westward:

For all the land which thou seest, to thee will I give it, and to thy seed for ever.

And I will make thy seed as the dust of the earth: so that if a man can number the dust of the earth, then shall thy seed also be numbered.

Arise, walk through the land in the length of it and in the breadth of it; for I will give it unto thee.

Genesis 13:14-17

3 This is my covenant, which ye shall keep, between me and you and thy seed after thee; Every man child among you shall be circumcised.

And ye shall circumcise the flesh of your foreskin; and it shall be a token of the covenant betwixt me and you.

And he that is eight days old shall be circumcised among you, every man child in your generations, he that is born in the house, or bought with money of any stranger, which is not of thy seed.

He that is born in thy house, and he that is bought with thy money, must needs be circumcised: and my covenant shall be in your flesh for an everlasting covenant.

And the uncircumcised man child whose flesh of his foreskin is not circumcised, that soul shall be cut off from his people; he hath broken my covenant.

Genesis 17:10-14

4 And it came to pass after these things, that God did tempt Abraham, and said unto him, Abraham: and he said, Behold, here I am.

And he said, Take now thy son, thine only son Isaac, whom thou lovest, and get thee into the land of Mo-ri-ah; and offer him there for a burnt offering upon one of the mountains which I will tell thee of.

And Abraham rose up early in the morning, and saddled his ass, and took two of his young men with him, and Isaac his son, and clave the wood for the burnt offering, and rose up, and went unto the place of which God had told him.

Then on the third day Abraham lifted up his eyes, and saw the place afar off.

And Abraham said unto his young men. Abide ye here with the ass; and I and the lad will go yonder and worship, and come again to you.

And Abraham took the wood of the burnt offering, and laid it upon Isaac his son; and he took the fire in his hand, and a knife; and they went both of them together.

And Isaac spake unto Abraham his father, and said, My father: and he said. Here am I, my son. And he said. Behold the fire and the wood: but where is the lamb for a burnt offering?

And Abraham said. My son, God will provide himself a lamb for a burnt offering: so they went both of them together.

And they came to the place which God had told him of; and Abraham built an altar there, and laid the wood in order, and bound Isaac his son, and laid him on the altar upon the wood.

And Abraham stretched forth his hand, and took the knife to slay his son.

And the angel of the Lord called unto him out of heaven, and said, Abraham, Abraham: and he said, Here am I.

And he said. Lay not thine hand upon the lad, neither do thou any thing unto him: for now I know that thou fearest God, seeing thou hast not withheld thy son, thine only son from me.

And Abraham lifted up his eyes, and looked, and behold behind him a ram caught in a thicket by his horns: and Abraham went and took the ram, and offered him up for a burnt offering in the stead of his son.

Genesis 22:1-13

5 And God appeared unto Jacob again, when he came out of Pa-dan-aram, and blessed him.

And God said unto him, Thy name is Jacob: thy name shall not be called any more Jacob, but Israel shall be thy name: and he called his name Israel.

And God said unto him, I am God Almighty: be fruitful and multiply; a nation and a company of nations shall be of thee, and kings shall come out of thy loins;

And the land which I gave Abraham and Isaac, to thee I will give it, and to thy seed after thee will I give the land.

Genesis 35:9-12

6 Then the Lord said unto Moses, Now shalt thou see what I will do to Pharaoh: for with a strong hand shall he let them go, and with a strong hand shall he drive them out of his land.

And God spake unto Moses, and said unto him, I am the Lord:

And I appeared unto Abraham, unto Isaac, and unto Jacob, by the name of God Almighty, but by my name *Jehovah* was I not known to them.

And I have also established my covenant with them, to give them the land of Ca-na-an, the land of their pilgrimage, wherein they were strangers.

And I have also heard the groaning of the children of Israel, whom the Egyptians keep in bondage; and I have remembered my covenant.

Wherefore say unto the children of Israel, I am the Lord, and I will bring you out from under the burdens of the Egyptians, and I will rid you out of their bondage, and

I will redeem you with a stretched out arm, and with great judgments:

And I will take you to me for a people, and I will be to you a God: and ye shall know that I am the Lord your God, which bringeth you out from under the burdens of the Egyptians.

Exodus 6:1-7

7 And the Lord spake unto Moses and Aaron in the land of Egypt, saying.

This month shall be unto you the beginning of months: it shall be the first month of the year to you.

Speak ye unto all the congregation of Israel, saying, In the tenth day of this month they shall take to them every man a lamb, according to the house of their fathers, a lamb for an house:

And if the household be too little for the lamb, let him and his neighbour next unto his house take it according to the number of the souls; every man according to his eating shall make your count for the lamb.

Your lamb shall be without blemish, a male of the first year: ye shall take it out from the sheep, or from the goats:

And ye shall keep it up until the fourteenth day of the same month: and the whole assembly of the congregation of Israel shall kill it in the evening.

And they shall take of the blood, and strike it on the two side posts and on the upper door post of the houses, wherein they shall eat it.

And they shall eat the flesh in that night, roast with fire, and unleavened bread; and with bitter herbs they shall eat it.

Eat not of it raw, nor sodden at all with water, but roast with fire; his head with his legs, and with the purtenance thereof.

And ye shall let nothing of it remain until the morning; and that which remaineth of it until the morning ye shall burn with fire.

And thus shall ye eat it; with your loins girded, your shoes on your feet, and your staff in your hand; and ye shall eat it in haste: it is the Lord's passover.

For I will pass through the land of Egypt this night, and will smite all the firstborn in the land of Egypt, both man and beast; and against all the gods of Egypt I will execute judgment: I am the Lord.

And the blood shall be to you for a token upon the houses where ye are; and when I see the blood, I will pass over you, and the plague shall not be upon you to destroy you, when I smite the land of Egypt.

And this day shall be unto you for a memorial; and ye shall keep it a feast to the Lord throughout your generations; ye shall keep it a feast by an ordinance for ever.

Seven days shall ye eat unleavened bread; even the first day ye shall put away leaven out of your houses: for whosoever eateth leavened bread from the first day until the seventh day, that soul shall be cut off from Israel.

And in the first day there shall be an holy convocation, and in the seventh day there shall be an holy convocation to you; no manner of work shall be done in them, save that which every man must eat, that only may be done of you.

And ye shall observe the feast of unleavened bread; for in this selfsame day have I brought your armies out of

the land of Egypt: therefore shall ye observe this day in your generations by an ordinance for ever.

In the first month, on the fourteenth day of the month at even, ye shall eat unleavened bread, until the one and twentieth day of the month at even.

Seven days shall there be no leaven found in your houses: for whosoever eateth that which is leavened, even that soul shall be cut off from the congregation of Israel, whether he be a stranger, or born in the land.

Ye shall eat nothing leavened; in all your habitations shall ye eat unleavened bread.

Exodus 12:1-20

8 And it came to pass at the end of the four hundred and thirty years, even the selfsame day it came to pass, that all the hosts of the Lord went out from the land of Egypt.

It is a night to be much observed unto the Lord for bringing them out from the land of Egypt: this is that night of the Lord to be observed of all the children of Israel in their generations.

And the Lord said unto Moses and Aaron, This is the ordinance of the passover: There shall no stranger eat thereof:

But every man's servant that is bought for money, when thou hast circumcised him, then shall he eat thereof.

A foreigner and an hired servant shall not eat thereof.

In one house shall it be eaten; thou shalt not carry forth ought of the flesh abroad out of the house; neither shall ye break a bone thereof.

All the congregation of Israel shall keep it.

And when a stranger shall sojourn with thee, and will keep the passover to the Lord, let all his males be

circumcised, and then let him come near and keep it; and he shall be as one that is born in the land: for no uncircumcised person shall eat thereof.

One law shall be to him that is homeborn, and unto the stranger that sojourneth among you.

Thus did all the children of Israel; as the Lord commanded Moses and Aaron, so did they.

And it came to pass the selfsame day, that the Lord did bring the children of Israel out of the land of Egypt by their armies.

Exodus 12 : 41-51

9 Ye shall make you no idols nor graven image, neither rear you up a standing image, neither shall ye set up any image of stone in your land, to bow down unto it: for I am the Lord your God.

Ye shall keep my sabbaths, and reverence my sanctuary: I am the Lord.

If ye walk in my statutes, and keep my commandments, and do them;

Then I will give you rain in due season, and the land shall yield her increase, and the trees of the field shall yield their fruit.

And your threshing shall reach unto the vintage, and the vintage shall reach unto the sowing time: and ye shall eat your bread to the full, and dwell in your land safely.

And I will give peace in the land, and ye shall lie down, and none shall make you afraid: and I will rid evil beasts out of the land, neither shall the sword go through your land.

Leviticus 26 : 1-6

10 Then will I remember my covenant with Jacob, and also my covenant with Isaac, and also my covenant with Abraham will I remember; and I will remember the land.

The land also shall be left of them, and shall enjoy her sabbaths, while she lieth desolate without them: and they shall accept of the punishment of their iniquity; because, even because they despised my judgments, and because their soul abhorred my statutes.

And yet for all that, when they be in the land of their enemies, I will not cast them away, neither will I abhor them, to destroy them utterly, and to break my covenant with them: for I am the Lord their God.

But I will for their sakes remember the covenant of their ancestors, whom I brought forth out of the land of Egypt in the sight of the heathen, that I might be their God: I am the Lord.

These are the statutes and judgments and laws which the Lord made between him and the children of Israel in mount Sinai by the hand of Moses.

Leviticus 26:42-46

11 And Moses called all Israel, and said unto them Hear, O Israel, the statutes and judgments which I speak in your ears this day, that ye may learn them, and keep, and do them.

The Lord our God made a covenant with us in Horeb.

The Lord made not this covenant with our fathers, but with us, even us, who are all of us here alive this day.

The Lord talked with you face to face in the mount out of the midst of the fire,

(I stood between the Lord and you at that time to shew you the word of the Lord: for ye were afraid by reason of the fire, and went not up into the mount;) saying,

I am the Lord thy God, which brought thee out of the land of Egypt, from the house of bondage.

Thou shalt have none other gods before me.

Thou shalt not make thee any graven image, or any likened of any thing that is in heaven above, or that is in the earth beneath, or that is in the waters beneath the earth:

Thou shalt not bow down thyself unto them, nor serve them: for I the Lord thy God am a jealous God, visiting the iniquity of the fathers upon the children unto the third and fourth generation of them that hate me,

And shewing mercy unto thousands of them that love me and keep my commandments.

Thou shalt not take the name of the Lord thy God in vain: for the Lord will not hold him guiltless that taketh his name in vain.

Keep the sabbath day to sanctify it, as the Lord thy God hath commanded thee.

Six days thou shalt labour, and do all thy work:

But the seventh day is the sabbath of the Lord thy God: in it thou shalt not do any work, thou, nor thy son, nor thy daughter, nor thy manservant, nor thy maidservant, nor thine ox, nor thine ass, nor any of thy cattle, nor thy stranger that is within thy gates; that thy manservant and thy maidservant may rest as well as thou.

And remember that thou wast a servant in the land of Egypt, and that the Lord thy God brought thee out thence through a mighty hand and by a stretched out arm; therefore the Lord thy God commanded thee to keep the sabbath day.

Honour thy father and thy mother, as the Lord thy God hath commanded thee; that thy days may be prolonged,

and that it may go well with thee, in the land which the Lord thy God giveth thee.

Thou shalt not kill.

Neither shalt thou commit adultery.

Neither shalt thou steal.

Neither shalt thou bear false witness against thy neighbour.

Neither shalt thou desire thy neighbour's wife, neither shalt thou covet thy neighbour's house, his field, or his manservant, or his maidservant, his ox, or his ass, or any thing that is thy neighbour's.

These words the Lord spake unto all your assembly in the mount out of the midst of the fire, of the cloud, and of the thick darkness, with a great voice: and he added no more. And he wrote them in two tables of stone, and delivered them unto me.

Deuteronomy 5:1-22

12 And king Solomon, and all the congregation of Israel, that were assembled unto him, were with him before the ark, sacrificing sheep and oxen, that could not be told nor numbered for multitude.

And the priests brought in the ark of the covenant of the Lord unto his place, into the oracle of the house, to the most holy place, even under the wings of the cherubims.

For the cherubims spread forth their two wings over the place of the ark, and the cherubims covered the ark and the staves thereof above.

And they drew out the staves, that the ends of the staves were seen out in the holy place before the oracle, and they were not seen without: and there they are unto this day.

There was nothing in the ark save the two tables of stone, which Moses put there at Horeb, when the Lord made a covenant with the children of Israel, when they came out of the land of Egypt.

And it came to pass, when the priests were come out of the holy place, that the cloud filled the house of the Lord,

So that the priests could not stand to minister because of the cloud: for the glory of the Lord had filled the house of the Lord.

Then spake Solomon, The Lord said that he would dwell in the thick darkness.

I have surely built thee an house to dwell in, a settled place for thee to abide in for ever.

And the king turned his face about, and blessed all the congregation of Israel: (and all the congregation of Israel stood;)

And he said, Blessed be the Lord God of Israel, which spake with his mouth unto David my father, and hath with his hand fulfilled it, saying,

Since the day that I brought forth my people Israel out of Egypt, I chose no city out of all the tribes of Israel to build an house, that my name might be therein; but I chose David to be over my People Israel.

1 Kings 8:5-16

13 I know that my redeemer liveth, and that he shall stand at the latter day upon the earth:

And though after my skin worms destroy this body, yet in my flesh shall I see God.

Job 19:25-26

14 Blessed is the nation whose God is the Lord, and the people whom he hath chosen for his own inheritance.

Psalm 33:12

15 I will sing of the mercies of the Lord for ever: with my mouth will I make known thy faithfulness to all generations.

For I have said, Mercy shall be built up for ever: thy faithfulness shalt thou establish in the very heavens.

I have made a covenant with my chosen, I have sworn unto David my servant,

Thy seed will I establish for ever, and build up thy throne to all generations.

Psalm 89:1-4

16 By the rivers of Babylon, there we sat down, yea, we wept, when we remembered Zion.

We hanged our harps upon the willows in the midst thereof.

For there they that carried us away captive required of us a song; and they that wasted us required of us mirth, saying, Sing us one of the songs of Zion.

How shall we sing the Lord's song in a strange land?

If I forget thee, O Jerusalem, let my right hand forget her cunning.

If I do not remember thee, let my tongue cleave to the roof of my mouth; if I prefer not Jerusalem above my chief joy.

Remember, O Lord, the children of Edom in the day of Jerusalem; who said, Rase it, rase it, even to the foundation thereof.

O daughter of Babylon, who art to be destroyed;
happy shall he be, that rewardeth thee as thou hast
served us.

Happy shall he be, that taketh and dasheth thy little
ones against the stones.

Psalm 137:1-9

17 But now thus saith the Lord that created thee, O Jacob,
and he that formed thee, O Israel, Fear not: for I have
redeemed thee, I have called thee by thy name; thou art
mine.

When thou passest through the waters, I will be with
thee; and through the rivers, they shall not overflow thee:
when thou walkest through the fire, thou shalt not be
burned; neither shall the flame kindle upon thee.

For I am the Lord thy God, the Holy One of Israel, thy
Saviour: I gave Egypt for thy ransom, Ethiopia and Seba
for thee.

Since thou wast precious in my sight, thou hast been
honourable, and I have loved thee: therefore will I give
men for thee, and people for thy life.

Fear not: for I am with thee: I will bring thy seed from
the east, and gather thee from the west;

I will say to the north, Give up; and to the south, Keep
not back: bring my sons from far, and my daughters from
the ends of the earth;

Even every one that is called by my name: for I have
created him for my glory, I have formed him; yea, I have
made him.

Isaiah 43:1-7

18 Verily thou art a God that hidest thyself, O God of Israel, the Saviour.

Isaiah 45:15

19 The Jews have purely mental conceptions of Deity, as one in essence. They call those profane who make representations of God in human shape out of perishable materials. They believe that Being to be supreme and eternal, neither capable of representation, nor of decay. They therefore do not allow any images to stand in their cities, much less in their temples. This flattery is not paid to their kings, nor this honour to our Emperors. From the fact, however, that their priests used to chant to the music of flutes and cymbals, and to wear garlands of ivy, and that a golden vine was found in the temple, some have thought that they worshipped Father Liber, the conqueror of the East, though their institutions do not by any means harmonize with the theory; for Liber established a festive and cheerful worship, while the Jewish religion is tasteless and mean.

Tacitus, Histories, V, 5

20 Without the mad rites of Mars and Bellona they [the Jew's] carried on war; and while, indeed, they did not conquer without victory, yet they did not hold it to be a goddess, but the gift of their God. Without Segetia they had harvests; without Bubona, oxen; honey without Mellona; apples without Pomona: and, in a word, everything for which the Romans thought they must supplicate so great a crowd of false gods, they received much more happily from the one true God. And if they had not sinned against Him with impious curiosity, which

seduced them like magic arts, and drew them to strange gods and idols, and at last led them to kill Christ, their kingdom would have remained to them and would have been, if not more spacious, yet more happy than that of Rome. And now that they are dispersed through almost all lands and nations, it is through the providence of that one true God; that whereas the images, altars, groves, and temples of the false gods are everywhere overthrown, and their sacrifices prohibited, it may be shown from their books how this has been foretold by their prophets so long before.

Augustine, City of God, IV, 34

- 21 Before the coming of Christ, the state of the Old Law was not changed as regards the fulfilment of the Law, which was effected in Christ alone; but it was changed as regards the condition of the people that were under the Law. Because, at first the people were in the desert, having no fixed abode; afterwards they were engaged in various wars with the neighbouring nations; and lastly, at the time of David and Solomon, the state of that people was one of great peace. And then for the first time the temple was built in the place which Abraham, instructed by God, had chosen for the purpose of sacrifice.

Aquinas, Summa Theologica, I-II, 102 4

- 22 The tabernacle was divided into two parts. One was called the "Holy of Holies," and was placed to the west. The other was called the "Holy Place," which was situated to the east. Moreover there was a court facing the tabernacle. Accordingly there are two reasons for this distinction. One is in respect of the tabernacle being

ordained to the worship of God. Because the different parts of the world are thus betokened by the division of the tabernacle. For that part which was called the Holy of Holies signified the higher world, which is that of spiritual substances, while that part which is called the Holy Place signified the corporeal world. Hence the Holy Place was separated from the Holy of Holies by a veil, which was of four different colours (denoting the four elements), namely, of linen, signifying earth, because linen, that is, flax, grows out of the earth; purple, signifying water, because the purple tint was made from certain shells found in the sea; violet, signifying air, because it has the colour of the air; and scarlet twice dyed, signifying fire. And this because matter composed of the four elements is a veil between us and incorporeal substances. Hence the high-priest alone, and that once a year, entered into the inner tabernacle, that is, the Holy of Holies, by which we are taught that man's final perfection consists in his entering into that world. But into the outward tabernacle, that is, the Holy Place, the priests entered every day, though the people were only admitted to the court; because the people are able to perceive material things, the inner nature of which only wise men by dint of study are able to discover.

Aquinas, Summa Theologica, I-II, 102, 4

- 23 The inner tabernacle, called the Holy of Holies, signified the higher world of spiritual substances; hence that tabernacle contained three things, namely, *the ark of the testament in which was a golden pot that had manna, and the rod of Aaron that had blossomed, and the tables* on which were written the ten commandments of the Law. Now the ark stood between two cherubim that looked one

towards the other; and over the ark was a table, called the propitiatory, raised above the wings of the cherubim, as though it were held up by them, and appearing, to the imagination, to be the very seat of God. For this reason it was called the propitiatory, as though the people received propitiation thence at the prayers of the high-priest. And so it was held up, so to speak, by the cherubim, in obedience, as it were, to God, while the ark of the testament was like the foot-stool to Him that sat on the propitiatory. These three things denote three things in that higher world. First, God Who is above all, and incomprehensible to any creature Hence no likeness of Him was set up, in order to denote His invisibility. But there was something to represent His seat, since, that is, the creature, which is beneath God, as the seat is under the one sitting on it, is comprehensible. Again in that higher world there are spiritual substances called angels. These are signified by the two cherubim, looking one towards the other, to show that they are at peace with one another . . . *Who maketh peace in . . . high places.* For this reason, too, there was more than one cherub, to betoken the multitude of heavenly spirits, to prevent their receiving worship from those who had been commanded to worship but one God. Moreover there are, enclosed as it were in that spiritual world, the intelligible types of whatsoever takes place in this world, just as in every cause are enclosed the types of its effects, and in the craftsman the types of the works of his craft. This was signified by the ark, which represented, by means of the three things it contained, the three things of greatest import in human affairs. These are wisdom, signified by the tables of the testament; the power of governing, represented by the rod of Aaron; and life, denoted by the

manna which was the means of sustenance. Or else these three signified the three Divine attributes, namely, wisdom, in the tables; power, in the rod, goodness, in the manna—both by reason of its sweetness, and because it was through the goodness of God that it was granted to man, so that therefore it was preserved as a memorial of the Divine mercy.

Aquinas, Summa Theologica, I—II, 102, 4

24 Under the Old Law there were seven temporal solemnities, and one continual solemnity. . . . There was a continual feast, since the lamb was sacrificed every day, morning and evening; and this continual feast of an abiding sacrifice signified the perpetuity of Divine happiness. Of the temporal feasts the first was that which was repeated every week. This was the solemnity of the Sabbath, celebrated in memory of the work of the creation of the universe. Another solemnity, namely, the New Moon, was repeated every month, and was observed in memory of the work of the Divine government. For the things of this lower world owe their variety chiefly to the movement of the moon; therefore this feast was kept at the new moon, and not at the full moon, to avoid the worship of idolaters who used to offer sacrifices to the moon at that particular time. These two blessings are bestowed in common on the whole human race, and hence they were repeated more frequently.

The other five feasts were celebrated once a year, and they commemorated the benefits which had been conferred especially on that people. For there was the feast of the Passover in the first month to commemorate the blessing of being delivered out of Egypt. The feast of Pentecost was celebrated fifty days later, to recall the

blessing of the giving of the Law. The other three feasts were kept in the seventh month, nearly the whole of which was solemnized by them, just as the seventh day. For on the first of the seventh month was the feast of Trumpets, in memory of the delivery of Isaac, when Abraham found the ram caught by its horns, which they represented by the horns which they blew. The feast of Trumpets was a kind of invitation whereby they prepared themselves to keep the following feast which was kept on the tenth day. This was the feast of Expiation, in memory of the blessing whereby, at the prayer of Moses, God forgave the people's sin of worshipping the calf. After this was the feast of Scenopegia or of Tents, which was kept for seven days, to commemorate the blessing of being protected and led by God through the desert, where they lived in tents. Hence during this feast they had to take *the fruits of the fairest tree*, that is, the citron, *and trees of dense foliage*, that is, the myrtle, which is fragrant, *and branches of palm-trees, and willows of the brook*, which retain their greenness a long time. And these are to be found in the Land of promise, to signify that God had brought them through the arid land of the wilderness to a land of delights. On the eighth day another feast was observed, of Assembly and Congregation, on which the people collected the expenses necessary for the divine worship, and it signified the uniting of the people and the peace granted to them in the Land of promise.

Aquinas, Summa Theologica, I—II, 102, 4

25 They [the Jews] are, as it were, the first-born in the family of God.

Calvin, Institutes of the Christian Religion, IV, 16

26 *Shylock*. I am a Jew. Hath not a Jew eyes? hath not a Jew hands, organs, dimensions, senses, affections, passions? fed with the same food, hurt with the same weapons, subject to the same diseases, healed by the same means, warmed and cooled by the same winter and summer, as a Christian is? If you prick us, do we not bleed? if you tickle us, do we not laugh? if you poison us, do we not die? and if you wrong us, shall we not revenge? If we are like you in the rest, we will resemble you in that. If a Jew wrong a Christian, what is his humility? Revenge. If a Christian wrong a Jew, what should his sufferance be by Christian example? Why revenge.

Shakespeare, Merchant of Venice, III, i, 60

27 The king of any country is the public person, or representative of all his own subjects. And God the king of Israel was the *Holy One* of Israel, The nation which is subject to one earthly sovereign is the nation of that sovereign, that is, of the public person. So the Jews, who were God's nation, were called *a holy nation*. For by *holy* is always understood either God Himself or that which is God's in propriety; as by *public* is always meant either the person of the Commonwealth itself, or something that is so the Commonwealth's as no private person can claim any propriety therein.

Therefore the Sabbath (God's day) is a holy day; the Temple (God's house), a *holy house*; sacrifices, tithes, and offerings (God's tribute), *holy duties*; priests, prophets, and anointed kings, under Christ (God's ministers), *holy men*; the celestial ministering spirits (God's messengers), *holy angels*; and the like: and wheresoever the word *holy* is taken properly, there is still something signified of propriety gotten by consent. In saying "Hallowed be Thy

name," we do but pray to God for grace to keep the first Commandment of having no other Gods but Him. Mankind is God's nation in propriety: but the Jews only were a *holy nation*. Why, but because they became his propriety by covenant?

Hobbes, Leviathan, III, 35

28 It is not unremarkable what *Philo* first observed, That the Law of *Moses* continued two thousand years without the least alteration; whereas, we see, the Laws of other Common-weals do alter with occasions.

Sir Thomas Browne, Religio Medici, I, 23

29 The Jew is obstinate in all fortunes; the persecution of fifteen hundred years hath but confirmed them in their Errour: they have already endured whatsoever may be inflicted, and have suffered, in a bad cause, even to the condemnation of their enemies.

Sir Thomas Browne, Religio Medici, I, 25

30 To give faith to the Messiah, it was necessary there should have been precedent prophecies, and that these should be conveyed by persons above suspicion, diligent, faithful, unusually zealous, and known to all the world.

To accomplish all this, God chose this carnal people, to whom He entrusted the prophecies which foretell the Messiah as a deliverer and as a dispenser of those carnal goods which this people loved. And thus they have had an extraordinary passion for their prophets and, in sight of the whole world, have had charge of these books which foretell their Messiah, assuring all nations that He should come and in the way foretold in the books, which they

held open to the whole world. Yet this people, deceived by the poor and ignominious advent of the Messiah, have been His most cruel enemies. So that they, the people least open to suspicion in the world of favouring us, the most strict and most zealous that can be named for their law and their prophets, have kept the books incorrupt. Hence those who have rejected and crucified Jesus Christ, who has been to them an offence, are those who have charge of the books which testify of Him, and state that He will be an offence and rejected. Therefore they have shown it was He by rejecting Him, and He has been alike proved both by the righteous Jews who received Him and by the unrighteous who rejected Him, both facts having been foretold.

Wherefore the prophecies have a hidden and spiritual meaning to which this people were hostile, under the carnal meaning which they loved. If the spiritual meaning had been revealed, they would not have loved it, and, unable to bear it, they would not have been zealous of the preservation of their books and their ceremonies; and if they had loved these spiritual promises, and had preserved them incorrupt till the time of the Messiah, their testimony would have had no force, because they had been his friends.

Therefore it was well that the spiritual meaning should be concealed; but, on the other hand, if this meaning had been so hidden as not to appear at all, it could not have served as a proof of the Messiah. What then was done? In a crowd of passages it has been hidden under the temporal meaning, and in a few has been clearly revealed; besides that, the time and the state of the world have been so clearly foretold that it is clearer than the sun. And in some places this spiritual meaning is so

clearly expressed that it would require a blindness, like that which the flesh imposes on the spirit when it is subdued by it, not to recognise it.

See, then, what has been the prudence of God. This meaning is concealed under another in an infinite number of passages, and in some, though rarely, it is revealed; but yet so that the passages in which it is concealed are equivocal and can suit both meanings; whereas the passages where it is disclosed are unequivocal and can only suit the spiritual meaning.

So that this cannot lead us into error and could only be misunderstood by so carnal a people.

For when blessings are promised in abundance, what was to prevent them from understanding the true blessings, but their covetousness, which limited the meaning to worldly goods? But those whose only good was in God referred them to God alone. For there are two principles, which divide the wills of men, covetousness and charity. Not that covetousness cannot exist along with faith in God, nor charity with worldly riches, but covetousness uses God and enjoys the world, and charity is the opposite.

Now the ultimate end gives names to things. All which prevents us from attaining it is called an enemy to us. Thus the creatures, however good, are the enemies of the righteous, when they turn them away from God, and God Himself is the enemy of those whose covetousness He confounds.

Pascal, Pensées, VIII, 571

- 31 The Jewish religion is wholly divine in its authority, its duration, its perpetuity, its morality, its doctrine, and its effects.

Pascal, Pensées, IX, 603

32 The religion of the Jews seemed to consist essentially in the fatherhood of Abraham, in circumcision, in sacrifices, in ceremonies, in the Ark, in the temple, in Jerusalem, and, finally, in the law, and in the covenant with Moses.

I say that it consisted in none of those things, but only in the love of God, and that God disregarded all the other things.

Pascal, Pensées, IX, 610

33 *Michael*. God from the Mount of *Sinai*, whose gray top
Shall tremble, he descending, will himself
In Thunder Lightning and loud Trumpets sound
Ordaine them Lawes; part such as appertaine
To civil Justice, part religious Rites
Of sacrifice, informing them, by types
And shadowes, of that destined Seed to bruise
The Serpent, by what meanes he shall achieve
Mankinds deliverance. But the voice of God
To mortal eare is dreadful; they beseech
That *Moses* might report to them his will,
And terror cease; he grants them thir desire,
Instructed that to God is no access
Without Mediator, whose high Office now
Moses in figure beares, to introduce
One greater, of whose day he shall foretell,
And all the Prophets in thir Age, the times
Of great *Messiah* shall sing. Thus Laws and Rites
Establisht, such delight hath God in Men
Obedient to his will, that he voutsafes
Among them to set up his Tabernacle,
The holy One with mortal Men to dwell:

By his prescript a Sanctuary is fram'd
Of Cedar, overlaid with Gold, therein
An Ark, and in the Ark his Testimony,
The Records of his Cov'nant, over these
A Mercie-seat of Gold between the wings
Of two bright Cherubim, before him burn
Seaven Lamps as in a Zodiac representing
The Heav'nly fires; over the Tent a Cloud
Shall rest by Day, a fierie gleame by Night,
Save when they journie, and at length they come,
Conducted by his Angel to the Land
Promisd to *Abraham* and his Seed: the rest
Were long to tell, how many Battels fought,
How many Kings destroyd, and Kingdoms won,
Or how the Sun shall in mid Heav'n stand still
A day entire, and Nights due course adjourne,
Mans voice commanding, Sun in Gibeon stand,
And thou Moon in the vale of *Aialon*,
Till *Israel* overcome; so call the third
From *Abraham*, Son of *Isaac*, and from him
His whole descent, who thus shall *Canaan* win.

Milton, Paradise Lost, XII, 227

- 34 Even a cursory perusal will show us that the only respects in which the Hebrews surpassed other nations, are in their successful conduct of matters relating to government, and in their surmounting great perils solely by God's external aid; in other ways they were on a par with their fellows, and God was equally gracious to all.

Spinoza, Theologico-Political Treatise, III

35 The Jews, a headstrong, moody, murm'ring race,
As ever tried th' extent and stretch of grace;
God's pamper'd people, whom, debauch'd with ease,
No king could govern, nor no God could please.

Dryden, Absalom and Achitophel, 45

36 If the God who guided the Jews wanted to give them a good land, if these unhappy people had actually lived in Egypt, why didn't he leave them in Egypt? The only answers to this question are theological phrases.

Voltaire, Philosophical Dictionary: Judea

37 If it were permitted to reason consistently in religious matters, it is clear that we all ought to become Jews, because Jesus Christ our Saviour was born a Jew, lived a Jew, died a Jew, and that he said expressly that he was accomplishing, that he was fulfilling the Jewish religion.

Voltaire, Philosophical Dictionary: Tolerance

38 May the children of the stock of Abraham, who dwell in this land, continue to merit and enjoy the good will of the other inhabitants, while everyone shall sit in safety under his own vine and fig tree, and there shall be none to make him afraid.

*Washington, Letter to the Hebrew Congregation,
Newport, R.I. (1790)*

39 The Jews, who, under the Assyrian and Persian monarchies, had languished for many ages the most despised portion of their slaves, emerged from obscurity under the successors of Alexander; and as they multiplied to a surprising degree in the East, and

afterwards in the West, they soon excited the curiosity and wonder of other nations. The sullen obstinacy with which they maintained their peculiar rites and unsocial manners seemed to mark them out a distinct species of men, who boldly professed, or who faintly disguised, their implacable hatred to the rest of human-kind. Neither the violence of Antiochus, nor the arts of Herod, nor the example of the circumjacent nations, could ever persuade the Jews to associate with the institutions of Moses the elegant mythology of the Greeks. According to the maxims of universal toleration, the Romans protected a superstition which they despised. The polite Augustus condescended to give orders that sacrifices should be offered for his prosperity in the temple of Jerusalem; while the meanest of the posterity of Abraham, who should have paid the same homage to the Jupiter of the Capitol, would have been an object of abhorrence to himself and to his brethren. But the moderation of the conquerors was insufficient to appease the jealous prejudices of their subjects, who were alarmed and scandalised at the ensigns of paganism, which necessarily introduced themselves into a Roman province. The mad attempt of Caligula to place his own statue in the temple of Jerusalem was defeated by the unanimous resolution of a people who dreaded death much less than such an idolatrous profanation. Their attachment to the law of Moses was equal to their detestation of foreign religions. The current of zeal and devotion, as it was contracted into a narrow channel, ran with the strength, and sometimes with the fury, of a torrent.

Gibbon, Decline and Fall of the Roman Empire, XV

40 The devout and even scrupulous attachment to the Mosaic religion, so conspicuous among the Jews who lived under the second temple, becomes still more surprising if it is compared with the stubborn incredulity of their forefathers. When the law was given in thunder from Mount Sinai; when the tides of the ocean and the course of the planets were suspended for the convenience of the Israelites; and when temporal rewards and punishments were the immediate consequences of their piety or disobedience, they perpetually relapsed into rebellion against the visible majesty of their Divine King, placed the idols of the nations in the sanctuary of Jehovah, and imitated every fantastic ceremony that was practised in the tents of the Arabs, or in the cities of Phoenicia.

Gibbon, Decline and Fall of the Roman Empire, XV

41 It is the boast of the Jewish apologists, that, while the learned nations of antiquity were deluded by the fables of polytheism, their simple ancestors of Palestine preserved the knowledge and worship of the true God. The moral attributes of Jehovah may not easily be reconciled with the standard of human virtue: his metaphysical qualities are darkly expressed; but each page of the Pentateuch and the Prophets is an evidence of his power: the unity of his name is inscribed on the first table of the law; and his sanctuary was never defiled by any visible image of the invisible essence.

Gibbon, Decline and Fall of the Roman Empire, L

42 The God of the Jewish people is the God only of Abraham and of his seed: national individuality and a special local worship are involved in such a conception of deity. Before

him all other gods are false: moreover the distinction between "true" and "false" is quite abstract; for as regards the false gods, not a ray of the divine is supposed to shine into them. But every form of spiritual force, and *a fortiori* every religion is of such a nature, that whatever be its peculiar character, an affirmative element is necessarily contained in it. However erroneous a religion may be, it possesses truth, although in a mutilated phase. In every religion there is a divine presence, a divine relation; and a philosophy of history has to seek out the spiritual element even in the most imperfect forms. But it does not follow that because it is a religion, it is therefore *good*. We must not fall into the lax conception that the content is of no importance but only the form. This latitudinarian tolerance the Jewish religion does not admit, being absolutely exclusive.

Hegel, Philosophy of History, Pt. I, III, 3

- 43 The fundamental characteristics of the Jewish religion are realism and optimism, views of the world which are closely allied; they form, in fact, the conditions of theism. For theism looks upon the material world as absolutely real, and regards life as a pleasant gift bestowed upon us.

Schopenhauer, Christian System

- 44 The Jews... had an absolute monarchy and a hierarchy, and their organised institutions were as obviously of sacerdotal origin as those of the Hindoos. These did for them what was done for other Oriental races by their institutions—subdued them to industry and order, and gave them a national life. But neither their kings nor their priests ever obtained, as in those other countries, the

exclusive moulding of their character. Their religion, which enabled persons of genius and a high religious tone to be regarded and to regard themselves as inspired from heaven, gave existence to an inestimably precious unorganised institution— the Order (if it may be so termed) of Prophets. Under the protection, generally though not always effectual, of their sacred character, the Prophets were a power in the nation, often more than a match for kings and priests, and kept up, in that little corner of the earth, the antagonism of influences which is the only real security for continued progress. Religion consequently was not there what it has been in so many other places— a consecration of all that was once established, and a barrier against further improvement.

Mill, Representative Government, 11

- 45 The Jews, instead of being stationary like other Asiatics, were, next to the Greeks, the most progressive people of antiquity, and, jointly with them, have been the starting-point and main propelling agency of modern cultivation.

Mill, Representative Government, 11

- 46 The Jews are the most remarkable nation of world history because, faced with the question of being or not being, they preferred, with a perfectly uncanny conviction, being *at any price*: the price they had to pay was the radical *falsification* of all nature, all naturalness, all reality, the entire inner world as well as the outer. They defined themselves counter to all those conditions under which a nation was previously able to live, was *permitted* to live; they made of themselves an antithesis to *natural* conditions—they inverted religion, religious worship,

morality, history, psychology one after the other in an irreparable way into the *contradiction of their natural values*.

Nietzsche, Antichrist, XXIV

47 To the Jewish people fate dealt a series of severe trials and painful experiences, so their God became hard, relentless, and, as it were, wrapped in gloom. He retained the character of a universal God who reigned over all lands and peoples; the fact, however, that his worship had passed from the Egyptians to the Jews found its expression in the added doctrine that the Jews were his chosen people, whose special obligations would in the end find their special reward. It might not have been easy for that people to reconcile their belief in their being preferred to all others by an all-powerful God with the dire experiences of their sad fate. But they did not let doubts assail them, they increased their own feelings of guilt to silence their mistrust and perhaps in the end they referred to "God's unfathomable will," as religious people do to this day.

Freud, Moses and Monotheism, Pt. III, I, 1

48 Of all the peoples who lived in antiquity in the basin of the Mediterranean the Jewish people is perhaps the only one that still exists in name and probably also in nature. With an unexampled power of resistance it has defied misfortune and ill-treatment, developed special character traits, and, incidentally, earned the hearty dislike of all other peoples.

Freud, Moses and Monotheism, Pt. III, II, 2

49 The preference which through two thousand years the Jews have given to spiritual endeavour has, of course, had its effect; it has helped to build a dike against brutality and the inclination to violence which are usually found where athletic development becomes the ideal of the people. The harmonious development of spiritual and bodily activity, as achieved by the Greeks, was denied to the Jews. In this conflict their decision was at least made in favour of what is culturally the more important.

Freud, Moses and Monotheism, Pt. III, II, 4

50 The religion that began with the prohibition against making an image of its God has developed in the course of centuries more and more into a religion of instinctual renunciation.

Freud, Moses and Monotheism, Pt. III, II, 5

51 The people met with hard times; the hopes based on the favour of God were slow in being fulfilled; it became not easy to adhere to the illusion, cherished above all else, that they were God's chosen people. If they wished to keep happiness, then the consciousness of guilt because they themselves were such sinners offered a welcome excuse for God's severity. They deserved nothing better than to be punished by him, because they did not observe the laws; the need for satisfying this feeling of guilt, which, coming from a much deeper source, was insatiable, made them render their religious precepts ever and ever more strict, more exacting, but also more petty. In a new transport of moral asceticism the Jews imposed on themselves constantly increasing instinctual renunciation, and thereby reached—at least in doctrine

and precepts—ethical heights that had remained inaccessible to the other peoples of antiquity,

Freud, Moses and Monotheism, Pt. III, II, 9

52 As the Vedas offer a glimpse into the antecedents of Greek mythology, so Hebrew studies open up vistas into the antecedents of Christian dogma. Christianity in its Patristic form was an adaptation of Hebrew religion to the Graeco-Roman world, and later, in the Protestant movement, a readaptation of the same to what we may call the Teutonic spirit. In the first adaptation, Hebrew positivism was wonderfully refined, transformed into a religion of redemption, and endowed with a semi-pagan mythology, a pseudo-Platonic metaphysics, and a quasi-Roman organisation. In the second adaptation, Christianity received a new basis and standard in the spontaneous faith of the individual; and, as the traditions thus undermined in principle gradually dropped away, it was reduced by the German theologians to a romantic and mystical pantheism. Throughout its transformations, however, Christianity remains indebted to the Jews not only for its founder, but for the nucleus of its dogma, cult, and ethical doctrine. If the religion of the Jews, therefore, should disclose its origin, the origin of Christianity would also be manifest.

Santayana, Life of Reason, III, 5

20.3 Christianity

The seminal quotations here are, of course, those drawn from the New Testament, depicting events in the life of Jesus

Christ and reporting his deeds and utterances. However, the reader should be aware that many passages from the Gospels, from the Acts of the Apostles, and from the epistles of St. Paul—passages that might have been included here—have been placed in other sections of this chapter. Here, as in the case of Judaism, the secular view of Christianity, and especially of its first impact on a pagan world, is given us by the historians.

Intimations and expositions of Christian doctrine will be found in quotations from the great theologians, both Roman Catholic and Protestant. Here again the reader must be advised that, since other sections of this chapter deal with specific aspects of Christian doctrine, many passages from the theologians that might have been placed here have been allocated elsewhere. Special attention should be called to the observations on Christianity by Pascal, who is certainly one of the most brilliant and stalwart defenders of Christianity. He argues eloquently and persuasively for the proposition that Christianity is the one true religion, a proposition that is also affirmed, but defended differently, by Montesquieu and Hegel.

Adverse views of Christianity are presented by Spinoza, Rousseau, Nietzsche, and Marx among others. Less hostile is the approach of those who distinguish between the ideals of Christianity and their inadequate approximation in reality, suggesting that Christianity has been infrequently practiced and that few is the number of those who have called themselves Christians who have followed in the footsteps of Christ.

■ ■ ■

1 For unto us a child is born, unto us a son is given: and the government shall be upon his shoulder: and his name shall be called Wonderful, Counsellor, The mighty God, The everlasting Father, The Prince of Peace.

Of the increase of his government and peace there shall be no end, upon the throne of David, and upon his kingdom, to order it, and to establish it with judgment and with justice from henceforth even for ever.

Isaiah 9:6-7

2 And there shall come forth a rod out of the stem of Jesse, and a Branch shall grow out of his roots:

And the spirit of the Lord shall rest upon him, the spirit of wisdom and understanding, the spirit of counsel and might, the spirit of knowledge and of the fear of the Lord;

And shall make him of quick understanding in the fear of the Lord: and he shall not judge after the sight of his eyes, neither reprove after the hearing of his ears:

But with righteousness shall he judge the poor, and reprove with equity for the meek of the earth; and he shall smite the earth with the rod of his mouth, and with the breath of his lips shall he slay the wicked.

And righteousness shall be the girdle of his loins, and faithfulness the girdle of his reins.

Isaiah 11:1-5

3 How beautiful upon the mountains are the feet of him that bringeth good tidings, that publisheth peace; that bringeth good tidings of good, that publisheth salvation; that saith unto Zion, Thy God reigneth!

Thy watchmen shall lift up the voice; with the voice together shall they sing: for they shall see eye to eye,

when the Lord shall bring again Zion.

Isaiah 52:7-8

4 He is despised and rejected of men; a man of sorrows, and acquainted with grief: and we hid as it were our faces from him; he was despised, and we esteemed him not.

Surely he hath borne our griefs, and carried our sorrows: yet we did esteem him stricken, smitten of God, and afflicted.

But he was wounded for our transgressions, he was bruised for our iniquities: the chastisement of our peace was upon him; and with his stripes we are healed.

All we like sheep have gone astray; we have turned every one to his own way; and the Lord hath laid on him the iniquity of us all.

He was oppressed, and he was afflicted, yet he opened not his mouth: he is brought as a lamb to the slaughter, and as a sheep before her shearers is dumb, so he openeth not his mouth.

He was taken from prison and from judgment: and who shall declare his generation? for he was cut off out of the land of the living: for the transgression of my people was he stricken.

And he made his grave with the wicked, and with the rich in his death; because he had done no violence, neither was any deceit in his mouth.

Yet it pleased the Lord to bruise him; he hath put him to grief: when thou shalt make his soul an offering for sin, he shall see his seed, he shall prolong his days, and the pleasure of the Lord shall prosper in his hand.

He shall see of the travail of his soul, and shall be satisfied: by his knowledge shall my righteous servant justify many; for he shall bear their iniquities.

Therefore will I divide him a portion with the great,
and he shall divide the spoil with the strong; because he
hath poured out his soul unto death: and he was
numbered with the transgressors; and he bare the sin of
many, and made intercession for the transgressors.

Isaiah 53:3-12

5 Thou shalt call his name Jesus: for he shall save his people
from their sins.

Matthew 1:21

6 Ye are the salt of the earth: but if the salt have lost his
savour, wherewith shall it be salted? it is thenceforth
good for nothing, but to be cast out, and to be trodden
under foot of men.

Ye are the light of the world. A city that is set on an hill
cannot be hid.

Neither do men light a candle, and put it under a
bushel, but on a candlestick; and it giveth light unto all
that are in the house.

Let your light so shine before men, that they may see
your good works, and glorify your Father which is in
heaven.

Matthew 5:13-16

7 Ask, and it shall be given you; seek, and ye shall find;
knock, and it shall be opened unto you.

Matthew 7:7

8 And Jesus saith unto him, The foxes have holes, and the
birds of the air have nests; but the Son of man hath not
where to lay his head.

And another of his disciples said unto him. Lord, suffer me first to go and bury my father.

But Jesus said unto him, Follow me; and let the dead bury their dead.

Matthew 8:20-22

9 Come unto me, all ye that labour and are heavy laden, and I will give you rest.

Take my yoke upon you, and learn of me; for I am meek and lowly in heart: and ye shall find rest unto your souls.

For my yoke is easy, and my burden is light.

Matthew 11:28-30

10 As they were eating, Jesus took bread, and blessed it, and brake it, and gave it to the disciples, and said. Take, eat; this is my body.

And he took the cup, and gave thanks, and gave it to them, saying. Drink ye all of it;

For this is my blood of the new testament, which is shed for many for the remission of sins.

Matthew 26:26-28

11 And it came to pass in those days, that there went out a decree from Caesar Augustus, that all the world should be taxed.

(And this taxing was first made when Cy-re-ni-us was governor of Syria.)

And all went to be taxed, every one into his own city.

And Joseph also went up from Galilee, out of the city of Nazareth, into Judaea, unto the city of David, which is

called Bethlehem; (because he was of the house and lineage of David:)

To be taxed with Mary his espoused wife, being great with child.

And so it was, that, while they were there, the days were accomplished that she should be delivered.

And she brought forth her firstborn son, and wrapped him in swaddling clothes, and laid him in a manger; because there was no room for them in the inn.

And there were in the same country shepherds abiding in the field, keeping watch over their flock by night.

And, lo, the angel of the Lord came upon them, and the glory of the Lord shone round about them: and they were sore afraid.

And the angel said unto them. Fear not: for, behold, I bring you good tidings of great joy, which shall be to all people.

For unto you is born this day in the city of David a Saviour, which is Christ the Lord.

And this shall be a sign unto you; Ye shall find the babe wrapped in swaddling clothes, lying in a manger.

And suddenly there was with the angel a multitude of the heavenly host praising God, and saying,

Glory to God in the highest, and on earth peace, good will toward men.

And it came to pass, as the angels were gone away from them into heaven, the shepherds said one to another, Let us now go even unto Bethlehem, and see this thing which is come to pass, which the Lord hath made known unto us.

And they came with haste, and found Mary, and Joseph, and the babe lying in a manger.

And when they had seen it, they made known abroad the saying which was told them concerning this child.

And all they that heard it wondered at those things which were told them by the shepherds.

But Mary kept all these things, and pondered them in her heart.

And the shepherds returned, glorifying and praising God for all the things that they had heard and seen, as it was told unto them.

And when eight days were accomplished for the circumcising of the child, his name was called *Jesus* which was so named of the angel before he was conceived in the womb.

Luke 2:1-21

12 As the people were in expectation, and all men mused in their hearts of John, whether he were the Christ, or not;

John answered, saying unto them all, I indeed baptize you with water; but one mightier than I cometh, the latchet of whose shoes I am not worthy to unloose: he shall baptize you with the Holy Ghost and with fire:

Whose fan is in his hand, and he will thoroughly purge his floor, and will gather the wheat into his garner; but the chaff he will burn with fire unquenchable.

And many other things in his exhortation preached he unto the people.

But Herod the tetrarch, being reprov'd by him for Herodias his brother Philip's wife, and (for all the evils which Herod had done.

Added yet this above all, that he shut up John in prison.

Now when all the people were baptized, it came to pass, that Jesus also being baptized, and praying, the

heaven was opened,

And the Holy Ghost descended in a bodily shape like a dove upon him, and a voice came from heaven, which said, Thou art my beloved Son; in thee I am well pleased.

Luke 3:15-22

13 Jesus answered and said unto him, Verily, verily, I say unto thee, Except a man be born again, he cannot see the kingdom of God.

Nicodemus saith unto him, How can a man be born when he is old? can he enter the second time into his mother's womb, and be born?

Jesus answered, Verily, verily, I say unto thee, Except a man be born of water and of the Spirit, he cannot enter into the kingdom of God.

That which is born of the flesh is flesh; and that which is born of the Spirit is spirit.

Marvel not that I said unto thee, Ye must be born again.

The wind bloweth where it listeth, and thou hearest the sound thereof, but canst not tell whence it Cometh, and whither it goeth: so is every one that is born of the Spirit.

Nicodemus answered and said unto him, How can these things be?

John 3:3-9

14 Verily, verily, I say unto you, He that believeth on me hath everlasting life.

I am that bread of life.

Your fathers did eat manna in the wilderness, and are dead.

This is the bread which cometh down from heaven,
that a man may cat thereof, and not die.

I am the living bread which came down from heaven: if
any man eat of this bread, he shall live for ever: and the
bread that I will give is my flesh, which I will give for the
life of the world.

The Jew's therefore strove among themselves, saying.
How can this man give us his flesh to eat?

Then Jesus said unto them. Verily, verily, I say unto
you. Except ye eat the flesh of the Son of man, and drink
his blood, ye have no life in you.

Whoso eateth my flesh, and drinketh my blood, hath
eternal life; and I will raise him up at the last day.

For my flesh is meat indeed, and my blood is drink
indeed.

He that cateth my flesh, and drinketh my blood,
dwelleth in me, and I in him.

As the living Father hath sent me, and I live by the
Father: so he that cateth me, even he shall live by me,

This is that bread which came down from heaven: not
as your fathers did cat manna, and are dead: he that
eateth of this bread shall live for ever.

John 6:47-58

15 And as Jesus passed by, he saw a man which was blind
from his birth.

And his disciples asked him, saying, Master, who did
sin, this man, or his parents, that he was born blind?

Jesus answered, Neither hath this man sinned, nor his
parents; but that the works of God should be made
manifest in him.

I must work the works of him that sent me, while it is
day: the night cometh, when no man can work.

As long as I am in the world, I am the light of the world.

John 9:1-5

16 Jesus saith unto him, I am the way, the truth, and the life: no man cometh unto the Father, but by me.

John 14:6

17 And the peace of God, which passeth all understanding, shall keep your hearts and minds through Christ Jesus.

Philippians 4:7

18 Great is the mystery of godliness: God was manifest in the flesh, justified in the Spirit, seen of angels, preached unto the Gentiles, believed on in the world, received up into glory.

I Timothy 3:16

19 For there are three that bear record in heaven, the Father, the Word, and the Holy Ghost: and these three are one.

I John 5:7

20 I was in the Spirit on the Lord's day, and heard behind me a great voice, as of a trumpet,

Saying, I am Alpha and O-meg-a, the first and the last: and, What thou seest, write in a book, and send it unto the seven churches which are in Asia; unto Ephesus, and unto Smyrna, and unto Per-ga-mos, and unto Thy-a-ti-ra, and unto Sardis, and unto Philadelphia, and unto La-od-i-ce-a.

And I turned to see the voice that spake with me. And being turned, I saw seven golden candlesticks;

And in the midst of the seven candlesticks one like unto the Son of man, clothed with a garment down to the foot, and girt about the paps with a golden girdle.

His head and his hairs were white like wool, as white as snow; and his eyes were as a flame of fire;

And his feet like unto fine brass, as if they burned in a furnace; and his voice as the sound of many waters.

And he had in his right hand seven stars: and out of his mouth went a sharp twoedged sword: and his countenance was as the sun shineth in his strength.

And when I saw him, I fell at his feet as dead. And he laid his right hand upon me, saying unto me. Fear not; I am the first and the last:

I am he that liveth, and was dead; and, behold, I am alive for evermore. Amen.

Revelation 1:10-18

21 All human efforts, all the lavish gifts of the emperor, and the propitiations of the gods, did not banish the sinister belief that the conflagration was the result of an order. Consequently, to get rid of the report, Nero fastened the guilt and inflicted the most exquisite tortures on a class hated for their abominations, called Christians by the populace. Christus, from whom the name had its origin, suffered the extreme penalty during the reign of Tiberius at the hands of one of our procurators, Pontius Pilatus, and a most mischievous superstition, thus checked for the moment, again broke out not only in Judaea, the first source of the evil, but even in Rome, where all things hideous and shameful from every part of the world find their centre and become popular. Accordingly, an arrest was first made of all who pleaded guilty; then, upon their information, an immense multitude was convicted, not so

much of the crime of firing the city, as of hatred against mankind. Mockery of every sort was added to their deaths. Covered with the skins of beasts, they were torn by dogs and perished, or were nailed to crosses, or were doomed to the flames and burnt, to serve as a nightly illumination, when daylight had expired.

Nero offered his gardens for the spectacle, and was exhibiting a show in the circus, while he mingled with the people in the dress of a charioteer or stood aloft on a car. Hence, even for criminals who deserved extreme and exemplary punishment, there arose a feeling of compassion; for it was not, as it seemed, for the public good, but to glut one man's cruelty, that they were being destroyed.

Tacitus, Annals, XV, 44

22 There are, to be sure, other things also quite as "foolish" [as the birth of Christ], which have reference to the humiliations and sufferings of God. Or else, let them call a crucified God "wisdom." But Marcion will apply the knife to this [doctrine] also, and even with greater reason. For which is more unworthy of God, which is more likely to raise a blush of shame, that [God] should be born, or that He should die? that He should bear the flesh, or the cross? be circumcised, or be crucified? be cradled, or be confined? be laid in a manger, or in a tomb? [Talk of "wisdom!"] You will show more of that if you refuse to believe this also. But, after all, you will not be "wise" unless you become a "fool" to the world, by believing "the foolish things of God."... And He was buried, and rose again; the fact is certain, because it is impossible.

Tertullian, De Carne Christi, 5

23 The sermon which Our Lord delivered on the mountain contains the whole process of forming the life of a Christian. Therein man's interior movements are ordered perfectly. For after declaring that his end is Happiness, and after commending the authority of the apostles, through whom the teaching of the Gospel was to be promulgated, He orders man's interior movements, first in regard to man himself, secondly in regard to his neighbour.

This he does in regard to man himself, in two ways, corresponding to man's two interior movements in respect of any prospective action namely, volition of what has to be done, and intention of the end. Therefore, in the first place. He directs man's will in respect of the various precepts of the Law by prescribing that man should refrain not merely from those external works that are evil in themselves, but also from internal acts, and from the occasions of evil deeds. In the second place He directs man's intention, by teaching that in our good works we should seek neither human praise, nor worldly riches, which is to lay up treasures on earth.

Afterwards He directs man's interior movement in respect of his neighbour, by forbidding us, on the one hand, to judge him rashly, unjustly, or presumptuously, and, on the other, to entrust him too readily with sacred things if he be unworthy.

Lastly, He teaches us how to fulfil the teaching of the Gospel; namely, by imploring the help of God, by striving to enter by the narrow door of perfect virtue, and by being wary lest we be led astray by evil influences. Moreover He declares that we must observe His commandments, and that it is not enough to make

profession of faith, or to work miracles, or merely to hear His words.

Aquinas, Summa Theologica, I—II, 108, 3

24 I admonish every pious Christian that he take not offence at the plain, unvarnished manner of speech of the Bible. Let him reflect that what may seem trivial and vulgar to him, emanates from the high majesty, power, and wisdom of God. The Bible is the book that makes fools of the wise of this world; It is understood only of the plain and simple hearted. Esteem this book as the precious fountain that can never be exhausted. In it thou findest the swaddling-clothes and the manger whither the angels directed the poor, simple shepherds; they seem poor and mean, but dear and precious is the treasure that lies therein.

Luther, Table Talk, H57

25 All the wisdom of the world is childish foolishness in comparison with the acknowledgment of Christ. For what is more wonderful than the unspeakable mystery, that the Son of God, the image of the eternal Father, took upon him the nature of man. Doubtless, he helped his supposed father, Joseph, to build houses; for Joseph was a carpenter. What will they of Nazareth think at the day of judgment, when they shall see Christ sitting in his divine majesty; surely they will be astonished, and say; Lord, thou helpest build my house, how comest thou now to this high honour?

When Jesus was born, doubtless, he cried and wept like other children, and his mother tended him as other mothers tend their children. As he grew up, he was submissive to his parents, and waited on them, and

carried his supposed father's dinner to him, and when he came back, Mary, no doubt, often said: "My dear little Jesus, where hast thou been?" He that takes not offence at the simple, lowly, and mean course of the life of Christ, is endued with high divine art and wisdom; yea, has a special gift of God in the Holy Ghost. Let us ever bear in mind, that our blessed Saviour thus humbled and abased himself, yielding even to the contumelious death of the cross, for the comfort of us poor miserable, and damned creatures.

Luther, Table Talk, H187

- 26 The operative cause of the sacrament is the word and institution of Christ, who ordained it. The substance is bread and wine, prefiguring the true body and blood of Christ, which is spiritually received by faith. The final cause of instituting the same, is the benefit and the fruit, the strengthening of our faith, not doubting that Christ's body and blood were given and shed for us, and that our sins by Christ's death certainly are forgiven.

Luther, Table Talk, H363

- 27 *Shylock*. O father Abram, what these Christians are,
Whose own hard dealings teaches them suspect
The thoughts of others!

Shakespeare, Merchant of Venice, I, iii, 161

- 28 *Marcellus*. Some say that ever 'gainst that season comes
Wherein our Saviour's birth is celebrated,
The bird of dawning singeth all night long:
And then, they say, no spirit dare stir abroad;
The nights are wholesome; then no planets strike,

No fairy takes, nor witch hath power to charm,
So hallow'd and so gracious is the time.

Shakespeare, Hamlet, I, i, 158

- 29 Baptism is the sacrament of allegiance of them that are to be received into the kingdom of God; that is to say, into eternal life; that is to say, to remission of sin: for as eternal life was lost by the committing, so it is recovered by the remitting of men's sins.

Hobbes, Leviathan, III, 42

- 30 Religions, as the pagan, are... popular, for they consist in externals. But they are not for educated people. A purely intellectual religion would be more suited to the learned, but it would be of no use to the common people. The Christian religion alone is adapted to all, being composed of externals and internals. It raises the common people to the internal, and humbles the proud to the external; it is not perfect without the two, for the people must understand the spirit of the letter, and the learned must submit their spirit to the letter.

Pascal, Pensées, IV, 251

- 31 The Christian religion... teaches men these two truths; that there is a God whom men can know, and that there is a corruption in their nature which renders them unworthy of Him, It is equally important to men to know both these points; and it is equally dangerous for man to know God without knowing his own wretchedness, and to know his own wretchedness without knowing the Redeemer who can free him from it. The knowledge of only one of these points gives rise either to the pride of

philosophers, who have known God, and not their own wretchedness, or to the despair of atheists, who know their own wretchedness, but not the Redeemer.

And, as it is alike necessary to man to know these two points, so is it alike merciful of God to have made us know them. The Christian religion does this; it is in this that it consists.

Let us herein examine the order of the world and see if all things do not tend to establish these two chief points of this religion: Jesus Christ is the end of all, and the centre to which all tends. Whoever knows Him knows the reason of everything.

Those who fall into error err only through failure to see one of these two things. We can, then, have an excellent knowledge of God without that of our own wretchedness and of our own wretchedness without that of God. But we cannot know Jesus Christ without knowing at the same time both God and our own wretchedness.

Therefore I shall not undertake here to prove by natural reasons either the existence of God, or the Trinity, or the immortality of the soul, or anything of that nature; not only because I should not feel myself sufficiently able to find in nature arguments to convince hardened atheists, but also because such knowledge without Jesus Christ is useless and barren. Though a man should be convinced that numerical proportions are immaterial truths, eternal and dependent on a first truth, in which they subsist and which is called God, I should not think him far advanced towards his own salvation.

The God of Christians is not a God who is simply the author of mathematical truths, or of the order of the elements; that is the view of heathens and Epicureans. He is not merely a God who exercises His providence over

the life and fortunes of men, to bestow on those who worship Him a long and happy life. That was the portion of the Jews, But the God of Abraham, the God of Isaac, the God of Jacob, the God of Christians, is a God of love and of comfort, a God who fills the soul and heart of those whom He possesses, a God who makes them conscious of their inward wretchedness, and His infinite mercy, who unites Himself to their inmost soul, who fills it with humility and joy, with confidence and love, who renders them incapable of any other end than Himself.

All who seek God without Jesus Christ, and who rest in nature, either find no light to satisfy them, or come to form for themselves a means of knowing God and serving Him without a mediator. Thereby they fall either into atheism, or into deism, two things which the Christian religion abhors almost equally.

Without Jesus Christ the world would not exist; for it should needs be either that it would be destroyed or be a hell.

If the world existed to instruct man of God, His divinity would shine through every part in it in an indisputable manner; but as it exists only by Jesus Christ, and for Jesus Christ, and to teach men both their corruption and their redemption, all displays the proofs of these two truths.

All appearance indicates neither a total exclusion nor a manifest presence of divinity, but the presence of a God who hides Himself. Everything bears this character.

Pascal, Pensées, VIII, 556

- 32 That religion has always existed on earth which consists in believing that man has fallen from a state of glory and of communion with God into a state of sorrow, penitence, and estrangement from God, but that after this life we

shall be restored by a Messiah who should have come. All things have passed away, and this has endured, for which all things are.

Men have in the first age of the world been carried away into every kind of debauchery, and yet there were saints, as Enoch, Lamech, and others, who waited patiently for the Christ promised from the beginning of the world, Noah saw the wickedness of men at its height; and he was held worthy to save the world in his person, by the hope of the Messiah of whom he was the type. Abraham was surrounded by idolaters, when God made known to him the mystery of the Messiah, whom he welcomed from afar. In the time of Isaac and Jacob, abomination was spread over all the earth; but these saints lived in faith; and Jacob, dying and blessing his children, cried in a transport which made him break off his discourse, "I await, O my God, the Saviour whom Thou hast promised. . . The Egyptians were infected both with idolatry and magic; the very people of God were led astray by their example. Yet Moses and others believed Him whom they saw not, and worshipped Him, looking to the eternal gifts which He was preparing for them.

The Greeks and Latins then set up false deities; the poets made a hundred different theologies, while the philosophers separated into a thousand different sects; and yet in the heart of Judaea there were always chosen men who foretold the coming of this Messiah, which was known to them alone.

He came at length in the fullness of time, and time has since witnessed the birth of so many schisms and heresies, so many political revolutions, so many changes in all things; yet this Church, which worships Him who has always been worshipped, has endured

uninterruptedly. It is a wonderful, incomparable, and altogether divine fact that this religion, which has always endured, has always been attacked. It has been a thousand times on the eve of universal destruction, and every time it has been in that state, God has restored it by extraordinary acts of His power.

Pascal, Palsies, IX, 613

33 *Michael*. Nor after resurrection shall he stay
Longer on Earth then certaine times to appeer
To his Disciples, Men who in his Life
Still follow'd him; to them shall leave in charge
To teach all nations what of him they learn'd
And his Salvation, them who shall beleeeve
Baptizing in the profluent streame, the signe
Of washing them from guilt of sin to Life
Pure, and in mind prepar'd, if so befall.
For death, like that which the redeemer dy'd.

Milton, Paradise Lost, XII, 436

34 I have often wondered, that persons who make a boast of professing the Christian religion, namely, love, joy, peace, temperance, and charity to all men, should quarrel with such rancorous animosity, and display daily towards one another such bitter hatred, that this, rather than the virtues they claim, is the readiest criterion of their faith.

Spinoza, Theohgico-Political Treatise, Pref.

35 Christians are distinguished from the rest of the world, not by faith, nor by charity, nor by the other fruits of the Holy Spirit, but solely by their opinions, inasmuch as they defend their cause, like everyone else, by miracles, that

is by ignorance, which is the source of all malice; thus they turn a faith, which may be true, into superstition.

Spinoza, Letter to Henry Oldenburg (Nov. 1675)

36 Now I saw in my Dream, that the highway up which *Christian* was to go, was fenced on either side with a Wall, and that Wall is called *Salvation*. Up this way therefore did burdened *Christian* run, but not without great difficulty, because of the load on his back.

He ran thus till he came at a place somewhat ascending; and upon that place stood a Cross, and a little below in the bottom, a Sepulchre. So I saw in my Dream, that just as *Christian* came up with the *Cross*, his burden loosed from off his Shoulders, and fell from off his back, and began to tumble; and so continued to do, till it came to the mouth of the Sepulchre, where it fell in, and I saw it no more.

Bunyan, Pilgrim's Progress, I

37 The System of the Gospel, after the Fate of other Systems, is generally antiquated and exploded; and the Mass or Body of the common People, among whom it seems to have had its latest Credit, are now grown as much ashamed of it as their Betters; Opinions, like Fashions, always, descending from those of Quality to the middle Sort, and thence to the Vulgar, where at length they are dropp'd and vanish.

Swift, Argument Against Abolishing Christianity

38 The Christian religion, which ordains that men should love each other, would, without doubt, have every nation blest with the best civil, the best political laws; because

these, next to this religion are the greatest good that men can give and receive.

Montesquieu, Spirit of Laws, XXIV,1

- 39 The principles of Christianity, deeply engraved on the heart, would be infinitely more powerful than the false honour of monarchies, than the humane virtues of republics, or the servile fear of despotic states.

Montesquieu, Spirit of Laws, XXIV, 6

- 40 Christianity as a religion is entirely spiritual, occupied solely with heavenly things; the country of the Christian is not of this world. He does his duty, indeed, but does it with profound indifference to the good or ill success of his cares. Provided he has nothing to reproach himself with, it matters little to him whether things go well or ill here on earth. If the State is prosperous, he hardly dares to share in the public happiness, for fear he may grow proud of his country's glory; if the State is languishing, he blesses the hand of God that has laid upon His people.

Rousseau, Social Contract, IV, 8

- 41 Christianity preaches only servitude and dependence. Its spirit is so favourable to tyranny that it always profits by such a *regime*. True Christians are made to be slaves, and they know it and do not much mind; this short life counts for too little in their eyes.

Rousseau, Social Contract, IV, 8

- 42 *Johnson*. As to the Christian religion, Sir, besides the strong evidence which we have for it, there is a balance in its favour from the number of great men who have

been convinced of its truth, after a serious consideration of the question. Grotius was an acute man, a lawyer, a man accustomed to examine evidence, and he was convinced. Grotius was not a recluse, but a man of the world, who certainly had no bias to the side of religion. Sir Isaac Newton set out an infidel, and came to be a very firm believer.

Boswell, Life of Johnson (July 28, 1763)

43 On Sunday, June 3, we all went to Southill church, which is very near to Mr. Dilly's house. It being the first Sunday of the month, the holy sacrament was administered, and I staid to partake of it. When I came afterwards into Dr. Johnson's room, he said, "You did right to stay and receive the communion; I had not thought of it." This seemed to imply that he did not choose to approach the altar without a previous preparation, as to which good men entertain different opinions, some holding that it is irreverent to partake of that ordinance without considerable premeditation; others, that whoever is a sincere Christian, and in a proper frame of mind to discharge any other ritual duty of our religion, may, without scruple, discharge this most solemn one. A middle notion I believe to be the just one, which is, that communicants need not think a long train of preparatory forms indispensably necessary; but neither should they rashly and lightly venture upon so awful and mysterious an institution. Christians must judge each for himself, what degree of retirement and self-examination is necessary upon each occasion.

Boswell, Life of Johnson (June 3, 1781)

44 The Christians were not less adverse to the business than to the pleasures of this world. The defence of our persons and property they knew not how to reconcile with the patient doctrine which enjoined an unlimited forgiveness of past injuries, and commanded them to invite the repetition of fresh insults. Their simplicity was offended by the use of oaths, by the pomp of magistracy, and by the active contention of public life; nor could their humane ignorance be convinced that it was lawful on any occasion to shed the blood of our fellow-creatures, either by the sword of justice or by that of war, even though their criminal or hostile attempts should threaten the peace and safety of the whole community. . . . This indolent, or even criminal disregard to the public welfare, exposed them to the contempt and reproaches of the Pagans, who very frequently asked, what must be the fate of the empire, attacked on every side by the barbarians, if all mankind should adopt the pusillanimous sentiments of the new sect? To this insulting question the Christian apologists returned obscure and ambiguous answers, as they were unwilling to reveal the secret cause of their security; the expectation that, before the conversion of mankind was accomplished, war, government, the Roman empire, and the world itself, would be no more. It may be observed that, in this instance likewise, the situation of the first Christians coincided very happily with their religious scruples, and that their aversion to an active life contributed rather to excuse them from the service than to exclude them from the honours of the state and army.

Gibbon, Decline and Fall of the Roman Empire, XV

45 it is not easy to extract any distinct ideas from the Vague though eloquent declamations of the Fathers, or to

ascertain the degree of immortal glory and happiness which they confidently promised to those who were so fortunate as to shed their blood in the cause of religion. They inculcated with becoming diligence that the fire of martyrdom supplied every defect and expiated every sin; that, while the souls of ordinary Christians were obliged to pass through a slow and painful purification, the triumphant sufferers entered into the immediate fruition of eternal bliss, where, in the society of the patriarchs, the apostles, and the prophets, they reigned with Christ, and acted as his assessors in the universal judgment of mankind.

Gibbon, Decline and Fall of the Roman Empire, XVI

- 46 A quiet conscience makes one so serene! Christians have burnt each other, quite persuaded That all the Apostles would have done as they did.

Byron, Don Juan, I, 83

- 47 Christianity has this peculiar disadvantage, that unlike other religions, it is not a pure system of doctrine: its chief and essential feature is that it is a history, a series of events, a collection of facts, a statement of the actions and sufferings of individuals: it is this history which constitutes dogma, and belief in it is salvation.

Schopenhauer, Christian System

- 48 This is the miracle of Christianity, more wonderful than that one of changing the water into wine; this miracle in all stillness, without any change of rulers, moreover without a hand being moved, of making every man, divinely understood, into a king, so easily, so smoothly,

so miraculously, that the world in a certain sense does not need to know it. For in the world outside, there the king will and ought to be the only one who rules according to his conscience; but to obey—for conscience's sake will be permitted everyone; moreover, no one, no one can prevent it. And there within, there far within, where the Christian dwells in the conscience-relation, there is everything changed.

Lo, the world raises a tumult just to bring about a little change; it sets heaven and earth in motion for nothing, like the mountain which brought forth a mouse: Christianity in all stillness brings about the change of the infinite as if it were nothing. It is so quiet, quiet as nothing worldly can be; as quiet as only the dead and inwardness can be; and what else is Christianity but inwardness!

Thus Christianity transforms every relation between men into a conscience-relationship, and thus also into a love-relationship.

Kierkegaard, Works of Love, I, 3B

- 49 The Christian world is always offended by the true Christian. Only now the passion of offense is not ordinarily so strong that it wishes to eradicate him; no, it will only continue to mock and insult him. This is easy to explain. At the time when the world was itself conscious of not being Christian, then there was something to fight about, then it was a fight to the death. But now, when the world is proudly and calmly certain that it is Christian, the true Christian insistence is merely something to laugh at. The confusion is even more distressing than in the first period of Christianity. That was distressing, but there was meaning in it, since the world was fighting to the

death against Christianity. But the world's present lofty calmness in its consciousness of being Christian, its cheap bit of mockery, if one wishes to call it that—of the real Christian: this almost borders on madness. For never in its first period was Christianity thus made the object of ridicule.

Kierkegaard, Works of Love, I, 5

50 Official preaching has falsely represented religion, Christianity, as nothing but consolation, happiness etc. And consequently doubt has the advantage of being able to say in a *superior* way: I do not wish to be made happy by an illusion.

If Christianity were truthfully presented as suffering, ever greater as one advances further in it: doubt would have been disarmed, and in any case there would have been no opportunity for being superior—where it was a matter of avoiding— pain.

Kierkegaard, Journals (1851)

51 Every Stoic was a Stoic; but in Christendom where is the Christian?

Emerson, Self-Reliance

52 The modern Christian is a man who has consented to say all the prayers in the liturgy, provided you will let him go straight to bed and sleep quietly afterward. All his prayers begin with "Now I lay me down to sleep," and he is forever looking forward to the time when he shall go to his "long rest." He has consented to perform certain old, established charities, too, after a fashion, but he does not wish to hear of any new-fangled ones; he doesn't wish to

have any supplementary articles added to the contract to fit it to the present time. He shows the whites of his eyes on the Sabbath, and the blacks all the rest of the week.

Thoreau, Plea for Captain John Brown

53 Christianity only hopes. It has hung its harp on the willows, and cannot sing a song in a strange land. It has dreamed a sad dream, and does not yet welcome the morning with joy.

Thoreau, The Christian Fable

54 The religious world is but the reflex of the real world. And for a society based upon the production of commodities, in which the producers in general enter into social relations with one another by treating their products as commodities and values, whereby they reduce their individual private labour to the standard of homogeneous human labour—for such a society, Christianity with its cultus of abstract man, more especially in its bourgeois developments, Protestantism, Deism, etc., is the most fitting form of religion.

Marx, Capital, Vol. I, I, 1

55 To pretend that Christianity was intended to stereotype existing forms of government and society, and protect them against change, is to reduce it to the level of Islamism or of Brahminism. It is precisely because Christianity has not done this that it has been the religion of the progressive portion of mankind, and Islamism, Brahminism, etc. have been those of the stationary portions; or rather (for there is no such thing as a really stationary society) of the declining portions. There have

been abundance of people, in all ages of Christianity, who tried to make it something of the same kind; to convert us into a sort of Christian Mussulmans, with the Bible for a Koran, prohibiting all improvement: and great has been their power, and many have had to sacrifice their lives in resisting them. But they have been resisted, and the resistance has made us what we are, and will yet make us what we are to be.

Mill, Subjection of Women, II

56 Sometimes an attempt is made to determine the "leading idea," as it has been called, of Christianity, an ambitious essay as employed on a supernatural work, when, even as regards the visible creation and the inventions of man, such a task is beyond us. Thus its one idea has been said by some to be the restoration of our fallen race, by others philanthropy, by others the tidings of immortality, or the spirituality of true religious service, or the salvation of the elect, or mental liberty, or the union of the soul with God. If, indeed, it is only thereby meant to use one or other of these as a central idea for convenience, in order to group others around it, no fault can be found with such a proceeding; and in this sense I should myself call the Incarnation the central aspect of Christianity, out of which the three main aspects of its teaching take their rise, the sacramental, the hierarchical, and the ascetic. But one aspect of Revelation must not be allowed to exclude or to obscure another; and Christianity is dogmatical, devotional, practical all at once; it is esoteric and exoteric; it is indulgent and strict; it is light and dark; it is love, and it is fear.

*Newman, Essay on the Development of Christian
Doctrine, Pt. I, I, 1*

- 57 Christianity is that which righteousness really is.
Therefore, if something called Christianity prevails, and yet the promises are not satisfied, the inference is that this *something* is not that which righteousness really is, and therefore not really Christianity.

Arnold, Literature and Dogma, XII

- 58 *Father Paissy*. The science of this world, which has become a great power, has, especially in the last century, analysed everything divine handed down to us in the holy books. After this cruel analysis the learned of this world have nothing left of all that was sacred of old. But they have only analysed the parts and overlooked the whole, and in deed their blindness is marvellous. Yet the whole still stands steadfast before their eyes, and the gates of hell shall not prevail against it. Has it not lasted nineteen centuries, is it not still a living a moving power in the individual soul and in the masses of people? It is still as strong and living even in the souls of atheists, who have destroyed everything! For even those who have renounced Christianity and attack it, in their inmost being still follow the Christian ideal, for hitherto neither their subtlety nor the ardour of their hearts has been able to create a higher ideal of man and of virtue than the ideal given by Christ of old. When it has been attempted, the result has been only grotesque.

Dostoevsky, Brothers Karamazov, Pt. II, IV, 1

- 59 It is a basic tenet of Christianity that all men are equal, not only because of their equal relation to the infinite,

but because they are brothers, they are all acknowledged as sons of God.

Tolstoy, What Is Religion?, VI

60 The Christian faith is a sacrifice: a sacrifice of all freedom, all pride, all self-confidence of the spirit; at the same time, enslavement and self-mockery, self-mutilation.

Nietzsche, Beyond Good and Evil, III, 46

61 Suppose we could contemplate the oddly painful and equally crude and subtle comedy of European Christianity with the mocking and aloof eyes of an Epicurean god, I think our amazement and laughter would never end: doesn't it seem that a single will dominated Europe for eighteen centuries—to turn man into a *sublime miscarriage*?

Nietzsche, Beyond Good and Evil, III, 62

62 What is more harmful than any vice?—Active sympathy for the ill-constituted and weak—Christianity.

Nietzsche, Antichrist, II

63 One should not embellish or dress up Christianity: it has waged a *war to the death* against this *higher* type of man, it has excommunicated all the fundamental instincts of this type, it has distilled evil, the *Evil One*, out of these instincts—the strong human being as the type of reprehensibility, as the 'outcast'. Christianity has taken the side of everything weak, base, ill-constituted, it has made an ideal out of *opposition* to the preservative instincts of strong life; it has depraved the reason even of the intellectually strongest natures by teaching men to

feel the supreme values of intellectuality as sinful, as misleading, as *temptations*. The most deplorable example: the depraving of Pascal, who believed his reason had been depraved by original sin while it had only been depraved by his Christianity!

Nietzsche, Antichrist, V

64 Why not give Christianity a trial? The question seems a hopeless one after 2000 years of resolute adherence to the old cry of "Not this man, but Barabbas." Yet it is beginning to look as if Barabbas was a failure, in spite of his strong right hand, his victories, his empires, his millions of money, and his moralities and churches and political constitutions. "This man" has not been a failure yet; for nobody has ever been sane enough to try his way.

Shaw, Androcles and the Lion, Pref.

65 The doctrines in which Jesus is thus confirmed are, roughly, the following:

1. The kingdom of heaven is within you. You are the son of God; and God is the son of man. God is a spirit, to be worshipped in spirit and in truth, and not an elderly gentleman to be bribed and begged from. We are members one of another; so that you cannot injure or help your neighbor without injuring or helping yourself. God is your father: you are here to do God's work; and you and your father are one.

2. Get rid of property by throwing it into the common stock. Dissociate your work entirely from money payments. If you let a child starve you are letting God starve. Get rid of all anxiety about tomorrow's dinner and

clothes, because you cannot serve two masters: God and Mammon.

3. Get rid of judges and punishment and revenge. Love your neighbor as yourself, he being a part of yourself. And love your enemies: they are your neighbors.

4. Get rid of your family entanglements. Every mother you meet is as much your mother as the woman who bore you. Every man you meet is as much your brother as the man she bore after you. Dont waste your time at family funerals grieving for your relatives: attend to life, not to death: there are as good fish in the sea as ever came out of it, and better. In the kingdom of heaven, which, as aforesaid, is within you, there is no marriage nor giving in marriage, because you cannot devote your life to two divinities: God and the person you are married to.

Shaw, Androcles and the Lion, Pref.

66 Christianity has two faces. Popular Christianity has for its emblem a gibbet, for its chief sensation a sanguinary execution after torture, for its central mystery an insane vengeance bought off by a trumpery expiation. But there is a nobler and profounder Christianity which affirms the sacred mystery of Equality, and forbids the glaring futility and folly of vengeance, often politely called punishment or justice. The gibbet part of Christianity is tolerated. The other is criminal felony.

Shaw, Major Barbara, Pref.

67 Surely some revelation is at hand;
Surely the Second Coming is at hand.
The Second Coming! Hardly are those words out
When a vast image out of *Spiritus Mundi*

Troubles my sight: somewhere in sands of the desert
A shape with lion body and the head of a man,
A gaze blank and pitiless as the sun,
Is moving its slow thighs, while all about it
Reel shadows of the indignant desert birds.
The darkness drops again; but now I know
That twenty centuries of stony sleep
Were vexed to nightmare by a rocking cradle,
And what rough beast, its hour come round at last,
Slouches towards Bethlehem to be born?

Yeats, The Second Coming

68 Religious experience... may take other forms than the Christian, and within Christianity it may take other forms than the Catholic; but the Catholic form is as good as any intrinsically for the devotee himself, and it has immense advantages over its probable rivals in charm, in comprehensiveness, in maturity, in internal rationality, in external adaptability; so much so that a strong anticlerical government, like the French, cannot safely leave the church to be overwhelmed by the forces of science, good sense, ridicule, frivolity, and avarice (all strong forces in France), but must use violence as well to do it. In the English church, too, it is not those who accept the deluge, the resurrection, and the sacraments only as symbols that are the vital party, but those who accept them literally; for only these have anything to say to the poor, or to the rich, that can refresh them. In a frank supernaturalism, in a tight clericalism, not in a pleasant secularisation, lies the sole hope of the church. Its sole dignity also lies there. It will not convert the world; it never did and it never could. It will remain a voice crying in the wilderness; but it will believe what it

cries, and there will be some to listen to it in the future, as there have been many in the past. As to modernism, it is suicide. It is the last of those concessions to the spirit of the world which half-believers and double-minded prophets have always been found making; but it is a mortal concession. It concedes everything; for it concedes that everything in Christianity, as Christians hold it, is an illusion.

Santayana, Winds of Doctrine, II

69 Let the reader fill out this outline [of the Christian epic] for himself with its thousand details; let him remember the endless mysteries, arguments, martyrdoms, consecrations that carried out the sense and made vital the beauty of the whole. Let him pause before the phenomenon; he can ill afford, if he wishes to understand history or the human mind, to let the apparition float by unchallenged without delivering up its secret. What shall we say of this Christian dream?

Those who are still troubled by the fact that this dream is by many taken for a reality, and who are consequently obliged to defend themselves against it, as against some dangerous error in science or in philosophy, may be allowed to marshal arguments in its disproof. Such, however, is not my intention. Do we marshal arguments against the miraculous birth of Buddha, or the story of Cronos devouring his children? We seek rather to honour the piety and to understand the poetry embodied in those fables. If it be said that those fables are believed by no one, I reply that those fables are or have been believed just as unhesitatingly as the Christian theology, and by men no less reasonable or learned than the unhappy apologists of our own ancestral creeds. Matters

of religion should never be matters of controversy. We neither argue with a lover about his taste, nor condemn him, if we are just, for knowing so human a passion. That he harbours it is no indication of a want of sanity on his part in other matters. But while we acquiesce in his experience, and are glad he has it, we need no arguments to dissuade us from sharing it. Each man may have his own loves, but the object in each case is different. And so it is, or should be, in religion.

Santayana, Life of Reason, III, 6

20.4 Church

The Temple, in the Old Testament, is both an architectural monument and a unique religious symbol; destroyed, it can be rebuilt; forgotten, it can be restored and remembered. It is by no means the only place of Jewish worship; synagogues exist wherever a small number of Jews come together to worship communally; in contrast, the Temple is the sole repository of the Ark of the Covenant and houses the holy of holies.

As there can be many synagogues, so there can be many churches, each a house of worship, each a cell of the Christian religious community. But unlike the Temple, the Church, in the Christian tradition, has no architectural embodiment, nor is it a religious symbol or a unique repository of sacred objects. Rather it is, in the language of Christian theologians, the mystical body of Christ, the city of God on earth. The relation of church and state is thus conceived as the relation of the city of God to the city of man; further subtleties are introduced by the distinction between the church visible and the church invisible, the church militant and the church triumphant.

The quotations included here discuss, among other things, the foundation of the Church, the unity of the Church and the plurality of churches, the mode of government appropriate to the Church, and church reform.

■ ■ ■

1 And Jesus, walking by the sea of Galilee, saw two brethren, Simon called Peter, and Andrew his brother, casting a net into the sea: for they were fishers.

And he saith unto them, Follow me, and I will make you fishers of men.

And they straightway left their nets, and followed him.

And going on from thence, he saw other two brethren, James the son of Zebedee, and John his brother, in a ship with Zebedee their father, mending their nets; and he called them.

And they immediately left the ship and their father, and followed him.

Matthew 4:18-22

2 When Jesus came into the coasts of Caesarea Phi-lip-pi, he asked his disciples, saying, Whom do men say that I the Son of man am?

And they said, Some say that thou art John the Baptist: some, E-li-as; and others, Jer-e-mi-as, or one of the prophets.

He saith unto them. But whom say ye that I am?

And Simon Peter answered and said, Thou art the Christ, the Son of the living God.

And Jesus answered and said unto him, Blessed art thou, Simon Bar-jo-na: for flesh and blood hath not revealed h unto thee, but my Father which is in heaven.

And I say also unto thee. That thou art Peter, and upon this rock I will build my church; and the gates of hell shall not prevail against it.

And I will give unto thee the keys of the kingdom of heaven: and whatsoever thou shalt bind on earth shall be bound in heaven: and whatsoever thou shalt loose on earth shall be loosed in heaven.

Matthew 16:13-19

3 Moreover if thy brother shall trespass against thee, go and tell him his fault between thee and him alone: if he shall hear thee, thou hast gained thy brother.

But if he will not hear thee, then take with thee one or two more, that in the mouth of two or three witnesses every word may be established.

And if he shall neglect to hear them, tell it unto the church: but if he neglect to hear the church, let him be unto thee as an heathen man and a publican.

Verily I say unto you, Whatsoever ye shall bind on earth shall be bound in heaven: and whatsoever ye shall loose on earth shall be loosed in heaven.

Again I say unto you, That if two of you shall agree on earth as touching any thing that they shall ask, it shall be done for them of my Father which is in heaven.

For where two or three are gathered together in my name, there am I in the midst of them.

Matthew 18:15-20

4 Then the eleven disciples went away into Galilee, into a mountain where Jesus had appointed them.

And when they saw him, they worshipped him: but some doubted.

And Jesus came and spake unto them, saying, All power is given unto me in heaven and in earth.

Go ye therefore, and teach all nations, baptizing them in the name of the Father, and of the Son, and of the Holy Ghost:

Teaching them to observe all things whatsoever I have commanded you: and, lo, I am with you alway, even unto the end of the world. Amen.

Matthew 28:16-20

5 Afterward he appeared unto the eleven as they sat at meat, and upbraided them with their unbelief and hardness of heart, because they believed not them which had seen him after he was risen.

And he said unto them, Go ye into all the world, and preach the gospel to every creature.

He that believeth and is baptized shall be saved; but he that believeth not shall be damned.

And these signs shall follow them that believe; In my name shall they cast out devils; they shall speak with new tongues;

They shall take up serpents; and if they drink any deadly thing, it shall not hurt them; they shall lay hands on the sick, and they shall recover.

Mark 16:14-18

6 And there was also a strife among them, which of them should be accounted the greatest.

And he said unto them. The kings of the Gentiles exercise lordship over them; and they that exercise authority upon them are called benefactors.

But ye shall not be so: but he that is greatest among you, let him be as the younger; and he that is chief, as he that doth serve.

For whether is greater, he that sitteth at meat, or he that serveth? is not he that sitteth at meat? but I am among you as he that serveth.

Ye are they which have continued with me in my temptations.

And I appoint unto you a kingdom, as my Father hath appointed unto me;

That ye may eat and drink at my table in my kingdom,
and sit on thrones judging the twelve tribes of Israel.

Luke 22:24-30

7 Verily, verily, I say unto you, He that entereth not by the door into the sheepfold, but climbeth up some other way, the same is a thief and a robber.

But he that entereth in by the door is the shepherd of the sheep.

To him the porter openeth; and the sheep hear his voice; and he calleth his own sheep by name and leadeth them out.

And when he putteth forth his own sheep, he goeth before them, and the sheep follow him; for they know his voice.

And a stranger will they not follow, but will flee from him: for they know not the voice of strangers.

This parable spake Jesus unto them; but they understood not what things they were which he spake unto them.

Then said Jesus unto them again, Verily, verily, I say unto you, I am the door of the sheep.

All that ever came before me are thieves and robbers: but the sheep did not hear them.

I am the door: by me if any man enter in, he shall be saved, and shall go in and out, and find pasture.

The thief cometh not, but for to steal, and to kill, and to destroy: I am come that they might have life, and that they might have it more abundantly.

I am the good shepherd: the good shepherd giveth his life for the sheep.

John 10:1-11

8 Simon Peter said unto him. Lord, whither goest thou? Jesus answered him, Whither I go, thou canst not follow me now; but thou shalt follow me afterwards.

Peter said unto him, Lord, why cannot I follow thee now? I will lay down my life for thy sake.

Jesus answered him. Wilt thou lay down thy life for my sake? Verily, verily, I say unto thee, The cock shall not crow, till thou hast denied me thrice.

John 13:36-38

9 These things I command you, that ye love one another.

If the world hate you, ye know that it hated me before it hated you.

If ye were of the world, the world would love his own: but because ye are not of the world, but I have chosen you out of the world, therefore The world hateth you.

John 15:17-19

10 Then the same day at evening, being the first day of the week, when the doors were shut where The disciples were assembled for fear of the Jews, came Jesus and stood in the midst, and saith unto them, Peace be unto you.

And when he had so said, he shewed unto them his hands and his side. Then were The disciples glad, when they saw the Lord.

Then said Jesus to them again. Peace be unto you: as my Father hath sent me, even so send I you.

And when he had said this, he breathed on them, and saith unto them, Receive ye the Holy Ghost:

Whose soever sins ye remit, they are remitted unto them; and whose soever sins ye retain, they are retained.

John 20:19-23

11 So when they had dined, Jesus saith to Simon Peter, Simon, son of Jonas, lovest thou me more than these? He saith unto him. Yea, Lord; thou know-est that I love thee. He saith unto him, Feed my lambs.

He saith to him again the second time, Simon, son of Jonas, lovest thou me? He saith unto him, Yea, Lord; thou knowest that I love thee. He saith unto him, Feed my sheep.

He saith unto him the third time, Simon, son of Jonas, lovest thou me? Peter was grieved because he said unto him the third time, Lovest thou me? And he said unto him, Lord, thou knowest all things; thou knowest that I love thee. Jesus saith unto him, Feed my sheep.

John 21:15-17

12 On this account some allegorize all that concerns Paradise itself, where the first men, the parents of the human race, are, according to the truth of holy Scripture, recorded to have been; and they understand all its trees and fruit-bearing plants as virtues and habits of life, as if they had no existence in the external world, but were only so spoken of or related for the sake of spiritual meanings. As if there could not be a real terrestrial Paradise! As if there never existed these two women, Sarah and Hagar, nor the two sons who were born to Abraham, the one of the bond woman, the other of the free, because the apostle says that in them the two covenants were prefigured; or as if water never flowed from the rock when Moses struck it, because therein Christ can be seen in a figure, as the same apostle says, "Now that rock was Christ!" No one, then, denies that

Paradise may signify the life of the blessed; its four rivers, the four virtues, prudence, fortitude, temperance, and justice; its trees, all useful knowledge; its fruits, the customs of the godly; its tree of life, wisdom herself, the mother of all good; and the tree of the knowledge of good and evil, the experience of a broken commandment. The punishment which God appointed was in itself, a just, and therefore a good thing; but man's experience of it is not good.

These things can also and more profitably be understood of the Church, so that they become prophetic foreshadowings of things to come. Thus Paradise is the Church, as it is called in the Canticles; the four rivers of Paradise are the four gospels; the fruit-trees the saints, and the fruit their works; the tree of life is the holy of holies, Christ; the tree of the knowledge of good and evil, the will's free choice. For if man despise the will of God, he can only destroy himself; and so he learns the difference between consecrating himself to the common good and revelling in his own. For he who loves himself is abandoned to himself, in order that, being overwhelmed with fears and sorrows, he may cry, if there be yet soul in him to feel his ills, in the words of the psalm, "My soul is cast down within me," and when chastened, may say, "Because of his strength I will wait upon Thee." These and similar allegorical interpretations may be suitably put upon Paradise without giving offence to any one, while yet we believe the strict truth of the history, confirmed by its circumstantial narrative of facts.

Augustine, City of God, XIII, 21

13 In this wicked world, in these evil days, when the Church measures her future loftiness by her present humility,

and is exercised by goading fears, tormenting sorrows, disquieting labours, and dangerous temptations, when she soberly rejoices, rejoicing only in hope, there are many reprobates mingled with the good, and both are gathered together by the gospel as in a dragnet; and in this world, as in a sea, both swim enclosed without distinction in the net, until it is brought ashore, when the wicked must be separated from the good, that in the good, as in His temple, God may be all in all. We acknowledge, indeed, that His word is now fulfilled who spake in the psalm, and said, "I have announced and spoken; they are multiplied above number." This takes place now, since He has spoken, first by the mouth of His forerunner John, and afterward by His own mouth, saying, "Repent: for the kingdom of heaven is at hand." He chose disciples, whom He also called apostles, of lowly birth, unhonoured, and illiterate, so that whatever great thing they might be or do. He might be and do it in them. He had one among them whose wickedness He could use well in order to accomplish His appointed passion, and furnish His Church an example of bearing with the wicked. Having sown the Holy Gospel as much as that behoved to be done by His bodily presence. He suffered, died, and rose again, showing by His passion what we ought to suffer for the truth, and by His resurrection what we ought to hope for in adversity; saving always the mystery of the sacrament, by which His blood was shed for the remission of sins. He held converse on the earth forty days with His disciples, and in their sight ascended into heaven, and after ten days sent the promised Holy Spirit. It was given as the chief and most necessary sign of His coming on those who had believed, that every one of them spoke in the tongues of all nations; thus

signifying that the unity of the Catholic Church would embrace all nations and would in like manner speak in all tongues.

Augustine, City of God, XVIII, 49

- 14 The Church is His body, as the apostle's teaching shows us; and it is even called His spouse. His body, then, which has many members, and all performing different functions, He holds together in the bond of unity and love, which is its true health. Moreover He exercises it in the present time, and purges it with many wholesome afflictions, that, when He has transplanted it from this world to the eternal world, He may take it to Himself as His bride, without spot or wrinkle, or any such thing.

Augustine, Christian Doctrine, I, 16

- 15 The universal Church cannot err, since she is governed by the Holy Ghost Who is the Spirit of truth.

Aquinas, Summa Theologica, II-II, 1, 9

- 16 It is manifest that he who adheres to the teaching of the Church, as to an infallible rule, assents to whatever the Church teaches. Otherwise, if, of the things taught by the Church, he holds what he chooses to hold, and rejects what he chooses to reject, he no longer adheres to the teaching of the Church as to an infallible rule, but to his own will.

Aquinas, Summa Theologica, II-II, 5, 3

- 17 Those who are unbelievers, though not actually in the Church, are in the Church potentially. And this potentiality is rooted in two things—first and principally,

in the power of Christ, which is sufficient for the salvation of the whole human race; secondly, in the liberty of choice.

Aquinas, Summa Theologica, II, 8, 3

- 18 The term Church is taken in two senses. For sometimes it denotes the body only, which is united to Christ as its Head. In this way alone has the Church the character of spouse, and in this way Christ is not a member of the Church, but is the Head from which all the members receive. In another sense the Church denotes the head and members united together; and thus Christ is said to be a member of the Church, in so far as He fulfils an office distinct from all others, by pouring forth life into the other members, although He is not very properly called a member, since a member implies a certain restriction, whereas in Christ spiritual good is not restricted but is absolutely entire, so that He is the entire good of the Church, nor is He together with others anything greater than He is by Himself.

Aquinas, Summa Theologica, III Suppl., 95, 3

- 19 There where we came, at the first step, was white marble so polished and smooth that I mirrored me therein as I appear.

The second darker was than perse, of a stone, rugged and calcined, cracked in its length and in its breadth.

The third, which is massy above, seemed to me of porphyry so flaming red as blood that spurts from a vein.

Upon this God's angel held both his feet, sitting upon the threshold, which seemed to me adamantine stone.

Up by the three steps, with my good will, my Leader [Virgil] brought me, saying: "Humbly ask that the bolt be loosed."

Devoutly I flung me at the holy feet; for mercy I craved that he would open to me; but first on my breast thrice I smote me.

Seven P's upon my forehead he described with the point of his sword and: "Do thou wash these wounds when thou art within," he said.

Ashes, or earth which is dug out dry, would be of one colour with his vesture, and from beneath it he drew forth two keys.

One was of gold and the other was of silver; first with the white and then with the yellow he did so to the gate that I was satisfied.

"Whensoever one of these keys fails so that it turns not aright in the lock," said he to us, "this passage opens not.

More precious is one, but the other requires exceeding art and wit ere it unlocks, because it is the one which unties the knot.

From Peter I hold them; and he told me to err rather in opening, than in keeping it locked, if only the people fell prostrate at my feet."

Then he pushed the door of the sacred portal, saying: "Enter, but I make you ware that he who looketh behind returns outside again."

Dante, Purgatorio, IX, 94

20 In form, then, of a white rose displayed itself to me that sacred soldiery which in his blood Christ made his spouse;

but the other, which as it flieth seeth and doth sing his
glory who enamoureth it, and the excellence which hath
made it what it is,

like to a swarm of bees which doth one while plunge
into the flowers and another while wend back to where its
toil is turned to sweetness,

ever descended into the great flower adorned with so
many leaves, and reascended thence to where its love
doth ceaseless make sojourn.

They had their faces all of living flame, and wings of
gold, and the rest so white that never snow reacheth such
limit.

When they descended into the flow'er, from rank to
rank they proffered of the peace and of the ardour which
they acquired as they fanned their sides,

nor did the interposing of so great a flying multitude,
betwixt the flower and that which was above, impede the
vision nor the splendour;

for the divine light so penetrateth through the
universe, in measure of its worthiness, that naught hath
power to oppose it.

Dante, Paradiso, XXXI, 1

21 This... monk let such old things slowly pace
And followed new-world manners in their place.
He cared not for that text a clean-plucked hen
Which holds that hunters are not holy men;
Nor that a monk, when he is cloisterless,
Is like unto a fish that's waterless;
That is to say, a monk out of his cloister.
But this same text he held not worth an oyster;
And I said his opinion was right good.
What? Should he study as a madman would

Upon a book in cloister cell? Or yet
Go labour with his hands and swink and sweat,
As Austin bids? How shall the world be served?
Let Austin have his toil to him reserved.

Chaucer, Canterbury Tales: The Prologue

- 22 The Church owes its life to the word of promise through faith, and is nourished and preserved by this same word. That is to say, the promises of God make the Church, not the Church the promise of God. For the Word of God is incomparably superior to the Church, and in this Word the Church, being a creature, has nothing to decree, ordain or make, but only to be decreed, ordained and made. For who begets his own parent? Who first brings forth his own maker?

Luther, Babylonian Captivity of the Church

- 23 The Christian Church... will always exist on earth, together with the office of preaching the Gospel, Baptism, and the Lord's Supper. These are in force as long as the world remains. For if He is to be an eternal Priest, He must always have a people or a following which recognizes His priestly office and exists by virtue of it. He must have people who believe in Him, preach Him, and confess His name in word and conduct. If He did not have such a following any longer. He could no longer be called a Priest. Therefore, He maintains Christendom on earth until the Last Day against all the power and might that opposes, and rages against, it. In this Christendom He rules as Priest or true pope through the office of the ministry and through the power of the Holy Spirit, in order even in this life to make new men out of us, to

communicate to us His eternal and divine gifts, that now we may have daily and everlasting forgiveness of sins, His power and strength, victory over death, devil, and hell, and may begin our life of eternal righteousness.

Luther, Commentary on Psalm 110

24 Where God's word is purely taught, there is also the upright and true church; for the true church is supported by the Holy Ghost, not by succession of inheritance.

Luther, Table Talk, H370

25 It is impossible for the Christian and true church to subsist without the shedding of blood, for her adversary, the devil, is a liar and a murderer. The church grows and increases through blood; she is sprinkled with blood; she is spoiled and bereaved of her blood; when human creatures will reform the church, then it costs blood.

Luther, Table Talk, H371

26 The word *Church* is used in the sacred Scriptures in two senses. Sometimes, when they mention the Church, they intend that which is really such in the sight of God, into which none are received but those who by adoption and grace are the children of God, and by the sanctification of the Spirit are the true members of Christ. And then it comprehends not only the saints at any one time resident on earth, but all the elect who have lived from the beginning of the world. But the word *Church* is frequently used in the Scriptures to designate the whole multitude, dispersed all over the world, who profess to worship one God and Jesus Christ, who are initiated into his faith by baptism, who testify their unity in true doctrine and

charity by a participation of the sacred supper, who consent to the word of the Lord, and preserve the ministry which Christ has instituted for the purpose of preaching it. In this Church are included many hypocrites, who have nothing of Christ but the name and appearance; many persons ambitious, avaricious, envious, slanderous, and dissolute in their lives, who are tolerated for a time, either because they cannot be convicted by a legitimate process, or because discipline is not always maintained with sufficient vigour. As it is necessary, therefore, to believe that Church, which is invisible to us, and known to God alone, so this Church, which is visible to men, we are commanded to honour, and to maintain communion with it.

Calvin, Institutes of the Christian Religion, IV, 1

- 27 Connected with the preaching of the gospel, another assistance and support for our faith is presented to us in the sacraments; on the subject of which it is highly important to lay down some certain doctrine, that we may learn for what end they were instituted, and how they ought to be used. In the first place, it is necessary to consider what a sacrament is. Now, I think it will be a simple and appropriate definition, if we say that it is an outward sign, by which the Lord seals in our consciences the promises of his good-will towards us, to support the weakness of our faith; and we on our part testify our piety towards him, in his presence and that of angels, as well as before men. It may, however, be more briefly defined, in other words, by calling it a testimony of the grace of God towards us, confirmed by an outward sign, with a reciprocal attestation of our piety towards him.

Calvin, Institutes of the Christian Religion, IV, 14

28 Methinks, Sir Knight-Errant, said he [Vivaldo] to him, you have taken up one of the strictest and most mortifying Professions in the World. I don't think but that a *Carthusian* Friar has a better Time on't than You have. Perhaps, answer'd Don *Quixote*, the Profession of a *Carthusian* may be as Austere, but I am within two Fingers Breadth of doubting, whether it may be as Beneficial to the World as ours. For, if we must speak the Truth, the Soldier, who put his Captain's Command in Execution, may be said to do as much at least as the Captain who commanded him. The Application is easy: For, while those religious Men have nothing to do, but with all Quietness and Security to say their Prayers for the Prosperity of the World, We Knights, like Soldiers, execute what they do but pray for, and procure those Benefits to Mankind, by the Strength of our Arms, and at the Hazard of our Lives, for which they only interceed. Nor do we do this shelter'd from the Injuries of the Air, but under no other Roof than that of the wide Heavens, expos'd to Summer's scorching Heat, and Winter's pinching Cold. So that we may justly style ourselves the Ministers of Heaven, and the Instruments of its Justice upon Earth; and as the Business of War is not to be compass'd without vast Toil and Labour, so the religious Soldier must undoubtedly be preferr'd before the religious Monk, who living still quiet and at Ease, has nothing to do but to pray for the Afflicted and Distressed. However, Gentlemen, do not imagine I wou'd insinuate as if the Profession of a Knight-Errant was a State of Perfection equal to that of a holy Recluse: I would only infer from what I've said, and what I my self endure, that

Ours without question is more laborious, more subject to the Discipline of heavy Blows, to Maceration, to the Penance of Hunger and Thirst, and in a Word, to Rags, to Want and Misery. For if you find that some Knights-Errant have at last by their Valour been rais'd to Thrones and Empires, you may be sure it has been still at the Expence of much Sweat and Blood. And had even those happier Knights been depriv'd of those assisting Sages and Inchanters, who help'd 'em in all Emergencies, they wou'd have been strangely disappointed of their mighty Expectations.

Cervantes, Don Quixote, I, 13

29 Perchance he for whom this bell tolls may be so ill as that he knows not it tolls for him; and perchance I may think myself so much better than I am, as that they who are about me and see my state may have caused it to toll for me, and I know not that. The church is catholic, universal, so are all her actions; all that she does belongs to all. When she baptizes a child, that action concerns me; for that child is thereby connected to that body which is my head too, and ingrafted into that body whereof I am a member. And when she buries a man, that action concerns me: all mankind is of one author and is one volume; when one man dies, one chapter is not torn out of the book, but translated into a better language; and every chapter must be so translated. God employs several translators; some pieces are translated by age, some by sickness, some by war, some by justice; but God's hand is in every translation and his hand shall bind up all our scattered leaves again for that library where every book shall he open to one another. As therefore the bell that rings to a sermon calls not upon the preacher

only, but upon the congregation to come, so this bell calls us all; but how much more me, who am brought so near the door by this sickness. There was a contention as far as a suit (in which piety and dignity, religion and estimation, were mingled) which of the religious orders should ring to prayers first in the morning; and it was determined that they should ring first that rose earliest. If we understand aright the dignity of this bell that tolls for our evening prayer, we would be glad to make it ours by rising early, in that application, that it might be ours as well as his whose indeed it is. The bell doth toll for him that thinks it doth; and though it intermit again, yet from that minute that that occasion wrought upon him, he is united to God. Who casts not up his eye to the sun when it rises? but who takes off his c) from a comet when that breaks out? Who bends not his ear to any bell which upon any occasion rings? but who can remove it from that bell which is passing a piece of himself out of this world? No man is an island, entire of itself; every man is a piece of the continent, a part of the main. If a clod be washed away by the sea, Europe is the less, as well as if a promontory were, as well as if a manor of thy friend's or of thine own were. Any man's death diminishes me because I am involved in mankind, and therefore never send to know for whom the bell tolls; it tolls for thee.

Donne, Devotions upon Emergent Occasions, XVII

30 I define a Church to be: a company of men professing Christian religion, united in the person of one sovereign; at whose command they ought to assemble, and without whose authority they ought not to assemble. And because in all Commonwealths that assembly which is without warrant from the civil sovereign is unlawful; that

Church also which is assembled in any Commonwealth that hath forbidden them to assemble is an unlawful assembly.

Hobbes, Leviathan, III, 39

- 31 There is on earth no such universal Church as all Christians are bound to obey, because there is no power on earth to which all other Commonwealths are subject. There are Christians in the dominions of several princes and states, but every one of them is subject to that Commonwealth whereof he is himself a member, and consequently cannot be subject to the commands of any other person.

Hobbes, Leviathan, III, 39

- 32 The greatest and main abuse of Scripture, and to which almost all the rest are either consequent or subservient, is the wresting of it to prove that the kingdom of God, mentioned so often in the Scripture, is the present Church, or multitude of Christian men now living, or that, being dead, are to rise again at the last day.

Hobbes, Leviathan, IV, 44

- 33 Those who do confine the Church of God, either to particular Nations, Churches or Families, have made it far narrower then our Saviour ever meant it.

Sir Thomas Browne, Religio Medici, I, 55

- 34 If some... men, who, by an extraordinary vocation, have made profession of withdrawing from the world and adopting the monks' dress, in order to live in a more perfect state than ordinary Christians, have fallen into

excesses which horrify ordinary Christians, and have become to us what the false prophets were among the Jews; this is a private and personal misfortune, which must indeed be deplored, but from which nothing can be inferred against the care which God takes of His Church; since all these things are so clearly foretold, and it has been so long since announced that these temptations would arise from people of this kind; so that when we are well instructed, we see in this rather evidence of the care of God than of His forgetfulness in regard to us.

Pascal, Pensees, XIV, 889

35 God regards only the inward; the Church judges only by the outward. God absolves as soon as He sees penitence in the heart; the Church when she sees it in works. God will make a church pure within, which confounds, by its inward and entirely spiritual holiness, the inward impiety of proud sages and Pharisees; and the Church will make an assembly of men whose external manners are so pure as to confound the manners of the heathen. If there are hypocrites among them, but so well disguised that she does not discover their venom, she tolerates them; for, though they are not accepted of God, whom they cannot deceive, they are of men, whom they do deceive. And thus she is not dishonoured by their conduct, which appears holy.

Pascal, Pensées, XIV, 905

36 Last came, and last did go,
The Pilot of the *Galilean* lake,
Two massy Keyes he bore of metals twain,
(The Golden opes, the Iron shuts amain)

He shook his Miter'd locks, and stem bespake,
How well could I have spar'd for thee, young swain,
Anow of such as for their bellies sake,
Creep and intrude, and climb into the fold?
Of other care they little reck'ning make.
Then how to scramble at the shearers feast,
And shove away the worthy bidden guest.
Blind mouths! that scarce themselves know how to hold
A Sheep-hook, or have learn'd ought els the least
That to the faithfull Herdmans art belongs!
What recks it them? What need they? They are sped;
And when they list, their lean and flashy songs
Grate on their scrannel Pipes of wretched straw,
The hungry Sheep look up, and are not fed,
But swoln with wind, and the rank mist they draw,
Rot inwardly, and foul contagion spread:
Besides what the grim Wolf with privy paw
Daily devours apace, and nothing sed,
But that two-handed engine at the door,
Stands ready to smite once, and smite no more.

Milton, Lycidas, 108

- 37 The rites of religion and the outward observances of piety should be in accordance with the public peace and well-being, and should therefore be determined by the sovereign power alone.

Spinoza, Theologico-Political Treatise, XIX

- 38 A church ... I take to be a voluntary society of men, joining themselves together of their own accord in order to the public worshipping of God in such manner as they

judge acceptable to Him, and effectual to the salvation of their souls.

Locke, Letter Concerning Toleration

39 No man by nature is bound unto any particular church or sect, but everyone joins himself voluntarily to that society in which he believes he has found that profession and worship which is truly acceptable to God. The hope of salvation, as it was the only cause of his entrance into that communion, so it can be the only reason of his stay there. For if afterwards he discover anything either erroneous in the doctrine or incongruous in the worship of that society to which he has joined himself, why should it not be as free for him to go out as it was to enter? No member of a religious society can be tied with any other bonds but what proceed from the certain expectation of eternal life. A church, then, is a society of members voluntarily uniting to that end.

Locke, Letter Concerning Toleration

40 To be of no church is dangerous. Religion, of which the rewards are distant and which is animated only by Faith and Hope, will glide by degrees out of the mind, unless it be invigorated and reimpresed by external ordinances, by stated calls to worship, and the salutary influence of example.

Johnson, Life of Milton

41 It may be laid down as a certain maxim that, all other things being supposed equal, the richer the church, the poorer must necessarily be, either the sovereign on the

one hand, or the people on the other; and, in all cases, the less able must the state be to defend itself.

Adam Smith, Wealth of Nations, V, 1

- 42 The acquisition of... absolute command over the consciences and understanding of a congregation, however obscure or despised by the world, is more truly grateful to the pride of the human heart than the possession of the most despotic power imposed by arms and conquest on a reluctant people.

Gibbon, Decline and Fall of the Roman Empire, XV

- 43 In one of the marches of Constantine [according to the Christian fable of Eusebius], he is reported to have seen with his own eyes the luminous trophy of the cross, placed above the meridian sun, and inscribed with the following words: *By this conquer*. This amazing object in the sky astonished the whole army, as well as the emperor himself, who was yet undetermined in the choice of a religion: but his astonishment was converted into faith by the vision of the ensuing night. Christ appeared before his eyes; and displaying the same celestial sign of the cross, he directed Constantine to frame a similar standard, and to march, with an assurance of victory, against Maxentius and all his enemies. . . . The Catholic church, both of the East and of the West, has adopted a prodigy which favours, or seems to favour, the popular worship of the cross. The vision of Constantine maintained an honourable place in the legend of superstition till the bold and sagacious spirit of criticism presumed to depreciate the triumph, and to arraign the truth, of the first Christian emperor.

Gibbon, Decline and Fall of the Roman Empire, XX

- 44 A magnificent temple is a laudable monument of national taste and religion, and the enthusiast who entered the dome of St. Sophia might be tempted to suppose that it was the residence, or even the workmanship, of the Deity. Yet how dull is the artifice, how insignificant is the labour, if it be compared with the formation of the vilest insect that crawls upon the surface of the temple!

Gibbon, Decline and Fall of the Roman Empire, XL

- 45 Dear mother, dear mother, the Church is cold. But the Ale-house is healthy and pleasant and warm.

Blake, The Little Vagabond

- 46 The Church ... is not merely a *religion* as opposed to another religion, but is at the same time a particular form of secular existence, occupying a place side by side with other secular existence. The religious existence of the Church is governed by Christ; the secular side of its government is left to the free choice of the members themselves.

Hegel, Philosophy of History, Pt. III, III 2

- 47 If a man will hold fast to this which is indeed Christ's own saying, that the truth is the way, he will perceive ever more clearly that a Church triumphant in this world is a vain conceit, that in this world there can be question only of a Church militant.

Kierkegaard, Training in Christianity, III, 5

48 Bluntly put, a chaplain is the minister of the Prince of Peace serving in the host of the God of War—Mars, As such, he is as incongruous as a musket would be on the altar at Christmas. Why, then, is he there? Because he indirectly subserves the purpose attested by the cannon; because too he lends the sanction of the religion of the meek to that which practically is the abrogation of everything but brute force.

Melville, Billy Budd

49 The church is a sort of hospital for men's souls, and as full of quackery as the hospital for their bodies.

Thoreau, The Christian Fable

50 *Grand Inquisitor*. So long as man remains free he strives for nothing so incessantly and so painfully as to find someone to worship. But man seeks to worship what is established beyond dispute, so that all men would agree at once to worship it. For these pitiful creatures are concerned not only to find what one or the other can worship, but to find something that all would believe in and worship; what is essential is that all may be *together* in it. This craving for *community* of worship is the chief misery of every man individually and of all humanity from the beginning of time. For the sake of common worship they've slain each other with the sword. They have set up gods and challenged one another, "Put away your gods and come and worship ours, or we will kill you and your gods!"

Dostoevsky, Brothers Karamazov, Pt. 11, V, 5

51 The Christian churches and Christianity have nothing in common save in name: they are utterly hostile opposites. The churches are arrogance, violence, usurpation, rigidity, death; Christianity is humility, penitence, submissiveness, progress, life.

Tolstoy, The Kingdom of God Is Within you

52 I *condemn* Christianity, I bring against the Christian Church the most terrible charge any prosecutor has ever uttered. To me it is the extremest thinkable form of corruption, it has had the will to the ultimate corruption conceivably possible. The Christian Church has left nothing untouched by its depravity, it has made of every value a disvalue, of every truth a lie, of every kind of integrity a vileness of soul. People still dare to talk to me of its 'humanitarian' blessings! To *abolish* any state of distress whatever has been profoundly inexpedient to it: it has lived on states of distress, it has *created* states of distress in order to eternalize *itself*.

Nietzsche, Antichrist, LXII

53 We may recall from what we know of the morphology of groups that it is possible to distinguish very different kinds of groups and opposing lines in their development. There are very fleeting groups and extremely lasting ones; homogeneous ones, made up of the same sorts of individuals, and unhomogeneous ones; natural groups, and artificial ones, requiring an external force to keep them together; primitive groups, and highly organized ones with a definite structure. But for reasons which have yet to be explained we should like to lay particular stress upon a distinction to which the authorities have rather

given too little attention; I refer to that between leaderless groups and those with leaders. And, in complete opposition to the usual practice, we shall not choose a relatively simple group formation as our point of departure, but shall begin with highly organized, lasting, and artificial groups. The most interesting example of such structures are churches—communities of believers—and armies.

A church and an army are artificial groups, that is, a certain external force is employed to prevent them from disintegrating and to check alterations in their structure. As a rule a person is not consulted, or is given no choice, as to whether he wants to enter such a group; any attempt at leaving it is usually met with persecution or with severe punishment, or has quite definite conditions attached to it. It is quite outside our present interest to enquire why these associations need such special safeguards. We are only attracted by one circumstance, namely that certain facts, which are far more concealed in other cases, can be observed very clearly in those highly organized groups which are protected from dissolution in the manner that has been mentioned.

In a church (and we may with advantage take the Catholic Church as a type) as well as in an army, however different the two may be in other respects, the same illusion holds good of there being a head—in the Catholic Church Christ, in an army its commander-in-chief—who loves all the individuals in the group with an equal love. Everything depends upon this illusion; if it were to be dropped, then both Church and army would dissolve, so far as the external force permitted them to. This equal love was expressly enunciated by Christ; "Inasmuch as ye have done it unto one of the least of these my brethren,

ye have done it unto me." He stands to the individual members of the group of believers in the relation of a kind elder brother; he is their father surrogate. All the demands that are made upon the individual are derived from this love of Christ's. A democratic character runs through the Church, for the very reason that before Christ everyone is equal, and that everyone has an equal share in his love. It is not without a deep reason that the similarity between the Christian community and a family is invoked, and that believers call themselves *brothers in Christ*, that is, brothers through the love which Christ has for them.

Freud, Group Psychology and Analysis of the Ego, V

54 The broad-backed hippopotamus

Rests on his belly in the mud;
Although he seems so firm to us
He is merely flesh and blood.

Flesh and blood is weak and frail,
Susceptible to nervous shock;
While the True Church can never fail
For it is based upon a rock.

The hippo's feeble steps may err
In compassing material ends,
While the True Church need never stir
To gather in its dividends.

The 'potamus can never reach
The mango on the mango-tree;
But fruits of pomegranate and peach
Refresh the Church from over sea.

At mating time the hippo's voice
Betrays inflexions hoarse and odd,
But every week we hear rejoice
The Church, at being one with God.

The hippopotamus's day
Is passed in sleep; at night he hunts;
God works in a mysterious way—
The Church can sleep and feed at once.

I saw the 'potamus take wing
Ascending from the damp savannas,
And quiring angels round him sing
The praise of God, in loud hosannas.

Blood of the Lamb shall wash him clean
And him shall heavenly arms enfold,
Among the saints he shall be seen
Performing on a harp of gold.

He shall be washed as white as snow.
By all the martyr'd virgins kist,
While the True Church remains below
Wrapt in the old miasmal mist.

T, S. Eliot, The Hippopotamus

55 To receive that call, Stephen, said the priest, is the greatest honour that the Almighty God can bestow upon a man. No king or emperor on this earth has the power of the priest of God. No angel or archangel in heaven, no saint, not even the Blessed Virgin herself has the power of a priest of God: the power of the keys, the power to

bind and to loose from sin, the power of exorcism, the power to cast out from the creatures of God the evil spirits that have power over them, the power, the authority, to make the great God of Heaven come down upon the altar and take the form of bread and wine. What an awful power, Stephen!

Joyce, Portrait of the Artist as a Young Man, IV

20.5 God

In the Western tradition, the idea of God has generated a very voluminous discussion. The quotations included here represent, we hope, a judicious selection from that discussion, but many aspects of it, especially intricate subtleties that delight philosophers and theologians, cannot be adequately covered, and some are not even touched on.

The notion of a single deity, or reference to God in the singular, is not confined to books that reflect the Jewish and Christian faiths. Such references are also to be found in the writings of the Greek and Roman poets and philosophers, side by side with references to the Olympian deities or the gods of the Roman pantheon. In fact, the works of Plato and Aristotle contain passages that have come to be looked upon as anticipations of the doctrines about God's nature and attributes and of the demonstration of God's existence that are more fully developed later in the writings of Christian theologians. The other major source upon which the theologians draw is, of course, the Old and the New Testament, the latter especially for the doctrines of the trinity, of the incarnation, and of the resurrection. For theological exegesis, the most remarkable scriptural

passage is, perhaps, the one in Exodus, in which God announces himself to Moses in the words: "I am that I am."

A great many of the quotations drawn from the theologians and philosophers deal with the question of God's existence and with the arguments that are claimed to demonstrate it. One argument in particular, the famous ontological argument first proposed by Anselm, is rejected by theologians and philosophers who think that the existence of God must be proved or at least affirmed on some basis other than the conception we entertain of the supreme being.

The positions of the deist and the pantheist, as well as of the agnostic and the atheist, are represented here along with a variety of versions of orthodox theism. As the reader would expect, the reader will find Augustine, Anselm, Aquinas, Luther, Galvin, Descartes, Hobbes, Leibniz, and Locke aligned, in one way or another, against Spinoza, Hume, Voltaire, Kant, Nietzsche, Bertrand Russell, and Freud. Pascal's contribution to the discussion stands out for its emphasis on the mystery of God and on the reasonableness of seeking God even though reason itself affords no assurance of finding him through arguments or proofs.

Other discussions relevant to our knowledge of God will be found in Section 6.4 on Error, Ignorance, and the Limits of Human Knowledge, Section 6.5 on Opinion, Belief, and Faith, and Section 17.1 on Philosophy and Philosophers.

■ ■ ■

1 Moses said, I will now turn aside, and see this great sight, why the bush is not burnt.

And when the Lord saw that he turned aside to see, God called unto him out of the midst of the bush, and said, Moses, Moses. And he said, Here am I.

And he said. Draw not nigh hither: put off thy shoes from off thy feet, for the place whereon thou standest is holy ground.

Moreover he said, I am the God of thy father, the God of Abraham, the God of Isaac, and the God of Jacob. And Moses hid his face; for he was afraid to look upon God.

Exodus 3:3-6

- 2 God said unto Moses, *I am that I am*: and he said, Thus shah thou say unto the children of Israel, *I am* hath sent me unto you.

And God said moreover unto Moses, Thus shah thou say unto the children of Israel, The Lord God of your fathers, the God of Abraham, the God of Isaac, and the God of Jacob, hath sent me unto you: this is my name for ever, and this is my memorial unto all generations.

Exodus 3:14-15

- 3 Then sang Moses and the children of Israel this song unto the Lord, and spake, saying, I will sing unto the Lord, for he hath triumphed gloriously: the horse and his rider hath he thrown into the sea.

The Lord is my strength and song, and he is become my salvation: he is my God, and I will prepare him an habitation; my father's God, and I will exalt him.

The Lord is a man of war: the Lord is his name.

Pharaoh's chariots and his host hath he cast into the sea: his chosen captains also are drowned in the Red sea.

The depths have covered them: they sank into the bottom as a stone.

Thy right hand, O Lord, is become glorious in power: thy right hand, O Lord, hath dashed in pieces the enemy.

And in the greatness of thine excellency thou hast overthrown them that rose up against thee: thou sentest forth thy wrath, which consumed them as stubble.

And with the blast of thy nostrils the waters were gathered together, the floods stood upright as an heap, and the depths were congealed in the heart of the sea.

The enemy said, I will pursue, I will overtake, I will divide the spoil; my lust shall be satisfied upon them; I will draw my sword, my hand shall destroy them.

Thou didst blow with thy wind, the sea covered them: they sank as lead in the mighty waters.

Who is like unto thee, O Lord, among the gods? who is like thee, glorious in holiness, fearful in praises, doing wonders?

Exodus 15:1-11

4 Thou canst not see my face: for there shall no man see me, and live.

Exodus 33:20

5 The Lord bless thee, and keep thee:

The Lord make his face shine upon thee, and be gracious unto thee:

The Lord lift up his countenance upon thee, and give thee peace.

Numbers 6:24-26

6 The Lord thy God is a consuming fire, even a jealous God.

Deuteronomy 4:24

7 And he [the angel of the Lord] said, Go forth, and stand upon the mount before the Lord. And, behold, the Lord passed by, and a great and strong wind rent the mountains, and brake in pieces the rocks before the-Lord; but the Lord was not in the wind: and after the wind an earthquake; but the Lord was not in the earthquake:

And after the earthquake a fire; but the Lord was not in the fire: and after the fire a still small voice.

1 Kings 19:11-12

8 Though he slay me, yet will I trust in him: but I will maintain mine own ways before him.

Job 13:15

9 The heavens declare the glory of God; and the firmament sheweth his handywork.

Day unto day uttereth speech, and night unto night sheweth knowledge.

There is no speech nor language, where their voice is not heard.

Their line is gone out through all the earth, and their words to the end of the world. In them hath he set a tabernacle for the sun,

Which is as a bridegroom coming out of his chamber, and rejoiceth as a strong man to run a race.

His going forth is from the end of the heaven, and his circuit unto the ends of it: and there is nothing hid from the heat thereof.

The law of the Lord is perfect, converting the soul; the testimony of the Lord is sure, making wise the simple.

The statutes of the Lord are right, rejoicing the heart; the commandment of the Lord is pure, enlightening the eyes.

The fear of the Lord is clean, enduring for ever: the judgments of the Lord are true and righteous altogether.

More to be desired are they than gold, yea, than much fine gold: sweeter also than honey and the honeycomb.

Moreover by them is thy servant warned: and in keeping of them there is great reward.

Who can understand his errors? cleanse thou me from secret faults.

Keep back thy servant also from presumptuous sins; let them not have dominion over me: then shall I be upright, and I shall be innocent from the great transgression.

Let the words of my mouth, and the meditation of my heart, be acceptable in thy sight, O Lord, my strength, and my redeemer.

Psalms 19:1-14

10 Hear, O my people, and I will speak; O Israel, and I will testify against thee: I am God, even thy God.

I will not reprove thee for thy sacrifices or thy burnt offerings, to have been continually before me.

I will take no bullock out of thy house, nor he goats out of thy folds.

For every beast of the forest is mine, and the cattle upon a thousand hills.

I know all the fowls of the mountains: and the wild beasts of the field are mine.

If I were hungry, I would not tell thee: for the world is mine, and the fulness thereof.

Psalm 50:7-12

11 The fool hath said in his heart, There is no God.

Psalm 53:1

12 O Lord, thou hast searched me, and known me.

Thou knowest my downsitting and mine uprising, thou understandest my thought afar off.

Thou compassest my path and my lying down, and art acquainted with all my ways.

For there is not a word in my tongue, but, lo, O Lord, thou knowest it altogether.

Thou hast beset me behind and before, and laid thine hand upon me.

Such knowledge is too wonderful for me; it is high, I cannot attain unto it.

Whither shall I go from thy spirit? or whither shall I flee from thy presence?

If I ascend up into heaven, thou art there; if I make my bed in hell, behold, thou art there.

If I take the wings of the morning, and dwell in the uttermost parts of the sea;

Even there shall thy hand lead me, and thy right hand shall hold me.

If I say, Surely the darkness shall cover me; even the night shall be light about me.

Yea, the darkness hideth not from thee; but the night shineth as the day: the darkness and the light are both alike to thee.

Psalm 139:1-12

13 The voice of him that crieth in the wilderness. Prepare ye the way of the Lord, make straight in the desert a

highway for our God.

Every valley shall be exalted, and every mountain and hill shall be made low: and the crooked shall be made straight, and the rough places plain:

And the glory of the Lord shall be revealed, and all flesh shall see it together; for the mouth of the Lord hath spoken it.

The voice said. Cry. And he said, What shall I cry? All flesh is grass, and all the goodness thereof is as the flower of the field:

The grass withereth, the flower fadeth: because the spirit of the Lord bloweth upon it; surely the people is grass.

The grass withereth, the flower fadeth; but the word of our God shall stand for ever.

Isaiah 40:3-8

14 And above the firmament that was over their heads was the likeness of a throne, as the appearance of a sapphire stone: and upon the likeness of the throne was the likeness as the appearance of a man above upon it.

And I saw as the colour of amber, as the appearance of fire round about within it, from the appearance of his loins even upward, and from the appearance of his loins even downward, I saw as it were the appearance of fire, and it had brightness round about.

As the appearance of the bow that is in the cloud in the day of rain, so was the appearance of the brightness round about. This was the appearance of the likeness of the glory of the Lord.

Ezekiel 1:26-28

- 15 *Diotima*. God mingles not with man; but through Love all the intercourse and converse of god with man, whether awake or asleep, is carried on.

Plato, Symposium, 203A

- 16 *Socrates*. God [is] perfectly simple and true both in word and deed; he changes not; he deceives not, either by sign or word, by dream or waking vision.

Plato, Republic, 11, 382B

- 17 There is... something which is always moved with an unceasing motion, which is motion in a circle; and this is plain not in theory only but in fact. Therefore the first heaven must be eternal. There is therefore also something which moves it. And since that which moves and is moved is intermediate, there is something which moves without being moved, being eternal, substance, and actuality. And the object of desire and the object of thought move in this way; they move without being moved. The primary objects of desire and of thought are the same. For the apparent good is the object of appetite, and the real good is the primary object of rational wish. But desire is consequent on opinion rather than opinion on desire; for the thinking is the starting-point. And thought is moved by the object of thought, and one of the two columns of opposites is in itself the object of thought; and in this, substance is first, and in substance, that which is simple and exists actually. (The one and the simple are not the same; for 'one' means a measure, but 'simple' means that the thing itself has a certain nature.) But the beautiful, also, and that which is in itself

desirable are in the same column; and the first in any class is always best, or analogous to the best.

That a final cause may exist among unchangeable entities is shown by the distinction of its meanings. For the final cause is (a) some being for whose good an action is done, and (b) something at which the action aims; and of these the latter exists among unchangeable entities though the former does not. The final cause, then, produces motion as being loved, but all other things move by being moved. Now if something is moved it is capable of being otherwise than as it is. Therefore if its actuality is the primary form of spatial motion, then in so far as it is subject to change, in *this* respect it is capable of being otherwise,—in place, even if not in substance. But since there is something which moves while itself unmoved, existing actually, this can in no way be otherwise than as it is. For motion in space is the first of the kinds of change, and motion in a circle the first kind of spatial motion; and this the first mover *produces*. The first mover, then, exists of necessity; and in so far as it exists by necessity, its mode of being is good, and it is in this sense a first principle. For the necessary has all these senses—that which is necessary perforce because it is contrary to the natural impulse, that without which the good is impossible, and that which cannot be otherwise but can exist only in a single way.

On such a principle, then, depend the heavens and the world of nature. And it is a life such as the best which we enjoy, and enjoy for but a short time (for it is ever in this state, which we cannot be), since its actuality is also pleasure. (And for this reason are waking, perception, and thinking most pleasant, and hopes and memories are so on account of these.) And thinking in itself deals with

that which is best in itself, and that which is thinking in the fullest sense with that which is best in the fullest sense. And thought thinks on itself because it shares the nature of the object of thought; for it becomes an object of thought in coming into contact with and thinking its objects, so that thought and object of thought are the same. For that which is *capable* of receiving the object of thought, i.e. the essence, is thought. But it is *active* when it *possesses* this object. Therefore the possession rather than the receptivity is the divine element which thought seems to contain, and the act of contemplation is what is most pleasant and best. If, then, God is always in that good state in which we sometimes are, this compels our wonder; and if in a better this compels it yet more. And God *is* in a better state. And life also belongs to God; for the actuality of thought is life, and God is that actuality; and God's self-dependent actuality is life most good and eternal. We say therefore that God is a living being, eternal, most good, so that life and duration continuous and eternal belong to God; for this *is* God.

Aristotle, Metaphysics, 1072a20

- 18 The nature of the divine thought involves certain problems; for while thought is held to be the most divine of things observed by us, the question how it must be situated in order to have that character involves difficulties. For if it thinks of nothing, what is there here of dignity? It is just like one who sleeps. And if it thinks, but this depends on something else, then (since that which is its substance is not the act of thinking, but a potency) it cannot be the best substance; for it is through thinking that its value belongs to it. Further, whether its substance is the faculty of thought or the act of thinking, what does

it think of? Either of itself or of something else; and if of something else, either of the same thing always or of something different. Does it matter, then, or not, whether it thinks of the good or of any chance thing? are there not some things about which it is incredible that it should think? Evidently, then, it thinks of that which is most divine and precious, and it does not change; for change would be change for the worse, and this would be already a movement. First, then, if 'thought' is not the act of thinking but a potency, it would be reasonable to suppose that the continuity of its thinking is wearisome to it. Secondly, there would evidently be something else more precious than thought, viz. that which is thought of. For both thinking and the act of thought will belong even to one who thinks of the worst thing in the world, so that if this ought to be avoided (and it ought, for there are even some things which it is better not to see than to see), the act of thinking cannot be the best of things. Therefore it must be of itself that the divine thought thinks (since it is the most excellent of things), and its thinking is a thinking on thinking.

But evidently knowledge and perception and opinion and understanding have always something else as their object, and themselves only by the way. Further, if thinking and being thought of are different, in respect of which does goodness belong to thought? For to *be* an act of thinking and to be an object of thought are not the same thing. we answer that in some cases the knowledge is the object. In the productive sciences it is the substance or essence of the object, matter omitted, and in the theoretical sciences the definition or the act of thinking is the object. Since, then, thought and the object of thought are not different in the case of things

that have not matter, the divine thought and its object will be the same, i.e. the thinking will be one with the object of its thought.

A further question is left—whether the object of the divine thought is composite; for if it were, thought would change in passing from part to part of the whole. We answer that everything which has not matter is indivisible—as human thought, or rather the thought of composite beings, is in a certain period of time (for it does not possess the good at this moment or at that, but its best, being something *different* from it, is attained only in a whole period of time), so throughout eternity is the thought which has *itself* for its object.

Aristotle, Metaphysics, 1074b15

- 19 The activity of God, which surpasses all others in blessedness, must be contemplative; and of human activities, therefore, that which is most akin to this must be most of the nature of happiness.

Aristotle, Ethics, 1178b22

- 20 *Velleius*. God is completely inactive and unfettered by the need for occupation. He neither toils nor labors, but delights in his own wisdom and virtue. He knows for certain that he will always enjoy perfect and eternal pleasures. This is the God whom we can properly call happy....

But if the world itself is considered to be God, what could be less restful than to revolve at incredible speed around an axis, without a single moment of respite? Repose is a necessary condition for happiness. But on the other hand, if some god dwells in the world as its ruler

and pilot, maintaining the course of the stars, the changes of season, and all the processes of creation, watching over all the interests of man on land and sea, what a bondage to tiresome and laborious business that would be.

Cicero, De Natura Deorum, I, 19

- 21 Nature is nothing else but God and the divine Reason that pervades the whole universe. You may, if you wish, address this creator of the world by different names, such as Jupiter Best and Greatest, the Thunderer, or the Stayer. This last title does not derive from the tale told by historians about the Roman battle-line being stayed from flight in answer to prayers. It simply means that all things are upheld by his benefits. Thus he is called Stayer and Stabilizer. You may also call him Fate; that would be no mistake. For since Fate is only a connected chain of causes, he is the first of the causes on which all succeeding ones depend. Any name that you choose to apply to him will be appropriate if it connotes a power that operates in heaven. His titles are as countless as his benefits.

Seneca, On Benefits, IV, 7

- 22 In the beginning was the Word, and the Word was with God, and the Word was God.
The same was in the beginning with God.
All things were made by him; and without him was not any thing made that was made.
In him was life; and the life was the light of men.
And the light shineth in darkness; and the darkness comprehended it not.

There was a man sent from God, whose name was John,

The same came for a witness, to bear witness of the Light, that all men through him might believe.

He was not that Light, but was sent to bear witness of that Light.

That was the true Light, which lighteth every man that cometh into the world.

He was in the world, and the world was made by him, and the world knew him not.

He came unto his own, and his own received him not.

But as many as received him, to them gave he power to become the sons of God, even to them that believe on his name.

John 1:1-12

23 God is a Spirit: and they that worship him must worship him in spirit and in truth.

John 4:24

24 It is a fearful thing to fall into the hands of the living God.

Hebrews 10:31

23 God is light, and in him is no darkness at all.

I John 1:5

26 Beloved, let us love one another: for love is of God; and every one that loveth is born of God, and knoweth God.

He that loveth not knoweth not God; for God is love.

I John 4:7-8

27 I am Alpha and Omega, the beginning and the ending, saith the Lord, which is, and which was, and which is to come, the Almighty.

Revelation 1:8

28 God governs the world, not by irresistible force, but persuasive argument and reason, controlling it into compliance with his eternal purposes.

Plutarch, Phocion

29 We ought first to learn that there is a God and that he provides for all things; also that it is not possible to conceal from him our acts, or even our intentions and thoughts. The next thing is to learn what is the nature of the Gods; for such as they are discovered to be, he, who would please and obey them, must try with all his power to be like them. If the divine is faithful, man also must be faithful; if it is free, man also must be free; if beneficent, man also must be beneficent; if magnanimous, man also must be magnanimous; as being then an imitator of God, he must do and say everything consistently with this fact.

Epictetus, Discourses, II, 14

30 Seeking nothing, possessing nothing, lacking nothing, the One is perfect and, in our metaphor, has overflowed, and its exuberance has produced the new.

Plotinus, Fifth Ennead, II, 1

31 What ... is my God, what but the Lord God? *For Who is Lord but the Lardy or Who is God but our God?* O Thou, the greatest and the best, mightiest, almighty, most merciful and most just, utterly hidden and utterly

present, most beautiful and most strong, abiding yet mysterious, suffering no change and changing all things: never new, never old, making all things new, *bringing age upon the proud and they know it not*; ever in action, ever at rest, gathering all things to Thee and needing none; sustaining and fulfilling and protecting, creating and nourishing and making perfect; ever seeking though lacking nothing. Thou lovest without subjection to passion, Thou art jealous but not with fear; Thou canst know repentance but not sorrow, be angry yet unperturbed by anger. Thou canst change the works Thou hast made but Thy mind stands changeless. Thou dost find and receive back what Thou didst never lose; art never in need but dost rejoice in Thy gains, art not greedy but dost exact interest manifold. Men pay Thee more than is of obligation to %in return from Thee, yet who has anything that is not already Thine? Thou owest nothing yet dost pay as if in debt to Thy creature, forgivest what is owed to Thee yet dost not lose thereby. And with all this, what have I said, my God and my Life and my sacred Delight? What can anyone say when he speaks of Thee? Yet woe to them that speak not of Thee at all, since those who say most are but dumb.

Augustine, Confessions, I, 4

32 Heaven and earth and all that is in them tell me wherever I look that I should love You, and they cease not to tell it to all men, so that there is no excuse for them. For *You will have mercy on whom You will have mercy and You will show mercy to whom You will show mercy*: otherwise heaven and earth cry their praise of You to deaf ears.

But what is it that I love when I love You? Not the beauty of any bodily thing, nor the order of seasons, not

the brightness of light that rejoices the eye, nor the sweet melodies of all songs, nor the sweet fragrance of flowers and ointments and spices: not manna nor honey, not the limbs that carnal love embraces. None of these things do I love in loving my God. Yet in a sense I do love light and melody and fragrance and food and embrace when I love my God—the light and the voice and the fragrance and the food and embrace in the soul, when that light shines upon my soul which no place can contain, that voice sounds which no time can take from me, I breathe that fragrance which no wind scatters, I eat the food which is not lessened by eating, and I lie in the embrace which satiety never comes to sunder. This it is that I love, when I love my God.

Augustine, Confessions, X, 6

33 What is... God? I asked the earth and it answered: "I am not He"; and all things that are in the earth made the same confession. I asked the sea and the deeps and the creeping things, and they answered: "We are not your God; seek higher." I asked the winds that blow, and the whole air with all that is in it answered: "Anaximenes was wrong; I am not God." I asked the heavens, the sun, the moon, the stars, and they answered: "Neither are we God whom you seek." And I said to all the things that throng about the gateways of the senses: "Tell me of my God, since you are not He. Tell me something of Him." And they cried out in a great voice: "He made us." My question was my gazing upon them, and their answer was their beauty. And I turned to myself and said: "And you, who are you?" And I answered: "A man." Now clearly there is a body and a soul in me, one exterior, one interior. From which of these two should I have enquired

of my God? I had already sought Him by my body, from earth to heaven, as far as my eye could send its beams on the quest. But the interior part is the better, seeing that all my body's messengers delivered to it, as ruler and judge, the answers that heaven and earth and all things in them made when they said: "We are not God," and, "He made us." The inner man knows these things through the ministry of the outer man: I the inner man knew them, I, I the soul, through the senses of the body. I asked the whole frame of the universe about my God and it answered me: "I am not He, but He made me."

Augustine, Confessions, X, 6

34 We worship that God Who has appointed to the natures created by Him both the beginnings and the end of their existing and moving: Who holds, knows, and disposes the causes of things; Who hath created the virtue of seeds; Who hath given to what creatures He would a rational soul, which is called mind; Who hath bestowed the faculty and use of speech; Who hath imparted the gift of foretelling future things to whatever spirits it seemed to Him good; Who also Himself predicts future things through whom He pleases, and through whom He will remove diseases; Who, when the human race is to be corrected and chastised by wars, regulates also the beginnings, progress, and ends of these wars; Who hath created and governs the most vehement and most violent fire of this world, in due relation and proportion to the other elements of immense nature; Who is the governor of all the waters; Who hath made the sun brightest of all material lights, and hath given him suitable power and motion; Who hath not withdrawn, even from the inhabitants of the nether world. His dominion and power;

Who hath appointed to mortal natures their suitable seed and nourishment, dry or liquid; Who establishes and makes fruitful the earth; Who bountifully bestows its fruits on animals and on men; Who knows and ordains, not only principal causes, but also subsequent causes; Who hath determined for the moon her motion; Who affords ways in heaven and on earth for passage from one place to another; Who hath granted also to human minds, which He hath created, the knowledge of the various arts for the help of life and nature; Who hath appointed the union of male and female for the propagation of offspring; Who hath favoured the societies of men with the gift of terrestrial fire for the simplest and most familiar purposes, to burn on the hearth and to give light. These are, then, the things which that most acute and most learned man Varro has laboured to distribute among the select gods, by I know not what physical interpretation, which he has got from other sources and also conjectured for himself. But these things the one true God makes and does, but as *the same* God—that is, as He who is wholly everywhere, included in no space, bound by no chains, mutable in no part of His being, filling heaven and earth with omnipresent power, not with a needy nature. Therefore He governs all things in such a manner as to allow them to perform and exercise their own proper movements. For although they can be nothing without Him, they are not what He is. He does also many things through angels; but only from Himself does He beatify angels. So also, though He send angels to men for certain purposes. He does not for all that beatify men by the good inherent in the angels, but by Himself, as He does the angels themselves.

Augustine, City of God, VII, 30

35 God is ever the constant foreknowing overseer, and the everpresent eternity of His sight moves in harmony with the future nature of our actions, as it dispenses rewards to the good, and punishments to the bad. Hopes are not vainly put in God, nor prayers in vain offered: if these are right, they cannot but be answered. Turn therefore from vice: ensue virtue: raise your soul to upright hopes: send up on high your prayers from this earth. If you would be honest, great is the necessity enjoined upon your goodness, since all you do is done before the eyes of an all-seeing Judge.

Boethius, Consolation of Philosophy, V

36 Lord, do thou, who dost give understanding to faith, give me, so far as thou knowest it to be profitable, to understand that thou art as we believe; and that thou art that which we believe. And, indeed, we believe that thou art a being than which nothing greater can be conceived. Or is there no such nature, since the fool hath said in his heart, there is no God? But, at any rate, this very fool, when he hears of this being of which I speak—a being than which nothing greater can be conceived—understands what he hears, and what he understands is in his understanding; although he does not understand it to exist.

For, it is one thing for an object to be in the understanding, and another to understand that the object exists. When a painter first conceives of what he will afterwards perform, he has it in his understanding, but he does not yet understand it to be, because he has not yet performed it. But after he has made the painting,

he both has it in his understanding, and he understands that it exists, because he has made it.

Hence, even the fool is convinced that something exists in the understanding, at least, than which nothing greater can be conceived. For, when he hears of this, he understands it. And whatever is understood, exists in the understanding. And assuredly that, than which nothing greater can be conceived, cannot exist in the understanding alone. For, suppose it exists in the understanding alone; then it can be conceived to exist in reality; which is greater.

Therefore, if that, than which nothing greater can be conceived, exists in the understanding alone, the very being, than which nothing greater can be conceived, is one, than which a greater can be conceived. But obviously this is impossible. Hence, there is no doubt that there exists a being, than which nothing greater can be conceived, and it exists both in the understanding and in reality.

And it assuredly exists so truly, that it cannot be conceived not to exist. For, it is possible to conceive of a being which cannot be conceived not to exist; and this is greater than one which can be conceived not to exist. Hence, if that, than which nothing greater can be conceived, can be conceived not to exist, it is not that, than which nothing greater can be conceived. But this is an irreconcilable contradiction. There is, then, so truly a being than which nothing greater can be conceived to exist, that it cannot even be conceived not to exist; and this being thou art, O Lord, our God.

So truly, therefore, dost thou exist, O Lord, my God, that thou canst not be conceived not to exist; and rightly. For, if a mind could conceive of a being better than thee,

the creature would rise above the Creator; and this is most absurd. And, indeed, whatever else there is, except thee alone, can be conceived not to exist. To thee alone, therefore, it belongs to exist more truly than all other beings, and hence in a higher degree than all others. For, whatever else exists does not exist so truly, and hence in a less degree it belongs to it to exist. Why, then, has the fool said in his heart, there is no God, since it is so evident, to a rational mind, that thou dost exist in the highest degree of all? Why, except that he is dull and a fool?

Anselm of Canterbury, Proslogium, II-III

37 But how art thou omnipotent, if thou art not capable of all things? Or, if thou canst not be corrupted and canst not lie, nor make what is true, false—as, for example, if thou shouldst make what has been done not to have been done, and the like—how art thou capable of all things? Or else to be capable of these things is not power, but impotence. For, he who is capable of these things is capable of what is not for his good, and of what he ought not to do; and the more capable of them he is, the more power have adversity and perversity against him; and the less has he himself against these.

Anselm of Canterbury, Proslogium, VII

38 O Lord, our God, the more truly art thou omnipotent, since thou art capable of nothing through impotence, and nothing has power against thee.

Anselm of Canterbury, Proslogium, VII

39 Truly, O Lord, this is the unapproachable light in which thou dwellest; for truly there is nothing else which can penetrate this light, that it may see thee there. Truly, I see it not, because it is too bright for me. And yet, whatsoever I see, I see through it, as the weak eye sees what it sees through the light of the sun, which in the sun itself it cannot look upon. My understanding cannot reach that light, for it shines too bright. It does not comprehend it, nor does the eye of my soul endure to gaze upon it long. It is dazzled by the brightness, it is overcome by the greatness, it is overwhelmed by the infinity, it is dazed by the largeness, of the light.

O supreme and unapproachable light I O whole and blessed truth, how far art thou from me, who am so near to thee! How far removed art thou from my vision, though I am so near to thine! Everywhere thou art wholly present, and I see thee not. In thee I move, and in thee I have my being; and I cannot come to thee. Thou art within me, and about me, and I feel thee not.

Anselm of Canterbury, Proslogium, XVI

40 Assuredly thou art life, thou art wisdom, thou art truth, thou art goodness, thou art blessedness, thou art eternity, and thou art every true good. Many are these attributes: my straitened understanding cannot see so many at one view, that it may be gladdened by all at once. How, then. O Lord, art thou all these things? are they parts of thee, or is each one of these rather the whole, which thou art? For, whatever is composed of parts is not altogether one, but is in some sort plural, and diverse from itself; and either in fact or in concept is capable of dissolution.

But these things are alien to thee, than whom nothing better can be conceived of. Hence, there are no parts in

thee. Lord, nor art thou more than one. But thou art so truly a unitary being, and so identical with thyself, that in no respect art thou unlike thyself; rather thou art unity itself, indivisible by any conception. Therefore, life and wisdom and the rest are not parts of thee, but all are one; and each of these is the whole, which thou art, and which all the rest are.

In this way, then, it appears that thou hast no parts, and that thy eternity, which thou art, is nowhere and never a part of thee or of thy eternity. But everywhere thou art as a whole, and thy eternity exists as a whole forever.

Anselm of Canterbury, Proslogium, XVIII

- 41 To know that God exists in a general and confused way is implanted in us by nature, since God is man's Happiness. For man naturally desires happiness, and what is naturally desired by man must be naturally known to him. This, however, is not to know absolutely that God exists.

Aquinas, Summa Theologica, I, 2, 1

- 42 Perhaps not everyone who hears this word "God" understands it to signify something than which nothing greater can be thought, seeing that some have believed God to be a body. Yet, granted that everyone understands that by this word "God" is signified something than which nothing greater can be thought, nevertheless, it does not therefore follow that he understands that what the word signifies exists actually, but only that it exists in the intellect. Nor can it be argued that it actually exists, unless it be admitted that there actually exists something

than which nothing greater can be thought. And this is what is not admitted by those who hold that God does not exist.

Aquinas, Summa Theologica, I, 2, 1

- 43 The existence of God and other like truths about God which can be known by natural reason, are not articles of faith, but are preambles to the articles. For faith presupposes natural knowledge, even as grace presupposes nature, and perfection supposes something that can be perfected. Nevertheless, there is nothing to prevent a man who cannot grasp a proof accepting, as a matter of faith, something which in itself is capable of being known and demonstrated.

Aquinas, Summa Theologica, I, 2, 2

- 44 In the world of sense we find there is an order of efficient causes. There is no case known (nor indeed, is it possible) in which a thing is found to be the efficient cause of itself, because in that case it would be prior to itself, which is impossible. Now in efficient causes it is not possible to go on to infinity, because in all efficient causes following in order, the first is the cause of the intermediate cause, and the intermediate is the cause of the ultimate cause, whether the intermediate cause be several, or one only. Now to take away the cause is to take away the effect. Therefore, if there be no first cause among efficient causes, there will be no ultimate, nor any intermediate cause. But if in efficient causes it is possible to go on to infinity, there will be no first efficient cause, neither will there be an ultimate effect, nor any intermediate efficient causes, all of which is plainly false. Therefore it is

necessary to admit a first efficient cause, to which everyone gives the name of God....

we find in nature things that are possible to be and not to be, since they are found to be generated, and to be corrupted, and consequently they are possible to be and not to be. But it is impossible for these always to exist, for that which is possible not to be at some time is not.

Therefore, if everything is possible not to be, then at one time there could have been nothing in existence. Now if this were true, even now there would be nothing in existence, because that which does not exist only begins to exist by something already existing. Therefore, if at one time nothing was in existence, it would have been impossible for anything to have begun to exist; and thus even now nothing would be in existence—which is clearly false. Therefore, not all beings are merely possible, but there must exist something the existence of which is necessary. But every necessary thing either has its necessity caused by another, or not. Now it is impossible to go on to infinity in necessary things which have their necessity caused by another, as has been already proved in regard to efficient causes. Therefore we must admit the existence of some being having of itself its own necessity, and not receiving it from another, but rather causing in others their necessity. This all men speak of as God.

Aquinas, Summa Theologica, I, 2, 3

45 In some way God is in every place, and this is to be everywhere. First, as He is in all things as giving them being, power, and operation, so He is in every place as giving it being and power to be in a place. Again, things placed are in place in so far as they fill a place; and God fills every place; not, indeed, as a body, for a body is said

to fill place in so far as it excludes the presence of another body; but by God being in a place, others are not thereby excluded from it; rather indeed. He Himself fills every place by the very fact that He gives being to the things that fill every place.

Aquinas, Summa Theologica, I, 8, 2

- 46 Eternity is nothing else but God Himself. Hence God is not called eternal as if He were in any way measured, but the notion of measurement is there taken according to the apprehension of our mind alone,

Aquinas, Summa Theologica, I, 10, 2

- 47 God comprehends in Himself the whole perfection of being. If then many gods existed, they would necessarily differ from each other. Something therefore would belong to one which did not belong to another. And if this were a privation, one of them would not be absolutely perfect; but if a perfection, one of them would be without it. So it is impossible for many gods to exist. Hence also the ancient philosophers, constrained as it were by truth itself, when they asserted an infinite principle asserted likewise that there was only one such principle.

Aquinas, Summa Theologica, I, 11, 3

- 48 Oh grace abounding, wherein I presumed to fix my look on the eternal light so long that I consumed my sight thereon!

Within its depths I saw ingathered, bound by love in one volume, the scattered leaves of all the universe;

substance and accidents and their relations, as though together fused, after such fashion that what I tell of is one

simple flame.

The universal form of this complex I think that I beheld, because more largely, as I say' this, I feel that I rejoice.

A single moment maketh a deeper lethargy for me than twenty and five centuries have wrought on the emprise that erst threw Neptune in amaze at Argo's shadow.

Thus all suspended did my mind gaze fixed, immovable, intent, ever enkindled by its gazing.

Such at that light doth man become that to turn thence to any other sight could not by possibility be ever yielded.

For the good, which is the object of the will, is therein wholly gathered, and outside it that same thing is defective which therein is perfect.

Now shall my speech fall farther short even of what I can remember than an infant's who still bathes his tongue at breast.

Not that more than a single semblance was in the living light whereon I looked, which ever is such as it was before;

but by the sight that gathered strength in me one sole appearance even as I changed worked on my gaze.

In the profound and shining being of the deep light appeared to me three circles, of three colours and one magnitude;

one by the second as Iris by Iris seemed reflected, and the third seemed a fire breathed equally from one and from the other.

Oh but how scant the utterance, and how faint, to my conceit! and it, to what I saw, is such that it sufficeth not to call it little.

O Light eternal who only in thyself abidest, only
thyself dost understand, and to thyself, self-understood
self-understanding, turnest love and smiling!

That circling which appeared in thee to be conceived
as a reflected light, by mine eyes scanned some little,
in itself, of its own colour, seemed to be painted with
our effigy, and thereat my sight was all committed to it.

As the geometer who all sets himself to measure the
circle and who findeth not, think as he may, the principle
he lacketh;

such was I at this new seen spectacle; I would perceive
how the image consorteth with the circle, and how it
setteth there;

but not for this were my proper wings, save that my
mind was smitten by a flash wherein its will came to it.

To the high fantasy here power failed; but already my
desire and will were rolled—even as a wheel that moveth
equally—by the Love that moves the sun and the other
stars.

Dante, Paradiso, XXXIII, 82

49 I can't understand what must be in a man's mind if he
doesn't feel seriously that there is a God when he sees
the sun rise. It must at times occur to him that there are
eternal things, or else he must push his face into the dirt
like a sow. For it's incredible that they [the planets] be
observed to move without inquiring whether there isn't
somebody who moves them.

Luther, Table Talk, 447

50 Though our mind cannot conceive of God, without
ascribing some worship to him, it will not be sufficient

merely to apprehend that he is the only proper object of universal worship and adoration, unless we are also persuaded that he is the fountain of all good, and seek for none but in him. This I maintain, not only because he sustains the universe, as he once made it, by his infinite power, governs it by his wisdom, preserves it by his goodness, and especially reigns over the human race in righteousness and judgment, exercising a merciful forbearance, and defending them by his protection; but because there cannot be found the least particle of wisdom, light, righteousness, power, rectitude, or sincere truth which does not proceed from him, and claim him for its author.

Calvin, Institutes of the Christian Religion, I, 2

- 51 To represent God as a Creator only for a moment, who entirely finished all his work at once, were frigid and jejune; and in this it behoves us especially to differ from the heathen, that the presence of the Divine power may appear to us no less in the perpetual state of the world than in its first origin.

Calvin, Institutes of the Christian Religion, I, 16

- 52 God, wishing to teach us that the good have something else to hope for, and the wicked something else to fear, than the fortunes and misfortunes of this world, handles and allots these according to his occult disposition, and deprives us of the means of foolishly making our profit of them.

Montaigne, Essays, I, 32, We Should Meddle Soberly

53 What is there... more vain than to try to divine God by our analogies and conjectures, to regulate him and the world by our capacity and our laws, and to use at the expense of the Deity this little shred of ability that he was pleased to allot to our natural condition? And, because we cannot stretch our vision as far as his glorious throne, to have brought him here below to our corruption and our miseries?

Montaigne, Essays, II, 12, Apology for Raymond Sebond

54 It has always seemed to me that for a Christian this sort of talk is full of indiscretion and irreverence: "God cannot die, God cannot go back on his word, God cannot do this or that." I do not think it is good to confine the divine power thus under the law's of our speech. And the probability that appears to us in these propositions should be expressed more reverently and religiously.

Montaigne, Essays, II, 12, Apology for Raymond Sebond

55 When we say that the infinity of the centuries both past and to come is to God but an instant, that his goodness, wisdom, power, are the same thing as his essence—our tongues say it, but our intelligence does not apprehend it.

Montaigne, Essays, 11, 12, Apology for Raymond Sebond

56 He Who is before the ages and on into the ages thus adorned the great things of His wisdom: nothing excessive, nothing defective, no room for any censure. How lovely are his works! All things, in twos, one against one, none lacking its opposite.

He has strengthened the goods—adornment and propriety—of each and every one and established them in the best reasons, and who will be satiated seeing their glory?

Kepler, Harmonies of the World, V, 9

57 *Dogberry*. Well, God's a good man.

Shakespeare, Much Ado About Nothing, III, V, 39

58 Natural theology ... is that knowledge or rudiment of knowledge concerning God, which may be obtained by the contemplation of his creatures; which knowledge may be truly termed divine in respect of the object, and natural in respect of the light. The bounds of this knowledge are, that it sufficeth to convince atheism, but not to inform religion: and therefore there was never miracle wrought by God to convert an atheist, because the light of nature might have led him to confess a God: but miracles have been wrought to convert idolaters and the superstitious, because no light of nature extendeth to declare the will and true worship of God. For as all works do show forth the power and skill of the workman, and not his image, so it is of the works of God, which do show the omnipotency and wisdom of the maker, but not his image.

Bacon, Advancement of Learning, Bk. 11, VI, 1

59 It is at least as certain that God, who is a Being so perfect, is, or exists, as any demonstration of geometry can possibly be.

Descartes, Discourse on Method, IV

60 That idea ... by which I understand a Supreme God, eternal, infinite, [immutable], omniscient, omnipotent, and Creator of all things which are outside of Himself, has certainly more objective reality in itself than those ideas by which finite substances are represented.

Descartes, Meditations on First Philosophy, III

61 From the fact that I cannot conceive a mountain without a valley, it does not follow that there is any mountain or any valley in existence, but only that the mountain and the valley, whether they exist or do not exist, cannot in any way be separated one from the other. While from the fact that I cannot conceive God without existence, it follows that existence is inseparable from Him, and hence that He really exists; not that my thought can bring this to pass, or impose any necessity on things, but, on the contrary, because the necessity which lies in the thing itself, i.e. the necessity of the existence of God determines me to think in this way. For it is not within my power to think of God without existence (that is of a supremely perfect Being devoid of a supreme perfection) though it is in my power to imagine a horse either with wings or without wings.

Descartes, Meditations on First Philosophy, V

62 We have in the notion of God absolute immensity, simplicity, and a unity that embraces all other attributes; and of this idea we find no example in us.

Descartes, Objections and Replies, II

63 When God is said to be unthinkable, that applies to the thought that grasps him adequately, and does not hold

good of that inadequate thought which we possess and which suffices to let us know that he exists,

Descartes, Objections and Replies, II

- 64 Some one must exist in whom are formally or eminently all the perfections of which we have any idea. But we possess the idea of a power so great that by Him and Him alone, in whom this power is found, must heaven and earth be created, and a power such that likewise whatever else is apprehended by me as possible must be created by Him too. Hence concurrently with God's existence we have proved all this likewise about him.

Descartes, Demonstrating the Existence of God and the Distinction Between Soul and Body, Prop. 3, Corol.

- 65 When you say how strange it is that other men do not think about God in the same way as I do, when He has impressed the idea of Himself on them exactly as on me, it is precisely as if you were to marvel that since all are acquainted with the idea of a triangle, they do not all perceive an equal number of truths about it, and some probably reason about this very figure incorrectly.

Descartes, Objections and Replies, V

- 66 Perpetual fear, always accompanying mankind in the ignorance of causes, as it were in the dark, must needs have for object something. And therefore when there is nothing to be seen, there is nothing to accuse either of their good or evil fortune but some power or agent invisible: in which sense perhaps it was that some of the old poets said that the gods were at first created by human fear: which, spoken of the gods (that is to say, of

the many gods of the Gentiles), is very true. But the acknowledging of one God eternal, infinite, and omnipotent may more easily be derived from the desire men have to know the causes of natural bodies, and their several virtues and operations, than from the fear of what was to befall them in time to come. For he that, from any effect he seeth come to pass, should reason to the next and immediate cause thereof, and from thence to the cause of that cause, and plunge himself profoundly in the pursuit of causes, shall at last come to this, that there must be (as even the heathen philosophers confessed) one First Mover; that is, a first and an eternal cause of all things; which is that which men mean by the name of God: and all this without thought of their fortune, the solicitude whereof both inclines to fear and hinders them from the search of the causes of other things; and thereby gives occasion of feigning of as many gods as there be men that feign them.

Hobbes, Leviathan, I, 12

67 That we may know what worship of God is taught us by the light of nature, I will begin with His attributes. Where, first, it is manifest, we ought to attribute to Him existence: for no man can have the will to honour that which he thinks not to have any being.

Secondly, that those philosophers who said the world, or the soul of the world, was God spake unworthily of Him, and denied His existence: for by God is understood the cause of the world; and to say the world is God is to say there is no cause of it, that is, no God.

Thirdly, to say the world was not created, but eternal, seeing that which is eternal has no cause, is to deny there is a God.

Fourthly, that they who, attributing, as they think, ease to God, take from Him the care of mankind, take from Him his honour: for it takes away men's love and fear of Him, which is the root of honour.

Fifthly, in those things that signify greatness and power, to say He is finite is not to honour Him: for it is not a sign of the will to honour God to attribute to Him less than we can; and finite is less than we can, because to finite it is easy to add more.

Therefore to attribute *figure* to Him is not honour; for all figure is finite:

Nor to say we conceive, and imagine, or have an idea of Him in our mind; for whatsoever we conceive is finite:

Nor to attribute to Him *parts* or *totality*; which are the attributes only of things finite:

Nor to say He is in this or that *place* ... nor that He is *moved* or *resteth*; for both these attributes ascribe to Him place:

Nor that there be more gods than one, because it implies them all finite; for there cannot be more than one infinite:

Nor to ascribe to Him (unless metaphorically, meaning not the passion, but the effect) passions that partake of grief; as *repentance*, *anger*, *mercy*: or of want; as *appetite*, *hope*, *desire*; or of any passive faculty: for passion is power limited by somewhat else.

And therefore when we ascribe to God a *will*, it is not to be understood, as that of man, for a *rational appetite*; but as the power by which He effecteth everything.

Likewise when we attribute to Him sight, and other acts of sense; as also *knowledge* and *understanding*; which in us is nothing else but a tumult of the mind, raised by external things that press the organical parts of

man's body: for there is no such thing in God, and, being things that depend on natural causes, cannot be attributed to Him.

He that will attribute to God nothing but what is warranted by natural reason must either use such negative attributes as *infinite, eternal, incomprehensible*; or superlatives, as *most high, most great*, and the like; or indefinite, as *good, just, holy, creator*; and in such sense as if He meant not to declare what He is (for that were to circumscribe Him within the limits of our fancy), but how much we admire Him, and how ready we would be to obey Him; which is a sign of humility, and of a will to honour Him as much as we can: for there is but one name to signify our conception of His nature, and that is I AM; and but one name of His relation to us, and that is *God*, in which is contained father, king, and lord.

Hobbes, Leviathan, II, 31

68 The nature of God is incomprehensible; that is to say, we understand nothing of *what* He is, but only *that* He is; and therefore the attributes we give Him are not to tell one another *what* He is, nor to signify our opinion of His nature, but our desire to honour Him with such names as we conceive most honourable amongst ourselves.

Hobbes, Leviathan, III, 34

69 Neither had these or any other ever such advantage of me, as to incline me to any point of Infidelity or desperate positions of Atheism; for I have been these many years of opinion there was never any. Those that held Religion was the difference of Man from Beasts, have spoken probably, and proceed upon a principle as inductive as the other.

That doctrine of *Epicurus*, that denied the Providence of God, was no Atheism, but a magnificent and high strained conceit of his Majesty, which he deemed too sublime to mind the trivial Actions of those inferiour Creatures. That fatal Necessity of the Stoicks, is nothing but the immutable Law of his will. Those that heretofore denied the Divinity of the Holy Ghost, have been condemned, but as Hereticks; and those that now deny our Saviour (though more than Hereticks) are not so much as Atheists: for though they deny two persons in the Trinity, they hold as we do, there is but one God.

Sir Thomas Browne, Religio Medici, I, 20

70 Not only the zeal of those who seek Him proves God, but also the blindness of those who seek Him not.

Pascal, Pensées, III, 200

71 It is incomprehensible that God should exist, and it is incomprehensible that He should not exist; that the soul should be joined to the body, and that we should have no soul; that the world should be created, and that it should not be created, etc.; that original sin should be, and that it should not be.

Pascal, Pensees, III, 230

72 It is the heart which experiences God, and not the reason. This, then, is faith: God felt by the heart, not by the reason.

Pascal, Pensees, IV, 278

73 It is... true that everything teaches man his condition, but he must understand this well. For it is not true that all

reveals God, and it is not true that all conceals God. But it is at the same time true that He hides Himself from those who tempt Him, and that He reveals Himself to those who seek Him, because men are both unworthy and capable of God; unworthy by their corruption, capable by their original nature.

Pascal, Pensees, VIII, 557

74 If the compassion of God is so great that He instructs us to our benefit, even when He hides Himself, what light ought we not to expect from Him when He reveals Himself?

Pascal, Pensees, XIII, 848

75 Hail holy light, offspring of Heav'n first-born,
Or of th' Eternal Coeternal beam
May I express thee unblam'd? since God is light,
And never but in unapproached light
Dwelt from Eternitie, dwelt then in thee,
Bright effluence of bright essence increate.
Or hear'st thou rather pure Ethereal stream,
Whose Fountain who shall tell? before the Sun,
Before the Heavens thou wert, and at the voice
Of God, as with a Mantle didst invest
The rising world of waters dark and deep,
Won from the void and formless infinite.
Thee I re-visit now with bolder wing,
Escap't the *Stygian* Pool, though long detain'd
In that obscure sojourn, while in my flight
Through utter and through middle darkness borne
With other notes then to th' *Orphean* Lyre
I sung of *Chaos* and *Eternal Night*,

Taught by the heav'nly Muse to venture down
The dark descent, and up to reascend,
Though hard and rare: thee I revisit safe,
And feel thy sovran vital Lamp; but thou
Revisit'st not these eyes, that rowle in vain
To find thy piercing ray, and find no dawn;
So thick a drop serene hath quencht thir Orbs,
Or dim suffusion veild.

Milton, Paradise Lost, III, I

76 Thee Father first they [the angel choir] sung Omnipotent,
Immutable, Immortal, Infinite,
Eternal King; thee Author of all being.
Fountain of Light, thy self invisible
Amidst the glorious brightness where thou sit'st
Thron'd inaccessible, but when thou shad'st
The full blaze of thy beams, and through a cloud
Drawn round about thee like a radiant Shrine,
Dark with excessive bright thy skirts appeer,
Yet dazle Heav'n, that brightest Seraphim
Approach not, but with both wings veil thir eyes.

Milton, Paradise Lost, III, 372

77 By God, I understand Being absolutely infinite, that is to
say, substance consisting of infinite attributes, each one
of which expresses eternal and infinite essence.

Spinoza, Ethics, I, Def. 6

78 God, or substance consisting of infinite attributes, each
one of which expresses eternal and infinite essence,
necessarily exists.

If this be denied, conceive, if it be possible, that God does not exist. Then it follows that His essence does not involve existence. But this is absurd. Therefore God necessarily exists.

Spinoza, Ethics, I, Prop. 11, Demonst.

79 Neither in God nor outside God is there any cause or reason which can negate His existence, and therefore God necessarily exists.

Spinoza, Ethics, I, Prop. 11, Another Proof

80 God and all His attributes are eternal, that is to say, each one of His attributes expresses existence. The same attributes of God, therefore, which manifest the eternal essence of God, at the same time manifest His eternal existence; that is to say, the very same thing which constitutes the essence of God constitutes at the same time His existence, and therefore His existence and His essence are one and the same thing.

Spinoza, Ethics, I, Prop. 20

81 God loves no one and hates no one; for God is not affected with any affect of joy or sorrow, and consequently He neither loves nor hates any one.

Spinoza, Ethics, V, Prop. 17, Corol.

82 God alone has a distinct knowledge of all, for He is the source of all. It has been very well said that as a centre He is everywhere, but His circumference is nowhere, for everything is immediately present to Him without any distance from this centre,

Leibniz, Principles of Nature and of Grace, 13

83 The conception of God which is the most common and the most full of meaning is expressed well enough in the words: God is an absolutely perfect being. The implications, however, of these words fail to receive sufficient consideration. For instance, there are many different kinds of perfection, all of which God possesses, and each one of them pertains to him in the highest degree.

We must also know what perfection is. One thing which can surely be affirmed about it is that those forms or natures which are not susceptible of it to the highest degree, say the nature of numbers or of figures, do not permit of perfection. This is because the number which is the greatest of all (that is, the sum of all the numbers), and likewise the greatest of all figures, imply contradictions. The greatest knowledge, however, and omnipotence contain no impossibility. Consequently power and knowledge do admit of perfection, and in so far as they pertain to God they have no limits.

Whence it follows that God who possesses supreme and infinite wisdom acts in the most perfect manner not only metaphysically, but also from the moral standpoint. And with respect to our selves it can be said that the more we are enlightened and informed in regard to the works of God the more will we be disposed to find them excellent and conforming entirely to that which we might desire.

Leibniz, Discourse on Metaphysics, I

84 God alone (or the Necessary Being) has this prerogative that if he be possible he must necessarily exist, and, as nothing is able to prevent the possibility of that which involves no bounds, no negation, and consequently, no

contradiction, this alone is sufficient to establish *a priori* his existence. We have, therefore, proved his existence through the reality of eternal truths. But a little while ago we also proved it *a posteriori*, because contingent beings exist which can have their ultimate and sufficient reason only in the necessary being which, in turn, has the reason for existence in itself.

Leibniz, Monadology, 45

85 The first contrivance of those very artificial parts of animals, the eyes, ears, brain, muscles, heart, lungs, midriff, glands, larynx, hands, wings, swimming bladders, natural spectacles, and other organs of sense and motion; and the instinct of brutes and insects can be the effect of nothing else than the wisdom and skill of a powerful, ever-living agent, who being in all places, is more able by His will to move the bodies within His boundless uniform sensorium, and thereby to form and reform the parts of the Universe, than we are by our will to move the parts of our own bodies. And yet we are not to consider the world as the body of God, or the several parts thereof as the parts of God. He is a uniform Being, void of organs, members or parts, and they are his creatures subordinate to him, and subservient to His will; and He is no more the soul of them than the soul of man is the soul of the species of things carried through the organs of sense into the place of its sensation, where it perceives them by means of its immediate presence, without the intervention of any third thing. The organs of sense are not for enabling the soul to perceive the species of things in its sensorium, but only for conveying them thither; and God has no need of such organs, He being everywhere present to the things themselves.

Newton, Optics, III, I

86 The visible marks of extraordinary wisdom and power appear so plainly in all the works of the creation, that a rational creature, who will but seriously reflect on them, cannot miss the discovery of a Deity. And the influence that the discovery of such a Being must necessarily have on the minds of all that have but once heard of it is so great, and carries such a weight of thought and communication with it, that it seems stranger to me that a whole nation of men should be anywhere found so brutish as to want the notion of a God, than that they should be without any notion of numbers, or fire.

Locke, Concerning Human Understanding, Bk. I, III, 9

87 It is as certain that there is a God, as that the opposite angles made by the intersection of two straight lines are equal. There was never any rational creature that set himself sincerely to examine the truth of these propositions that could fail to assent to (hem; though yet it be past doubt that there are many men, who, having not applied their thoughts that way, are ignorant both of the one and the other.

Locke, Concerning Human Understanding, Bk. I, in, 17

88 If we attentively consider the constant regularity, order, and concatenation of natural things, the surprising magnificence, beauty, and perfection of the larger, and the exquisite contrivance of the smaller parts of creation, together with the exact harmony and correspondence of the whole, but above all the never-enough-admired laws of pain and pleasure, and the instincts or natural inclinations, appetites, and passions of animals; I say if

we consider all these things, and at the same time attend to the meaning and import of the attributes One, Eternal, Infinitely Wise, Good, and Perfect, we shall clearly perceive that they belong to the aforesaid Spirit, "who works all in all," and "by whom all things consist."

Berkeley, Principles of Human Knowledge, 146

89 A human spirit or person is not perceived by sense, as not being an idea; when therefore we see the colour, size, figure, and motions of a man, we perceive only certain sensations or ideas excited in our own minds; and these being exhibited to our view in sundry distinct collections, serve to mark out unto us the existence of finite and created spirits like ourselves. Hence it is plain we do not see a man—if by *man* is meant that which lives, moves, perceives, and thinks as we do—but only such a certain collection of ideas as directs us to think there is a distinct principle of thought and motion, like to ourselves, accompanying and represented by it. And after the same manner we see God; all the difference is that, whereas some one finite and narrow assemblage of ideas denotes a particular human mind, whithersoever we direct our view, we do at all times and in all places perceive manifest tokens of the Divinity: everything we see, hear, feel, or anywise perceive by sense, being a sign or effect of the power of God; as is our perception of those very motions which are produced by men.

Berkeley, Principles of Human Knowledge, 148

90 It argues surely more power in the Deity to delegate a certain degree of power to inferior creatures than to produce every thing by his own immediate volition. It

argues more wisdom to contrive at first the fabric of the world with such perfect foresight that, of itself, and by its proper operation, it may serve all the purposes of providence, than if the great Creator were obliged every moment to adjust its parts, and animate by his breath all the wheels of that stupendous machine.

Hume, Concerning Human Understanding, VII, 56

- 91 God is related to the universe, as Creator and Preserver; the laws by which He created all things are those by which He preserves them. He acts according to these rules, because He knows them; He knows them, because He made them; and He made them, because they are in relation to His wisdom and power.

Montesquieu, Spirit of Laws, I, 1

- 92 The theist is a man firmly persuaded of the existence of a Supreme Being as good as He is powerful, who has formed all beings with extension, vegetating, sentient and reflecting; who perpetuates their species, who punishes crimes without cruelty, and rewards virtuous actions with kindness.

The theist does not know how God punishes, how he protects, how he pardons, for he is not reckless enough to flatter himself that he knows how God acts, but he knows that God acts and that He is just. Difficulties against Providence do not shake him in his faith, because they are merely great difficulties, and not proofs. He submits to this Providence, although he perceives but a few effects and few signs of this Providence: and, judging of the things he does not see by the things he sees, he

considers that this Providence reaches all places and all centuries.

Reconciled in this principle with the rest of the universe, he does not embrace any of the sects, all of which contradict each other; his religion is the most ancient and the most widespread; for the simple worship of a God has preceded all the systems of the world. He speaks a language that all peoples understand, while they do not understand one another. He has brothers from Pekin to Cayenne, and he counts all wise men as his brethren. He believes that religion does not consist either in the opinions of an unintelligible metaphysic, or in vain display, but in worship and justice. The doing of good, there is his service; being submissive to God, there is his doctrine. The Mahometan cries to him—"Have a care if you do not make the pilgrimage to Mecca!" "Woe unto you," says a Recollet, "if you do not make a journey to Notre-Dame de Lorette!" He laughs at Lorette and at Mecca; but he succours the needy and defends the oppressed.

Voltaire, Philosophical Dictionary: Theist

93 If God did not exist it would be necessary to invent him.

*Voltaire, Epitre d l'Auteur du Livre des Trois Imposteurs
(Nov. 10, 1770)*

94 While all the ambitious attempts of reason to penetrate beyond the limits of experience end in disappointment, there is still enough left to satisfy us in a practical point of view. No one, it is true, will be able to boast that he knows that there is a God and a future life; for, if he knows this, he is just the man whom I have long wished

to find. All knowledge, regarding an object of mere reason, can be communicated; and I should thus be enabled to hope that my own knowledge would receive this wonderful extension, through the instrumentality of his instruction. No, my conviction is not *logical*, but *moral* certainty; and since it rests on subjective grounds (of the moral sentiment), I must not even say: *It is* morally certain that there is a God, etc., but: *I am* morally certain, that is, my belief in God and in another world is so interwoven with my moral nature that I am under as little apprehension of having the former torn from me as of losing the latter,

Kant, Critique of Pure Reason, Transcendental Method

95 Whence have we the conception of God as the supreme good? Simply from the *idea* of moral perfection, which reason frames *a priori* and connects inseparably with the notion of a free will.

Kant, Fundamental Principles of the Metaphysic of Morals, II

96 It is morally necessary to assume the existence of God.

Kant, Critique of Practical Reason, Pt. I, n, 2

97 While *fear* doubtless in the first instance may have been able to produce *gods*, that is demons, it is only *reason* by its moral principles that has been able to produce the conception of *God*—and it has been able to do so despite the great ignorance that has prevailed in what concerns the teleology of nature, or the considerable doubt that arises from the difficulty of reconciling by a sufficiently

established principle the mutually conflicting phenomena
that nature presents.

Kant, Critique of Teleological Judgement, 86

98 Faust. Who dare name Him?

And who avow:

"I believe in Him"?

Who feels and would

Have hardihood

To say: "I don't believe in Him"?

The All-Enfolder,

The All-Upholder,

Enfolds, upholds He not

You, me. Himself?

Do not the heavens over-arch us yonder?

Does not the earth lie firm beneath?

Do not eternal stars rise friendly

Looking down upon us?

Look I not, eye in eye, on you.

And do not all things throng

Toward your head and heart,

Weaving in mystery eternal,

Invisible, visible, near to you?

Fill up your heart with it, great though it is,

And when you're wholly in the feeling, in its bliss.

Name it then as you will,

Name it Happiness! Heart! Love! God!

I have no name for that!

Feeling is all in all;

Name is but sound and smoke,

Beclouding Heaven's glow.

Goethe, Faust, I, 3432

99 —Brook and road

Were fellow-travellers in this gloomy Pass,
And with them did we journey several hours
At a slow step. The immeasurable height
Of woods decaying, never to be decayed,
The stationary blasts of waterfalls,
And in the narrow rent, at every turn,
Winds thwarting winds bewildered and forlorn,
The torrents shooting from the clear blue sky,
The rocks that muttered close upon our ears,
Black drizzling crags that spake by the wayside
As if a voice were in them, the sick sight
And giddy prospect of the raving stream,
The unfettered clouds and region of the heavens,
Tumult and peace, the darkness and the light—
Were all the workings of one mind, the features
Of the same face, blossoms upon one tree,
Characters of the great Apocalypse,
The types and symbols of Eternity,
Of first, and last, and midst, and without end.

Wordsworth, The Simplon Pass

100 That the history of the world, with all the changing scenes which its annals present, is this process of development and the realization of spirit—this is the true *Theodicaea*, the justification of God in history. Only *this* insight can reconcile spirit with the history of the world—*viz.*, that what has happened, and is happening every day, is not only not "without God," but is essentially His work.

Hegel, Philosophy of History, Pt. IV, III, 3

101 What is this unknown something with which the Reason collides when inspired by its paradoxical passion, with the result of unsettling even man's knowledge of himself? It is the Unknown. It is not a human being, in so far as we know what man is; nor is it any other known thing. So let us call this unknown something: *God*. It is nothing more than a name we assign to it. The idea of demonstrating that this unknown something (God) exists, could scarcely suggest itself to the Reason. For if God does not exist it would of course be impossible to prove it; and if he does exist it would be folly to attempt it.

Kierkegaard, Philosophical Fragments, III

102 O, yet we trust that somehow good
Will be the final goal of ill,
To pangs of nature, sins of will,
Defects of doubt, and taints of blood;

That nothing walks with aimless feet;
That not one life shall be destroy'd,
Or cast as rubbish to the void,
When God hath made the pile complete;

That not a worm is cloven in vain;
That not a moth with vain desire
Is shrivell'd in a fruitless fire,
Or but subserves another's gain.

Behold, we know not anything;
I can but trust that good shall fall
At last—far off—at last, to all,
And every winter change to spring.

So runs my dream; but what am I?
An infant crying in the night;
An infant crying for the light,
And with no language but a cry.

Tennyson, In Memoriam, LIV

103 For tho' from out our bourne of Time and Place
The flood may bear me far,
I hope to see my Pilot face to face
When I have crost the bar.

Tennyson, Crossing the Bar

104 The belief in God has often been advanced as not only the greatest, but the most complete of all the distinctions between man and the lower animals. It is however impossible, as we have seen, to maintain that this belief is innate or instinctive in man. On the other hand a belief in all-pervading spiritual agencies seems to be universal; and apparently follows from a considerable advance in man's reason, and from a still greater advance in his faculties of imagination, curiosity and wonder. I am aware that the assumed instinctive belief in God has been used by many persons as an argument for His existence. But this is a rash argument, as we should thus be compelled to believe in the existence of many cruel and malignant spirits, only a little more powerful than man; for the belief in them is far more general than in a beneficent Deity. The idea of a universal and beneficent Creator does not seem to arise in the mind of man, until he has been elevated by long-continued culture.

Darwin, Descent of Man, III, 21

105 Men are growing to be seriously alive to the fact that the historical evolution of humanity, which is generally, and I venture to think not unreasonably, regarded as progress, has been, and is being, accompanied by a co-ordinate elimination of the supernatural from its originally large occupation of men's thoughts.

T. H. Huxley, Science and Christian Tradition, Prologue

106 To whom turn I but to thee, the ineffable Name?

Builder and maker, thou, of houses not made with hands!

What, have fear of change from thee who art ever the same?

Doubt that thy power can fill the heart that thy power expands?

There shall never be one lost good! What was, shall live as before;

The evil is null, is naught, is silence implying sound;

What was good shall be good, with, for evil, so much good more;

On the earth the broken ares; in the heaven a perfect round.

Browning, Abt Vogler

107 But I need, now as then, [in youth]

Thee, God, who moulded men;

And since, not even while the whirl was worst,

Did I—to the wheel of life

With shapes and colors rife,

Bound dizzily—mistake my end, to slake thy thirst:

So, take and use thy work;

Amend what flaws may lurk,

What strain o' the stuff, what warpings past the aim!
My times be in thy hand!
Perfect the cup as planned!
Let age approve of youth, and death complete the same!

Browning, Rabbi Ben Ezra

108 The word "God" is used in most cases as by no means a term of science or exact knowledge, but a term of poetry and eloquence, a term *thrown out*, so to speak, at a not fully grasped object of the speaker's consciousness, a *literary* term, in short; and mankind mean different things by it as their consciousness differs.

Arnold, Literature and Dogma, I

109 No one will say, that it is admittedly certain and verifiable, that there is a personal first cause, the moral and intelligent governor of the universe, whom we may call *God* if we will. But that all things seem to us to have what we call a law of their being, and to tend to fulfil it, is certain and admitted; though whether we will call this *God* or not, is a matter of choice. Suppose, however, we call it *God*, we then give the name of *God* to a certain and admitted reality; this, at least, is an advantage.

Arnold, Literature and Dogma, I

no Ivan. There was an old sinner in the eighteenth century who declared that, if there were no God, he would have to be invented. . . , And man has actually invented God. And what's strange, what would be marvellous, is not that God should really exist; the marvel is that such an idea, the idea of the necessity of God, could enter the head of

such a savage, vicious beast as man. So holy it is, so touching, so wise and so great a credit it does to man,

Dostoevsky, Brothers Karamazov, Pt. II, V, 3

111 *Ivan*. If God exists and if He really did create the world, then, as we all know, He created it according to the geometry of Euclid and the human mind with the conception of only three dimensions in space. Yet there have been and still are geometricians and philosophers, and even some of the most distinguished, who doubt whether the whole universe, or to speak more widely, the whole of being, was only created in Euclid's geometry; they even dare to dream that two parallel lines, which according to Euclid can never meet on earth, may meet somewhere in infinity. I have come to the conclusion that, since I can't understand even that, I can't expect to understand about God. I acknowledge humbly that I have no faculty for settling such questions, I have a Euclidian earthly mind, and how could I solve problems that are not of this world? And I advise you never to think about it either, my dear Alyosha, especially about God, whether He exists or not. All such questions are utterly inappropriate for a mind created with an idea of only three dimensions.

Dostoevsky, Brothers Karamazov, Pt. II, V, 3

112 "I ought to tell you that I do not believe ... do not believe in God," said Pierre, regretfully and with an effort, feeling it essential to speak the whole truth.

The Mason looked intently at Pierre and smiled as a rich man with millions in hand might smile at a poor

fellow who told him that he, poor man, had not the five rubles that would make him happy.

"Yes, you do not know Him, my dear sir," said the Mason. "You cannot know Him. You do not know Him and that is why you are unhappy."

"Yes, yes, I am unhappy," assented Pierre. "But what am I to do?"

"You know Him not, my dear sir, and so you are very unhappy. You do not know Him, but He is here. He is in me, He is in my words. He is in thee, and even in those blasphemous words thou hast just uttered!" pronounced the Mason in a stern and tremulous voice.

He paused and sighed, evidently trying to calm himself.

"If He were not," he said quietly, "you and I would not be speaking of Him, my dear sir. Of what, of whom, are we speaking? Whom hast thou denied?" he suddenly asked with exulting austerity and authority in his voice. "Who invented Him, if He did not exist? Whence came thy conception of the existence of such an incomprehensible Being? Why didst thou, and why did the whole world, conceive the idea of the existence of such an incomprehensible Being, a Being all-powerful, eternal, and infinite in all His attributes?..."

He stopped and remained silent for a long time.

Pierre could not and did not wish to break this silence.

"He exists, but to understand Him is hard," the Mason began again, looking not at Pierre but straight before him, and turning the leaves of his book with his old hands which from excitement he could not keep still. "If it were a man whose existence thou didst doubt I could bring him to thee, could take him by the hand and show him to thee. But how can I, an insignificant mortal, show His

omnipotence. His infinity, and all His mercy to one who is blind, or who shuts his eyes that he may not see or understand Him and may not see or understand his own vileness and sinfulness?" He paused again. "Who art thou? Thou dreamest that thou art wise because thou couldst utter those blasphemous words," he went on, with a somber and scornful smile. "And thou art more foolish and unreasonable than a little child, who, playing with the parts of a skillfully made watch, dares to say that, as he does not understand its use, he does not believe in the master who made it. To know Him is hard.... For ages, from our forefather Adam to our own day, we labor to attain that knowledge and are still infinitely far from our aim; but in our lack of understanding we see only our weakness and His greatness...."

Tolstoy, War and Peace, V, 2

113 Glory be to God for dappled things—
For skies of couple-colour as a brindled cow;
For rose-moles all in stipple upon trout that swim;
Fresh-firecoal chestnut-falls; finches' wings;
Landscape plotted and pieced—fold, fallow, and plough;
And all trades, their gear and tackle and trim.
All things counter, original, spare, strange;
Whatever is fickle, freckled (who knows how?)
With swift, slow; sweet, sour; adazzle, dim;
He fathers-forth whose beauty is past change:
Praise him.

G. M. Hopkins, Pied Beauty

114 The world is charged with the grandeur of God.
It will flame out, like shining from shook foil;

It gathers to a greatness, like the ooze of oil Crushed.
Why do men then now not reck his rod? Generations have
trod, have trod, have trod;
And all is seared with trade; bleared, smeared with toil;
And wears man's smudge and shares man's smell; the
soil
Is bare now, nor can foot feel, being shod.

And for all this, nature is never spent;
There lives the dearest freshness deep down things;
And though the last lights off the black West went
Oh, morning, at the brown brink eastward, springs—
Because the Holy Ghost over the bent
World broods with warm breast and ah! bright wings.

G. M. Hopkins, God's Grandeur

115 Thus spake the devil unto me, once on a time: "Ever
God hath his hell: it is his love for man."

And lately did I hear him say these words: "God is
dead: of his pity for man hath God died."

Nietzsche, Thus Spake Zarathustra, IV, Introduction

116 A people which still believes in itself still also has its
own God. In him it venerates the conditions through
which it has prospered, its virtues—it projects its joy in
itself, its feeling of power on to a being whom one can
thank for them. He who is rich wants to bestow; a proud
people needs a God in order to *sacrifice*. ... Within the
bounds of such presuppositions religion is a form of
gratitude. One is grateful for oneself: for that one needs a
God.—Such a God must be able to be both useful and
harmful, both friend and foe—he is admired in good and
bad alike. The *anti-natural* castration of a God into a God

of the merely good would be totally undesirable here. One has as much need of the evil God as of the good God: for one does not owe one's existence to philanthropy or tolerance precisely. ... Of what consequence would a God be who knew nothing of anger, revengefulness, envy, mockery, cunning, acts of violence? to whom even the rapturous *ardeurs* of victory and destruction were unknown? One would not understand such a God: why should one have him?—To be sure: when a people is perishing; when it feels its faith in the future, its hope of freedom vanish completely; when it becomes conscious that the most profitable thing of all is submissiveness and that the virtues of submissiveness are a condition of its survival, then its God has to alter too. He now becomes a dissembler, timid, modest, counsels 'peace of soul', no more hatred, forbearance, 'love' even towards friend and foe. He is continually moralizing, he creeps into the cave of every private virtue, becomes a God for everybody', becomes a private man, becomes a cosmopolitan.... Formerly he represented a people, the strength of a people, everything aggressive and thirsting for power in the soul of a people: now he is merely the good God.

Nietzsche, Antichrist, XVI

117 The Christian conception of God—God as God of the sick, God as spider, God as spirit—is one of the most corrupt conceptions of God arrived at on earth: perhaps it even represents the low-water mark in the descending development of the God type.

Nietzsche, XVIII

118 Even the slightest trace of piety in us ought to make us feel that a God who cures a headcold at the right moment or tells us to get into a coach just as a downpour is about to start is so absurd a God he would have to be abolished even if he existed. A God as a domestic servant, as a postman, as an almanac-maker—at bottom a word for the stupidest kind of accidental occurrence.

Nietzsche, Antichrist, LII

119 If but some vengeful god would call to me
From up the sky, and laugh: "Thou suffering thing,
Know that thy sorrow is my ecstasy,
That thy love's loss is my hate's profiting!"

Then would I bear it, clench myself, and die,
Steeled by the sense of ire unmerited;
Half-eased in that a Powerfuller than I
Had willed and meted me the tears I shed.

But not so. How arrives it joy' lies slain,
And why unblooms the best hope ever sown?
—Crass Casualty obstructs the sun and rain,
And dicing Time for gladness casts a moan. . . .
These purblind Doomsters had as readily strown
Blisses about my pilgrimage as pain.

Hardy, Hap

120 God is the ultimate limitation, and His existence is the ultimate irrationality. For no reason can be given for just that limitation which it stands in His nature to impose, God is not concrete, but He is the ground for concrete actuality. No reason can be given for the nature of God, because that nature is the ground of rationality.

Whitehead, Science and the Modern World, XI

121 I do not pretend to be able to prove that there is no God. I equally cannot prove that Satan is a fiction. The Christian God may exist; so may the Gods of Olympus, or of ancient Egypt, or of Babylon. But no one of these hypotheses is more probable than any other: they lie outside the region of even probable knowledge, and therefore there is no reason to consider any of them.

Russell, I Believe, I

122 The same father , . . who gave the child his life and preserved it from the dangers which that life involves, also taught it what it may or may not do, made it accept certain limitations of its instinctual wishes, and told it what consideration it would be expected to show towards its parents and brothers and sisters, if it wanted to be tolerated and liked as a member of the family circle, and later on of more extensive groups. The child is brought up to know its social duties by means of a system of love-rewards and punishments, and in this way it is taught that its security in life depends on its parents (and, subsequently, other people) loving it and being able to believe in its love for them. This whole state of affairs is carried over by the grown man unaltered into his religion. The prohibitions and commands of his parents live on in his breast as his moral conscience; God rules the world of men with the help of the same system of rewards and punishments, and the degree of protection and happiness which each individual enjoys, depends on his fulfilment of the demands of morality; the feeling of security, with which he fortifies himself against the dangers both of the external world and of his human environment, is founded on his love of God and the consciousness of God's love for him. Finally, he has in prayer a direct influence on the

divine will, and in that way insures for himself a share in the divine omnipotence.

*Freud, New Introductory Lectures on Psycho-Analysis,
XXXV*

123 The last contribution to the criticism of the religious *Weltanschauung* has been made by psychoanalysis, which has traced the origin of religion to the helplessness of childhood, and its content to the persistence of the wishes and needs of childhood into maturity. This does not precisely imply a refutation of religion, but it is a necessary rounding off of our knowledge about it, and, at least on one point, it actually contradicts it, for religion lays claim to a divine origin. This claim, to be sure, is not false if our interpretation of God is accepted.

*Freud, New Introductory Lectures on Psycho-Analysis,
XXXV*

124 Obvious considerations like these furnish the proof of God's existence, not as philosophers have tried to express it after the fact and in relation to mythical conceptions of God nady current, but as mankind originally perceived it, and (where religion is spontaneous) perceives it still. There is such an order in experience that we find our desires doubly dependent on something which, because it disregards our will, we call an external power. Sometimes it overwhelms us with scourges and wonders, so that we must marvel at it and fear; sometimes it removes, or after removing restores, a support necessary to our existence and happiness, so that we must cling to it, hope for it, and love it. Whatever is serious in religion, whatever is bound up with morality

and fate, is contained in those plain experiences of dependence and of affinity to that on which we depend. The rest is poetry, or mythical philosophy, in which definitions not warranted in the end by experience are given to that power which experience reveals. To reject such arbitrary definitions is called atheism by those who frame them; but a man who studies for himself the ominous and the friendly aspects of reality and gives them the truest and most adequate expression he can is repeating what the founders of religion did in the beginning. He is their companion and follower more truly than are the apologists for secondhand conceptions which these apologists themselves have never compared with the facts, and which they prize chiefly for misrepresenting actual experience and giving it imaginary extensions.

Santayana, Life of Reason, III, 3

125 He Who Himself begot, middler the Holy Ghost, and Himself sent Himself, Agenbuyer, between Himself and othere, Who, put upon by His fiends, stripped and whipped, was nailed like bat to barndoor, starved on crosstree. Who let Him bury, stood up, harrowed hell, fared into heaven and there these nineteen hundred years sitteth on the right hand of His Own Self but yet shall come in the latter day to doom the quick and dead when all the quick shall be dead already.

Joyce, Ulysses

20.6 Gods and Goddesses

One striking difference between the quotations in this section and the quotations in Section 20.5 on God is that here the poets and the historians hold forth most eloquently and vividly whereas there the philosophers and theologians heap argument upon argument. Another difference, of course, is the contrast between the colorful anthropomorphic personality of each particular god and goddess and the abstract metaphysical characterization of a supernatural being.

The tragic and epic poets of antiquity, as well as the historians, give us a familiarity with the dwellers on Mt. Olympus, or their Roman counterparts, that enhances our appreciation of the later literature in which allusion to these deities is so frequently made. Their stories about the adventures and misadventures of the capricious or wayward divinities led Plato to call for the exclusion of the poets from the ideal state, in order to prevent immoral actions from being imitated or misleading lessons from being learned. The reader will find that famous passage from the *Republic* in Section 13.2 on Freedom of Thought and Expression: Censorship.

The pagan philosophers manifest a certain detachment in their comments on the deities worshipped in the polytheistic religions of antiquity, often dealing with the popular beliefs about the gods in terms of their own more abstract consideration of God. In the materialistic cosmology of the ancient atomists, Epicurus and Lucretius, the gods are exiled

to a place of pleasure without power. No harm is done in admitting their existence if they are deprived of any power to intervene in the order of nature or to control man by the distribution of rewards and punishments.

As might be expected, adverse criticisms of pagan polytheism are expressed by Christian theologians and by philosophers who profess a commitment to Christian beliefs. This raises, of course, the problem of the line that divides authentic religion from mythology and superstition, in connection with which the reader is referred to Section 20.12 on Superstition. It is also suggested that the reader compare Gibbon's remarks on Christianity in Section 20.3 with his comments here on pagan religious beliefs.

■ ■ ■

- 1 *Dione*. That man who fights the immortals lives for no long time,
his children do not gather to his knees to welcome
their father
when he returns home after the fighting and the bitter
warfare.

Homer, Iliad, V, 407

- 2 *Zeus*. Come, you gods, make this endeavour, that you all
may learn this.
Let down out of the sky a cord of gold; lay hold of it
all you who are gods and all who are goddesses, yet
not
even so can you drag down Zeus from the sky to the
ground, not

Zeus the high lord of counsel, though you try until you grow weary.

Yet whenever I might strongly be minded to pull you,
I could drag you up, earth and all and sea and all with you,

then fetch the golden rope about the horn of Olympos
and make it fast, so that all once more should dangle
in mid air.

So much stronger am I than the gods, and stronger
than mortals.

Homer, Iliad, VIII, 18

- 3 *Zeus*. My word, how mortals take the gods to task!
All their afflictions come from us, we hear.
And what of their own failings? Greed and folly
double the suffering in the lot of man.

Homer, Odyssey, I, 30

- 4 *Menelaos*. Young friends, no mortal man can vie with Zeus.
His home and all his treasures are for ever Homer,
Odyssey,

Homer, Odyssey, IV, 79

- 5 *A Suitor*. They go in foreign guise, the gods do, looking like
strangers, turning up in towns and settlements to keep
an eye on manners, good or bad.

Homer, Odyssey, XVII, 486

- 6 Invisible the gods are ever nigh,
Pass through the midst and bend th' all-seeing eye:
Who heed not heaven's revenge, but wrest the right,
And grind the poor, are naked to their sight.

Hesiod, Works and Days

- 7 Children of Jove, all hail! but deign to give
Th' enchanting song! record the sacred race
Of ever-living gods; who sprang from earth,
From the starr'd heaven, and from the murky night,
And whom the salt deep nourish'd into life.
Declare how first the gods and earth became;
The rivers and th' immeasurable sea
Raging in foamy swell; the glittering stars,
And the wide heaven above; and who from these
Of deities arose, dispensing good;
Say how their treasures, how their honours each
Allotted shared; how first they fix'd abode
Amidst Olympus' many-winding vales.

Hesiod, Theogony

- 8 The Persians . . . have no images of the gods, no temples
nor altars, and consider the use of then a sign of folly.
This comes, I think, from their not believing the gods to
have the same nature with men, as the Greeks imagine.

Herodotus, History, I, 131

- 9 *Heracles*. I do not believe the gods commit
adultery, or bind each other in chains.
I never did believe it; I never shall;
nor that one god is tyrant of the rest.
If god is truly god, he is perfect,
lacking nothing.

Euripides, Heracles, 1341

- 10 *Talthybius*. Do we, holding that the gods exist, deceive
ourselves with unsubstantial dreams and lies, while

random careless chance and change alone control the world?

Euripides, Hecuba, 489

- 11 *Hecuba*. I am a slave, I know, and slaves are weak. But the gods are strong, and over them there stands some absolute, some moral order or principle of law more final still.

Upon this moral law the world depends; through it the gods exist; by it we live, defining good and evil.

Euripides, Hecuba, 798

- 12 *Polymestor*. The inconsistent gods make chaos of our lives, pitching us about with such savagery of change that we, out of our anguish and uncertainty, may turn to them.

Euripides, Hecuba, 958

- 13 *Creusa*. O you who give the seven-toned lyre
A voice which rings out of the lifeless,
Rustic horn the lovely sound
Of the Muses' hymns,
On you, Latona's son, here
In daylight I will lay blame.
You came with hair flashing
Gold, as I gathered
Into my cloak flowers ablaze
With their golden light.
Clinging to my pale wrists
As I cried for my mother's help
You led me to bed in a cave,
A god and my lover,

With no shame,
Submitting to the Cyprian's will.
In misery I bore you
A son, whom in fear of my mother
I placed in that bed
Where you cruelly forced me.
Ah! He is lost now,
Snatched as food for birds,
My son and yours; O lost!
But you play the lyre,
Chanting your paeans.

O hear me, son of Latona,
Who assign your prophecies
From the golden throne
And the temple at earth's center,
I will proclaim my words in your ears:
You are an evil lover;
Though you owed no debt
To my husband, you have
Set a son in his house.
But my son, yes and yours, hard-hearted,
Is lost, carried away by birds,
The clothes his mother put on him abandoned.
Delos hates you and the young
Laurel which grows by the palm
With its delicate leaves, where Latona
Bore you, a holy child, fruit of Zeus.

Euripides, Ion, 881

- 14 *Chorus*. —You on the streets!
—You on the roads!
—Make way!

—Let every mouth be hushed. Let no ill-omened words profane your tongues.

—Make way! Fall back!

—Hush.

—For now I raise the old, old hymn to Dionysus.

—Blessed, blessed are those who know the mysteries of god.

—Blessed is he who hallows his life in the worship of god, he whom the spirit of god possesseth, who is one with those who belong to the holy body of god.

—Blessed are the dancers and those who are purified, who dance on the hill in the holy dance of god.

—Blessed are they who keep the rite of Cybele the Mother.

—Blessed are the thyrsus-bearers, those who wield in their hands the holy wand of god.

—Blessed are those who wear the crown of the ivy of god.

—Blessed, blessed are they: Dionysus is their God!

Euripides, Bacchae, 68

15 *Chorus.* —He is sweet upon the mountains. He drops to the earth from the running packs.

He wears the holy fawn-skin. He hunts the wild goat and kills it.

He delights in the raw flesh.

He runs to the mountains of Phrygia, to the mountains of Lydia he runs!

He is Bromius who leads us! *Evohe!*

—With milk the earth flows! It flows with wine! It runs with the nectar of bees!

—Like frankincense in its fragrance is the blaze of the torch he bears.

Flames float out from his trailing wand as he runs, as he dances, kindling the stragglers, spurring with cries, and his long curls stream to the wind!

—And he cries, as they cry, *Evohe!*—

On, Bacchae!

On, Bacchae!

Follow, glory of golden Tmolus, hymning god with a rumble of drums, with a cry. *Evohe!* to the Evian god, with a cry of Phrygian cries, when the holy flute like honey plays the sacred song of those who go
to the mountain!
to the mountain!

—Then, in ecstasy, like a colt by its grazing mother, the Bacchante runs with flying feet, she leaps!

Euripides, Bacchae, 135

16 *Chorus.*—Slow but unmistakable
the might of the gods moves on.
It punishes that man,
infatuate of soul
and hardened in his pride,
who disregards the gods.
The gods are crafty:
they lie in ambush
a long step of time
to hunt the unholy.
Beyond the old beliefs,
no thought, no act shall go.
Small, small is the cost
to believe in this:
whatever is god is strong;
whatever long time has sanctioned,
that is a law forever;

the law tradition makes
is the law of nature.

Euripides, Bacchae, 882

- 17 *Agathon*. Love set in order the empire of the gods— the love of beauty, as is evident, for with deformity Love has no concern. In the days of old, as I began by saying, dreadful deeds were done among the gods, for they were ruled by Necessity; but now since the birth of Love, and from the Love of the beautiful, has sprung every good in heaven and earth.

Plato, Symposium, 197A

- 18 *Socrates*. Did ever man, Meletus, believe in the existence of human things, and not of human beings? ... I wish, men of Athens, that he would answer, and not be always trying to get up an interruption. Did ever any man believe in horsemanship, and not in horses? or in flute-playing, and not in flute-players? No, my friend; I will answer to you and to the court, as you refuse to answer for yourself. There is no man who ever did. But now please to answer the next question: Can a man believe in spiritual and divine agencies, and not in spirits or demigods?

Meletus. He cannot.

How lucky I am to have extracted that answer, by the assistance of the court! But then you swear in the indictment that I teach and believe in divine or spiritual agencies (new or old, no matter for that); at any rate, I believe in spiritual agencies,—so you say and swear in the affidavit; and yet if I believe in divine beings, how can I help believing in spirits or demigods;—must I not?

To be sure I must; and therefore I may assume that your silence gives consent. Now what are spirits or demigods? are they not either gods or the sons of gods?

Certainly they are.

But this is what I call the facetious riddle invented by you: the demigods or spirits are gods, and you say first that I do not believe in gods, and then again that I do believe in gods; that is, if I believe in demigods. For if the demigods are the illegitimate sons of gods, whether by the nymphs or by any other mothers, of whom they are said to be the sons—what human being will ever believe that there are no gods if they are the sons of gods? You might as well affirm the existence of mules, and deny that of horses and asses. Such nonsense, Meletus, could only have been intended by you to make trial of me. You have put this into the indictment because you had nothing real of which to accuse me. But no one who has a particle of understanding will ever be convinced by you that the same men can believe in divine and superhuman things, and yet not believe that there are gods and demigods and heroes.

Plato, Apology, 27A

- 19 *Athenian Stranger*. Of the stars too, and of the moon, and of the years and months and seasons, must we not say in like manner, that since a soul or souls having every sort of excellence are the causes of all of them, those souls are Gods, whether they are living beings and reside in bodies, and in this way order the whole heaven, or whatever be the place and mode of their existence;—and will any one who admits all this venture to deny that all things are full of Gods?

Cleinias. No one. Stranger, would be such a madman.

Plato, Laws, X, 899A

20 One difficulty which is as great as any has been neglected both by modern philosophers and by their predecessors—whether the principles of perishable and those of imperishable things are the same or different. If they are the same, how are some things perishable and others imperishable, and for what reason? The school of Hesiod and all the theologians thought only of what was plausible to themselves, and had no regard to us. For, asserting the first principles to be gods and born of gods, they say that the beings which did not taste of nectar and ambrosia became mortal: and clearly they are using words which are familiar to themselves, yet what they have said about the very application of these causes is above our comprehension. For if the gods taste of nectar and ambrosia for their pleasure, these are in no wise the causes of their existence; and if they taste them to maintain their existence, how can gods who need food be eternal?—But into the subtleties of the mythologists it is not worth our while to inquire seriously.

Aristotle, Metaphysics, 1000a5

21 We assume the gods to be above all other beings blessed and happy; but what sort of actions must we assign to them? Acts of justice? Will not the gods seem absurd if they make contracts and return deposits, and so on? Acts of a brave man, then, confronting dangers and running risks because it is noble to do so? Or liberal acts? To whom will they give? It will be strange if they are really to have money or anything of the kind. And what would their temperate acts be? Is not such praise tasteless, since they have no bad appetites? If we were to run

through them all, the circumstances of action would be found trivial and unworthy of gods. Still, every one supposes that they live and therefore that they are active; we cannot suppose them to sleep like Endymion, Now if you take away from a living being action, and still more production, what is left but contemplation? Therefore the activity of Gk>d, which surpasses all others in blessedness, must be contemplative; and of human activities, therefore, that which is most akin to this must be most of the nature of happiness.

Aristotle, Ethics, 1178b9

22 If you well apprehend and keep in mind these things, nature free at once and rid of her haughty lords is seen to do all things spontaneously of herself without the meddling of the gods. For I appeal to the holy breasts of the gods who in tranquil peace pass a calm time and an unruffled existence, who can rule the sum, who hold in his hand with controlling force the strong reins, of the immeasurable deep? who can at once make all the different heavens to roll and warm with ethereal fires all the fruitful earths, or be present in all places at all times, to bring darkness with clouds and shake with noise the heaven's serene expanse, to hurl lightnings and often throw down his own temples, and withdrawing into the deserts there to spend his rage in practising his bolt which often passes the guilty by and strikes dead the innocent and unoffending?

Lucretius, Nature of Things, II

23 For soon as thy philosophy issuing from a godlike intellect has begun with loud voice to proclaim the nature

of things, the terrors of the mind are dispelled, the walls of the world part asunder, I see things in operation throughout the whole void: the divinity of the gods is revealed and their tranquil abodes which neither winds do shake nor clouds drench with rains nor snow congealed by sharp frosts harms with hoary fall: an ever cloudless ether o'ercanopies them, and they laugh with light shed largely round. Nature too supplies all their wants and nothing ever impairs their peace of mind.

Lucretius, Nature of Things, III

24 This too you may not possibly believe, that the holy seats of the gods exist in any parts of the world: the fine nature of the gods far withdrawn from our senses is hardly seen by the thought of the mind; and since it has ever eluded the touch and stroke of the hands, it must touch nothing which is tangible for us; for that cannot touch which does not admit of being touched in turn. And therefore their seats as well must be unlike our seats, fine, even as their bodies are fine.

Lucretius, Nature of Things, V

25 We are told that there is no race in the world so uncivilized or barbarous but that it has some intimation of a belief in the gods. It is certain that many men entertain wrong ideas about the gods. This results from a corrupt nature. Nevertheless, all men hold to some divine power and a divine nature, and this is not because of some human agreement or convention. Nor is it a belief established by rules or statutes. It is commonly accepted that such a unanimity among the world's races is according to natural law.

Cicero, Disputations, I, 13

26 The gods have been portrayed by the poets as angry and lustful. They have described for us the gods' wars, battles, squabbles, and wounds; their hatreds, enmities, quarrels; their births and deaths; their complaints and sorrows; their unbridled passions; their adulteries and imprisonments; their unions with humans and the birth of mortal progeny from an immortal parent. These errors of the poets may be classed with the monstrous teachings of the astrologers and the insane mythology of Egypt, as well as with popular theology, which is a mass of inconsistency derived from ignorance. Anyone who thinks about the unfounded and irrational nature of these doctrines should regard Epicurus with reverence and rank him among the gods about whom we are inquiring. He alone perceived that the gods exist because nature herself has imprinted a conception of them on the minds of men.

Cicero, De Natura Deorum, I, 16

27 *Velleius*. We agree that the gods are supremely happy. Since no one is happy without virtue, and virtue does not exist apart from reason, and reason is only found in human form, we must also assume that the gods possess the form of men.

Cicero, De Natura Deorum, I, 18

28 *Lucillius*. If some people interpret the will of certain beings, naturally those beings themselves must exist. There are people who interpret the will of the gods. Therefore we must admit that the gods exist. But someone may argue that not all prophecies come true.

Not all sick persons get well either, but that doesn't disqualify the practice of medicine. Omens of future events are revealed by the gods. Men may not understand these omens, but the fault is with the human powers of inference, not with the nature of the gods.

Cicero, De Natura Deorum, II, 4

29 Gods are convenient to have, so let us concede their existence,

Bring to their obsolete shrine plenty of incense and wine.

Nor are they careless, aloof, calm in the semblance of slumber:

Live an innocent life; godhead is certainly near.

Keep true faith, and return whatever is placed in your keeping;

Keep your hands clean of blood; never indulge in a fraud.

Ovid, Art of Love, I, 637

30 Pythagoras . . . conceived of the first principle of being as transcending sense and passion, invisible and incorrupt, and only to be apprehended by abstract intelligence. So Numa forbade the Romans to represent God in the form of man or beast, nor was there any painted or graven image of a deity admitted amongst them for the space of the first hundred and seventy years, all which time their temples and chapels were kept free and pure from images; to such baser objects they deemed it impious to liken the highest, and all access to God impossible, except by the pure act of the intellect. His sacrifices, also, had great similitude to the ceremonial of Pythagoras, for

they were not celebrated with effusion of blood, but consisted of flour, wine, and the least costly offerings.

Plutarch, Numa Pompilius

- 31 So dispassionate a temper [as Pericles'], a life so pure and unblemished, in the height of power and place, might well be called Olympian, in accordance with our conceptions of the divine beings, to whom, as the natural authors of all good and of nothing evil, we ascribe the rule and government of the world. Not as the poets represent, who, while confounding us with their ignorant fancies, are themselves confuted by their own poems and fictions, and call the place, indeed, where they say the gods make their abode, a secure and quiet seat, free from all hazards and commotions, untroubled with winds or with clouds, and equally through all time illumined with a soft serenity and a pure light as though such were a home most agreeable for a blessed and immortal nature; and yet, in the meanwhile, affirm that the gods themselves are full of trouble and enmity and anger and other passions, which no way become or belong to even men that have any understanding.

Plutarch, Pericles

- 32 We cannot suppose that the divine beings actually and literally turn our bodies and direct our hands and our feet this way or that, to do what is right: it is obvious that they must actuate the practical and elective element of our nature, by certain initial occasions, by images presented to the imagination, and thoughts suggested to the mind, such either as to excite it to, or avert and withhold it from, any particular course.

Plutarch, Coriolanus

33 The Gods take no thought for our happiness, only for our punishment.

Tacitus, Historic I, 3

34 In truth [gods] do exist, and they do care for human things, and they have put all the means in man's power to enable him not to fall into real evils.

Marcus Aurelius, Meditations, II, 11

35 The least-known things are the fittest to be deified; wherefore to make gods of ourselves, like antiquity, passes the utmost bounds of feeble-mindedness. I would even rather have followed those who worshiped the serpent, the dog, and the ox; inasmuch as their nature and being is less known to us, and we have more chance to imagine what we please about those animals and attribute extraordinary faculties to them. But to have made gods of our condition, the imperfection of which we should know; to have attributed to them desire, anger, vengeance, marriages, generation, kinships, love and jealousy, our limbs and our bones, our fevers and our pleasures, our deaths, our burials—this must have come from a marvelous intoxication of the human intelligence.

Montaigne, Essays, II, 12, Apology for Raymond Sebond

36 *Gloucester*. As flies to wanton boys, are we to the gods,
They kill us for their sport.

Shakespeare, Lear, IV, i, 38

37 *Florizel*. The gods themselves,
Humbling their deities to love, have taken
The shapes of beasts upon them. Jupiter
Became a bull, and bellow'd; the green Neptune
A ram, and bleated; and the fire-robed god,
Golden Apollo, a poor humble swain.

Shakespeare, Winter's Tale, IV, iv, 25

38 And for that part of religion which consisteth in opinions concerning the nature of powers invisible, there is almost nothing that has a name that has not been esteemed amongst the Gentiles, in one place or another, a god or devil; or by their poets feigned to be animated, inhabited, or possessed by some spirit or other.

The unformed matter of the world was a god by the name of Chaos.

The heaven, the ocean, the planets, the fire, the earth, the winds, were so many gods.

Men, women, a bird, a crocodile, a calf, a dog, a snake, an onion, a leek, were deified. Besides that, they filled almost all places with spirits called *demons*: the plains, with Pan and Panises, or Satyrs; the woods, with Fauns and Nymphs; the sea, with Tritons and other Nymphs; every river and fountain, with a ghost of his name and with Nymphs; every house, with its *Lares*, or familiars; every man, with his *Genius*; Hell, with ghosts and spiritual officers, as Charon, Cerberus, and the Furies; and in the night time, all places with *larvae*, *lemures*, ghosts of men deceased, and a whole kingdom of fairies and bugbears. They have also ascribed divinity, and built temples, to mere accidents and qualities; such as are time, night, day, peace, concord, love, contention, virtue, honour, health, rust, fever, and the like; which when they

prayed for, or against, they prayed to as if there were ghosts of those names hanging over their heads, and letting fall or withholding that good, or evil, for or against which they prayed. They invoked also their own wit, by the name of Muses; their own ignorance, by the name of Fortune; their own lust, by the name of Cupid; their own rage, by the name Furies; their own privy members by the name of Priapus; and attributed their pollutions to *incubi* and *succubae*: insomuch as there was nothing which a poet could introduce as a person in his poem which they did not make either a god or a devil.

Hobbes, Leviathan, I, 12

- 39 What true or tolerable notion of a Deity could they have, who acknowledged and worshipped hundreds? Every deity that they owned above one was an infallible evidence of their ignorance of Him, and a proof that they had no true notion of God, where unity, infinity, and externity were excluded. To which, if we add their gross conceptions of corporeity, expressed in their images and representations of their deities; the amours, marriages, copulations, lusts, quarrels, and other mean qualities attributed by them to their gods; we shall have little reason to think that the heathen world, i.e. the greatest part of mankind, had such ideas of God in their minds as he himself, out of care that they should not be mistaken about him, was author of.

Locke, Concerning Human Understanding, Bk. I, III, 15

- 40 If they say that the variety of deities worshipped by the heathen world were but figurative ways of expressing the several attributes of that incomprehensible Being, or

several parts of his providence, I answer: what they might be in the original I will not here inquire; but that they were so in the thoughts of the vulgar I think nobody will affirm.

Locke, Concerning Human Understanding, Bk. I, III, 15

41 You find certain phenomena in nature. You seek a cause or author. You imagine that you have found him. You afterwards become so enamoured of this offspring of your brain, that you imagine it impossible, but he must produce something greater and more perfect than the present scene of things, which is so full of ill and disorder. You forget, that this superlative intelligence and benevolence are entirely imaginary, or at least, without any foundation in reason; and that you have no ground to ascribe to him any qualities, but what you see he has actually exerted and displayed in his productions. Let your gods, therefore, O philosophers, be suited to the present appearances of nature: and presume not to alter these appearances by arbitrary suppositions, in order to suit them to the attributes, which you so fondly ascribe to your deities.

Hume, Concerning Human Understanding, XI, 106

42 The devout polytheist, though fondly attached to his national rites, admitted with implicit faith the different religions of the earth. Fear, gratitude, and curiosity, a dream or an omen, a singular disorder, or a distant journey, perpetually disposed him to multiply the articles of his belief, and to enlarge the list of his protectors. The thin texture of the Pagan mythology was interwoven with various but not discordant materials. As soon as it was

allowed that sages and heroes, who had lived, or who had died for the benefit of their country, were exalted to a state of power and immortality, it was universally confessed that they deserved, if not the adoration, at least the reverence of all mankind. The deities of a thousand groves and a thousand streams possessed, in peace, their local and respective influence; nor could the Roman who deprecated the wrath of the Tiber, deride the Egyptian who presented his offering to the beneficent genius of the Nile. The visible powers of Nature, the planets, and the elements, were the same throughout the universe. The invisible governors of the moral world were inevitably cast in a similar mould of fiction and allegory. Every virtue, and even vice, acquired its divine representative; every art and profession its patron, whose attributes, in the most distant ages and countries, were uniformly derived from the character of their peculiar votaries. A republic of gods of such opposite tempers and interest required, in every system, the moderating hand of a supreme magistrate, who, by the progress of knowledge and flattery, was gradually invested with the sublime perfections of an Eternal Parent, and an Omnipotent Monarch. Such the mild spirit of antiquity, that the nations were less attentive to the difference than to the resemblance of their religious worship. The Greek, the Roman, and the Barbarian, as they met before their respective altars, easily persuaded themselves, that under various names, and with various ceremonies, they adored the same deities.

Gibbon, Decline and Fall of the Roman Empire, II

- 43 The deities of Olymipus, as they are painted by the immortal bard, imprint themselves on the minds which

are the least addicted to superstitious credulity. Our familiar knowledge of their names and characters, their forms and attributes, *seems* to bestow on those airy beings a real and substantial existence; and the pleasing enchantment produces an imperfect and momentary assent of the imagination to those fables which are the most repugnant to our reason and experience.

Gibbon, Decline and Fall of the Roman Empire, XXIII

- 44 The weakness of polytheism was, in some measure, excused by the moderation of its claims; and the devotion of the Pagans was not incompatible with the most licentious scepticism.

Gibbon, Decline and Fall of the Roman Empire, XXIII

- 45 I am not sure but I should betake myself in extremities to the liberal divinities of Greece, rather than to my country's God. Jehovah, though with us he has acquired new attributes, is more absolute and unapproachable, but hardly more divine, than Jove. He is not so much of a gentleman, not so gracious and catholic, he does not exert so intimate and genial an influence on nature, as many a god of the Greeks. I should fear the infinite power and inflexible justice of the almighty mortal hardly as yet apotheosized, so wholly masculine, with no sister Juno, no Apollo, no Venus, nor Minerva, to intercede for me.... The Grecian are youthful and erring and fallen gods, with the vices of men, but in many important respects essentially of the divine race. In my Pantheon, Pan still reigns in his pristine glory, with his ruddy face, his flowing beard, and his shaggy body, his pipe and his crook, his nymph Echo, and his chosen daughter lambe; for the great god Pan is

not dead, as was rumored. No god ever dies. Perhaps of all the gods of New England and of ancient Greece, I am most constant at his shrine.

*Thoreau, A Week on the Concord and Merrimack Rivers
(Sunday)*

46 That fear first created the gods is perhaps as true as anything so brief could be on so great a subject.

Santayana, Life of Reason, III, 3

20.7 Angels and Devils

Superhuman in the sense that they are superior to man but not supernatural because, like man, they have natures created by God, the angels (the bad angels, the devils or demons, as well as the good) occupy a special place in the Judeo-Christian cosmology that has only a faint analogy with the role played by the demigods in other religions. In their most frequent appearance in the Old Testament and the New, they perform the function of messengers or emissaries of the Lord; but, as other passages indicate, that is by no means their only *raison d'être*. They comprise, on the one hand, the heavenly host, the celestial hierarchy, engaged in the adoration of God; and, on the other, they are the damned as well as the ministers of damnation in the nether regions below.

We know, both from Scripture and from the poets, the proper names of only a small number of the angels and demons. The name most familiar to us is that of the fallen Seraph, variously called Lucifer, Satan, or Mephistopheles, who appears as the serpent in the Garden of Eden. Among

the good angels, we are acquainted by name only with angels of a much lower rank, such as the archangels Michael and Gabriel. Indeed, one of the most striking things we are told about these creatures by Christian theologians is that they are arranged in nine ranks or grades, the lowest being the angels and archangels who act as guardians of individual men or as messengers from God to man, the highest being the cherubim and seraphim, whose prime function is simply to adore their Creator and to praise him.

In three of the greatest poems of Western literature—in Dante's *Divine Comedy*, in Milton's *Paradise Lost*, and in Goethe's *Faust*—angels and demons play leading roles. Their portrayal in these poems, rather than their appearances in the Bible or the theories about them developed by the theologians, dominates our imagination. In addition, it is in such poems as Milton's *Lycidas* that we are made aware of the mischievous and prankish fairies that represent vestigial traces of the demons or devils of the older pagan religions that Christianity long struggled to replace. And in Pope's charming *Rape of the Lock*, a whole panoply of minor but nonetheless spiritual figures watch over such things as the arrangement of tea tables and the ordering of wardrobes.

As the reader will find, the picture of the angels and demons given by the poets does not fully accord with the analysis of their nature and behavior by the theologians. For the poets, angels seem on the whole to be remarkably human—although, of course, more beautiful, powerful, wise. For the theologians, the angels are incorporeal substances, pure spirits or intelligences, having an amazing set of properties appropriate to such natures, by comparison with which man is at best a superior animal. Among the many things the reader will learn by examining the quotations

presented here from such works as the elaborate "Treatise on Angels" in the *Summa Theologica* of Thomas Aquinas, two in particular will correct widely prevalent misimpressions. One is that theologians were never in doubt about the number of angels able to occupy a single point in space, such as the head of a pin; the second is that the souls of the departed who join the community of saints are not transformed into angels, although they are "taken up into the angelic orders." A third point is not documented because no theologian ever doubted it: all angels are male.

■ ■ ■

- 1 Bless the Lord, ye his angels, that excel in strength, that do his commandments, hearkening unto the voice of his word.

Bless ye the Lord, all ye his hosts; ye ministers of his, that do his pleasure.

Psalms 103:20-21

- 2 So the prayers of them both were heard before the majesty of the great God. And Raphael was sent to heal them both, that is, to scale away the whiteness of Tobit's eyes, and to give Sara the daughter of Raguel for a wife to Tobias the son of Tobit.

Tobit 3:16-17

- 3 Surely I will keep close nothing from you. For I said, It was good to keep close the secret of a king, but that it was honorable to reveal the works of God. Now therefore, when thou didst pray, and Sara thy daughter-in-law, I did

bring the remembrance of your prayers before the Holy One: and when thou didst bury the dead, I was with thee likewise. And when thou didst not delay to rise up, and leave thy dinner, to go and cover the dead, thy good deed was not hid from me: but I was with thee. And now God hath sent me to heal thee and Sara thy daughter-in-law. I am Raphael, one of the seven holy angels, which present the prayers of the saints, and which go in and out before the glory of the Holy One.

Then they were both troubled, and fell upon their faces: for they feared. But he said unto them, Fear not, for it shall go well with you; praise God therefore. For not of any favor of mine, but by the will of our God I came; wherefore praise him for ever. All these days I did appear unto you; but I did neither eat nor drink, but ye did see a vision. Now therefore give God thanks: for I go up to him that sent me; but write all things which are done in a book. And when they arose, they saw him no more. Then they confessed the great and wonderful works of God, and how the angel of the Lord had appeared unto them.

Tobit 12:11-22

- 4 *Athenian Stranger*. There is a tradition of the happy life of mankind in days when all things were spontaneous and abundant. And of this the reason is said to have been as follows:—Cronos knew what we ourselves were declaring, that no human nature invested with supreme power is able to order human affairs and not overflow with insolence and wrong. Which reflection led him to appoint not men but demigods, who are of a higher and more divine race, to be the kings and rulers of our cities; he did as we do with flocks of sheep and other tame animals. For we do not appoint oxen to be the lords of oxen, or goats

of goats; but we ourselves are a superior race and rule over them. In like manner God, in his love of mankind, placed over us the demons, who are a superior race, and they with great ease and pleasure to themselves, and no less to us, taking care of us and giving us peace and reverence and order and justice never failing, made the tribes of men happy and united.

Plato, Laws, IV, 713A

5 Why do ye not understand my speech? even because ye cannot hear my word.

Ye are of your father the devil, and the lusts of your father ye will do. He was a murderer from the beginning, and abode not in the truth, because there is no truth in him. When he speaketh a lie, he speaketh of his own: for he is a liar, and the father of it.

And because I tell you the truth, ye believe me not.

Which of you convinceth me of sin? And if I say the truth, why do ye not believe me?

He that is of God heareth God's words: ye therefore hear them not, because ye are not of God.

John 8:43-47

6 Be sober, be vigilant; because your adversary the devil, as a roaring lion, walketh about, seeking whom he may devour.

1 Peter 5:8

7 And I beheld, and I heard the voice of many angels round about the throne and the beasts and the elders: and the number of them was ten thousand times ten thousand, and thousands of thousands.

Revelation 5:11

8 And there was war in heaven: Michael and his angels fought against the dragon; and the dragon fought and his angels,

And prevailed not; neither was their place found anymore in heaven.

And the great dragon was cast out, that old serpent, called the Devil, and Satan, which deceived! the whole world: he was cast out into the earth, and his angels were cast out with him.

Revelation 12:7-9

9 And I saw an angel come down from heaven, having the key of the bottomless pit and a great chain in his hand.

And he laid hold on the dragon, that old serpent, which is the Devil, and Satan, and bound him a thousand years.

And cast him into the bottomless pit, and shut him up, and set a seal upon him, that he should deceive the nations no more, till the thousand years should be fulfilled: and after that he must be loosed a little season....

And when the thousand years are expired, Satan shall be loosed out of his prison,

And shall go out to deceive the nations which are in the four quarters of the earth, Gog and Magog, to gather them together to battle: the number of whom is as the sand of the sea.

Revelation 20:1-8

10 No credence whatever is to be given to the opinion of Apuleius and the other philosophers of the same school,

namely, that the demons act as messengers and interpreters between the gods and men to carry our petitions from us to the gods, and to bring back to us the help of the gods. On the contrary, we must believe them to be spirits most eager to inflict harm, utterly alien from righteousness, swollen with pride, pale with envy, subtle in deceit; who dwell indeed in this air as in a prison, in keeping with their own character, because, cast down from the height of the higher heaven, they have been condemned to dwell in this element as the just reward of irretrievable transgression.

Augustine, City of God, VIII, 22

- 11 The demons... have knowledge without charity, and are thereby so inflated or proud that they crave those divine honours and religious services which they know to be due to the true God, and still, as far as they can, exact these from all over whom they have influence.

Augustine, City of God, IX, 20

- 12 The good angels... hold cheap all that knowledge of material and transitory things which the demons are so proud of possessing—not that they are ignorant of these things, but because the love of God, whereby they are sanctified, is very dear to them, and because, in comparison of that not merely immaterial but also unchangeable and ineffable beauty» with the holy love of which they are inflamed, they despise all things which are beneath it and all that is not it, that they may with every good thing that is in them enjoy that good which is the source of their goodness. And therefore they have a more certain knowledge even of those temporal and

mutable things, because they contemplate their principles and causes in the word of God, by which the world was made—those causes by which one thing is approved, another rejected, and all arranged. But the demons do not behold in the wisdom of God these eternal, and, as it were, cardinal causes of things temporal, but only foresee a larger part of the future than men do, by reason of their greater acquaintance with the signs which are hidden from us. Sometimes, too, it is their own intentions they predict. And, finally, the demons are frequently, the angels never, deceived. For it is one thing, by the aid of things temporal and changeable, to conjecture the changes that may occur in time, and to modify such things by one's own will and faculty—and this is to a certain extent permitted to the demons—it is another thing to foresee the changes of times in the eternal and immutable laws of God, which live in His wisdom, and to know the will of God, the most infallible and powerful of all causes, by participating in His spirit; and this is granted to the holy angels by a just discretion. And thus they are not only eternal, but blessed. And the good wherein they are blessed is God, by Whom they were created. For without end they enjoy the contemplation and participation of Him.

Augustine, City of God, IX, 22

- 13 What Catholic Christian does not know that no new devil will ever arise among the good angels, as he knows that this present devil will never again return into the fellowship of the good?

Augustine, City of God, XI, 13

14 Though in the order of nature angels rank above men, yet, by the scale of justice, good men are of greater value than bad angels.

Augustine, City of God, XI, 16

15 That certain angels sinned, and were thrust down to the lowest parts of this world, where they are, as it were, incarcerated till their final damnation in the day of judgment, the Apostle Peter very plainly declares, when he sa>'s that "God spared not the angels that sinned, but cast them down to hell, and delivered them into chains of darkness to be reserved into judgment." Who, then, can doubt that God, either in foreknowledge or in act, separated between these and the rest? And who will dispute that the rest are justly called "light"? For even we who are yet living by faith, hoping only and not yet enjoying equality with them, are already called "light" by the apostle: "For ye were sometimes darkness, but now are ye light in the Lord." But as for these apostate angels, all who understand or believe them to be worse than unbelieving men are well aware that they are called "darkness." Wherefore, though light and darkness are to be taken in their literal signification in these passages of Genesis in which it is said, "God said. Let there be light, and there was light," and "God divided the light from the darkness," yet, for our part, we understand these two societies of angels—the one enjoying God, the other swelling with pride; the one to whom it is said, "Praise ye Him, all His angels," the other whose prince says, "All these things will I give Thee if Thou wilt fall down and worship me"; the one blazing with the holy love of God, the other reeking with the unclean lust of self-advancement. And since, as it is written, "God resisteth

the proud, but giveth grace unto the humble," we may say, the one dwelling in the heaven of heavens, the other cast thence, and raging through the lower regions of the air; the one tranquil in the brightness of piety, the other tempest-tossed with beclouding desires; the one, at God's pleasure, tenderly succouring, justly avenging—the other, set on by its own pride, boiling with the lust of subduing and hurting; the one the minister of God's goodness to the utmost of their good pleasure, the other held in by God's power from doing the harm it would; the former laughing at the latter when it does good unwillingly by its persecutions, the latter envying the former when it gathers in its pilgrims. These two angelic communities, then, dissimilar and contrary to one another, the one both by nature good and by will upright, the other also good by nature but by will depraved, as they are exhibited in other and more explicit passages of holy writ, so I think they are spoken of in this book of Genesis under the names of "light" and "darkness".

Augustine, City of God, XI, 33

- 16 That the contrary propensities in good and bad angels have arisen, not from a difference in their nature and origin, since God, the good Author and Creator of all essences, created them both, but from a difference in their wills and desires, it is impossible to doubt. While some steadfastly continued in that which was the common good of all, namely, in God Himself, and in His eternity, truth, and love; others, being enamoured rather of their own power, as if they could be their own good, lapsed to this private good of their own, from that higher and beatific good which was common to all, and, bartering the lofty dignity of eternity for the inflation of

pride, the most assured verity for the slyness of vanity, uniting love for factious partisanship, they became proud, deceived, envious. The cause, therefore, of the blessedness of the good is adherence to God. And so the cause of the others' misery will be found in the contrary, that is, in their not adhering to God.

Augustine, City of God, XII, 1

- 17 Though we cannot call the devil a fornicator or drunkard, or ascribe to him any sensual indulgence (though he is the secret instigator and prompter of those who sin in these ways), yet he is exceedingly proud and envious. And this viciousness has so possessed him, that on account of it he is reserved in chains of darkness to everlasting punishment. Now these vices, which have dominion over the devil, the apostle attributes to the flesh, which certainly the devil has not. For he says "hatred, variance, emulations, strife, envying" are the works of the flesh; and of all these evils pride is the origin and head, and it rules in the devil though he has no flesh.

Augustine, City of God, XIV, 3

- 18 It is He Who, when He foreknew that man would in his turn sin by abandoning God and breaking His law, did not deprive him of the power of freewill, because He at the same time foresaw what good He Himself would bring out of the evil, and how from this mortal race, deservedly and justly condemned, He would by His grace collect, as now He does, a people so numerous, that He thus fills up and repairs the blank made by the fallen angels, and that thus that beloved and heavenly city is not defrauded of

the full number of its citizens, but perhaps may even rejoice in a still more overflowing population.

Augustine, City of God, XXII, 1

- 19 The angels of God are our angels, as Christ is God's and also ours. They are God's, because they have not abandoned Him; they are ours, because we are their fellow-citizens.

Augustine, City of God, XXII, 29

- 20 If every one to whom we ought to show, or who ought to show to us, the offices of mercy is by right called a neighbour, it is manifest that the command to love our neighbour embraces the holy angels also, seeing that so great offices of mercy have been performed by them on our behalf.

Augustine, Christian Doctrine, I, 30

- 21 Angels need an assumed body, not for themselves, but on our account, that by conversing familiarly with men they may give evidence of that intellectual companionship which men expect to have with them in the life to come. Moreover that angels assumed bodies under the Old Law was a figurative indication that the Word of God would take a human body, because all the apparitions in the Old Testament were ordered to that one whereby the Son of God appeared in the flesh.

Aquinas, Summa Theologica, I, 51, 2

- 22 There are not two angels in the same place. The reason of this is because it is impossible for two complete causes to be the causes immediately of one and the same thing.

This is evident in every genus of causes; for there is one proximate form of one thing, and there is one proximate mover, although there may be several remote movers. Nor can it be objected that several individuals may row a boat, since no one of them is a perfect mover, because no one man's strength is sufficient for moving the boat, while all together are as one mover, in so far as their united strengths all combine in producing the one movement. Hence, since the angel is said to be in one place by the fact that his power touches the place immediately by way of a perfect container... there can be but one angel in one place.

Aquinas, Summa Theologica, I, 52, 3

- 23 Men cannot know future things except in their causes, or by God's revelation. The angels know the future in the same way, but much more acutely.

Aquinas, Summa Theologica, I, 57, 3

- 24 Angels and intellectual souls are incorruptible by the very fact of their having a nature whereby they are capable of truth. But they did not possess this nature from eternity. It was bestowed upon them when God Himself willed it. Consequently it does not follow that the angels existed from eternity-

Aquinas, Summa Theologica, I, 61, 2

- 25 The demons do not delight in the obscenities of the sins of the flesh as if they themselves were disposed to carnal pleasures; it is wholly through envy that they take pleasure in all sorts of human sins, so far as these are hindrances to a man's good.

Aquinas, Summa Theologica, I, 63, 2

26 The demons know a truth in three ways: first of all by the subtlety of their nature; for although they are darkened by privation of the light of grace, yet they are enlightened by the light of their intellectual nature. Secondly, by revelation from the holy angels; for while not agreeing with them in conformity of will, they do agree, nevertheless, by their likeness of intellectual nature, according to which they can accept what is manifested by others. Thirdly, they know by long experience; not as deriving it from the senses, but when the likeness of their innate intelligible species is completed in individual things, they know some things as present, which they previously did not know would come to pass.

Aquinas, Summa Theologica, I, 64, 1

27 Both a good and a bad angel by their own natural power can move the human imagination. This may be explained as follows.... Corporeal nature obeys the angel as regards local movement, so that whatever can be caused by the local movement of bodies is subject to the natural power of the angels. Now- it is manifest that imaginative apparitions are sometimes caused in us by the local movement of animal spirits and humours. Hence Aristotle says, when assigning the cause of visions in dreams, that "when an animal sleeps, the blood descends in abundance to the sensitive principle, and movements descend with it"; that is, the impressions left from the movements of sensible things, which movements are preserved in the animal spirits, "and move the sensitive principle," so that a certain appearance ensues, as if the

sensitive principle were being then changed by the external objects themselves. Indeed, the disturbance of the spirits and humours may be so great that such appearances may even occur to those who are awake, as is seen in mad people, and the like. So, as this happens by a natural disturbance of the humours, and sometimes also by the will of man who voluntarily imagines what he previously experienced, so also the same may be done by the power of a good or a bad angel, sometimes with alienation from the bodily senses, sometimes without such alienation.

Aquinas, Summa Theologica, I, 111, 3

- 28 Each man has a guardian angel appointed to him. The reason for this is that the guardianship of angels belongs to the execution of Divine Providence concerning men. But God's providence acts differently as regards men and as regards other corruptible creatures, for they are related differently to incorruptibility. For men are not only incorruptible in the common species, but also in the proper forms of each individual, which are the rational souls, which cannot be said of other incorruptible things. Now it is manifest that the providence of God is chiefly exercised towards what remains for ever; but as regards things which pass away, the providence of God acts so as to order them to the things which are perpetual. Thus the providence of God is related to each man as it is to every genus or species of things corruptible. But, according to Gregory, "the different orders are assigned to the different genera of things, for instance the Powers to coerce the demons, the Virtues to work miracles in things corporeal." And it is probable that the different species are presided over by different angels of the same order.

Hence it is also reasonable to suppose that different angels are appointed to the guardianship of different men.

Aquinas, Summa Theologica, I, 113, 2

- 29 The wicked angels assail men in two ways. First, by instigating them to sin. And thus they are not sent by God to assail us, but are sometimes permitted to do so according to God's just judgments. But sometimes their assault is a punishment to man. And thus they are sent by God, as the lying spirit was sent to punish Achab, King of Israel.... For punishment is referred to God as its first author. Nevertheless the demons who are sent to punish, do so with an intention other than that for which they are sent; for they punish from hatred or envy, although they are sent by God on account of His justice.

Aquinas, Summa Theologica, I, 114, 1

- 30 The devil is the occasional and indirect cause of all our sins in so far as he induced the first man to sin, by reason of whose sin human nature is so infected that we are all prone to sin, even as the burning of wood might be imputed to the man who dried the wood so as to make it easily inflammable. He is not, however, the direct cause of all the sins of men, as though each were the result of his suggestion.

Aquinas, Summa Theologica, I-II, 80, 4

- 31 And now there came, upon the turbid waves, a crash of fearful sound, at which the shores both trembled;
a sound as of a wind, impetuous for the adverse heats, which smites the forest without any stay;

shatters off the boughs, beats down, and s\veeps away; dusty in front, it goes superb, and makes the wild beasts and the shepherds flee.

He loosed my eyes, and said; "Now turn thy nerve of vision on that ancient foam, there where the smoke is harshest."

As frogs, before their enemy the serpent, ran all asunder through the water, till each squats upon the bottom:

so i saw more than a thousand ruined spirits flee before one, who passed the Stygian ferry with soles unwet.

He waved that gross air from his countenance, often moving his left *hand* before *him*; and only of that trouble seemed he weary.

Well did I perceive that he was a Messenger of Heaven; and I turned to the Master [Virgil]; and he made a sign that I should stand quiet, and bow down to him.

Ah, how full he seemed to me of indignation! He reached the gate, and with a wand opened it: for there was no resistance.

"O outcasts of Heaven! race despised!" began he, upon the horrid threshold, "why dwells this insolence in you?

Why spurn ye at that Will, whose object never can be frustrated, and which often has increased your pain?

What profits it to butt against the Fates? Your Cerberus, if ye remember, still bears his chin and his throat peeled for doing so."

Then he returned by the filthy way, and spake no word to us; but looked like one whom other care urges and incites than that of those who stand before him.

Dante, Inferno, IX, 64

32 *Friar*. I heard once at Bologna many of the Devil's vices told; amongst which, I heard that he is a liar and the father of lies.

Dante, Inferno, XXIII, 142

33 The Emperor of the dolorous realm {Satan}, from mid breast stood forth out of the ice; and I m size am liker to a giant,

than the giants are to his arms: mark now how great that whole must be, which corresponds to such a part.

If he was once as beautiful as he is ugly now, and lifted up his brows against his Maker, well may all affliction come from him.

Oh how great a marvel seemed it to me, when I saw three faces on his head! The one in front, and it was fiery red;

the others were two, that were adjoined to this, above the very middle of each shoulder; and they were joined [at] his crest;

and the right seemed between white and yellow; the left was such to look on, as they who come from where the Nile [descends].

Under each there issued forth two mighty wings, of size befitting such a bird; sea-sails I never saw so broad.

No plumes had they; but were in form and texture like a bat's: and he was flapping them, so that three winds went forth from him

Thereby Cocytus all was frozen; with six eyes he wept, and down three chins gushed tears and bloody foam.

In every mouth he champ'd a sinner with his teeth, like a brake; so that he thus kept three of them in

torment.

To the one in front, the biting was nought, compared with the tearing: for at times the back of him remained quite stript of skin.

"That soul up there, which suffers greatest punishment," said the Master [Virgil], "is Judas Iscariot, *he* who has his head within, and outside plies his legs.

Of the other two, who have their heads beneath, that one, who hangs from the black visage is Brutus: see how he writhes himself, and utters not a word;

and the other is Cassius, who seems so stark of limb. But night is reascending; and now must we depart: for we have seen the whole."

Dante, Inferno, XXXIV, 28

34 [There are three hierarchies of angels and] each hierarchy has three orders, so that the Church holds and affirms nine orders of spiritual creatures. The first is that of the Angels, the second of the Arch-angels, the third of the Thrones; and these three orders make the first hierarchy; not first in order of nobility, nor in order of creation (for the others are more noble, and all were created at once), but first in the order of our ascent to their loftiness. Next come the Dominations, afterwards the Virtues, then the Principalities; and these make the second hierarchy. Above these are the Powers, and the Cherubim, and above all are the Seraphim; and these make the third hierarchy, And the number of the hierarchies and that of the orders constitutes a most potent system of their speculation. For inasmuch as the divine majesty is in three persons, which have one substance, they may be contemplated in three-fold manner. For the supreme power of the Father may be

contemplated; and this it is that the first hierarchy, to wit first in nobility and last in our enumeration, gazes upon; and the supreme wisdom of the Son may be contemplated; and this it is that the second hierarchy gazes upon; and the supreme and most burning love of the Holy Spirit may be contemplated; and this it is that the third hierarchy gazes upon: the which being nearest unto us gives us of the gifts which it receiveth. And inasmuch as each person of the divine Trinity may be considered in three-fold manner, there are in each hierarchy three orders diversely contemplating. The Father may be considered without respect to aught save himself; and this contemplation the Seraphim do use, who see more of the first cause than any other angelic nature. The Father may be considered according as he hath relation to the Son, to wit how he is parted from him and how united with him, and this do the Cherubim contemplate. The Father may further be considered according as from him proceeded! the Holy Spirit, and how he is parted from him and how united with him; and this contemplation the Powers do use. And in like fashion may there be speculation of the Son and of the Holy Spirit. Wherefore it behoves that there be nine manners of contemplating spirits to gaze upon the light which alone seeth itself completely. And here is a word which may not be passed in silence. I say that out of all these orders some certain were lost so soon as they were created, I take it to the number of a tenth part; for the restoration of which human nature was afterward created.

Dante, Convivio, II, 6

35 Death has been introduced into the world through the devil's envy, and on this account the devil is called the

author of death. For what else does Satan do than seduce from true religion, provoke sedition, cause wars, pestilence, etc., and bring about every evil?

Luther, Table Talk, 1379

36 The acknowledgment of angels is needful in the church. Therefore godly preachers should teach them logically. First, they should show what angels are, namely, spiritual creatures without bodies. Secondly, what manner of spirits they are, namely good spirits and not evil; and here evil spirits must also be spoken of, not created evil by God, but made so by their rebellion against God, and their consequent fall; this hatred began in Paradise, and will continue and remain against Christ and his church to the world's end. Thirdly, they must speak touching their function, which . . . is to present a mirror of humility to godly Christians, in that such pure and perfect creatures as the angels do minister unto us, poor and wretched people, in household and temporal policy, and in religion. They are our true and trusty servants, performing offices and works that one poor miserable mendicant would be ashamed to do for another. In this sort ought we to teach with care, method, and attention, touching the sweet and loving angels. Whoso speaks of them not in the order prescribed by logic, may speak of many irrelevant things, but little or nothing to edification.

The angels are near to us, to those creatures whom by God's command they are to preserve, to the end we receive no hurt of the devil, though, withal, they behold God's face, and stand before him. Therefore when the devil intends to hurt us, then the loving holy angels resist and drive him away; for the angels have long arms, and although they stand before the face and in the presence

of God and his son Christ, yet they are hard by and about us in those affairs, which by God we are commanded to take in hand. The devil is also near and about us, incessantly tracking our steps, in order to deprive us of our lives, our saving health, and salvation. But the holy angels defend us from him, insomuch that he is not able to work us such mischief as willingly he would.

Luther, Table Talk, H570-571

37 When Satan will not leave off tempting thee, then bear with patience, hold on hand and foot, nor faint, as if there would be no end thereof, but stand courageously, and attend God's leisure, knowing that what the devil cannot accomplish by his sudden and powerful assaults, he thinks to gain by craft, by persevering to vex and tempt thee, thereby to make thee faint and weary, as in the Psalm is noted: "Many a time have they afflicted me from my youth up; yet they have not prevailed against me," etc. But be fully assured, that in this sport with the devil, God, with all his holy angels, takes delight and joy; and assure thyself, also, that the end thereof will be blessed and happy, which thou shalt certainly find to thy everlasting comfort.

Luther, Table Talk, H660

38 We are frequently informed in the Scripture, that angels are celestial spirits, whose ministry and service God uses (or the execution of whatever he has decreed; and hence this name is given to them, because God employs them as messengers to manifest himself to men. Other appellations also, by which they are distinguished, are derived from a similar cause. They are called Hosts,

because, as life-guards, they surround their prince, aggrandizing his majesty, and rendering it conspicuous; and, like soldiers, are ever attentive to the signal of their leader; and are so prepared for the performance of his commands, that he has no sooner signified his will than they are ready for the work, or rather are actually engaged in it. Such a representation of the throne of God is exhibited in the magnificent descriptions of the Prophets, but particularly of Daniel; where he says, when God had ascended the Judgment-seat, that "thousand thousands ministered unto him, and ten thousand times ten thousand stood before him." Since by their means the Lord wonderfully exerts and declares the power and strength of his hand, thence they are denominated Powers. Because by them he exercises and administers his government in the world, therefore they are called sometimes Principalities, sometimes Powers, sometimes Dominions. Lastly, because the glory of God in some measure resides in them, they have also, for this reason, the appellation of Thrones; although on this last name I would affirm nothing, because a different interpretation is equally or even more suitable. But, omitting this name, the Holy Spirit often uses the former ones, to magnify the dignity of the angelic ministry. Nor, indeed, is it right that no honour should be paid to those instruments, by whom God particularly exhibits the presence of his power. Moreover, they are more than once called gods; because in their ministry, as in a mirror, they give us an imperfect representation of Divinity. Though I am pleased with the interpretation of the old writers, on those passages where the Scripture records the appearance of an angel of God to Abraham, Jacob, Moses, and others, that Christ was that angel, yet frequently, where mention is made of

angels in general, this name is given to them. Nor should this surprise us; for, if that honour be given to princes and governors, because, in the performance of their functions, they are vicegerents of God, the supreme King and Judge, there is far greater reason for its being paid to angels, in whom the splendour of the Divine glory is far more abundantly displayed.

Calvin, Institutes of the Christian Religion, I, 14

- 39 When Satan is called the god and prince of this world, the strong man armed, the prince of the power of the air, a roaring lion, these descriptions only tend to make us more cautious and vigilant, and better prepared to encounter him.

Calvin, Institutes of the Christian Religion, I, 14

- 40 Having been previously warned that we are perpetually threatened by an enemy, and an enemy desperately bold and extremely strong, skilled in every artifice, indefatigable in diligence and celerity, abundantly provided with all kinds of weapons, and most expert in the science of war, let us make it the grand object of our attention, that we suffer not ourselves to be oppressed with slothfulness and inactivity, but, on the contrary, arousing and collecting all our courage, be ready for a vigorous resistance; and as this warfare is terminated only by death, let us encourage ourselves to perseverance.

Calvin, Institutes of the Christian Religion, I, 14

- 41 They for us fight, they watch and dewly ward,
And their bright squadrons round about us plant;

And all for love, and nothing for reward;
O why should heavenly God to men have such regard?

Spenser, Faerie Queene, Bk. II, VIII, 2

42 *Puck*. I am that merry wanderer of the night.
I jest to Oberon and make him smile
When I a fat and bean-fed horse beguile,
Neighing in likeness of a filly foal:
And sometime lurk I in a gossip's bowl,
In very likeness of a roasted crab,
And when she drinks, against her lips I bob
And on her wither'd dewlap pour the ale.
The wisest aunt, telling the saddest tale,
Sometime for three-foot stool mistaketh me;
Then slip I from her bum, down topples she,
And "tailor" cries, and falls into a cough;
And then the whole quire hold their hips and laugh,
And waxen in their mirth and neeze and swear
A merrier hour was never wasted there.

Shakespeare, Midsummer-Night's Dream, II, i, 43

43 *Puck*. I'll put a girdle round about the earth In forty
minutes.

Shakespeare, Midsummer-Night's Dream, II, i, 175

44 *Titania*. Be kind and courteous to this gentleman;
Hop in his walks and gambol in his eyes;
Feed him with apricocks and dewberries,
With purple grapes, green figs, and mulberries;
The honey-bags steal from the humble-bees,
And for night-tapers crop their waxen thighs
And light them at the fiery glow-worm's eyes,

To have my love to bed and to arise;
And pluck the wings from painted butterflies
To fan the moonbeams from his sleeping eyes:
Nod to him, elves, and do him courtesies.

Shakespeare, Midsummer-Night's Dream, III, i, 167

45 *Antonio*. The devil can cite Scripture for his purpose.

Shakespeare, Merchant of Venice, I, iii, 99

46 *Marcellas*. Tis gone! [*Exit Ghost.*]

We do it wrong, being so majestic,
To offer it the show of violence;
For it is, as the air, invulnerable.
And our vain blows malicious mockery.

Bernardo. It was about to speak, when the cock crew.

Horatio. And then it started like a guilty thing
Upon a fearful summons. I have heard,
The cock, that is the trumpet to the morn,
Doth with his lofty and shrill-sounding throat
Awake the god of day; and, at his warning
Whether in sea or fire, in earth or air,
The extravagant and erring spirit hies
To his confine.

Shakespeare, Hamlet, I, i, 142

47 *Hamlet*. Angels and ministers of grace defend us!

Shakespeare, Hamlet, I, iv, 39

48 *Hamlet*. The devil hath power
To assume a pleasing shape.

Shakespeare, Hamlet, II, ii, 628

49 *Banquo*. And oftentimes, to win us to our harm,
The instruments of darkness tell us truths,
Win us with honest trifles, to betray's
In deepest consequence.

Shakespeare, Macbeth, I, iii, 123

50 *Malcolm*. Angels are bright still, though the brightest fell.

Shakespeare, Macbeth, IV, iii, 22

51 *Caliban*. All the infections that the sun sucks up
From bogs, fens, flats, on Prosper fall and make him
By inch-meal a disease! His spirits hear me
And yet I needs must curse. But they'll nor pinch,
Fright me with urchin-shows, pitch me i' the mire,
Nor lead me, like a firebrand, in the dark
Out of my way, unless he bid 'em; but
For every trifle are they set upon me;
Sometime like apes that mow and chatter at me
And after bite me, then like hedgehogs which
Lie tumbling in my barefoot way and mount
Their pricks at my footfall; sometime am I
All wound with adders who with cloven tongues
Do hiss me into madness.

Shakespeare, Tempest, II, ii, 1

52 *Prospero*. Yc elves of hills, brooks, standing lakes, and
groves,
And ye that on the sands with printless foot
Do chase the ebbing Neptune and do fly him
When he comes back; you demi-puppets that
By moonshine do the green sour ringlets make,
Whereof the ewe not bites, and you whose pastime

Is to make midnight mushrooms, that rejoice
To hear the solemn curfew; by whose aid,
Weak masters though ye be, I have bedimm'd
The noontide sun, call'd forth the mutinous winds,
And 'twixt the green sea and the azured vault
Set roaring war; to the dread rattling thunder
Have I given fire and rifted Jove's stout oak
With his own bolt; the strong-based promontory
Have I made shake and by the spurs pluck'd up
The pine and cedar; graves at my command
Have waked their sleepers, oped, and let 'em forth
By my so potent art. But this rough magic
I here abjure, and, when I have required
Some heavenly music, which even now I do,
To work mine end upon their senses that
This airy charm is for, I'll break my staff,
Bury it certain fathoms in the earth,
And deeper than did ever plummet sound
I'll drown my book.

Shakespeare, Tempest, V, i, 34

53 *Ariel*. Where the bee sucks, there suck I.
In a cowslip's bell I lie;
There I couch when owls do cry.
On the bat's back I do fly After summer merrily.
Merrily, Merrily shall I live now
Under the blossom that hangs on the bough.

Shakespeare, Tempest, V, i, 88

54 At the round earths imagin'd corners, blow
Your trumpets, Angels, and arise, arise

From death, you numberlesse infinities
Of soulcs.

Donne, Holy Sonnet VII

55 By the name of *angel* is signified, generally, a messenger; and most often a messenger of God: and by a messenger of God is signified anything that makes known His extraordinary presence; that is to say, the extraordinary manifestation of His power, especially by a dream or vision.

Hobbes, Leviathan, III, 34

56 The kingdom of darkness ... is nothing else but a confederacy of deceivers that, to obtain dominion over men in this present world, endeavour, by dark and erroneous doctrines, to extinguish in them the light, both of nature and of the gospel; and so to disprepare them for the kingdom of God to come.

Hobbes, Leviathan, IV, 44

57 Then to the Spicy Nut-brown Ale,
With stories told of many a feat,
How *Faery Mab* the junkets eat,
She was pincht, and pull'd she sed,
And he by Friars Lanthorn led
Tells how the drudging *Goblin* swet,
To ern his Cream-bowle duly set,
When in one night, ere glimps of morn.
His shadowy Flalc hath thresh'd the Corn
That ten day-labourers could not end.

Milton, L'Allegro, 100

58 There the companions of his fall, o'rewhelm'd
With Floods and Whirlwinds of tempestuous fire,
He soon discerns, and weltering by his side
One next himself in power, and next in crime,
Long after known in *Palestine*, and nam'd
Beelzebub. To whom th' Arch-Enemy,
And thence in Heav'n call'd Satan, with bold words
Breaking the horrid silence thus began.

If thou beest he; But O how fall'n! how chang'd
From him, who in the happy Realms of Light
Cloth'd with transcendent brightness didst outshine
Myriads though bright.

Milton, Paradise Lost, I, 76

59 So stretcht out huge in length the Arch-fiend lay
Chain'd on the burning Lake, nor ever thence
Had ris'n or heav'd his head, but that the will
And high permission of all-mling Heaven
Left him at large to his own dark designs,
That with reiterated crimes he might
Heap on himself damnation, while he sought
Evil to others, and enrag'd might see
How all his malice sens'd but to bring forth
Infinite goodness, grace and mercy shewn
On Man by him seduc't, but on himself
Treble confusion, wrath and vengeance pour'd.

Milton, Paradise Lost, I, 209

60 Spirits when they please
Can either Sex assume, or both; so soft
And uncompounded is their Essence pure,
Not ti'd or manacl'd with joynt or limb.

Nor founded on the brittle strength of bones,
Like cumbrous flesh; but in what shape they choose
Dilated or condens't, bright or obscure,
Can execute their aerie purposes,
And works of love or enmity fulfill.

Milton, Paradise Lost, 1, 423

61 Neither Man nor Angel can discern
Hypocrisie, the only evil that walks
Invisible, except to God alone,
By his permissive will, through Heav'n and Earth.

Milton, Paradise Lost, III, 682

62 *Adam*. Nor think, though men were none,
That heav'n would want spectators, God want praise;
Millions of spiritual Creatures walk the Earth
Unseen, both when we wake, and when we sleep:
All these with ceaseless praise his works behold
Both day and night.

Milton, Paradise Lost, IV, 675

63 Satan with his Powers
Farr was advanc't on winged speed, an Host
Innumerable as the Starrs of Night,
Or Starrs of Morning, Dew-drops, which the Sun
Impearls on every leaf and every' flouer.
Regions they pass'd, the mightie Regencies
Of Seraphim and Potentates and Thrones
In thir triple Degrees, Regions to which
All thy Dominion, *Adam*, is no more
Then what this Garden is to all the Earth,
And all the Sea, from one entire globose

Stretcht into Longitude; which having pass'd
At length into the limits of the North
They came, and *Satan* to his Royal seat
High on a Hill, far blazing, as a Mount
Rais'd on a Mount, with Pyramids and Towrs
From Diamond Quarries hew'n, & Rocks of Gold,
The Palace of great *Lucifer*, (so call
That Structure in the Dialect of men
Interpreted) which not long after, hee
Affecting all equality with God,
In imitation of that Mount whereon
Messiah was declar'd in sight of Heav'n,
The Mountain of the Congregation call'd;
For thither he assembl'd all his Train,
Pretending so commanded to consult
About the great reception of thir King,
Thither to come, and with calumnious Art
Of counterfeted truth thus held thir ears.

Thrones, Dominations, Princedomes, Vertues, Powers,
If these magnific Titles yet remain
Not meerly titular, since by Decree
Another now hath to himself ingross't
All Power, and us eclipst under the name
Of King anointed, for whom all this haste
Of midnight march, and hurried meeting here,
This onely to consult how we may best
With what may be devis'd of honours new
Receive him coming to receive from us
Knee-tribute yet unpaid, prostration vile,
Too much to one, but double how endur'd,
To one and to his image now proclaim'd?
But what if better counsels might erect
Our minds and teach us to cast off this Yoke?

Will ye submit your necks, and chuse to bend
The supple knee? ye will not, if I trust
To know ye right, or if ye know your selves
Natives and Sons of Heav'n possest before
By none, and if not equal all, yet free,
Equally free; for Orders and Degrees
Jarr not with liberty, but well consist.
Who can in reason then or right assume
Monarchic over such as live by right
His equals, if in power and splendor less,
In freedome equal? or can introduce
Law and Edict on us, who without law
Erre not, much less for this to be our Lord,
And look for adoration to th' abuse
Of those Imperial Titles which assert
Our being ordain'd to govern, not to serve?

Milton, Paradise Lost, V, 740

64 *Raphael*. The sword

Of Michael from the Armoric of God
Was giv'n him temperd so, that neither keen
Nor solid might resist that edge: it met
The sword of *Satan* with steep force to smite
Descending, and in half cut sheere, nor staid,
But with swift wheele reverse, deep entring shar'd
All his right side; then *Satan* first knew pain,
And writh'd him to and fro convolv'd; so sore
The griding sword with discontinuous wound
Pass'd through him, but th' Ethereal substance clos'd
Not long divisible, and from the gash
A stream of Nectarous humor issuing flow'd
Sanguin, such as Celestial Spirits may bleed.
And all his Armour staind ere while so bright.

Milton, Paradise Lost, VI, 320

65 *God*. Because thou hast done this, thou art accurst
Above all Cattel, each Beast of the Field;
Upon thy Belly groveling thou shalt goe,
And dust shalt eat all the days of thy Life.
Between Thee and the Woman I will put
Enmity, and between thine and her Seed;
Her Seed shall bruise thy head, thou shalt bruise his heel.

Milton, Paradise Lost, X, 175

66 It is not possible for man to sever the wheat from the
tares, the good fish from the other fry; that must be the
Angels' Ministry at the end of mortal things.

Milton, Areopagitica

67 Then *Apollyon* straddled quite over the whole breadth of
the way, and said, I am void of fear in this matter, prepare
thy self to die, for I swear by my Infernal Den, that thou
shalt go no further, here will I spill thy soul; and with that,
he threw a flaming Dart at his breast, but *Christian* had a
Shield in his hand, with which he caught it, and so
prevented the danger of that. Then did *Christian* draw, for
he saw 'twas time to bestir him; and *Apollyon* as fast
made at him, throwing Darts as thick as Hail; by the
which, notwithstanding all that *Christian* could do to
avoid it, *Apollyon* wounded him in his head, his hand and
foot; this made *Christian* give a little back; *Apollyon*
therefore followed his work again, and *Christian* again
took courage, and resisted as manfully as he could. This
sore combat lasted for above half a day, even till
Christian was almost quite spent. For you must know that

Christian by reason of his wounds, must needs grow weaker and weaker.

Then *Apollyon* espying his opportunity, began to gather up close to *Christian*, and wrestling with him, gave him a dreadful fall; and with that, *Christian's* Sword flew out of his hand. Then said *Apollyon*, *I am sure of thee now*; and with that, he had almost prest him to death, so that *Christian* began to despair of life. But as God would have it, while *Apollyon* was fetching of his last blow, thereby to make a full end of this good Man, *Christian* nimbly reached out his hand for his Sword, and caught it, saying, *Rejoice not against me, O mine Enemy! when I fall, I shall arise*; and with that, gave him a deadly thrust, which made him give back, as one that had received his mortal wound: *Christian* perceiving that, made at him again, saying. *Nay, in all these things we are more than Conquerors, through him that loved us*. And with that, *Apollyon* spread forth his Dragon's wings, and sped him away, that *Christian* saw him no more.

Bunyan, Pilgrim's Progress, I

68 It is not impossible to conceive, nor repugnant to reason, that there may be many species of spirits, as much separated and diversified one from another by distinct properties whereof we have no ideas, as the species of sensible things are distinguished one from another by qualities which we know and observe in them. That there should be more species of intelligent creatures above us, than there are of sensible and material below us, is probable to me from hence: that in all the visible corporeal world, we see no chasms or gaps.

Locke, Concerning Human Understanding, Bk. III, VI, 12

69 Some secret truths, from learned pride concealed,
To Maids alone and Children are revealed:
What though no credit doubting Wits may give?
The Fair and Innocent shall still believe.
Know, then, unnumbered Spirits round thee fly,
The light Militia of the lower sky:
These, though unseen, are ever on the wing,
Hang o'er the Box, and hover round the Ring.

Pope, The Rape of the Lock, I, 37

70 The Sprites of fiery Termagants in Flame
Mount up, and take a Salamander's name.
Soft yielding minds to Water glide away,
And sip, with Nymphs, their elemental Tea.
The graver Prude sinks downward to a Gnome,
In search of mischief still on Earth to roam.
The light Coquettes in Sylphs aloft repair.
And sport and flutter in the fields of Air.
Know further yet; whoever fair and chaste
Rejects mankind, is by some Sylph embraced:
For Spirits, freed from mortal laws, with ease
Assume what sexes and what shapes they please.
What guards the purity of melting Maids,
In courtly balls, and midnight masquerades,
Safe from the treach'rous friend, the daring spark,
The glance by day, the whisper in the dark,
When kind occasion prompts their warm desires.
When music softens, and when dancing fires?
'Tis but their Sylph, the wise Celestials know,
Though Honour is the word with Men below.

Pope, The Rape of the Lock, I, 59

71 But now secure the painted vessel glides,
The sun-beams trembling on the floating tides:
While melting music steals upon the sky,
And softened sounds along the waters die;
Smooth flow the waves, the Zephyrs gently play,
Belinda smiled, and all the world was gay.
All but the Sylph—with careful thoughts opprest,
Th' impending woe sat heavy on his breast.
He summons strait his Denizens of air;
The lucid squadrons round the sails repair:
Soft o'er the shrouds aerial whispers breathe,
That seemed but Zephyrs to the train beneath.
Some to the sun their insect-wings unfold,
Waft on the breeze, or sink in clouds of gold;
Transparent forms, too fine for mortal sight,
Their fluid bodies half dissolved in light,
Loose to the wind their airy garments flew,
Thin glitt'ring textures of the filmy dew,
Dipt in the richest tincture of the skies,
Where light disports in ever-mingling dyes,
While every beam new transient colours flings,
Colours that change whene'er they wave their wings.

Pope, The Rape of the Lock, II, 47

72 This day, black Omens threat the brightest Fair,
That e'er deserved a watchful spirit's care;
Some dire disaster, or by force, or slight;
But what, or where, the fates have wrapt in night.
Whether the nymph shall break Diana's law.
Or some frail China jar receive a flaw;
Or stain her honour or her new brocade;
Forget her prayers, or miss a masquerade;
Or lose her heart, or necklace, at a ball;

Or whether Heaven has doomed that Shock must fall.
Haste, then, ye spirits! to your charge repair:
The flutt'ring fan be Zephyretta's care;
The drops to thee, Brillante, we consign;
And, Momentilla, let the watch be thine;
Do thou, Crispissa, tend her fav'rite Lock;
Ariel himself shall be the guard of Shock.

To fifty chosen Sylphs, of special note.
We trust th' important charge, the Petticoat:
Oft have we known that seven-fold fence to fail,
Though stiff with hoops, and armed with ribs of whale;
Form a strong line about the silver bound,
And guard the wide circumference around.

Whatever spirit, careless of his charge,
His post neglects, or leaves the fair at large,
Shall feel sharp vengeance soon o'ertake his sins,
Be stopped in vials, or transfixed with pins;
Or plunged in lakes of bitter washes lie,
Or wedged whole ages in a bodkin's eye:
Gums and Pomatums shall his flight restrain,
While clogged he beats his silken wings in vain;
Or Alum styptics with contracting power
Shrink his thin essence like a rivelled flower:
Or, as Ixion fixed, the wretch shall feel
The giddy motion of the whirling Mill,
In fumes of burning Chocolate shall glow,
And tremble at the sea that froths below!

He spoke; the spirits from the sails descend;
Some, orb in orb, around the nymph extend;
Some thrid the mazy ringlets of her hair;
Some hang upon the pendants of her ear:
With beating hearts the dire event they wait,
Anxious, and trembling for the birth of Fate.

Pope, The Rape of the Lock, H, 101

73 I look upon the vulgar observation, "That the devil often deserts his friends, and leaves them in the lurch," to be a great abuse on that gentleman's character. Perhaps he may sometimes desert those who are only his cup acquaintance; or who, at most, are but half his; but he generally stands by those who are thoroughly his servants, and helps them off in all extremities, till their bargain expires.

Fielding, Tom Jones, XVIII, 5

74 I have always found that Angels have the vanity to speak of themselves as the only wise; this they do with a confident insolence sprouting from systematic reasoning.

Blake, Marriage of Heaven and Hell, 21

75 Of course, Satan has some kind of case, it goes without saying. It may be a poor one, but that is nothing; that can be said about any one of us.... We may not pay him reverence for that would be indiscreet; but we can at least respect his talents. A person who has for untold centuries maintained the imposing position of spiritual head of four fifths of the human race, and political head of the whole of it, must be granted the possession of executive abilities of the loftiest order. ... I would like to see him. I would rather see him and shake him by the tail than any other member of the European Concert.

Mark Twain, Concerning the Jews

20.8 Worship and Service

We understand the common expression "religious services" to stand for the program of prayers, chants, hymns, readings from scripture, confessions of faith and of sin, and sometimes sacraments and sermons that constitute the liturgy of worship engaged in communally by the members of a religious sect. But religious worship need not be communal, nor does the performance of other religious acts, such as prayer, confession, and thanksgiving.

The quotations included here cover the acts of piety and reverence in the pagan religions of antiquity as well as the forms of worship practiced in Judaism and Christianity. Prayer, veneration, and sacrifice are prominent in both traditions. But the notion of propitiating the deity by sacrifice and the veneration of his graven image, which play a large part in pagan worship, are either expunged from or are radically transformed in Judaism and Christianity. Passages taken from both the Old and the New Testament speak decisively on these points.

Prayer is, perhaps, the subject most frequently touched on in the quotations below. The purpose and the efficacy of prayer are discussed; and an interesting variety of actual prayers are presented. What the theologians have to say about prayer contrasts sharply with the non-theological approach to the subject, typified by Coleridge's remark that "He prayeth best, who loveth best/ All things both great and small."

■ ■ ■

- 1 And God blessed the seventh day, and sanctified it:
because that in it he had rested from all his work which

God created and made.

Gaiesis 2:3

2 Hear, O Israel: The Lord our God is one Lord:

And thou shalt love the Lord thy God with all thine heart, and with all thy soul, and with all thy might.

And these words, which I command thee this day, shall be in thine heart:

And thou shalt teach them diligently unto thy children, and shalt talk of them when thou sittest in thine house, and when thou walkest by the way, and when thou liest down, and when thou risest up.

And thou shalt bind them for a sign upon thine hand, and they shall be as frontlets between thine eyes.

And thou shalt write them upon the posts of thy house, and on thy gates.

Deuteronomy 6:4-9

3 And it was told king David, saying, The Lord hath blessed the house of Obed-edom, and all that pertaineth unto him, because of the ark of God. So David went and brought up the ark of God from the house of Obed-edom into the city of David with gladness.

And it was so, that when they that bare the ark of the Lord had gone six paces, he sacrificed oxen and fatlings.

And David danced before the Lord with all his might; and David was girded with a linen e-phod.

So David and all the house of Israel brought up the ark of the Lord with shouting, and with the sound of the trumpet.

And as the ark of the Lord came into the city of David, Mi-chal Saul's daughter looked through a window, and

saw king David leaping and dancing before the Lord; and she despised him in her heart- . . .

Then David returned to bless his household. And Michal the daughter of Saul came out to meet David, and said. How glorious was the king of Israel to day, who uncovered himself to day in the eyes of the handmaids of his servants, as one of the vain fellows shamelessly uncovered! himself I

And David said unto Michal, It was before the Lord, which chose me before thy father, and before all his house, to appoint me ruler over the people of the Lord, over Israel: therefore will I play before the Lord.

II Samuel 6:12-21

4 Give ear to my words, O Lord, consider my meditation.

Hearken unto the voice of my cry, my King, and my God: for unto thee will I pray.

My voice shalt thou hear in the morning, O Lord; in the morning will I direct my prayer unto thee, and will look up.

Psalms 5:1-3

5 Hear the right, O Lord, attend unto my cry, give ear unto my prayer, that goeth not out of feigned lips.

Let my sentence come forth from thy presence; let thine eyes behold the things that are equal.

Thou hast proved mine heart; thou hast visited me in the night; thou hast tried me, and shalt find nothing; I am purposed that my mouth shall not transgress.

Concerning the works of men, by the word of thy lips I have kept me from the paths of the destroyer.

Hold up my goings in thy paths, that my footsteps slip not.

I have called upon thee, for thou wilt hear me, O God: incline thine ear unto me, and hear my speech.

Shew thy marvellous loving-kindness, O thou that savest by thy right hand them which put their trust in thee from those that rise up against them.

Psalm 17:1-7

6 O sing unto the Lord a new song: sing unto the Lord, all the earth.

Sing unto the Lord, bless his name; shew forth his salvation from day to day.

Declare his glory among the heathen, his wonders among all people.

For the Lord is great, and greatly to be praised: he is to be feared above all gods.

For all the gods of the nations are idols: but the Lord made the heavens.

Honour and majesty are before him: strength and beauty are in his sanctuary.

Give unto the Lord, O ye kindreds of the people, give unto the Lord glory and strength.

Give unto the Lord the glory due unto his name: bring an offering, and come into his courts.

O worship the Lord in the beauty of holiness: fear before him, all the earth.

Say among the heathen that the Lord reigneth: the world also shall be established that it shall not be moved: he shall judge the people righteously.

Let the heavens rejoice, and let the earth be glad; let the sea roar, and the fulness thereof.

Let the field be joyful, and all that is therein: then
shall all the trees of the wood rejoice
Before the Lord.

Psalm 96:1-13

7 Make a joyful noise unto the Lord, all ye lands.

Serve the Lord with gladness: come before his
presence with singing.

Know ye that the Lord he is God: it is he that hath
made us, and not we ourselves; we are his people, and
the sheep of his pasture.

Enter into his gates with thanksgiving, and into his
courts with praise: be thankful unto him, and bless his
name.

For the Lord is good; his mercy is everlasting; and his
truth endureth to all generations.

Psalm 100:1-5

8 Out of the depths have I cried unto thee, O Lord.

Lord, hear my voice: let thine ears be attentive to the
voice of my supplications.

If thou, Lord, shouldest mark iniquities, O Lord, who
shall stand?

But there is forgiveness with thee, that thou mayest
be feared.

Psalm 130:1-4

9 To what purpose is the multitude of your sacrifices unto
me? saith the Lord: I am full of the burnt offerings of
rams, and the fat of fed beasts; and I delight not in the
blood of bullocks, or of lambs, or of he goats.

When ye come to appear before me, who hath required this at your hand, to tread my courts?

Bring no more vain oblations; incense is an abomination unto me; the new moons and sabbaths, the calling of assemblies, I cannot away with; it is iniquity, even the solemn meeting.

Your new moons and your appointed feasts my soul hateth: they are a trouble unto me; I am weary to bear them.

And when ye spread forth your hands, I will hide mine eyes from you: yea, when ye make many prayers, I will not hear; Your hands are full of blood.

Wash you, make you clean; put away the evil of your doings from before mine eyes; cease to do evil;

Learn to do well; seek judgment, relieve the oppressed, judge the fatherless, plead for the widow.

Isaiah 1:11-17

10 Wherewith shall I come before the Lord, and bow myself before the high God? shall I come before him with burnt offerings, with calves of a year old?

Will the Lord be pleased with thousands of rams, or with ten thousands of rivers of oil? shall I give my firstborn for my transgression, the fruit of my body for the sin of my soul?

He hath shewed thee, O man, what is good; and what doth the Lord require of thee, but to do justly, and to love mercy, and to walk humbly with thy God?

Micah 6:6-8

11 *Phoenix*. The very immortals can be moved; their virtue and honour and strength are greater than ours are,

and yet with sacrifices and offerings for endearment,
with libations and with savour men turn back even the
immortals
in supplication, when any man does wrong and
transgresses.

Homer, Iliad, IX, 497

- 12 Phoinix. There are... the spirits of Prayer, the daughters of
great Zeus,
and they are lame of their feet, and wrinkled, and cast
their eyes sidelong,
who toil on their way left far behind by the spirit of
Ruin:
but she. Ruin, is strong and sound on her feet, and
therefore
far outruns all Prayers, and wins into every country
to force men astray; and the Prayers follow as healers
after her.
If a man venerates these daughters of Zeus as they
draw near,
such a man they bring great advantage, and hear his
entreaty;
but if a man shall deny them, and stubbornly with a
harsh word
refuse, they go to Zeus, son of Kronos, in supplication
that Ruin may overtake this man, that he be hurt, and
punished.

Homer, Iliad, IX, 502

- 13 *Creon*. And still you dared to overstep these laws?
Antigone. For me it was not Zeus who made that order.
Nor did that Justice who lives with the gods below

mark out such law's to hold among mankind.
Nor did I think your orders were so strong
that you, a mortal man, could over-run
the gods' unwritten and unfailing laws.
Not now, nor yesterday's, they always live,
and no one knows their origin in time.
So not through fear of any man's proud spirit
would I be likely to neglect these laws,
draw on myself the gods' sure punishment.
I knew that I must die; how could I not?
even without your warning. If I die
before my time, I say it is a gain.
Who lives in sorrows many as are mine
how shall he not be glad to gain his death?
And so, for me to meet this fate, no grief.
But if I left that corpse, my mother's son,
dead and unburied I'd have cause to grieve
as now I grieve not.
And if you think my acts are foolishness
the foolishness may be in a fool's eye.

Sophocles, Antigone, 449

- 14 *Chorus*. Our happiness depends
on wisdom all the way.
The gods must have their due.
Great words by men of pride
bring greater blows upon them.
So wisdom comes to the old.

Sophocles, Antigone, 1347

- 15 *Heracles*. Keep holy in the sight of God.
All else our father Zeus thinks of less moment.

Holiness does not die with the men that die.
Whether they die or live, it cannot perish.

Sophocles, Philoctetes, 1441

16 *Ion*. I have a glorious task:
To set my hands to serve
Not a man but the immortals.
I will never weary
Over my pious tasks.

Euripides, Ion, 131

17 Chorus. Not by sounding lament
but only by prayer and reverent love
for the gods, my child, will you learn to live gentler days.

Euripides, Electra, 196

18 *Chorus*. —Uncontrollable, the unbeliever goes,
in spitting rage, rebellious and amok,
madly assaulting the mysteries of god,
profaning the rites of the mother of god.
Against the unassailable he runs, with rage
obsessed. Headlong he runs to death.
For death the gods exact, curbing by that bit
the mouths of men. They humble us with death
that we remember what we are who are not god,
but men. We run to death. Wherefore, I say,
accept, accept:
humility is wise; humility is blest.
But what the world calls wise I do not want.
Elsewhere the chase. I hunt another game,
those great, those manifest, those certain goals,
achieving which, our mortal lives are blest.

Let these things be the quarry of my chase:
purity; humility; an unrebelling soul,
accepting all. Let me go the customary way,
the timeless, honored, beaten path of those who walk
with reverence and awe beneath the sons of heaven.

Euripides, Bacchae, 996

- 19 *Socrates*. I mean to say that the holy has been
acknowledged by us to be loved of God because it is
holy, not to be holy because it is loved.

Euthyphro. Yes.

Soc. But that which is dear to the gods is dear to them
because it is loved by them, not loved by them because it
is dear to them.

Euth. True.

Soc. But, friend Euthyphro, if that which is holy is the
same with that which is dear to God, and is loved
because it is holy, then that which is dear to God would
have been loved as being dear to God; but if that which
is dear to God is dear to him because loved by him, then
that which is holy would have been holy because loved
by him. But now you see that the reverse is the case, and
that they are quite different from one another. For one is
of a kind to be loved because it is loved, and the other is
loved because it is of a kind to be loved. Thus you appear
to me, Euthyphro, when I ask you what is the essence of
holiness, to offer an attribute only, and not the essence—
the attribute of being loved by all the gods. But you still
refuse to explain to me the nature of holiness. And
therefore, if you please, I will ask you not to hide your
treasure, but to tell me once more what holiness or piety
really is, whether dear to the gods or not (for that is a

matter about which we will not quarrel); and what is impiety?

Euth. I really do not know, Socrates, how to express what I mean. For somehow or other our arguments, on whatever ground we rest them, seem to turn round and walk away from us,

Plato, Euthyphro, 10B

20 *Timaeus*. All men . . . who have any degree of right feeling, at the beginning of every enterprise, whether small or great, always call upon God. And we, too, who are going to discourse of the nature of the universe, how created or how existing without creation, if we be not altogether out of our wits, must invoke the aid of Gods and Goddesses and pray that our words may be acceptable to them and consistent with themselves.

Plato, Timaeus, 27B

21 *Athenian Stranger*. The prayer of a fool is full of danger, being likely to end in the opposite of what he desires.

Plato, Laws, III, 688A

22 *Athenian Stranger*. What life is agreeable to God, and becoming in his followers? One only, expressed once for all in the old saying that "like agrees with like, with measure measure," but things which have no measure agree neither with themselves nor with the things which have. Now God ought to be to us the measure of all things, and not man, as men commonly say: the words are far more true of him. And he who would be dear to God must, as far as is possible, be like him and such as he is. Wherefore the temperate man is the friend of God, for

he is like him; and the intemperate man is unlike him, and different from him, and unjust. And the same applies to other things; and this is the conclusion, which is also the noblest and truest of all sayings—that for the good man to offer sacrifice to the Gods, and hold converse with them by means of prayers and offerings and every kind of service, is the noblest and best of all things, and also the most conducive to a happy life, and very fit and meet. But with the bad man, the opposite of this is true: for the bad man has an impure soul, whereas the good is pure; and from one who is polluted, neither a good man nor God can without impropriety receive gifts. Wherefore the unholy do only waste their much service upon the Gods, but when offered by any holy man, such service is most acceptable to them. This is the mark at which we ought to aim. But what weapons shall we use, and how shall we direct them? In the first place, we affirm that next after the Olympian Gods and the Gods of the State, honour should be given to the Gods below; they should receive everything in even numbers, and of the second choice, and ill omen, while the odd numbers, and the first choice, and the things of lucky omen, are given to the Gods above, by him who would rightly hit the mark of piety. Next to these Gods, a wise man will do service to the demons or spirits, and then to the heroes, and after them will follow the private and ancestral Gods, who are worshipped as the law prescribes in the places which are sacred to them.

Plato, Laws, IV, 716B

- 23 No act is it of piety to be often seen with veiled head to turn to a stone and approach every altar and fall prostrate on the ground and spread out the palms before

the statues of the gods and sprinkle the altars with much blood of beasts and link vow on to vow, but rather to be able to look on all things with a mind at peace.

Lucretius, Nature of Things, V

24 *Cotta*. Piety is justice towards the gods. But if men and gods have nothing in common, how can any claims of justice exist between them? Holiness is the science of divine worship. But why should the gods be revered, if we have not received, nor expect to receive, any benefit from them?

Cicero, De Natura Deorum, I, 41

25 Be ye therefore perfect, even as your Father which is in heaven is perfect.

Matthew 5:48

26 And when thou prayest, thou shall not be as the hypocrites are: for they love to pray standing in the synagogues and in the comers of the streets, that they may be seen of men. Verily I say unto you, They have their reward.

But thou, when thou prayest, enter into thy closet, and when thou hast shut thy door, pray to thy Father which is in secret; and thy Father which seeth in secret shall reward thee openly.

But when ye pray, use not vain repetitions, as the heathen do: for they think that they shall be heard for their much speaking.

Be not ye therefore like unto them: for your Father knoweth what things ye have need of, before ye ask him.

After this manner therefore pray ye: Our Father which art in heaven, Hallowed be thy name.

Thy kingdom come. Thy will be done in earth, as it is in heaven.

Give us this day our daily bread.

And forgive us our debts, as we forgive our debtors.

And lead us not into temptation, but deliver us from evil: For thine is the kingdom, and the power, and the glory, for ever. Amen.

Matthew 6:5-13

27 He that loveth father or mother more than me is not worthy of me: and he that loveth son or daughter more than me is not worthy of me.

And he that taketh not his cross, and followeth after me, is not worthy of me.

He that findeth his life shall lose it: and he that loseth his life for my sake shall find it.

Matthew 10:37-39

28 A certain man had two sons; and he came to the first, and said, Son, go work to day in my vineyard.

He answered and said, I will not: but afterward he repented, and went.

And he came to the second, and said likewise. And he answered and said, I go, sir: and went not.

Whether of them twain did the will of his father? They say unto him. The first. Jesus saith unto them. Verily I say unto you. That the publicans and the harlots go into the kingdom of God before you.

Matthew 21:28-31

29 He said unto another, Follow me. But he said. Lord, suffer me first to go and bury my father.

Jesus said unto him. Let the dead bury their dead: but go thou and preach the kingdom of God.

And another also said, Lord, I will follow thee; but let me first go bid them farewell, which are at home at my house.

And Jesus said unto him, No man, having put his hand to the plough, and looking back, is fit for the kingdom of God.

Luke 9:59-62

30 And he spake this parable unto certain which trusted in themselves that they were righteous, and despised others:

Two men went up into the temple to pray; the one a Pharisee, and the other a publican.

The Pharisee stood and prayed thus with himself, God, I thank thee, that I am not as other men are, extortioners, unjust, adulterers, or even as this publican.

I fast twice in the week, I give tithes of all that I possess.

And the publican, standing afar off, would not lift up so much as his eyes unto heaven, but smote upon his breast, saying, God be merciful to me a sinner.

I tell you, this man went down to his house justified rather than the other.

Luke 18:9-14

31 A certain nobleman went into a far country to receive for himself a kingdom, and to return.

And he called his ten servants, and delivered them ten pounds, and said unto them, Occupy till I come.

But his citizens hated him, and sent a message after him, saying, We will not have this man to reign over us.

And it came to pass, that when he was returned, having received the kingdom, then he commanded these servants to be called unto him, to whom he had given the money, that he might know how much every man had gained by trading.

Then came the first, saying. Lord, thy pound hath gained ten pounds.

And he said unto him. Well, thou good servant: because thou hast been faithful in a very little, have thou authority over ten cities.

And the second came, saying, Lord, thy pound hath gained five pounds.

And he said likewise to him. Be thou also over five cities.

And another came, saying. Lord, behold, here is thy pound, which I have kept laid up in a napkin:

For I feared thee, because thou art an austere man: thou takest up that thou layedst not down, and reapest that thou didst not sow.

And he saith unto him, Out of thine own mouth will I judge thee, thou wicked servant. Thou knewest that I was an austere man, taking up that I laid not down, and reaping that I did not sow:

Wherefore then gavest not thou my money into the bank, that at my coming I might have required mine own with usury?

And he said unto them that stood by. Take from him the pound, and give it to him that hath ten pounds.

(And they said unto him, Lord, he hath ten pounds.)

For I say unto you. That unto every one which hath shall be given; and from him that hath not, even that he hath shall be taken away from him.

Luke 19:12-26

32 Whatsoever ye shall ask in my name, that will I do, that the Father may be glorified in the Son.

If ye shall ask any thing in my name, I will do it.

John 14:13-14

33 I beseech you therefore, brethren, by the mercies of God, that ye present your bodies a living sacrifice, holy, acceptable unto God, which is your reasonable service.

And be not conformed to this world: but be ye transformed by the renewing of your mind, that ye may prove what is that good, and acceptable, and perfect, will of God.

Romans 12:1-2

34 The fruit of the Spirit is love, joy, peace, long-suffering, gentleness, goodness, faith,

Meekness, temperance: against such there is no law.

And they that are Christ's have crucified the flesh with the affections and lusts.

If we live in the Spirit, let us also walk in the Spirit.

Galatians 5:22-25

35 Pray without ceasing.

1 Thessalonians 5:17

36 What doth it profit, my brethren, though a man say he hath faith, and have not works? can faith save him?

If a brother or sister be naked, and destitute of daily food,

And one of you say unto them. Depart in peace, be ye warmed and filled; notwithstanding ye give them not those things which are needful to the body; what doth it profit?

Even so faith, if it hath not works, is dead, being alone.

Yea, a man may say, Thou hast faith, and I have works: shew me thy faith without thy works, and I will shew thee my faith by my works.

Thou believest that there is one God; thou doest well: the devils also believe, and tremble.

But wilt thou know, O vain man, that faith without works is dead?

Was not Abraham our father justified by works, when he had offered Isaac his son upon the altar?

Seest thou how faith wrought with his works, and by works was faith made perfect?

And the scripture was fulfilled which saith, Abraham believed God, and it was imputed unto him for righteousness: and he was called the Friend of God.

Ye see then how that by works a man is justified, and not by faith only.

Likewise also was not Rahab the harlot justified by works, when she had received the messengers, and had sent them out another way?

For as the body without the spirit is dead, so faith without works is dead also.

James 2:14-26

37 When he had taken the book, the four beasts and four and twenty elders fell down before the Lamb, having

every one of them harps, and golden vials full of odours, which are the prayers of saints.

Revelation 5:8

38 Ought we not when we are digging and ploughing and eating to sing this hymn to God? "Great is God, who has given us such implements with which we shall cultivate the earth: great is God who has given us hands, the power of swallowing, a stomach, imperceptible growth, and the power of breathing while we sleep." This is what we ought to sing on every occasion, and to sing the greatest and most divine hymn for giving us the faculty of comprehending these things and using a proper way. Well then, since most of you have become blind, ought there not to be some man to fill this office, and on behalf of all to sing the hymn to God? For what else can I do, a lame old man, than sing hymns to God? If then I was a nightingale, I would do the part of a nightingale: if I were a swan, I would do like a swan. But now I am a rational creature, and I ought to praise God: this is my work; I do it, nor will I desert this post, so long as I am allowed to keep it; and I exhort you to join in this same song.

Epictetus, Discourses, I, 16

39 I say that we ought not to desire in every way what is not our own. And the sorrow of another is another's sorrow: but my sorrow is my own. I, then, will stop my own sorrow by every means, for it is in my power: and the sorrow of another I will endeavor to stop as far as I can; but I will not attempt to do it by every means; for if I do, I shall be fighting against God, I shall be opposing Zeus and shall be placing myself against him in the administration of

the universe; and the reward of this fighting against God and of this disobedience not only will the children of my children pay, but I also shall myself, both by day and by night, startled by dreams, perturbed, trembling at every piece of news, and having my tranquillity depending on the letters of others.

Epictetus, Discourses, III, 24

40 A prayer of the Athenians: Rain, rain, O dear Zeus, down on the ploughed fields of the Athenians and on the plains.—In truth we ought not to pray at all, or we ought to pray in this simple and noble fashion.

Marcus Aurelius, Meditations, V, 7

41 Live with the gods. And he does live with the gods who constantly shows to them that his own soul is satisfied with that which is assigned to him, and that it does all that the daemon wishes, which Zeus hath given to every man for his guardian and guide, a portion of himself. And this is every man's understanding and reason.

Marcus Aurelius, Meditations, V, 27

42 *Great art Thou, O Lord, and greatly to be praised; great is Thy power, and of Thy wisdom there is no number. And man desires to praise Thee. He is but a tiny part of all that Thou hast created. He bears about him his mortality, the evidence of his sinfulness, and the evidence that Thou dost resist the proud: yet this tiny part of all that Thou hast created desires to praise Thee.*

Thou dost so excite him that to praise Thee is his joy. For Thou hast made us for Thyself and our hearts are restless till they rest in Thee. Grant me, O Lord, to know

which is the soul's first movement toward Thee—to implore Thy aid or to utter its praise of Thee; and whether it must know Thee before it can implore. For it would seem clear that no one can call upon Thee without knowing Thee, for if he did he might invoke another than Thee, knowing Thee not. Yet may it be that a man must implore Thee before he can know Thee? But, *how shall they call on Him in Whom they have not believed? or how shall they believe without a preacher? And, they shall praise the Lord that seek Him;* for those that seek shall find; and finding Him they will praise Him. Let me seek Thee, Lord, by praying Thy aid, and let me utter my prayer believing in Thee: for Thou hast been preached to us. My faith, Lord, cries to Thee, the faith that Thou hast given me, that Thou hast inbreathed in me, through the humanity of Thy Son and by the ministry of Thy Preacher.

Augustine, Confessions, I, 1

43 Neither could the blessed immortals retain, nor we miserable mortals reach, a happy condition without worshipping the one God of gods, who is both theirs and ours.... For we are all His temple, each of us severally and all of us together, because He condescends to inhabit each individually and the whole harmonious body, being no greater in all than in each, since He is neither expanded nor divided. Our heart when it rises to Him is His altar; the priest who intercedes for us is His Only-begotten; we sacrifice to Him bleeding victims when we contend for His truth even unto blood; to Him we offer the sweetest incense when we come before Him burning with holy and pious love; to Him we devote and surrender ourselves and His gifts in us; to Him, by solemn feasts and on appointed days, we consecrate the memory of

His benefits, lest through the lapse of time ungrateful oblivion should steal upon us; to Him we offer on the altar of our heart the sacrifice of humility and praise, kindled by the fire of burning love. It is that we may see Him, so far as He can be seen; it is that we may cleave to Him that we are cleansed from all stain of sins and evil passions and are consecrated in His name. For He is the fountain of our happiness, He the end of all our desires. Being attached to Him, or rather let me say, re-attached—for we had detached ourselves and lost hold of Him—being, I say, re-attached to Him, we tend towards Him by love, that we may rest in Him, and find our blessedness by attaining that end.

Augustine, City of God, X, 3

- 44 There is... something in humility which, strangely enough, exalts the heart, and something in pride which debases it. This seems, indeed, to be contradictory, that loftiness should debase and lowliness exalt. But pious humility enables us to submit to what is above us; and nothing is more exalted above us than God; and therefore humility, by making us subject to God, exalts us. But pride, being a defect of nature, by the very act of refusing subjection and revolting from Him who is supreme, falls to a low condition.

Augustine, City of God, XIV, 13

- 45 It is a matter of no moment in the city of God whether he who adopts the faith that brings men to God adopts it in one dress and manner of life or another, so long only as he lives in conformity with the commandments of God.

Augustine, City of God, XIX, 19

46 We worship God by external sacrifices and gifts, not for His own profit, but for that of ourselves and our neighbour. For He does not need our sacrifices, but wishes them to be offered to Him in order to arouse our devotion and to profit our neighbour. Hence mercy, by which we supply others' defects is a sacrifice more acceptable to Him, as conducing more directly to our neighbour's well-being. ... *Do not forget to do good and to impart, for by such sacrifices God's favour is obtained.*

Aquinas, Summa Theologica, II-II, 30, 4

47 By the one same act man both serves and worships God, for worship regards the excellence of God, to Whom reverence is due; while service regards the subjection of man who, by his condition, is under an obligation of showing reverence to God. To these two belong all acts ascribed to religion, because, by them all, man bears witness to the Divine excellence and to his own subjection to God, either by offering something to God, or by assuming something Divine.

Aquinas, Summa Theologica, II-II, 81, 3

48 The worship of religion is paid to images, not as considered in themselves, nor as things, but as images leading us to God incarnate. Now movement to an image as image does not stop at the image, but goes on to the thing it represents.

Aquinas, Summa Theologica, II-II, 81, 3

49 We pay God honor and reverence, not for His sake (because He is of Himself full of glory to which no creature can add anything), but for our own sake,

because by the very fact that we revere and honor God, our mind is subjected to Him; wherein its perfection consists, since a thing is perfected by being subjected to its superior.

Aquinas, Summa Theologica, II-II, 81, 7

50 God bestows many things on us out of His liberality, even without our asking for them: but that He wishes to bestow certain things on us at our asking, is for the sake of our good, namely, that we may acquire confidence in having recourse to God, and that we may recognize in Him the Author of our goods.

Aquinas, Summa Theologica, II-II, 83, 2

51 The very fact that we wish to cling to God in a spiritual fellowship pertains to reverence for God: and consequently the act of any virtue assumes the character of a sacrifice through being done in order that we may cling to God in holy fellowship.

Aquinas, Summa Theologica, II-II, 85, 3

52 *The humbled souls.* O our Father who art in heaven, not circumscribed, but through the greater love thou hast for thy first works on high,

praised be thy name and thy worth by every creature, as 'tis meet to give thanks to thy sweet effluence.

May the peace of thy kingdom come upon us, for we cannot of ourselves attain to it with all our wit, if it come not.

As of their will thine angels make sacrifice to thee, singing *Hosanna*, so may men make of theirs.

Give us this day our daily manna, without which he backward goes through this rough desert, who most toileth to advance.

And as we forgive every one the evil we have suffered, do thou forgive in loving-kindness and regard not our desert.

Put not our virtue, which lightly is subdued, to trial with the old adversary, but deliver us from him who so pricks it.

This last prayer, dear Lord, is not made for us, for need is not, but for those who have remained behind us.

Dante, Purgatorio, XI, 1

53 *Bernard*. Virgin mother, daughter of thy son, lowly and uplifted more than any creature, fixed goal of the eternal counsel,

thou art she who didst human nature so ennoble that its own Maker scorned not to become its making.

In thy womb was lit again the love under whose warmth in the eternal peace this flower hath thus unfolded.

Here art thou unto us the meridian torch of love and there below with mortals art a living spring of hope.

Lady, thou art so great and hast such worth, that if there be who would have grace yet betaketh not himself to thee, his longing seeketh to fly without wings.

Thy kindliness not only succoureth whoso requesteth, but doth oftentimes freely forerun request.

In thee is tenderness, in thee is pity, in thee munificence, in thee united whatever in created being is of excellence.

Now he who from the deepest pool of the universe even to here hath seen the spiritlives one after one

imploreth thee, of grace, for so much power as to be
able to uplift his eyes more high towards final bliss;
and I, who never burned for my own vision more than I
do for his, proffer thee all my prayers, and pray they be
not scant,

that thou do scatter for him every cloud of his
mortality with prayers of thine, so that the joy supreme
may be unfolded to him.

And further do I pray thee, Queen who canst all that
thou wilt, that thou keep sound for him, after so great a
vision, his affections.

Let thy protection vanquish human ferments; see
Beatrice, with how many Saints, for my prayers folding
hands.

Dante, Paradiso, XXXIII, 1

54 That first he wrought and afterwards he taught;
Out of the gospel then that text he caught,
And this figure he added thereunto—
That, if gold rust, what shall poor iron do?
For if the priest be foul, in whom we trust,
What wonder if a layman yield to lust?
And shame it is, if priest take thought for keep,
A shitty shepherd, shepherding clean sheep.
Well ought a priest example good to give,
By his own cleanness, how his flock should live.

Chaucer, Canterbury Tales: The Prologue

55 The most acceptable service we can do and show unto
God, and which alone he desires of us, is, that he be
praised of us.

Luther, Table Talk, H99

56 To serve Christ ... is not to put on a hood or to be preoccupied with Mosaic ceremonies. But it is rather an entirely spiritual thing, not in the way in which the monks speak of something being spiritual which takes place only in the heart. But it is a spiritual service which originates with the Spirit. For whoever speaks the words of the Spirit is rightly said to preach, teach, and speak spiritually. Thus one is also said to live spiritually who is busy with holy deeds, that is, who does what is prescribed in the Ten Commandments. So the head of a household lives spiritually when he governs his own home through faith in the Son of God. Truly, spiritual obedience is to do through faith in the Son of God what you are ordered to do by God's command. There you have what it means to serve this King. It is not to enter a monastery, as the monks are wont to do, nor to choose these deeds or those, but to behold this King, to listen to Him, and afterwards to do what you have heard.

Luther, Commentary on Psalm 2

57 I may be wrong, I don't know; but since by a particular favor of divine goodness a certain form of prayer has been prescribed and dictated to us word for word by the mouth of God, it has always seemed to me that its use should be more ordinary with us than it is. And if I had my way, on sitting down to table and rising from it, on getting up and going to bed, and on all particular actions with which we are accustomed to associate prayers, I should like it to be the Lord's Prayer that Christians employ, if not exclusively, at least always. The Church may extend and diversify prayers according to the need of our instruction, for well I know that it is always the same substance and the same thing. But we ought to

have given that one this privilege, that the people should have it continually in their mouths; for it is certain that it says all that is necessary and that it is very proper for all occasions....

I was just now thinking about where that error of ours comes from, of having recourse to God in all our designs and enterprises, and calling on him in every kind of need and in whatever spot our weakness wants help, without considering whether the occasion is just or unjust, and invoking his name and his power, in whatever condition or action we are involved, however vicious it may be.

He is indeed our sole and unique protector, and can do anything to help us; but although he deigns to honor us with that sweet fatherly relationship, nevertheless he is as just as he is good and as he is powerful. But he exercises his justice much more often than his power, and favors us according to its dictates, not according to our requests.

Montaigne, Essays, I, 56, Of Prayers

58 The first law that God ever gave to man was a law of pure obedience; it was a naked and simple commandment about which man had nothing to know or discuss; since to obey is the principal function of a reasonable soul, recognizing a heavenly superior and benefactor. From obeying and yielding spring all other virtues, as from presumption all sin.

Montaigne, Essays, II, 12, Apology for Raymond Sebond

59 It now remains that at last, with my eyes and hands removed from the tablet of demonstrations and lifted up towards the heavens, I should pray, devout and

supplicating, to the Father of lights: O Thou Who dost by the light of nature promote in us the desire for the light of grace, that by its means Thou mayest transport us into the light of glory, I give thanks to Thee, O Lord Creator, Who hast delighted me with Thy makings and in the works of Thy hands have I exulted. Behold I now, I have completed the work of my profession, having employed as much power of mind as Thou didst give to me; to the men who are going to read those demonstrations I have made manifest the glory of Thy works, as much of its infinity as the narrows of my intellect could apprehend. My mind has been given over to philosophizing most correctly: if there is anything unworthy of Thy designs brought forth by me—a worm born and nourished in a wallowing place of sins—breathe into me also that which Thou dost wish men to know, that I may make the correction: If I have been allured into rashness by the wonderful beauty of Thy works, or if I have loved my own glory among men, while I am advancing in the work destined for Thy glory, be gentle and merciful and pardon me; and finally deign graciously to effect that these demonstrations give way to Thy glory and the salvation of souls and nowhere be an obstacle to that.

Kepler, Harmonies of the Worlds V, 9

60 *King*. O, my offence is rank, it smells to heaven;
It hath the primal eldest curse upon't,
A brother's murder. Pray can I not,
Though inclination be as sharp as will.
My stronger guilt defeats my strong intent;
And, like a man to double business bound,
I stand in pause where I shall first begin,
And both neglect. What if this cursed hand

Were thicker than itself with brother's blood,
Is there not rain enough in the sweet heavens
To wash it white as snow? Whereto serves mercy
But to confront the visage of offence?
And what's in prayer but this two-fold force,
To be forestalled ere we come to fall,
Or pardon'd being down? Then I'll look up;
My fault is past. But, O, what form of prayer
Can serve my turn? "Forgive me my foul murder"?
That cannot be; since I am still possess'd
Of those effects for which I did the murder,
My crown, mine own ambition, and my queen.
May one be pardon'd and retain the offence?
In the corrupted currents of this world
Offence's gilded hand may shove by justice,
And oft 'tis seen the wicked prize itself
Buys out the law: but 'tis not so above;
There is no shuffling, there the action lies
In his true nature; and we ourselves compell'd,
Even to the teeth and forehead of our faults,
To give in evidence. What then? what rests?
Try what repentance can. What can it not?
Yet what can it when one can not repent?
O wretched state! O bosom black as death!
O limed soul, that, struggling to be free,
Art more engaged! Help, angels! Make assay!
Bow, stubborn knees; and, heart with strings of steel,
Be soft as sinews of the new-born babe!
All may be well....
My words fly up, my thoughts remain below.

Shakespeare, Hamlet, III, iii, 36

61 As the wandring Knight and Squire went discoursing of this and other Matters, they had not rode much more than a League, ere they espy'd about a dozen Men, who look'd like Country-Fellows sitting at their Victuals, with their Cloaks under them, on the green Grass, in the middle of a Meadow. Near 'em they saw several white Clothes or Sheets spread out and laid close to one another, that seem'd to cover something. Don Quixote rode up to the People, and after he had civilly saluted 'em, ask'd what they had got under that Linen? Sir, answer'd one of the Company, they are some carv'd Images that are to be set up at an Altar we are erecting in our Town. We cover 'em, lest they should be sullied, and carry 'em on our Shoulders for fear they should be broken. If you please, said Don *Quixote*, I should be glad to see 'em; for considering the Care you take of 'em, they should be Pieces of Value. Ay, marry are they, quoth another, or else we're damnably cheated; for there's ne'er an Image among 'em that does not stand us in more than fifty Ducats; and, that you may know I'm no Liar, do but stay, and you shall see with your own Eyes. With that, getting up on his Legs, and leaving his Victuals, he went and took off the Cover from one of the Figures, that happen'd to be St *George* on Horseback, and under his Feet a Serpent coil'd up, his Throat transfix'd with a Lance, with the Fierceness that is commonly represented in the Piece; and all, as they use to say, spick and span-new, and shining like beaten Gold. Don *Quixote* having seen the Image, This, said he, was one of the best Knights-Errant the Divine Warfare or Church-Militant ever had: His Name was Don St *George*, and he was an extraordinary Protector of Damsels. What's the next? The Fellow having uncover'd it, it proved to be St *Martin* on

Horseback. This Knight too, said Don *Quixote* at the first sight, was one of the Christian Adventurers, and I am apt to think he was more liberal than valiant; and thou may'st perceive it, *Sancho*, by his dividing his Cloak, with a poor Man; he gave him half, and doubtless 'twas Winter time, or else he would have giv'n it him whole, he was so charitable. Not so neither, I fancy, quoth *Sancho*, but I guess he stuck to the Proverb: *To Give and Keep what's fit*. Requires a Share of Wit. Don *Quixote* smil'd, and desir'd the Men to shew him the next Image; which appear'd to be that of the Patron of *Spain* a Horse-back, with his Sword bloody, trampling down *Moors*, and treading over Heads. Ay, this is a Knight indeed, (cry'd Don *Quixote*, when he saw it) one of those that fought in the Squadrons of the Saviour of the World: He is call'd Don *Sant-Jago*, *Meta Mores*, or Don *St James the Moor-killer*, and may be reckon'd one of the most valorous Saints and Professors of Chivalry that the Earth then enjoy'd, and Heaven now possesses. Then they uncover'd another Piece, which shew'd *St Paul* falling from his Horse, with all the Circumstances usually express'd in the Story of his Conversion, and represented so to the Life, that he look'd as if he had been answering the Voice that spoke to him from Heaven. This, said Don *Quixote*, was the greatest Enemy the Church Militant had once, and prov'd afterwards the greatest Defender it will ever have. In his Life a true Knight-Errant, and in Death a stedfast Saint; an indefatigable Labourer in the Vineyard of the Lord, a Teacher of the *Gentiles*, who had Heaven for his School, and Christ himself for his Master and Instructor. Then Don *Quixote* perceiving there were no more Images, desir'd the Men to cover those he had seen: And now, my good Friends, said he to 'em, I cannot but esteem the

Sight that I have had of these Images as a happy Omen; for these Saints and Knights were of the same Profession that I follow, which is that of Arms: The Difference only lies in this Point, that They were Saints, and fought according to the Rules of holy Discipline; and I am a Sinner, and fight after the manner of Men. They conquer'd Heaven by Force, for Heaven is taken by Violence; but I, alas, cannot yet tell what I gain by the Force of my Labours! Yet were my *Dulcinea del Toboso* but free from her Troubles, by a happy Change in my Fortune, and an Improvement in my Understanding, I might perhaps take a better Course than I do. Heaven grant it, quoth *Sancho*, and let the Devil do his worst.

Cervantes, Don Quixote, II, 58

62 The end of worship amongst men is power. For where a man seeth another worshipped, he supposeth him powerful, and is the readier to obey him; which makes his power greater. But God has no ends: the worship we do him proceeds from our duty and is directed according to our capacity by those rules of honour that reason dictateth to be done by the weak to the more potent men, in hope of benefit, for fear of damage, or in thankfulness for good already received from them.

Hobbes, Leviathan, II, 31

63 The obedience required at our hands by God, that accepteth in all our actions the will for the deed, is a serious endeavour to obey Him; and is called also by all such names as signify that endeavour. And therefore obedience is sometimes called by the names of *charity* and *love*, because they imply a will to obey; and our

Saviour himself maketh our love to God, and to one another, a fulfilling of the whole law; and sometimes by the name of *righteousness*, for righteousness is but the will to give to every one his own, that is to say, the will to obey the laws; and sometimes by the name of *repentance*, because to repent implieth a turning away from sin, which is the same with the return of the will to obedience. Whosoever therefore unfeignedly desireth to fulfil the commandments of God, or repenteth him truly of his transgressions, or that loveth God with all his heart, and his neighbour as himself, hath all the obedience necessary to his reception into the kingdom of God: for if God should require perfect innocence, there could no flesh be saved.

Hobbes, Leviathan, III, 43

64 A man must renounce piety altogether, if he does not at least wish to die like a Christian.

Pascal, Pensées, II, 63

65 Experience makes us see an enormous difference between piety and goodness,

Pascal, Pensées, VII, 496

66 There is nothing so perilous as what pleases God and man. For those states, which please God and man, have one property which pleases God, and another which pleases men; as the greatness of Saint Teresa. What pleased God was her deep humility in the midst of her revelations; what pleased men was her light. And so we torment ourselves to imitate her discourses, thinking to

imitate her conditions, and not so much to love what God loves and to put ourselves in the state which God loves.

It is better not to fast, and be thereby humbled, than to fast and be self-satisfied therewith.

Pascal, Pensées, VII, 499

67 When I consider how my light is spent,
E're half my day's, in this dark world and wide.
And that one Talent which is death to hide,
Lodg'd with me useless, though my Soul more bent
To serve therewith my Maker, and present
My true account, least he returning chide,
Doth God exact day-labour, light deny'd,
I fondly ask; But patience to prev'ent
That murmur, soon replies, God doth not need
Either man's work or his own gifts, who best
Bear his milde yoke, they serve him best, his State
Is Kingly. Thousands at his bidding speed
And post o're Land and Ocean without rest:
They also serve who only stand and waite.

Milton, When I consider how my light is spent

68 *Adam.* Henceforth I leame, that to obey is best,
And love with feare the onely God, to walk
As in his presence, ever to observe
His providence, and on him sole depend,
Merciful over all his works, with good
Still overcoming evil, and by small
Accomplishing great things, by things deemd weak
Subverting worldly strong, and worldly wise
By simply meek; that suffering for Truths sake
Is fortitude to highest victorie,

And to the faithful Death the Gate of Life;
Taught this by his example whom I now
Acknowledge my Redeemer ever blest.

Milton, Paradise Lost, XII, 561

69 The desire of doing well which is born in us, because we live according to the guidance of reason, I call *Piety*.

Spinoza, Ethics, IV, Prop. 37, Schol. 1

70 There is a false appearance of piety and religion in dejection; and although dejection is the opposite of pride, the humble dejected man is very near akin to the proud.

Spinoza, Ethics, IV, Appendix XXII

71 *Good Will*. We make no objections against any, notwithstanding all that they have done before they come hither, they in no wise are cast out, and therefore, good *Christian*, come a little way with me, and I will teach thee about the way thou must go. Look before thee; dost thou see this narrow way? THAT is the way thou must go. It was cast up by the Patriarchs, Prophets, Christ, and his Apostles; and it is as straight as a Rule can make it: This is the way thou must go.

But said *Christian*, *Is there no turnings nor windings by which a Stranger may lose the way?*

Good Will. Yes, there are many ways *butt* down upon this; and they are crooked, and wide: But thus thou may'st distinguish the right from the wrong, *That* only being straight and narrow.

Bunyan, Pilgrim's Progress, I

72 He that worships God does it with design to please Him and procure His favour. But that cannot be done by him who, upon the command of another, offers unto God that which he knows will be displeasing to Him, because not commanded by Himself. This is not to please God, or appease his wrath, but willingly and knowingly to provoke Him by a manifest contempt, which is a thing absolutely repugnant to the nature and end of worship.

Locke, Letter Concerning Toleration

73 When external worship is attended with great magnificence, it flatters our minds and strongly attaches us to religion. The riches of temples and those of the clergy greatly affect us. Thus even the misery of the people is a motive that renders them fond of a religion which has served as a pretext to those who were the cause of their misery.

Montesquieu, Spirit of Laws, XXV, 2

74 Almost all civilised nations dwell in houses; hence naturally arose the idea of building a house for God in which they might adore and seek him, amidst all their hopes and fears.

Montesquieu, Spirit of Laws, XXV, 3

75 The great art... of piety, and the end for which all religious rites seem to be instituted, is the perpetual renovation of the motives to virtue by a voluntary employment of our mind in the contemplation of its excellence, its importance, and its necessity, which, in proportion as they are more frequently and more willingly revolved, gain a more forcible and permanent influence

till in time they become the reigning ideas and standing principles of action and the test by which everything proposed to the judgment is rejected or approved.

Johnson, Rambler No. 7

76 In religion, as a rule, prostration, adoration with bowed head, coupled with contrite, timorous posture and voice, seems to be the only becoming demeanour in presence of the Godhead, and accordingly most nations have assumed and still observe it. Yet this cast of mind is far from being intrinsically and necessarily involved in the idea of the sublimity of a religion and of its object. The man that is actually in a state of fear, finding in himself good reason to be so, because he is conscious of offending with his evil disposition against a might directed by a will at once irresistible and just, is far from being in the frame of mind for admiring divine greatness, for which a temper of calm reflection and a quite free judgement are required. Only when he becomes conscious of having a disposition that is upright and acceptable to God, do those operations of might serve to stir within him the idea of the sublimity of this Being, so far as he recognizes the existence in himself of a sublimity of disposition consonant with His will, and is thus raised above the dread of such operations of nature, in which he no longer sees God pouring forth the vials of the wrath.

Kant, Critique of Aesthetic Judgement, 28

77 For Mercy has a human heart,
Pity a human face,
And Love, the human form divine,

And Peace, the human dress.

Then every man, of every clime,
That prays in his distress,
Prays to the human form divine,
Love, Mercy, Pity, Peace.

Blake, The Divine Image

78 *Gretchen*. Oh, bend Thou,
Mother of Sorrows; send Thou
A look of pity on my pain.

Thine heart's blood welling
With pangs past telling,
Thou gazest where Thy Son hangs slain.

Thou, heavenward gazing,
Art deep sighs raising
On high for His and for Thy pain.

Who feeleth
How reeleth

This pain in every bone?
All that makes my poor heart shiver,
Why it yearneth and doth quiver,
Thou dost know and Thou alone!

Wherever I am going,
How woe, woe, woe is growing,
Ah, how my bosom aches!
When lonely watch Tm keeping,
Tm weeping, weeping, weeping.

My heart within me breaks.

The plants before my window
I wet with tears—ah, me!—
As in the early morning
I plucked these flowers for Thee.

Ah, let my room but borrow
The early sunlight red,
I sit in all my sorrow
Already on my bed.

Help! rescue me from death and stain!
Oh, bend Thou,
Mother of Sorrows; send Thou
A look of pity on my pain!

Goethe. Faust, I, 3587

79 He prayeth best, who loveth best
All things both great and small;
For the dear God who loveth us,
He made and loveth all.

Coleridge, The Rime of the Ancient Mariner, 614

80 It is said of James, the head of the community in Jerusalem, that the skin of his knees was as hard as a camel's from constantly praying, and that he could pray for days together. To our age that may seem laughable; but one should remember what eloquence and fullness of heart is implied by being able to pray for so long without growing tired, particularly as we have difficulty enough in making a truly heartfelt prayer.

Kierkegaard, Journals (Oct. 1, 1838)

81 The immediate person thinks and imagines that when he prays, the important thing, the thing he must concentrate upon, is that *God should hear* what HE *is praying for*. And yet in the true, eternal sense it is just the reverse: the true relation in prayer is not when God hears what is prayed for, but when *the person praying* continues to pray until he is *the one who hears*, who hears what God wills. The immediate person, therefore, uses many words and, therefore, makes demands in his prayer; the true man of prayer only attends.

Kierkegaard, Journals (1846)

82 *Arthur*. 'The old order changeth, yielding place to new,
And God fulfils himself in many ways.
Lest one good custom should corrupt the world.
Comfort thyself: what comfort is in me?
I have lived my life, and that which I have done
May He within himself make pure! but thou,
If thou shouldst never see my face again,
Pray for my soul. More things are wrought by prayer
Than this world dreams of. Wherefore, let thy voice
Rise like a fountain for me night and day.
For what are men better than sheep or goats
That nourish a blind life within the brain,
If, knowing God, they lift not hands of prayer
Both for themselves and those who call them friend?
For so the whole round earth is every way
Bound by gold chains about the feet of God.'

Tennyson, Morte d'Arthur, 291

83 Oh, thou big while God aloft there somewhere in yon darkness, have mercy on this small black boy down here; preserve him from all men that have no bowels to feel fear!

Melville, Moby Dick, XL

84 Early in the morning—about six—Mr. Bulstrode rose and spent some time in prayer. Does any one suppose that private prayer is necessarily candid—necessarily goes to the roots of action? Private prayer is inaudible speech, and speech is representative: who can represent himself just as he is, even in his own reflections?

George Eliot, Middlemarch, VII, 70

85 *Father Zossima*. Young man, be not forgetful of prayer. Every time you pray, if your prayer is sincere, there will be new feeling and new meaning in it, which will give you fresh courage, and you will understand that prayer is an education.

Dostoevsky, Brothers Karamazov, Pt. II, 3

86 We hear, in these days of scientific enlightenment, a great deal of discussion about the efficacy of prayer; and many reasons are given us why we should not pray, whilst others are given us why we should. But in all this very little is said of the reason why we *do* pray, which is simply that we cannot *help* praying. It seems probable that, in spite of all that "science" may do to the contrary, men will continue to pray to the end of time, unless their mental nature changes in a manner which nothing we know should lead us to expect. The impulse to pray a necessary consequence of the fact that whilst the

innermost of the empirical selves of a man is a Self of the *social* sort, it yet can find its only adequate *Socius* in an ideal world.

William James, Psychology, X

20.9 Heresy and Unbelief

The quotations included in this section divide into two main groups, one dealing with orthodoxy and heresy, the other with that form of unbelief which undermines religion—atheism.

The epithet “atheist” or “infidel” is applied by the members of a religious community to those who deny or do not acknowledge the existence of the divinity worshiped in that community. Thus, for example, Spinoza was anathematized as an atheist by the Jewish community because his affirmation of God, heartfelt and impassioned as it was, involved the denial of the God of Abraham, Isaac, and Jacob. The heretic, in contrast, differs from other members of the religious community to which he belongs by advancing an interpretation of some point in their common faith that they regard as unsound. In the Jewish community, the decisive judgment defining or reaffirming orthodoxy and ejecting a particular heresy was rendered by the Sanhedrin; in the Christian community, by a church council, as, for example, the Council of Nicea in 325 which rejected the Arian heresy and formulated the orthodoxy of the Nicene or Athanasian creed.

Among the Fathers of the Church, Augustine is probably more responsible than any other for the formation of Christian orthodoxy through the definition and rejection of the many heresies that abounded in the early centuries of Christianity. It would be impossible, within the scope of this book, to exemplify this by quotation from all his

antiheretical tracts; but the reader will find a sampling of such polemics in the quotations from Augustine that attack the errors of the Manicheans. The names of other heresies and the disputes over them will be found in Gibbon's report of this aspect of the development of Christianity within the Roman empire. The quotations from Aquinas and from Luther not only contribute a precise definition of heresy, but also discuss various ways of arguing with heretics and point out the useful service that heretics perform for the religious community that excommunicates them.

It is interesting to note that, in the group of quotations dealing with unbelief and atheism, post-Reformation authors predominate. They are concerned with the problems of religious tolerance and persecution and, in this context, with the treatment to be accorded infidels and atheists.

On both of the main subjects treated here the reader is referred for the discussion of relevant considerations to Section 6.5 on Opinion, Belief, and Faith and to Section 6.6 on Doubt and Skepticism.

■ ■ ■

1 The fool hath said in his heart, There is no God.

Psalms 14:1

2 For first of all, when ye come together in the church, I hear that there be divisions among you; and I partly believe it.

For there must be also heresies among you, that they which are approved may be made manifest among you.

I Corinthians 11:18-19

3 But avoid foolish questions, and genealogies, and contentions, and strivings about the law; for they are unprofitable and vain.

A man that is an heretick after the first and second admonition reject;

Knowing that he that is such is subverted, and sinneth, being condemned of himself,

Titus 3:9-11

4 I fell in with a sect of men [the Manicheans] talking high-sounding nonsense, carnal and wordy men. The snares of the devil were in their mouths, to trap souls with an arrangement of the syllables of the names of God the Father and of the Lord Jesus Christ and of the Paraclete, the Holy Ghost, our Comforter. These names were always on their lips, but only as sounds and tongue noises; for their heart was empty of the true meaning. they cried out "Truth, truth;" they were forever uttering the word to me, but the thing was nowhere in them; indeed they spoke falsehood not only of You, who are truly Truth, but also of the elements of this world, Your creatures. Concerning these I ought to have passed beyond even the philosophers who spoke truly, for love of You, O my supreme and good Father, Beauty of all things beautiful. O Truth, Truth, how inwardly did the very marrow of my soul pant for You when time and again I heard them sound Your name. But it was all words—words spoken, words written in many huge tomes.

Augustine, Confessions, III, 6

5 Ham... who was the middle son of Noah, and, as it were, separated himself from both, and remained between

them, neither belonging to the first-fruits of Israel nor to the fullness of the Gentiles, what does he signify but the tribe of heretics, hot with the spirit, not of patience, but of impatience, with which the breasts of heretics are wont to blaze, and with which they disturb the peace of the saints? But even the heretics yield an advantage to those that make proficiency, according to the apostle's saying, "There must also be heresies, that they which are approved may be made manifest among you." Whence, too, it is elsewhere said, "The son that receives instruction will be wise, and he uses the foolish as his servant," For while the hot restlessness of heretics stirs questions about many articles of the Catholic faith, the necessity of defending them forces us both to investigate them more accurately, to understand them more clearly, and to proclaim them more earnestly; and the question mooted by an adversary becomes the occasion of instruction.

Augustine, City of God, XVI, 2

- 6 It is believed by some that those who do not abandon the name of Christ, and have been baptized in the Church and have not been cut off by any schism or heresy, no matter in what wickedness they live, not washing it away by penance nor redeeming it through almsgiving, but persevering in it stubbornly up to the last day of this life, are to be saved by fire (a fire made to endure in proportion to the magnitude of their evil deeds) and not to receive the punishment of eternal fire. But those who believe this and still are Catholics seem to me to be led astray by a kind of human benevolence.

Augustine, Enchiridion, XVIII

7 Many heretics abound; and God has permitted them to abound to this end, that we may not be always nourished with milk and remain in senseless infancy. For inasmuch as they have not understood how the divinity of Christ is set forth to our acceptance, they have concluded according to their will; and by not discerning aright, they have brought in most troublesome questions upon catholic believers; and the hearts of believers began to be disturbed and to waver. Then immediately it became a necessity for spiritual men, who had not only read in the Gospel anything respecting the divinity of our Lord Jesus Christ, but had also understood it, to bring forth the armour of Christ against the armour of the devil, and with all their might to fight in most open conflict for the divinity of Christ against false and deceitful teachers; lest, while they were silent, others might perish.

Augustine, On the Gospel of St. John, XXXVI, 6

8 Unbelievers cannot be said "to believe in a God" as we understand it in relation to the act of faith. For they do not believe that God exists under the conditions that faith determines. Hence they do not truly believe in a God, since ... to know simple things defectively is not to know them at all.

Aquinas, Summa Theologica, II-II, 2, 2

9 To have the faith is not part of human nature, but it is part of human nature that man's mind should not go against his inner instinct, and the outward preaching of the truth. Hence, in this way, unbelief is contrary to nature.

Aquinas, Summa Theologica, II-II, 10, 1

10 In disputing about the faith, two things must be observed, one on the part of the disputant, the other on the part of his hearers. On the part of the disputant, we must consider his intention. For if he were to dispute as though he had doubts about the faith, and did not hold the truth of faith for certain, and as though he intended to probe it with arguments, without doubt he would sin, as being doubtful of the faith and an unbeliever. On the other hand, it is praiseworthy to dispute about the faith in order to confute errors, or even for practice.

On the part of the hearers we must consider whether those who hear the disputation are instructed and firm in the faith, or simple and wavering. As to those who are well instructed and firm in the faith, there can be no danger in disputing about the faith in their presence. But as to simple-minded people, we must make a distinction. For either they are provoked and molested by unbelievers, for instance Jews or heretics, or pagans, who strive to corrupt the faith in them, or else they are not subject to provocation in this matter, as in those countries where there are no unbelievers. In the first case it is necessary to dispute in public about the faith, provided there be those who are equal and adapted to the task of confuting errors, since in this way simple people are strengthened in the faith, and unbelievers are deprived of the opportunity to deceive, while if those who ought to withstand the perverters of the truth of faith were silent, this would tend to strengthen error. Hence Gregory says; "Even as a thoughtless speech gives rise to error, so does an indiscreet silence leave those in error who might have been instructed." On the other hand, in the second case it is dangerous to dispute in public about the faith, in the presence of simple people, whose faith

for this very reason is more firm, that they have never heard anything differing from what they believe. Hence it is not expedient for them to hear what unbelievers have to say against the faith.

Aquinas, Summa Theologica, II-II, 10, 7

- 11 There are two ways in which a man may deviate from the rectitude of the Christian faith. First, because he is unwilling to assent to Christ Himself; and such a man has an evil will, so to say, in respect of the very end. This pertains to the species of unbelief in pagans and Jews. Secondly, because, though he intends to assent to Christ, yet he fails in his choice of those things by which he assents to Christ, because he chooses, not what Christ really taught, but the suggestions of his own mind. Therefore, heresy is a species of unbelief pertaining to those who profess the Christian faith, but corrupt its dogmas.

Aquinas, Summa Theologica, II-II, 11, 1

- 12 With regard to heretics two points must be observed; one, on their own side, the other, on the side of the Church. On their own side there is the sin, by which they deserve not only to be separated from the Church by excommunication, but also to be severed from the world by death. For it is a much graver matter to corrupt the faith which quickens the soul, than to forge money, which supports temporal life. Therefore if forgers of money and other evil-doers are condemned to death at once by the secular authority, much more reason is there for heretics, as soon as they are convicted of heresy, to be not only excommunicated but even put to death.

On the part of the Church, however, there is mercy which looks to the conversion of the wanderer, and therefore she condemns not at once, but *after the first and second admonition*.

Aquinas, Summa Theologica, II-II, 11, 3

13 I, who was desirous to behold the condition which such a fortress encloses,

as soon as I was in, sent my eyes around; and saw, on either hand, a spacious plain full of sorrow and of evil torment.

As at Arles, where the Rhone stagnates, as at Pola near the Quarnaro gulf, which shuts up Italy and bathes its confines,

the sepulchres make all the place uneven; so did they here on every side, only the manner here was bitterer:

for amongst the tombs were scattered flames, whereby they were made all over so glowing-hot, that iron more *hot* no craft requires.

Their covers were all raised up; and out of them proceeded moans so grievous, that they seemed indeed *the moans* of *spirits* sad and wounded.

And I: "Master [Virgil], what are these people who, buried within those chests, make themselves heard by their painful sighs?"

And he to me; "[Here] are the Arch-heretics with their followers of every sect; and much more, than thou thinkest, the tombs are laden.

Like with like is buried here; and the monuments are more and less hot." Then, after turning to the right hand, we passed between the tortures and the high battlements.

Dante, Inferno, IX, 106

14 I saw many herds of naked souls, who were all lamenting very miserably; and there seemed imposed upon them a diverse law.

Some were lying supine upon the ground; some sitting all crouched up; and others roaming incessantly.

Those that moved about were much more numerous; and those that were lying in the torment *were* fewer, but uttered louder cries of pain.

Over all the great sand, falling slowly, rained dilated flakes of fire, like *those* of snow in Alps without a wind.

As the flames which Alexander, in those hot regions of India, saw fall upon his host, entire to the ground;

whereat he with his legions took care to tramp the soil, for the fire was more easily extinguished while alone:

so fell the eternal heat, by which the sand was kindled, like tinder under flint and steel, redoubling the pain.

Ever restless was the dance of miserable hands, now here, now there, shaking off the fresh burning.

I began: "Master, thou who conquerest all things, save the hard Demons, that came forth against us at the entrance of the gate,

who is that great spirit, who seems to care not for the fire, and lies disdainful and contorted, so that the rain seems not to ripen him?"

And he himself, remarking that I asked my Guide [Virgil] concerning him, exclaimed: "What I was living, that am I dead.

Though Jove weary out his smith, from whom in anger he took the sharp bolt with which on my last day I was transfixed;

and though he weary out the others, one by one, at the black forge in Mongibello, crying: 'Help, help, good Vulcan!'

as he did at the strife of Phlegra; and hurl at me with all his might, yet should he not thereby have joyful vengeance."

Then my Guide spake with a force such as I had not heard before: "O Capaneus! in that thy pride remains unquenched,

thou art punished more: no torture, except thy own raving, would be pain proportioned to thy fury."

Then to me he turned with gentler lip, saying: "That was the one of the seven kings who laid siege to Thebes; and he held, and seems to hold,

God in defiance and prize him lightly; but, as I told him, his revilings are ornaments that well befit his breast."

Dante, Inferno, XIV, 19

- 15 What greater rebellion against God, what greater wickedness, what greater contempt of God is there than not believing his promise? For what is this but to make God a liar or to doubt that he is truthful?—that is, to ascribe truthfulness to one's self but lying and vanity to God? Does not a man who dote this deny God and set himself up as an idol in his heart? Then of what good are works done in such wickedness, even if they were the works of angels and apostles? Therefore God has rightly included all things, not under anger or lust, but under unbelief, so that they who imagine that they are fulfilling the law by doing the works of chastity and mercy required by the law (the civil and human virtues) might

not be saved. They are included under the sin of unbelief and must either seek mercy or be justly condemned.

Luther, Freedom of a Christian

- 16 Heretics ought to be persuaded by argument, and not by fire; and this was the way of the early Fathers. If it were wise policy to suppress heretics by burning them, then the executioners would be the most learned teachers on earth. We should have no need to study books any longer, for he who could overthrow his fellow by violence would have the right to burn him at the stake.

Luther, Appeal to the Ruling Class of German Nationality, III

- 17 We are brought back to the belief in God either by love or by force. Atheism being a proposition as it were unnatural and monstrous, difficult too and not easy to establish in the human mind, however insolent and unruly it may be, plenty of men have been seen, out of vanity and pride in conceiving opinions that are not common and that reform the world, to affect to profess it outwardly; who, if they are mad enough, are not strong enough nevertheless to have implanted it in their conscience. They will not fail to clasp their hands to heaven if you stick them a good sword-thrust in the chest.

Montaigne, Essays, II, 12, Apology for Raymond Sebond

- 18 This matter of divinity is handled either in form of instruction of truth, or in form of confutation of falsehood. The declinations from religion, besides the privative, which is atheism and the branches thereof, are three; heresies, idolatry, and witchcraft: heresies, when we

serve the true God with a false worship; idolatry, when we worship false gods, supposing them to be true; and witchcraft, when we adore false gods, knowing them to be wicked and false.

Bacon, Advancement of Learning, Bk. II, XXV, 24

19 I had rather believe all the fables in the Legend, and the Talmud, and the Alcoran, than that this universal frame is without a mind. And therefore God never wrought miracle to convince atheism, because his ordinary works convince it. It is true, that a little philosophy inclineth man's mind to atheism; but depth in philosophy bringeth men's minds about to religion: for while the mind of man looketh upon second causes scattered, it may sometimes rest in them, and go no further; but when it beholdeth the chain of them, confederate and linked together, it must needs fly to Providence and Deity. Nay, even that school which is most accused of atheism doth most demonstrate religion; that is, the school of Leucippus and Democritus and Epicurus. For it is a thousand times more credible, that four mutable elements and one immutable fifth essence, duly and eternally placed, need no God, than that an army of infinite small portions or seeds unplaced should have produced this order and beauty without a divine marshal. The Scripture saith, *The fool hath said in his heart, there is no God*: it is not said. *The fool hath thought in his heart* so as he rather saith it by rote to himself, as that he would have, than that he can thoroughly believe it, or be persuaded of it. For none deny there is a God but those for whom it maketh that there were no God. It appeareth in nothing more, that atheism is rather in the lip than in the heart of man, than by this; that atheists will ever be talking of that their

opinion, as if they fainted in it within themselves, and would be glad to be strengthened by the consent of others.

Bacon, Of Atheism

- 20 All that is said by the atheist against the existence of God, always depends either on the fact that we ascribe to God affections which are human, or that we attribute so much strength and wisdom to our minds that we even have the presumption to desire to determine and understand that which God can and ought to do. In this way all that they allege will cause us no difficulty, provided only we remember that we must consider our minds as things which are finite and limited, and God as a Being who is incomprehensible and infinite.

Descartes, Meditations on First Philosophy, Pref.

- 21 By denying the existence or providence of God, men may shake off their ease, but not their yoke. But to call this power of God, which extendeth itself not only to man, but also to beasts, and plants, and bodies inanimate, by the name of kingdom, is but a metaphorical use of the word. For he only is properly said to reign that governs his subjects by his word and by promise of rewards to those that obey it, and by threatening them with punishment that obey it not. Subjects therefore in the kingdom of God are not bodies inanimate, nor creatures irrational; because they understand no precepts as his: nor atheists, nor they that believe not that God has any care of the actions of mankind; because they acknowledge no word for his, nor have hope of his rewards, or fear of his threatenings. They therefore that believe there is a God

that governeth the world, and hath given precepts, and propounded rewards and punishments to mankind, are God's subjects; all the rest are to be understood as enemies.

Hobbes, Leviathan, II, 31

- 22 That Heresies should arise, we have the Prophetie of Christ; but that old ones should be abolished, we hold no prediction.

Sir Thomas Browne, Religio Medici, I, 8

- 23 What reason have [atheists] for saying that we cannot rise from the dead? What is more difficult, to be born or to rise again; that what has never been should be, or that what has been should be again? Is it more difficult to come into existence than to return to it? Habit makes the one appear easy to us; want of habit makes the other impossible, A popular way of thinking!

Why cannot a virgin bear a child? Does a hen not lay eggs without a cock? What distinguishes these outwardly from others? And who has told us that the hen may not form the germ as well as the cock?

Pascal, Pensées, III, 222

- 24 God (and the Apostles), foreseeing that the seeds of pride would make heresies spring up, and being unwilling to give them occasion to arise from correct expressions, has put in Scripture and the prayers of the Church contrary words and sentences to produce their fruit in time.

Pascal, Pensées, VIII, 579

25 *Chorus of Danites.* Just are the ways of God,
And justifiable to Men;
Unless there be who think not God at all,
If any be, they walk obscure;
For of such Doctrine never was there School,
But the heart of the Fool,
And no man therein Doctor but himself.

Milton, Samson Agonistes, 293

26 Truth is compared in Scripture to a streaming fountain; if her waters flow not in a perpetual progression, they sicken into a muddy pool of conformity and tradition. A man may be a heretic in the truth; and if he believe things only because his Pastor says so, or the Assembly so determines, without knowing other reason, though his belief be true, yet the very truth he holds becomes his heresy.

Milton, Areopagitica

27 Truth indeed came once into the world with her Divine Master, and was a perfect shape most glorious to look on: but when He ascended, and His Apostles after Him were laid asleep, then straight arose a wicked race of deceivers, who, as that story goes of the Egyptian Typhon with his conspirators, how they dealt with the good Osiris, took the virgin Truth, hewed her lovely form into a thousand pieces, and scattered them to the four winds. From that time ever since, the sad friends of Truth, such as durst appear, imitating the careful search that Isis made for the mangled body of Osiris, went up and down gathering up limb by limb, still as they could find them. We have not yet found them all. Lords and Commons, nor

ever shall do, till her Master's second coming; He shall bring together every joint and member, and shall mould them into an immortal feature of loveliness and perfection.

Milton, Areopagitica

28 Those are not at all to be tolerated who deny the being of a God. Promises, covenants, and oaths, which are the bonds of human society, can have no hold upon an atheist. The taking away of God, though but even in thought, dissolves all; besides also, those that by their atheism undermine and destroy all religion, can have no pretence of religion whereupon to challenge the privilege of a toleration. As for other practical opinions, though not absolutely free from all error, if they do not tend to establish domination over others, or civil impunity to the Church in which they are taught, there can be no reason why they should not be tolerated.

Locke, Letter Concerning Toleration

29 However clearly we may think this or the other doctrine to be deduced from Scripture, we ought not therefore to impose it upon others as a necessary article of faith because we believe it to be agreeable to the rule of faith, unless we would be content also that other doctrines should be imposed upon us in the same manner, and that we should be compelled to receive and profess all the different and contradictory opinions of Lutherans, Calvinists, Remonstrants, Anabaptists, and other sects which the contrivers of symbols, systems, and confessions are accustomed to deliver to their followers as genuine and necessary deductions from the Holy

Scripture. I cannot but wonder at the extravagant arrogance of those men who think that they themselves can explain things necessary to salvation more clearly than the Holy Ghost, the eternal and infinite wisdom of God.

Locke, Letter Concerning Toleration

- 30 The disbelief of a divine providence renders a man incapable of holding any publick station: for, since kings avow themselves to be the deputies of Providence, the Lilliputians think nothing can be more absurd, than for a prince to employ such men as disown the authority under which he acteth.

Swift, Gulliver's Travels, I, 6

- 31 M. Bayle has pretended to prove that it is better to be an Atheist than an Idolater; that is, in other words, that it is less dangerous to have no religion at all than a bad one. "I had rather," said he, "it should be said of me that I had no existence than that I am a villain." This is only a sophism founded on this, that it is of no importance to the human race to believe that a certain man exists, whereas it is extremely useful for them to believe the existence of a God. From the idea of his nonexistence immediately follows that of our independence; or, if we cannot conceive this idea, that of disobedience. To say that religion is not a restraining motive, because it does not always restrain, is equally absurd as to say that the civil laws are not a restraining motive. It is a false way of reasoning against religion to collect, in a large work, a long detail of the evils it has produced if we do not give at the same time an enumeration of the advantages

which have flowed from it. Were I to relate all the evils that have arisen in the world from civil laws, from monarchy, and from republican government, I might tell of frightful things. Were it of no advantage for subjects to have religion, it would still be of some, if princes had it, and if they whitened with foam the only rein which can restrain those who fear not human laws.

Montesquieu, Spirit of Laws, XXIV, 2

32 There is not a greater number of philosophical reasonings, displayed upon any subject, than those, which prove the existence of a Deity, and refute the fallacies of *Atheists*; and yet the most religious philosophers still dispute whether any man can so blinded as to be a speculative atheist. How shall we reconcile these contradictions? The knights-errant, who wandered about to clear the world of dragons and giants, never entertained the least doubt with regard to the existence of these monsters.

Hume, Concerning Human Understanding, XII, 116

33 What conclusion shall we draw from all this? That atheism is a very pernicious monster in those who govern; that it is also pernicious in the persons around statesmen, although their lives may be innocent, because from their cabinets it may pierce right to the statesmen themselves; that if it is not so deadly as fanaticism, it is nearly always fatal to virtue. Let us add especially that there are less atheists to-day than ever, since philosophers have recognized that there is no being vegetating without germ, no germ without a plan, etc., and that wheat comes in no wise from putrefaction.

Some geometers who are not philosophers have rejected final causes, but real philosophers admit them; a catechist proclaims God to the children, and Newton demonstrates Him to the learned.

If there are atheists, whom must one blame, if not the mercenary tyrants of souls, who, making us revolt against their knaveries, force a few weak minds to deny the God whom these monsters dishonour. How many times have the people's leeches brought oppressed citizens to the point of revolting against their king!

Voltaire, Philosophical Dictionary: Atheism

34 Now, it matters very much to the community that each citizen should have a religion. That will make him love his duty; but the dogmas of that religion concern the State and its members only so far as they have reference to morality and to the duties which he who professes them is bound to do to others. Each man may have, over and above, what opinions he pleases, without it being the Sovereign's business to take cognisance of them; for, as the Sovereign has no authority in the other world, whatever the lot of its subjects may be in the life to come, that is not its business, provided they are good citizens in this life.

There is therefore a purely civil profession of faith of which the Sovereign should fix the articles, not exactly as religious dogmas, but as social sentiments without which a man cannot be a good citizen or a faithful subject. While it can compel no one to believe them, it can banish from the State whoever does not believe them—it can banish him, not for impiety, but as an anti-social being, incapable of truly loving the laws and justice, and of sacrificing, at need, his life to his duty. If any one, after

publicly recognising these dogmas, behaves as if he does not believe them, let him be punished by death: he has committed the worst of all crimes, that of lying before the law.

Rousseau, Social Contract, IV, 8

35 *Johnson*. Every society has a right to preserve public peace and order, and therefore has a good right to prohibit the propagation of opinions which have a dangerous tendency. To say the *magistrate* has this right, is using an inadequate word; it is the *society* for which the magistrate is agent. He may be morally or theologically wrong in restraining the propagation of opinions which he thinks dangerous, but he is politically right.

Boswell, Life of Johnson (May 7, 1773)

36 *Johnson*. Sir, there is a great cry about infidelity; but there are, in reality, very few infidels. I have heard a person, originally a Quaker, but now, I am afraid, a Deist, say, that he did not believe there were, in all England, above two hundred infidels.

Boswell, Life of Johnson (Apr. 14, 1775)

37 The opinions of the Academics and Epicureans were of a less religious cast; but whilst the modest science of the former induced them to doubt, the positive ignorance of the latter urged them to deny, the providence of a Supreme Ruler. The spirit of inquiry, prompted by emulation, and supported by freedom, had divided the public teachers of philosophy into a variety of contending sects; but the ingenuous youth who, from every part,

resorted to Athens, and the other seats of learning in the Roman empire, were alike instructed in every school to reject and to despise the religion of the multitude. How, indeed, was it possible, that a philosopher should accept, as divine truths, the idle tales of the poets, and the incoherent traditions of antiquity; or, that he should adore, as gods, those imperfect beings whom he must have despised, as men! Against such unworthy adversaries, Cicero condescended to employ the arms of reason and eloquence; but the satire of Lucian was a much more adequate, as well as more efficacious weapon. We may be well assured, that a writer conversant with the world would never have ventured to expose the gods of his country to public ridicule, had they not already been the objects of secret contempt among the polished and enlightened orders of society.

Gibbon, Decline and Fall of the Roman Empire, II

- 38 It is the undoubted right of every society to exclude from its communion and benefits such among its members as reject or violate those regulations which have been established by general consent. In the exercise of this power the censures of the Christian church were chiefly directed against scandalous sinners, and particularly those who were guilty of murder, of fraud, or of incontinence; against the authors, or the followers, of any heretical opinions which had been condemned by the judgment of the episcopal order; and against those unhappy persons who, whether from choice or from compulsion, had polluted themselves after their baptism by any act of idolatrous worship. The consequences of excommunication were of a temporal as well as a spiritual nature. The Christian against whom it was pronounced

was deprived of any part in the oblations of the faithful. The ties both of religious and of private friendship were dissolved: he found himself a profane object of abhorrence to the persons whom he the most esteemed, or by whom he had been the most tenderly beloved; and as far as an expulsion from a respectable society could imprint on his character a mark of disgrace, he was shunned or suspected by the generality of mankind.

Gibbon, Decline and Fall of the Roman Empire, XV

39 So easily was he [the emperor Constantius) offended by the slightest deviation from his imaginary standard of Christian truth, that he persecuted, with equal zeal, those who defended the *consubstantiality*, those who asserted the *similar substance*, and those who denied the *likeness*, of the Son of God. Three bishops, degraded and banished for those adverse opinions, might possibly meet in the same place of exile; and, according to the difference of their temper, might either pity or insult the blind enthusiasm of their antagonists, whose present sufferings would never be compensated by future happiness.

Gibbon, Decline and Fall of the Roman Empire, XXI

40 Constantinople was the principal seat and fortress of Arianism; and, in a long interval of forty years, the faith of the princes and prelates w'ho reigned in the capital of the East \was rejected in the purer schools of Rome and Alexandria. The archiepiscopal throne of Macedonius, which had been polluted with so much Christian blood, was successively filled by Eudoxus and Damophilus. Their diocese enjoyed a free importation of vice and error from every province of the empire; the eager pursuit of

religious controversy afforded a new occupation to the busy idleness of the metropolis: and we may credit the assertion of an intelligent observer, who describes, with some pleasantry, the effects of their loquacious zeal. "This city," says he, "is full of mechanics and slaves, who are all of them profound theologians, and preach in the shops and in the streets. If you desire a man to change a piece of silver, he informs you wherein the Son differs from the Father; if you ask the price of a loaf, you are told, by way of reply, that the Son is inferior to the Father; and if you inquire whether the bath is ready, the answer is, that the Son was made out of nothing."

Gibbon, Decline and Fall of the Roman Empire, XXVII

- 41 By a second edict he [Leo III] proscribed the existence as well as the use of religious pictures; the churches of Constantinople and the provinces were cleansed from idolatry; the images of Christ, the Virgin, and the saints were demolished, or a smooth surface of plaster was spread over the walls of the edifice. The sect of the Iconoclasts was supported by the zeal and despotism of six emperors, and the East and West were involved in a noisy conflict of one hundred and twenty years.

Gibbon, Decline and Fall of the Roman Empire, XLIX

- 42 The laws of the pious emperors, which seldom touched the lives of less odious heretics, proscribed without mercy or disguise the tenets, the books, and the persons of the Montanists and Manichaeans: the books were delivered to the flames; and all who should presume to secrete such writings, or to profess such opinions, were devoted to an ignominious death.

Gibbon, Decline and Fall of the Roman Empire, LIV

- 43 We know, and it is our pride to know, that man is by his constitution a religious animal; that atheism is against, not only our reason, but our instincts; and that it cannot prevail long.

Burke, Reflections on the Revolution in France

- 44 If, from a practical point of view, the hypothesis of a Supreme and All-sufficient Being is to maintain its validity without opposition, it must be of the highest importance to define this conception in a correct and rigorous manner—as the transcendental conception of a necessary being, to eliminate all phenomenal elements (anthropomorphism in its most extended signification), and at the same time to overflow all contradictory assertions—be they atheistic, deistic, or anthropomorphic. This is of course very easy; as the same arguments which demonstrated the inability of human reason to *affirm* the existence of a Supreme Being must be alike sufficient to prove the invalidity of its denial. For it is impossible to gain from the pure speculation of reason demonstration that there exists no Supreme Being, as the ground of all that exists, or that this being possesses none of those properties which we regard as analogical with the dynamical qualities of a thinking being, or that, as the anthropomorphists would have us believe, it is subject to all the limitations which sensibility imposes upon those intelligences which exist in the world of experience.

A Supreme Being is, therefore, for the speculative reason, a mere ideal, though a *faultless* one—a conception which perfects and crowns the system of

human cognition, but the objective reality of which can neither be proved nor disproved by pure reason. If this defect is ever supplied by a moral theology, the problematic transcendental theology which has preceded, will have been at least serviceable as demonstrating the mental necessity existing for the conception, by the complete determination of it which it has furnished, and the ceaseless testing of the conclusions of a reason often deceived by sense, and not always in harmony with its own ideas.

Kant, Critique of Pure Reason, Transcendental Dialectic

45 Principle is a better test of heresy than doctrine. Heretics are true to their principles, but change to and fro, backwards and forwards, in opinion; for very opposite doctrines may be exemplifications of the same principle. Thus the Antiochenes and other heretics sometimes were Arians, sometimes Sabellians, sometimes Nestorians, sometimes Monophysites, as if at random, from fidelity to their common principle, that there is no mystery in theology. Thus Calvinists become Unitarians from the principle of private judgment. The doctrines of heresy are accidents and soon run to an end; its principles are everlasting.

Newman, Essay on the Development of Christian Doctrine, Pt. II, V, 2

46 The path Alyosha chose was a path going in the opposite direction, but he chose it with the same thirst for swift achievement. As soon as he reflected seriously he was convinced of the existence of God and immortality, and at once he instinctively said to himself: "I want to live for

immortality, and I will accept no compromise." In the same way, if he had decided that God and immortality did not exist, he would at once have become an atheist and a socialist. For socialism is not merely the labour question, it is before all things the atheistic question, the question of the form taken by atheism to-day, the question of the tower of Babel built without God, not to mount to heaven from earth but to set up heaven on earth.

Dostoevsky, Brothers Karamazov, Pt, I, I, 5

47 *Ivan*. "You see, only suppose that there was one such man among all those who desire nothing but filthy material gain—if there's only one like my old Inquisitor, who had himself eaten roots in the desert and made frenzied efforts to subdue his flesh to make himself free and perfect. But yet all his life he loved humanity, and suddenly his eyes were opened, and he saw that it is no great moral blessedness to attain perfection and freedom, if at the same time one gains the conviction that millions of God's creatures have been created as a mockery, that they will never be capable of using their freedom, that these poor rebels can never turn into giants to complete the tower, that it was not for such geese that the great idealist dreamt his dream of harmony. Seeing all that he turned back and joined—the clever people. Surely that could have happened?"

"Joined whom, what clever people?" cried Alyosha, completely carried away. "They have no such great cleverness and no mysteries and secrets.... Perhaps nothing but Atheism, that's all their secret. Your Inquisitor does not believe in God, that's his secret!"

"What if it is so! At last you have guessed it. It's perfectly true, it's true that that's the whole secret, but isn't that suffering, at least for a man like that, who has wasted his whole life in the desert and yet could not shake off his incurable love of humanity? In his old age he reached the clear conviction that nothing but the advice of the great dread spirit could build up any tolerable sort of life for the feeble, unruly, 'incomplete, empirical creatures created in jest.' And so, convinced of this, he sees that he must follow the counsel of the wise spirit, the dread spirit of death and destruction, and therefore accept lying and deception, and lead men consciously to death and destruction, and yet deceive them all the way so that they may not notice where they are being led, that the poor blind creatures may at least on the way think themselves happy. And note, the deception is in the name of Him in Whose ideal the old man had so fervently believed all his life long. Is not that tragic? And if only one such stood at the head of the whole army 'filled with the lust of power only for the sake of filthy gain'—would not one such be enough to make a tragedy? More than that, one such standing at the head is enough to create the actual leading idea of the Roman Church with all its armies and Jesuits, its highest idea. I tell you frankly that I firmly believe that there has always been such a man among those who stood at the head of the movement. Who knows, there may have been some such even among the Roman Popes. Who knows, perhaps the spirit of that accursed old man who loves mankind so obstinately in his own way, is to be found even now in a whole multitude of such old men, existing not by chance but by agreement, as a secret league formed long ago for the guarding of the mystery, to guard it from the weak

and the unhappy, so as to make them happy. No doubt it is so, and so it must be indeed."

Dostoevsky, Brothers Karamazov, Pt. 11, V, 5

48 *The Visitor*. Oh, blind race of men who have no understanding! As soon as men have all of them denied God—and I believe that period, analogous with geological periods, will come to pass—the old conception of the universe will fall of itself without cannibalism, and, what's more, the old morality, and everything will begin anew. Men will unite to take from life all it can give, but only for joy and happiness in the present world. Man will be lifted up with a spirit of divine Titanic pride and the man-god will appear. From hour to hour extending his conquest of nature infinitely by his will and his science, man will feel such lofty joy from hour to hour in doing it that it will make up for all his old dreams of the joys of heaven.

Dostoevsky, Brothers Karamazov, Pt. IV, XI, 9

49 The existentialist... thinks it very distressing that God does not exist, because all possibility of finding values in a heaven of ideas disappears along with Him; there can no longer be an a priori Good, since there is no infinite and perfect consciousness to think it. Nowhere is it written that the Good exists, that we must be honest, that we must not lie; because the fact is we are on a plane where there are only men. Dostoevsky said, "If God didn't exist, everything would be possible." That is the very starting point of existentialism. Indeed, everything is permissible if God does not exist, and as a result man is forlorn, because neither within him nor without does he

find anything to cling to. He can't start making excuses for himself.

Sartre, Existentialism

20.10 Prophecy

Two meanings of prophecy emerge in the quotations collected here. One is the foretelling or prediction of the future. The discussion of prophecy in this sense of the term belongs in a chapter on Religion only to the extent that the future foreseen has been predestined by the gods or by God; hence, the prophet or seer is also called a "diviner" or one who has skill in divination. Secular foresight and scientific prediction are treated elsewhere in this volume, as are fate and fortune when these are separated from divine providence. The reader will find such matters considered in Section 15.3 on Fate, Fortune, and Destiny and in Section 17.2 on Science and Scientific Method.

In its other meaning, prophecy involves more than the simple prediction of future events, though it may involve that also. Inspired by God, the Hebrew prophets serve as the medium through which God speaks to his chosen people, conveying his condemnation of their misdeeds and exhorting them to mend their ways. Prophecy, in this sense, is not only a medium of revelation and a form of mediation between God and man, but also the preachment of moral ideals and the castigation of moral iniquities. The passages from the Old Testament illustrate this meaning of prophecy and the role that the Hebrew prophets played at critical moments in the history of Judaism.

The poets and historians of antiquity provide us with examples of prophecy in the other sense. The philosophers and theologians, both ancient and medieval, discuss the art of divination, the interpretation of dreams for this purpose, and the use or misuse of astrology to foretell the future. One modern writer, Spinoza, expresses the opinion that the prophets of the Old Testament should be read solely for their moral preachments; and another modern writer, Hume, suggests that prophecies, if they are regarded as conveying a message from God, must also be regarded as miraculous. The reader will find Hume's opinions about the miraculous in Section 20.11 on Miracles.

■ ■ ■

1 And Moses went up from the plains of Moab unto the mountain of Nebo, to the top of Pisgah, that is over against Jericho, And the Lord shewed him all the land of Gil-e-ad, unto Dan.

And all Naph-ta-li, and the land of E-phra-im, and Manas-seh, and all the land of Judah, unto the utmost sea,

And the south, and the plain of the valley of Jericho, the city of palm trees, unto Zoar.

And the Lord said unto him, This is the land which I swear unto Abraham, unto Isaac, and unto Jacob, saying, I will give it unto thy seed: I have caused thee to see it with thine eyes, but thou shalt not go over thither....

And there arose not a prophet since in Israel like unto Moses, whom the Lord knew face to face.

In all the signs and the wonders, which the Lord sent him to do in the land of Egypt to Pharaoh, and to all his

servants, and to all his land.

And in all that mighty hand, and in all the great terror which Moses shewed in the sight of all Israel.

Deuteronomy 34:1-12

2 Am I a God at hand, saith the Lord, and not a God afar off?

Can any hide himself in secret places that I shall not see him? saith the Lord. Do not I fill heaven and earth? saith the Lord.

I have heard what the prophets said, that prophesy lies in my name, saying, I have dreamed, I have dreamed.

How long shall this be in the heart of the prophets that prophesy lies? yea, they are prophets of the deceit of their own heart;

Which think to cause my people to forget my name by their dreams which they tell every man to his neighbour, as their fathers have forgotten my name for Ba-al.

The prophet that hath a dream, let him tell a dream; and he that hath my word, let him speak my word faithfully. What is the chaff to the wheat? saith the Lord.

Is not my word like as a fire? saith the Lord; and like a hammer that breaketh the rock in pieces?

Therefore, behold, I am against the prophets, saith the Lord, that steal my words every one from his neighbour.

Behold, I am against the prophets, saith the Lord, that use their tongues, and say. He saith.

Behold, I am against them that prophesy false dreams, saith the Lord, and do tell them, and cause my people to err by their lies, and by their lightness; yet I sent them not, nor commanded them: therefore they shall not profit this people at all, saith the Lord.

Jeremiah 23:23-32

3 The Lord hath sent unto you all his servants the prophets, rising early and sending them; but ye have not hearkened, nor inclined your ear to hear.

They said, Turn ye again now every one from his evil way, and from the evil of your doings, and dwell in the land that the Lord hath given unto you and to your fathers for ever and ever:

And go not after other gods to serve them, and to worship them, and provoke me not to anger with the works of your hands; and I will do you no hurt.

Yet ye have not hearkened unto me, saith the Lord; that ye might provoke me to anger with the works of your hands to your own hurt....

And I will bring upon that land all my words which I have pronounced against it, even all that is written in this book, which Jeremiah hath prophesied against all the nations.

Jeremiah 25:4-13

4 Thus saith the Lord of hosts, the God of Israel;

Let not your prophets and your diviners, that be in the midst of you, deceive you, neither hearken to your dreams which ye cause to be dreamed.

For they prophesy falsely unto you in my name: I have not sent them, saith the Lord.

For thus saith the Lord, That after seventy years be accomplished at Babylon I will visit you, and perform my good word toward you, in caus-ing you to return to this place.

For I know the thoughts that I think toward you, saith the Lord, thoughts of peace, and not of evil, to give you

an expected end.

Jeremiah 29:8-11

5 The hand of the Lord was upon me, and carried me out in the spirit of the Lord, and set me down in the midst of the valley which was full of bones,

And caused me to pass by them round about: and, behold, there were very many in the open valley; and, lo, they were very dry.

And he said unto me, Son of man, can these bones live? And I answered, O Lord God, thou knowest.

Again he said unto me, Prophecy upon these bones, and say unto them, O ye dry bones, hear the word of the Lord.

Ezekiel 37:1-4

6 *Prometheus*. I have known all before,
all that shall be, and clearly known; to me,
nothing that hurts shall come with a new face.
So must I bear, as lightly as I can,
the destiny that fate has given me;
for I know well against necessity,
against its strength, no one can fight and win.

Aeschylus, Prometheus Bound, 100

7 *Orestes*. Even the gods, who at least bear the title of wise,
prove no less false than flitting dreams; in things divine
as well as human, confusion reigns; and 'tis only one
cause of grief, when a man, through no folly of his own
but from obeying the dictates of prophets, is ruined, as
ruined he is in the judgment of those who know.

Euripides, Iphigenia in Tauris, 570

8 *Servant*. How rotten this business of prophets is, how full of lies.

There never was any good in burning things on fires nor in the voices of fowl. It is sheer idiocy even to think that birds do people any good....

Why consult the prophets? We should sacrifice to the gods, ask them for blessings, and let prophecy go.

The art was invented as a bait for making money, but no man ever got rich on magic without work. The best prophet is common sense, our native wit.

Euripides, Helen, 745

9 *Teiresias*. A man's a fool to use the prophet's trade.

For if he happens to bring bitter news
he's hated by the men for whom he works;
and if he pities them and tells them lies
he wrongs the gods. No prophet but Apollo
should sing to men, for he has nought to fear.

Euripides, Phoenician Women, 954

10 *Socrates*. There is also a madness which is a divine gift, and the source of the chiefest blessings granted to men. For prophecy is a madness, and the prophetess at Delphi and the priestesses at Dodo-na when out of their senses have conferred great benefits on Hellas, both in public and private life, but when in their senses few or none. And I might also tell you how the Sibyl and other inspired persons have given to many an one many an intimation of the future which has saved them from falling. But it would be tedious to speak of what every one knows.

Plato, Phaedrus, 244A

11 *Timaets*. God has given the art of divination not to the wisdom, but to the foolishness of man. No man, when in his wits, attains prophetic truth and inspiration; but when he receives the inspired word, either his intelligence is enthralled in sleep, or he is demented by some distemper or possession. And he who would understand what he remembers to have been said, whether in a dream or when he was awake, by the prophetic and inspired nature, or would determine by reason the meaning of the apparitions which he has seen, and what indications they afford to this man or that, of past, present or future good and evil, must first recover his wits. But, while he continues demented, he cannot judge of the visions which he sees or the words which he utters; the ancient saying is very true, that "only a man who has his wits can act or judge about himself and his own affairs." And for this reason it is customary to appoint interpreters to be judges of the true inspiration. Some persons call them prophets; they are quite unaware that they are only the expositors of dark sayings and visions, and are not to be called prophets at all, but only interpreters of prophecy.

Plato, Timaeus, 71B

12 As to the divination which takes place in sleep, and is said to be based on dreams, we cannot lightly either dismiss it with contempt or give it implicit confidence. The fact that all persons, or many, suppose dreams to possess a special significance, tends to inspire us with belief in it [such divination], as founded on the testimony of experience; and indeed that divination in dreams should, as regards some subjects, be genuine, is not incredible, for it has a show of reason; from which one might form a like opinion also respecting all other

dreams. Yet the fact of our seeing no probable cause to account for such divination tends to inspire us with distrust. For, in addition to its further unreasonableness, it is absurd to combine the idea that the sender of such dreams should be God with the fact that those to whom he sends them are not the best and wisest, but merely commonplace persons.

Aristotle, Prophesying by Dreams, 462b12

13 Divination is made up of a little error and superstition, plus a lot of fraud.

Cicero, Divination, 11, 39

14 Arriv'd at Cumae, when you view the flood
Of black Avernus, and the sounding wood,
The mad prophetic Sibyl you shall find,
Dark in a cave, and on a rock reclin'd.
She sings the fates, and, in her frantic fits.
The notes and names, inscrib'd, to leaves commits.
What she commits to leaves, in order laid.
Before the cavern's entrance are display'd:
Unmov'd they lie; but, if a blast of wind
Without, or vapors issue from behind,
The leaves are borne aloft in liquid air,
And she resumes no more her museful care.
Nor gathers from the rocks her scatter'd verse,
Nor sets in order what the winds disperse.
Thus, many not succeeding, most upbraid
The madness of the visionary maid.
And with loud curses leave the mystic shade.

Virgil, Aeneid, III

15 In those days came John the Baptist, preaching in the wilderness of Judaea,

And saying, Repent ye: for the kingdom of heaven is at hand.

For this is he that was spoken of by the prophet Esaias, saying. The voice of one crying in the wilderness, Prepare ye the way of the Lord, make his paths straight.

Matthew 3:1—3

16 Think not that I am come to destroy the law, or the prophets: I am not come to destroy, but to fulfil.

For verily I say unto you, Till heaven and earth pass, one jot or one tittle shall in no wise pass from the law, till all be fulfilled.

Matthew 5:17-18

17 Beware of false prophets, which come to you in sheep's clothing, but inwardly they are ravening wolves.

Matthew 7:15

18 Certain of the scribes and of the Pharisees answered, saying, Master, we would see a sign from thee.

But he answered and said unto them, An evil and adulterous generation seeketh after a sign; and there shall no sign be given to it, but the sign of the prophet Jonas:

For as Jonas was three days and three nights in the whale's belly; so shall the Son of man be three days and three nights in the heart of the earth.

Matthew 12:38-40

19 A prophet is not without honour, save in his own country, and in his own house.

Matthew 13:57

20 If they hear not Moses and the prophets, neither will they be persuaded, though one rose from the dead.

Luke 16:31

21 When they therefore were come together, they asked of him, saying. Lord, wilt thou at this time restore again the kingdom to Israel?

And he said unto them, It is not for you to know the times or the seasons, which the Father hath put in his own power.

Acts 1:6-7

22 The fortunes of cities as well as of men . . . have their certain periods of time prefixed, which may be collected and foreknown from the position of the stars at their first foundation.

Plutarch, Romulus

23 Among other great changes that happen, as they say, at the turn of ages, the art of divination, also, at one time rises in esteem, and is more successful in its predictions, clearer and surer tokens being sent from God, and then, again, in another generation declines as low, becoming mere guesswork for the most part, and discerning future events by dim and uncertain intimations.

Plutarch, Sulla

24 But You, O Ruler of Your creation, how is it that you can show souls things that are to come? For such things You have told Your prophets. In what manner do You show the future to man, for whom nothing future yet is? Or do You show only present signs of things to come? For what does not exist obviously cannot be shown. The means You use is altogether beyond my gaze; my eyes have not the strength; of myself I shall never be able to see so deep.

Augustine, Confessions, XI, 19

25 In the manner of prophecy, figurative and literal expressions are mingled, so that a serious mind may, by useful and salutary effort, reach the spiritual sense; but carnal sluggishness, or the slowness of an uneducated and undisciplined mind, rests in the superficial letter, and thinks there is nothing beneath to be looked for.

Augustine, City of God, XX, 21

26 The majority of men follow their passions, which are movements of the sensitive appetite, in which movements heavenly bodies can co-operate; but few are wise enough to resist these passions. Consequently astrologers are able to foretell the truth in the majority of cases, especially in a general way. But not in particular cases, for nothing prevents man resisting his passions by his free-will. And so the astrologers themselves say that the wise man is stronger than the stars, in so far as, that is, he conquers his passions.

Aquinas, Summa Theologica, I, 115, 4

27 *Casca*. Are not you moved, when all the sway of earth
Shakes like a thing unfirm? O Cicero,

I have seen tempests, when the scolding winds
Have rived the knotty oaks, and I have seen
The ambidous ocean swell and rage and foam.
To be exalted with the threatening clouds:
But never till to-night, never till now,
Did I go through a tempest dropping fire.
Either there is a civil strife in heaven,
Or else the world, too saucy with the gods,
Incenses them to send destruction.

Cicero. Why, saw you anything more wonderful?

Casca. A common slave—you know him well by Sight—
Held up his left hand, which did flame and burn
Like twenty torches join'd, and yet his hand,
Not sensible of fire, remain'd unscorch'd.
Besides—I ha' not since put up my sword—
Against the Capitol I met a lion,
Who glared upon me, and went surly by
Without annoying me: and there were drawn
Upon a heap a hundred ghastly women,
Transformed with their fear, who swore they saw
Men all in fire walk up and down the streets.
And yesterday the bird of night did sit
Even at noon-day upon the market-place,
Hooting and shrieking. When these prodigies
Do so conjointly meet, let not men say
"These are their reasons; they are natural";
For, I believe, they are portentous things
Unto the climate that they point upon.

Cic. Indeed, it is a strange-disposed time:
But men may construe things for their fashion.
Clean from the purpose of the things themselves.

Shakespeare, Julius Caesar, I, iii, 3

28 *Banguo*. If you can look into the seeds of time,
And say which grain will grow and which will not.
Speak then to me, who neither beg nor fear
Your favours nor your hate.

Shakespeare, Macbeth, I, iii, 58

29 The foresight of things to come, which is providence,
belongs only to him by whose will they are to come. From
him only, and supernaturally, proceeds prophecy. The
best prophet naturally is the best guesser; and the best
guesser, he that is most versed and studied in the
matters he guesses at, for he hath most signs to guess by.

Hobbes, Leviathan, I, 3

30 When God speaketh to man, it must be either
immediately or by mediation of another man, to whom He
had formerly spoken by Himself immediately. How God
speaketh to a man immediately may be understood by
those well enough to whom He hath so spoken; but how
the same should be understood by another is hard, if not
impossible, to know. For if a man pretend to me that God
hath spoken to him supernaturally, and immediately, and
I make doubt of it, I cannot easily perceive what
argument he can produce to oblige me to believe it. It is
true that if he be my sovereign, he may oblige me to
obedience, so as not by act or word to declare I believe
him not; but not to think any otherwise than my reason
persuades me. But if one that hath not such authority
over me shall pretend the same, there is nothing that
exacteth either belief or obedience.

Hobbes, Leviathan, III, 32

31 Though God Almighty can speak to a man by dreams, visions, voice, and inspiration, yet He obliges no man to believe He hath so done to him that pretends it; who, being a man, may err and, which is more, may lie.

How then can he to whom God hath never revealed His will immediately (saving by the way of natural reason) know when he is to obey or not to obey His word, delivered by him that says he is a prophet?... To which I answer out of the Holy Scripture that there be two marks by which together, not asunder, a true prophet is to be known. One is the doing of miracles; the other is the not teaching any other religion than that which is already established. Asunder, I say, neither of these is sufficient. ... In which words two things are to be observed; first, that God will not have miracles alone serve for arguments to approve the prophet's calling; but for an experiment of the constancy of our adherence to Himself. For the works of the Egyptian sorcerers, though not so great as those of Moses, yet were great miracles. Secondly, that how great soever the miracle be, yet if it tend to stir up revolt against the king or him that governeth by the king's authority, he that doth such miracle is not to be considered otherwise than as sent to make trial of their allegiance.

Hobbes, Leviathan, III, 32

32 The prophecies are the strongest proof of Jesus Christ. It is for them also that God has made most provision; for the event which has fulfilled them is a miracle existing since the birth of the Church to the end. So God has raised up prophets during sixteen hundred years, and, during four hundred years afterwards, He has scattered all these prophecies among all the Jews, who carried

them into all parts of the world. Such was the preparation for the birth of Jesus Christ, and, as His Gospel was to be believed by all the world, it was not only necessary that there should be prophecies to make it believed, but that these prophecies should exist throughout the whole world, in order to make it embraced by the whole world.

Pascal, Pensees, XI, 706

33 If one man alone had made a book of predictions about Jesus Christ, as to the time and the manner, and Jesus Christ had come in conformity to these prophecies, this fact would have infinite weight.

But there is much more here. Here is a succession of men during four thousand years, who, consequently and without variation, come, one after another, to foretell this same event. Here is a whole people (the Jews] who announce it and who have existed for four thousand years, in order to give corporate testimony of the assurances which they have and from which they cannot be diverted by whatever threats and persecutions people may make against them. This is far more important.

Pascal, Pensées, XI, 710

34 The Jews, in slaying Him in order not to receive Him as the Messiah, have given Him the final proof of being the Messiah.

And in continuing not to recognise Him, they made themselves irreproachable witnesses. Both in slaying Him and in continuing to deny Him, they have fulfilled the prophecies.

Pascal, Pensées, XII, 761

35 Prophecy, or revelation, is sure knowledge revealed by God to man. A prophet is one who interprets the revelations of God to those who are unable to attain to sure knowledge of the matters revealed, and therefore can only apprehend them by simple faith.

Spinoza, Theologico-Political Treatise, I

36 The authority of the prophets has weight only in matters of morality, and... their speculative doctrines affect us little.

Spinoza, Theologico-Political Treatise, Pref.

37 No one except Christ received the revelations of God without the aid of imagination, whether in words or vision. Therefore the power of prophecy implies not a peculiarly perfect mind, but a peculiarly vivid imagination.

Spinoza, Theologico-Political Treatise, I

38 All prophecies are real miracles, and as such only, can be admitted as proofs of any revelation. If it did not exceed the capacity of human nature to foretell future events, it would be absurd to employ any prophecy as an argument for a divine mission or authority from heaven.

Hume, Concerning Human Understanding, X, 101

39 It must be admitted, a prophet's profession is a wretched one. For every one who, like Elijah, goes traveling from planet to planet in a shining chariot of light drawn by four white horses, there are a hundred who go on foot and must beg their dinner from door to door.

Voltaire, Philosophical Dictionary: Prophets

40 Any man may grave tablets of stone, or buy an oracle, or feign secret intercourse with some divinity, or train a bird to whisper in his ear, or find other vulgar ways of imposing on the people. He whose knowledge goes no further may perhaps gather round him a band of fools; but he will never found an empire, and his extravagances will quickly perish with him. Idle tricks form a passing tie; only wisdom can make it lasting.

Rousseau, Social Contract, 11, 7

41 But, Mousie, thou art no thy lane
In proving foresight may be vain!
The best-laid schemes o' mice and men
Gang aft a-gley,
And lea'e us nought but grief and pain
For promised joy.

Burns, To a Mouse

42 The future has not yet happened. But it is not *on that account* less necessary than the past, since the past did not become necessary by coming into existence, but on the contrary proved by coming into existence that it was not necessary. If the past had become necessary it would not be possible to infer the opposite about the future, but it would rather follow that the future also was necessary. If necessity could gain a foothold at a single point, there would no longer be any distinguishing between the past and the future. To assume to predict the future (prophecy) and to assume to understand the necessity of the past are one and the same thing, and only custom makes the one seem more plausible than the other to a given generation.

Kierkegaard, Philosophical Fragments, Interlude

43 Always the seer is a sayer. Somehow his dream is told; somehow he publishes it with solemn joy: sometimes with pencil on canvas, sometimes with chisel on stone, sometimes in towers and aisles of granite, his soul's worship is builded; sometimes in anthems of indefinite music; but clearest and most permanent, in words.

The man enamored of this excellency becomes its priest or poet. The office is coeval with the world. But observe the condition, the spiritual limitation of the office. The spirit only can teach.

Not any profane man, not any sensual, not any liar, not any slave can teach, but only he can give, who has; he only can create, who is. The man on whom the soul descends, through whom the soul speaks, alone can teach. Courage, piety, love, wisdom, can teach; and every man can open his door to these angels, and they shall bring him the gift of tongues. But the man who aims to speak as books enable, as synods use, as the fashion guides, and as interest commands, babbles. Let him hush.

Emerson, Address to Harvard Divinity School

44 There are always so many conjectures as to the issue of any event that however it may end there will always be people to say: "I said then that it would be so," quite forgetting that amid their innumerable conjectures many were to quite the contrary effect.

Tolstoy, War and Peace, X, 1

45 The prophet has drunk more deeply than anyone of the cup of bitterness, but his countenance is so unshaken

and he speaks such mighty words of cheer that his will becomes our will, and our life is kindled at his own.

William James, Psychology, XXVI

46 The attempt to translate Prophetic Vision, expressed in the language of poetic truth, into a metaphysical blueprint, expressed in the language of scientific truth, has two untoward effects. It forces us to direct our attention from what is essential and momentous in the poetic truth of Prophetic Vision to the trivial and intrinsically insoluble question of its relation to scientific truth; and it substitutes a provisional report for a timeless intuition. Even if we could succeed in translating poetic truth into scientific truth at the risk of robbing it of its meaning and value, our scientific formula would no sooner have been drafted than it would be already obsolete.

Toynbee, An Historian's Approach to Religion, IX

20.11 Miracles

As the reader might expect, the writers quoted here divide rather sharply into those who accept miracles as certainly within God's power to perform and those who reject miracles as impossible because they violate the laws of nature. One of the subtle issues involved in this dispute is whether a miracle consists in the doing of the impossible or is the occurrence of what is only improbable, not impossible. The theologians who offer us definitions of the miraculous, and provide us with the classification of different types of miracles, take the latter view: even an omnipotent God cannot do the impossible; the laws of nature do not express

necessities that make their contravention by miracles consist in doing the impossible. The philosophers (who reject miracles), among them especially Spinoza and Hume, differ among themselves on the question of whether or not the laws of nature express necessities that can be known by us; if not, as Hume appears to maintain, miracles may present us with striking exceptions to the normal course of nature, but they cannot be judged impossible.

The reader's attention is called to Augustine's remark that the existence of man himself—at once an animal and rational—is a greater miracle than any other; to Pascal's treatment of the miracles performed by Christ as evidence of his divinity and of the truth of his teachings; to Gibbon's skeptical treatment of the miracles that were supposed to have occurred in the early centuries of Christianity; to Kierkegaard's insight, expressed also by Dostoevsky, that faith in Christ precedes and underlies belief in the miracles he performed; and to Santayana's observation that science has its miracles, too.

Matters relevant to the discussion of miracles will be found in Section 19.1 on Nature AND THE Natural, in Section 19.3 on Cause, in Section 19.4 on Chance, and in Section 20.12 on Superstition.

■ ■ ■

- 1 Moses stretched forth his hand over the sea, and the sea returned to his strength when the morning appeared; and the Egyptians fled against it; and the Lord overthrew the Egyptians in the midst of the sea.

And the waters returned, and covered the chariots, and the horsemen, and all the host of Pharaoh that came into the sea after them; there remained not so much as one of them.

But the children of Israel walked upon dry land in the midst of the sea; and the waters were a wall unto them on their right hand, and on their left.

Thus the Lord saved Israel that day out of the hand of the Egyptians; and Israel saw the Egyptians dead upon the sea shore.

And Israel saw that great work which the Lord did upon the Egyptians: and the people feared the Lord, and believed the Lord, and his servant Moses.

Exodus 14:27-31

2 Neb-u-chad-nez-zar spake and said unto them. Is it true, O Sha-drach. Me-shach, and Abed-nego, do not ye serve my gods, nor worship the golden image which I have set up?

Now if ye be ready that at what time ye hear the sound of the cornet, flute, harp, sackbut, psaltery, and dulcimer, and all kinds of musick, ye fall down and worship the image which I have made; well: but if ye worship not, ye shall be cast the same hour into the midst of a burning fiery furnace; and who is that God that shall deliver you out of my hands?

Sha-drach, Me-shach, and Abed-nego, answered and said to the king, O Neb-u-chad-nez-zar, we are not careful to answer thee in this matter.

If it be so, our God whom we serve is able to deliver us from the burning fiery furnace, and he will deliver us out of thine hand, O king.

But if not, be it known unto thee, O king, that we will not serve thy gods, nor worship the golden image which

thou hast set up.

Then was Neb-u-chad-nez-zar full of fury, and the form of his visage was changed against Sha-drach, Me-shach, and Abed-nego: therefore he spake, and commanded that they should heat the furnace one seven times more than it was wont to be heated.

And he commanded the most mighty men that were in his army to bind Sha-drach, Me-shach, and Abed-nego, and to cast them into the burning fiery furnace.

Then these men were bound in their coats, their hosen, and their hats, and their other garments, and were cast into the midst of the burning fiery furnace.

Therefore because the king's commandment was urgent, and the furnace exceeding hot, the flame of the fire slew those men that took up Sha-drach, Me-shach, and Abed-nego.

And these three men, Sha-drach, Me-shach, and Abed-nego, fell down bound into the midst of the burning fiery furnace.

Then Neb-u-chad-nez-zar the king was astonished, and rose up in haste, and spake, and said unto his counsellors. Did not we cast three men bound into the midst of the fire? They answered and said unto the king. True, O king.

He answered and said, Lo, I see four men loose, walking in the midst of the fire, and they have no hurt; and the form of the fourth is like the Son of God.

Then Neb-u-chad-nez-zar came near to the mouth of the burning fiery furnace, and spake, and said, Sha-drach, Me-shach, and Abed-nego, ye servants of the most high God, come forth, and come hither. Then Sha-drach, Me-shach, and Abed-nego, came forth of the midst of the fire.

And the princes, governors, and captains, and the king's counsellors, being gathered together, saw these men, upon whose bodies the fire had no power, nor was an hair of their head singed, neither were their coats changed, nor the smell of fire had passed on them.

Daniel 3:14-27

3 When he was come down from the mountain, great multitudes followed him.

And, behold, there came a leper and worshipped him, saying. Lord, if thou wilt, thou canst make me clean.

And Jesus put forth his hand, and touched him, saying, I will; be thou clean. And immediately his leprosy was cleansed.

And Jesus saith unto him, Sec thou tell no man; but go thy way, shew thyself to the priest, and offer the gift that Moses commanded, for a testimony unto them.

Matthew 8:1-4

4 When Jesus departed thence, two blind men followed him, crying, and saying, Thou son of David, have mercy on us.

And when he was come into the house, the blind men came to him: and Jesus saith unto them, Believe ye that I am able to do this? They said unto him, Yea, Lord.

Then touched he their eyes, saying, According to your faith be it unto you.

And their eyes were opened; and Jesus straitly charged them, saying. See that no man know it.

But they, when they were departed, spread abroad his fame in all that country.

As they went out, behold, they brought to him a dumb man possessed with a devil.

And when the devil was cast out, the dumb spake; and the multitudes marvelled, saying, It was never so seen in Israel.

But the Pharisees said, He casteth out devils through the prince of the devils.

And Jesus went about all the cities and villages, teaching in their synagogues, and preaching the gospel of the kingdom, and healing every sickness and every disease among the people.

Matthew 9:27-35

5 Straightway he constrained his disciples to get into the ship, and to go to the other side before unto Beth-sa-i-da, while he sent away the people.

And when he had sent them away, he departed into a mountain to pray.

And when even was come, the ship was in the midst of the sea, and he alone on the land.

And he saw them toiling in rowing; for the wind was contrary unto them: and about the fourth watch of the night he cometh unto them, walking upon the sea, and would have passed by them.

But when they saw him walking upon the sea, they supposed it had been a spirit, and cried out:

For they all saw him, and were troubled. And immediately he talked with them, and saith unto them, Be of good cheer: it is I; be not afraid.

And he went up unto them into the ship; and the wind ceased: and they were sore amazed in themselves beyond measure, and wondered.

For they considered not the miracle of the loaves: for their heart was hardened.

Mark 6:45-52

6 The Pharisees came forth, and began to question with him, seeking of him a sign from heaven, tempting him.

And he sighed deeply in his spirit, and saith. Why doth this generation seek after a sign? verily I say unto you, There shall no sign be given unto this generation.

Mark 8:11-12

7 And the third day there was a marriage in Cana of Galilee; and the mother of Jesus was there:

And both Jesus was called, and his disciples, to the marriage.

And when they wanted wine, the mother of Jesus saith unto him, They have no wine.

Jesus saith unto her, Woman, what have I to do with thee? mine hour is not yet come.

His mother saith unto the servants, Whatsoever he saith unto you, do it.

And there were set there six waterpots of stone, after the manner of the purifying of the Jews, containing two or three firkins apiece.

Jesus saith unto them. Fill the waterpots with water. And they filled them up to the brim.

And he saith unto them. Draw out now, and bear unto the governor of the feast. And they bare it.

When the ruler of the feast had tasted the water that was made wine, and knew not whence it was: (but the servants which drew the water knew;) the governor of the feast called the bridegroom,

And saith unto him. Every man at the beginning doth set forth good wine; and when men have well drunk, then

that which is worse: but thou hast kept the good wine until now.

This beginning of miracles did Jesus in Cana of Galilee, and manifested forth his glory; and his disciples believed on him.

John 2:1-11

8 Then said Jesus unto him. Except ye see signs and wonders, ye will not believe.

John 4:48

9 The standing miracle of this visible world is little thought of, because always before us, yet, when we arouse ourselves to contemplate it, it is a greater miracle than the rarest and most unheard-of marvels. For man himself is a greater miracle than any miracle done through his instrumentality-

Augustine, City of God, X, 12

10 God, Who made the visible heaven and earth, does not disdain to work visible miracles in heaven or earth, that He may thereby awaken the soul which is immersed in things visible to worship Himself, the Invisible.

Augustine, City of God, X, 12

11 When we declare the miracles which God has wrought, or will yet work, and which we cannot bring under the very eyes of men, sceptics keep demanding that we shall explain these marvels to reason. And because we cannot do so, inasmuch as they are above human comprehension, they suppose we are speaking falsely. These persons themselves, therefore, ought to account

for all these marvels which we either can or do see. And if they perceive that this is impossible for man to do, they should acknowledge that it cannot be concluded that a thing has not been or shall not be because it cannot be reconciled to reason, since there are things now in existence of which the same is true.

Augustine, City of God, XXI, 5

- 12 The word miracle is derived from admiration, which arises when an effect is manifest, and its cause is hidden, as when a man sees an eclipse of the sun without knowing its cause. . . . Now the cause of an effect which makes its appearance may be known to one, but unknown to others. And so a thing is wonderful to one man, and not at all to others; as an eclipse is to a rustic, but not to an astronomer. Now a miracle is called so as being full of wonder, and as having a cause absolutely hidden from all; and this cause is God. Therefore those things which God does outside those causes which we know, are called miracles.

Aquinas, Summa Theologica, I, 105, 7

- 13 A miracle is said to go beyond the hope of nature, not beyond the hope of grace, which hope comes from faith, by which we believe in the future resurrection.

Aquinas, Summa Theologica, I, 105, 7

- 14 A miracle properly so called is when something is done outside the order of nature. But it is not enough for a miracle if something is done outside the order of any particular nature; for otherwise anyone would perform a miracle by throwing a stone upwards, as such a thing is

outside the order of the stone's nature. So for something to be called a miracle it is required that it be against the order of the whole created nature. But God alone can do this, because, whatever an angel or any other creature does by its own power, is according to the order of created nature, and thus it is not a miracle. Hence God alone can work miracles.

Aquinas, Summa Theologica, I, 110, 4

- 15 If we take a miracle in the strict sense, the demons cannot work miracles, nor can any creature, but God alone, since in the strict sense a miracle is something done outside the order of the entire created nature, under which order every power of a creature is contained. But sometimes miracles may be taken in a wide sense for whatever exceeds the human power and experience. And thus demons can work miracles, that is, things which rouse man's astonishment, by reason of their being beyond his power and outside his sphere of knowledge. For even a man by doing what is beyond the power and knowledge of another leads him to marvel at what he has done, so that in a way he seems to that man to have worked a miracle.

Aquinas, Summa Theologica, I, 114, 4

- 16 *Glendower*. I can call spirits from the vasty deep.
Hotspur. Why, so can I, or so can any man; But will they come when you do call for them?

Shakespeare, I Henry IV, III, i, 53

- 17 How long, said Don *Quixote*, do you reckon that I have been in the Cave? A little above an Hour, answered

Sancho. That's impossible, said Don *Quixote*, for I saw Morning and Evening, and Evening and Morning, three times since; so that I could not be absent less than three Days from this upper World. Ay, ay, quoth *Sancho*, my Master's in the Right; for these Inchantments, that have the greatest Share in all his Concerns, may make That seem three Days and three Nights to him, which is but an Hour to other People. It must be so, said Don *Quixote*. I hope. Sir, said the Scholar, you have eaten something in all that time. Not one Morsel, reply'd Don *Quixote*, neither have had the least desire to Eat, or so much as thought of it all the while. Do not they that are Inchant'd sometimes Eat? ask'd the Scholar. They never do, answered Don *Quixote*, and consequently they are never troubled with exonerating the Dregs of Food; tho' 'tis not unlikely that their Nails, their Beards and Hair still grow. Do they never sleep neither, said *Sancho*? Never, said Don *Quixote*; at least they never clos'd their Eyes while I was among 'em, nor I neither. This makes good the Saying, quoth *Sancho*, *Tell me thy Company, and I'll tell thee what thou art*. Troth! you have all been in-chanted together.

Cervantes, Don Quixote, II, 23

- 18 As for the narrations touching the prodigies and miracles of religions, they are either not true, or not natural; and therefore impertinent for the story of nature.

Bacon, Advancement of Learning, Bk. II, I, 4

- 19 The testimony that men can render of divine calling can be no other than the operation of miracles, or true prophecy (which also is a miracle), or extraordinary felicity. And therefore, to those points of religion which

have been received from them that did such miracles, those that are added by such as approve not their calling by some miracle obtain no greater belief than what the custom and laws of the places in which they be educated have wrought into them. For as in natural things men of judgement require natural signs and arguments, so in supernatural things they require signs supernatural (which are miracles) before they consent inwardly and from their hearts.

Hobbes, Leviathan, I, 12

20 Seeing... miracles now cease, we have no sign left whereby to acknowledge the pretended revelations or inspirations of any private man; nor obligation to give ear to any doctrine, farther than it is conformable to the Holy Scriptures.

Hobbes, Leviathan, III, 32

21 It belongeth to the nature of a miracle that it be wrought for the procuring of credit to God's messengers, ministers, and prophets, that thereby men may know they are called, sent, and employed by God, and thereby be the better inclined to obey them.

Hobbes, Leviathan, III, 37

22 That Miracles are ceased, I can neither prove, nor absolutely deny, much less define the time and period of their cessation: that they survived Christ, is manifest upon the Record of Scripture: that they out-lived the Apostles also, and were revived at the Conversion of Nations, many years after, we cannot deny, if we shall not question those Writers whose testimonies we do not

controvert in points that make for our own opinions; therefore that may have some truth in it that is reported by the Jesuites of their Miracles in the *Indies*; I could wish it were true, or had any other testimony than their own Pens. They may easily believe those Miracles abroad, who daily conceive a greater at home, the transmutation of those visible elements into the Body and Blood of our Saviour: for the conversion of Water into Wine, which he wrought in *Cana*, or what the Devil would have had him done in the Wilderness, of Stones into Bread, compared to this, will scarce deserve the name of a Miracle. Though indeed to speak properly, there is not one Miracle greater than another, they being the extraordinary effects of the Hand of God, to which all things are of an equal facility; and to create the World as easie as one single Creature.

Sir Thomas Browne, Religio Medici, I, 27

- 23 That Miracles have been, I do believe; that they may yet be wrought by the living, I do not deny: but have no confidence in those which are fathered on the dead; and this hath ever made me suspect the efficacy of reliques, to examine the bones, question the habits and appurtenances of Saints, and even of Christ himself.

Sir Thomas Browne, Religio Medici, I, 28

- 24 It is not possible to have a reasonable belief against miracles.

Pascal, Pensées, XIII, 815

- 25 Jesus Christ performed miracles, then the apostles, and the first saints in great number; because the prophecies not being yet accomplished, but in the process of being

accomplished by them, the miracles alone bore witness to them. It was foretold that the Messiah should convert the nations. How could this prophecy be fulfilled without the conversion of the nations? And how could the nations be converted to the Messiah, if they did not see this final effect of the prophecies which prove Him? Therefore, till He had died, risen again, and converted the nations, all was not accomplished; and so miracles were needed during all this time. Now they are no longer needed against the Jews; for the accomplished prophecies constitute a lasting miracle.

Pascal, Pensées, XIII, 838

- 26 As men are accustomed to call Divine the knowledge which transcends human understanding, so also do they style Divine, or the work of God, anything of which the cause is not generally known: for the masses think that the power and providence of God are most clearly displayed by events that are extraordinary and contrary to the conception they have formed of nature, especially if such events bring them any profit or convenience: they think that the clearest possible proof of God's existence is afforded when nature, as they suppose, breaks her accustomed order, and consequently they believe that those who explain or endeavour to understand phenomena or miracles through their natural causes are doing away with God and His providence. They suppose, forsooth, that God is inactive so long as nature works in her accustomed order, and *vice versa*, that the power of nature and natural causes are idle so long as God is acting: thus they imagine two powers distinct one from the other, the power of God and the power of nature, though the latter is in a sense determined by God, or (as

most people believe now) created by Him. What they mean by either, and what they understand by God and nature they do not know, except that they imagine the power of God to be like that of some royal potentate, and nature's power to consist in force and energy.

The masses then style unusual phenomena "miracles," and partly from piety, partly for the sake of opposing the students of science, prefer to remain in ignorance of natural causes, and only to hear of those things which they know least, and consequently admire most.

Spinoza, Theologico-Political Treatise, VI

27 A miracle is an event of which the causes cannot be explained by the natural reason through a reference to ascertained workings of nature; but since miracles were wrought according to the understanding of the masses, who are wholly ignorant of the workings of nature, it is certain that the ancients took for a miracle whatever they could not explain by the method adopted by the unlearned in such cases, namely, an appeal to the memory a recalling of something similar, which is ordinarily regarded without wonder; for most people think they sufficiently understand a thing when they have ceased to wonder at it. The ancients, then, and indeed most men up to the present day, had no other criterion for a miracle; hence we cannot doubt that many things are narrated in Scripture as miracles of which the causes could easily be explained by reference to ascertained workings of nature.

Spinoza, Theologico-Political Treatise, VI

28 Though the common experience and the ordinary course of things have justly a mighty influence on the minds of men, to make them give or refuse credit to anything proposed to their belief; yet there is one case, wherein the strangeness of the fact lessens not the assent to a fair testimony given of it. For where such supernatural events are suitable to ends aimed at by Him who has the power to change the course of nature, there, *under such circumstances*, that may be the fitter to procure belief, by how much the more they are beyond or contrary to ordinary observation. This is the proper case of *miracles*, which, well attested, do not only find credit themselves, but give it also to other truths, which need such confirmation.

Locke, Concerning Human Understanding, Bk. IV, XVI, 13

29 Sometimes an event may not, *in itself*, seem to be contrary to the laws of nature, and yet, if it were real, it might, by reason of some circumstances, be denominated a miracle; because, in *fact*, it is contrary to these laws. Thus if a person, claiming a divine authority, should command a sick person to be well, a healthful man to fall down dead, the clouds to pour rain, the winds to blow, in short, should order many natural events, which immediately follow upon his command; these might justly be esteemed miracles, because they are really, in this case, contrary to the law's of nature. For if any suspicion remain, that the event and command concurred by accident, there is no miracle and no transgression of the law's of nature. If this suspicion be removed, there is evidently a miracle, and a transgression of these laws; because nothing can be more contrary to nature than that the voice or command of a man should have such an

influence. A miracle may be accurately defined, *a transgression of a law of nature by a particular volition of the Deity, or by the interposition of some invisible agent*. A miracle may either be discoverable by men or not. This alters not its nature and essence. The raising of a house or ship into the air is a visible miracle. The raising of a feather, when the wind wants ever so little of a force requisite for that purpose, is as real a miracle, though not so sensible with regard to us,

Hume, Concerning Human Understanding, X, 90, fn,

- 30 A miracle is a violation of the law's of nature; and as a firm and unalterable experience has established these laws, the proof against a miracle, from the very nature of the fact, is as entire as any argument from experience can possibly be imagined. Why is it more than probable, that all men must die; that lead cannot, of itself, remain suspended in the air; that fire consumes wood, and is extinguished by water; unless it be, that these events are found agreeable to the laws of nature, and there is required a violation of these laws, or in other words, a miracle to prevent them? Nothing is esteemed a miracle, if it ever happen in the common course of nature. It is no miracle that a man, seemingly in good health, should die on a sudden: because such a kind of death, though more unusual than any other, has yet been frequently observed to happen. But it is a miracle, that a dead man should come to life; because that has never been observed in any age or country. There must, therefore, be a uniform experience against every miraculous event, otherwise the event would not merit that appellation. And as a uniform experience amounts to a proof, there is here a direct and full *proof*, from the nature of the fact,

against the existence of any miracle; nor can such a proof be destroyed, or the miracle rendered credible, but by an opposite proof, which is superior.

The plain consequence is (and it is a general maxim worthy of our attention), "That no testimony is sufficient to establish a miracle, unless the testimony be of such a kind, that its falsehood would be more miraculous, than the fact, which it endeavours to establish; and even in that case there is a mutual destruction of arguments, and the superior only gives us an assurance suitable to that degree of force, which remains, after deducting the inferior." When anyone tells me, that he saw a dead man restored to life, I immediately consider with myself, whether it be more probable, that this person should either deceive or be deceived, or that the fact, which he relates, should really have happened. I weigh the one miracle against the other; and according to the superiority, which I discover, I pronounce my decision, and always reject the greater miracle. If the falsehood of his testimony would be more miraculous, than the event which he relates; then, and not till then, can he pretend to command my belief or opinion.

Hume, Concerning Human Understandings X, 90-91

- 31 The many instances of forged miracles, and prophecies, and supernatural events, which, in all ages, have either been detected by contrary evidence, or which detect themselves by their absurdity, prove sufficiently the strong propensity of mankind to the extraordinary and the marvellous, and ought reasonably to beget a suspicion against all relations of this kind.

Hume, Concerning Human Understandings X, 93

32 Though the Being to whom the miracle is ascribed, be, in this case, Almighty, it does not, upon that account, become a whit more probable; since it is impossible for us to know the attributes or actions of such a Being, otherwise than from the experience which we have of his productions, in the usual course of nature.

Hume, Concerning Human Understanding, X, 99

33 I mentioned Hume's argument against the belief of miracles, that it is more probable that the witnesses to the truth of them are mistaken, or speak falsely, than that the miracles should be true. Johnson, "Why, Sir, the great difficulty of proving miracles should make us very cautious in believing them. But let us consider; although God has made Nature to operate by certain fixed laws, yet it is not unreasonable to think that he may suspend those laws, in order to establish a system highly advantageous to mankind. Now the Christian religion is a most beneficial system, as it gives us light and certainty where we were before in darkness and doubt. The miracles which prove it are attested by men who had no interest in deceiving us; but who, on the contrary, were told that they should suffer persecution, and did actually lay down their lives in confirmation of the truth of the facts which they asserted. Indeed, for some centuries the heathens did not pretend to deny the miracles; but said they were performed by the aid of evil spirits. This is a circumstance of great weight. Then, Sir, when we take the proofs derived from prophecies which have been so exactly fulfilled, we have most satisfactory evidence. Supposing a miracle possible, as to which, in my opinion, there can be no doubt, we have as strong evidence for

the miracles in support of Christianity, as the nature of the thing admits."

Boswell, Life of Johnson (July 21, 1763)

- 34 The frequent repetition of miracles serves to provoke, where it does not subdue, the reason of mankind.

Gibbon, Decline and Fall of the Roman Empire, XX

- 35 The philosopher, who with calm suspicion examines the dreams and omens, the miracles and prodigies, of profane or even of ecclesiastical history, will probably conclude that, if the eyes of the spectators have sometimes been deceived by fraud, the understanding of the readers has much more frequently been insulted by fiction. Every event, or appearance, or accident, which seems to deviate from the ordinary course of nature, has been rashly ascribed to the immediate action of the Deity.

Gibbon, Decline and Fall of the Roman Empire, XX

- 36 [Clovis], the victorious king of the Franks, proceeded without delay to the siege of Angouleme. At the sound of his trumpets the walls of the city imitated the example of Jericho, and instantly fell to the ground; a splendid miracle, which may be reduced to the supposition that some clerical engineers had secretly undermined the foundations of the rampart.

Gibbon, Decline and Fall of the Roman Empire, XXXVIII

- 37 Such is the progress of credulity, that miracles, most doubtful on the spot and at the moment, will be received with implicit faith at a convenient distance of time and space.

38 We do not adopt the right point of view in thinking of Christ only as a historical bygone personality. So regarded, the question is asked: what are we to make of his birth, his father and mother, his early domestic relations, his miracles, etc.?—i.e., what is he *unspiritually* regarded? Considered only in respect of his talents, character and morality, as a teacher and so forth, we place him in the same category with Socrates and others, though his morality may be ranked higher. But excellence of character, morality, etc.—all this is not the *ne plus ultra* in the requirements of spirit—does not enable man to gain the speculative idea of spirit for his conceptive faculty. If Christ is to be looked upon only as an excellent, even impeccable individual, and nothing more, the conception of the speculative idea, of absolute truth is ignored. But this is the desideratum, the point from which we have to start. Make of Christ what you will, exegetically, critically, historically—demonstrate as you please, how the doctrines of the Church were established by councils, attained currency as the result of this or that episcopal interest or passion, or originated in this or that quarter; let all such circumstances have been what they might—the only concerning question is: what is the idea or the truth in and for itself?

Further, the real attestation of the divinity of Christ is the witness of one's own spirit—not miracles; for only spirit recognizes spirit. The miracles may lead the way to such recognition. A miracle implies that the natural course of things is interrupted: but it is very much a question of relation what we call the "natural course"; and the phenomena of the magnet might, under cover of

this definition, be reckoned miraculous. Nor does the miracle of the divine mission of Christ prove anything; for Socrates likewise introduced a new self-consciousness on the part of spirit, diverse from the traditional tenor of men's conceptions. The main question is not his divine mission but the revelation made in Christ and the purport of his mission. Christ himself blames the Pharisees for desiring miracles of him, and speaks of false prophets who will perform miracles.

Hegel, Philosophy of History, Pt. III, III, 2

39 The Age of Miracles past? The Age of Miracles is for ever here!

Carlyle, The Hero as Priest

40 Jesus Christ belonged to the true race of prophets. He saw with open eye the mystery of the soul. Drawn by its severe harmony, ravished with its beauty, he lived in it, and had his being there. Alone in all history he estimated the greatness of man. One man was true to what is in you and me. He saw that God incarnates himself in man, and evermore goes forth anew to take possession of his World. He said, in this jubilee of sublime emotion, 'I am divine. Through me, God acts; through me, speaks. Would you see God, see me; or see thee, when thou also thinkest as I now think.' But what a distortion did his doctrine and memory suffer in the same, in the next, and the following ages! There is no doctrine of the Reason which will bear to be taught by the Understanding. The understanding caught this high chant from the poet's lips, and said, in the next age, 'This was Jehovah come down out of heaven. I will kill you, if you say he was a man.' The

idioms of his language and the figures of his rhetoric have usurped the place of his truth; and churches are not built on his principles, but on his tropes. Christianity became a Mythos, as the poetic reaching of Greece and of Egypt, before. He spoke of miracles; for he felt that man's life was a miracle, and all that man doth, and he knew that this daily miracle shines as the character ascends. But the word Miracle, as pronounced by Christian churches, gives a false impression; it is Monster. It is not one with the blowing clover and the falling rain.

Emerson, Address to Harvard Divinity School

- 41 If there is to be any sense in the assertion that miracles prove who Christ is, we must begin with not knowing who He is, that is to say, in the situation of contemporaneousness with an individual man, who is like other men, in whom there is nothing directly to be seen, an individual man who thereupon performs a miracle and himself says that it is a miracle he performs. What does this signify? It signifies that this individual man makes himself out to be more than man, makes himself out to be something pretty near to being God. Is not this cause for offence? You see something inexplicable, miraculous (and that is all), he himself says that it is a miracle—and with your own eyes you behold the individual man. The miracle can prove nothing; for if you do not believe that he is what he says he is, you deny the miracle. A miracle can make one attentive—now thou art in a state of tension, and all depends upon what thou dost choose, offence or faith. It is thy heart that must be revealed.

Kierkegaard, Training in Christianity, II, B

42 It is almost impossible to exaggerate the proneness of the human mind to take miracles as evidence, and to seek for miracles as evidence; or the extent to which religion, and religion of a true and admirable kind, has been, and is still, held in connection with a reliance upon miracles. This reliance will long outlast the reliance on the supernatural prescience of prophecy, for it is not exposed to the same tests. To pick Scripture-miracles one by one to pieces is an odious and repulsive task; it is also an unprofitable one, for whatever we may think of the affirmative demonstrations of them, a negative demonstration of them is, from the circumstances of the case, impossible. And yet the human mind is assuredly passing away, however slowly, from this hold of reliance also; and those who make it their stay will more and more find it fail them, will more and more feel themselves disturbed, shaken, distressed, and bewildered.

Arnold, Literature and Dogma, V

43 It is not miracles that dispose realists to belief. The genuine realist, if he is an unbeliever, will always find strength and ability to disbelieve in the miraculous, and if he is confronted with a miracle as an irrefutable fact he would rather disbelieve his own senses than admit the fact. Even if he admits it, he admits it as a fact of nature till then unrecognised by him. Faith does not, in the realist, spring from the miracle but the miracle from faith. If the realist once believes, then he is bound by his very realism to admit the miraculous also. The Apostle Thomas said that he would not believe till he saw, but when he did see he said, "My Lord and my God!" Was it the miracle forced him to believe? Most likely not, but he believed solely because he desired to believe and possibly he fully

believed in his secret heart even when he said, "I do not believe till I see."

Dostoevsky, Brothers Karamazov, Pt. I, I, 5

44 Miracles are so called because they excite wonder. In unphilosophical minds any rare or unexpected thing excites wonder, while in philosophical minds the familiar excites wonder also, and the laws of nature, if we admit such laws, excite more wonder than the detached events. Each morning the sunrise excites wonder in the poet, and the order of the solar system excites it every night in the astronomer. Astronomy explains the sunrise, but what shall explain the solar system? The universe, which would explain everything, is the greatest of wonders, and a perpetual miracle.

Santayana, The Idea of Christ in the Gospels

45 Science, which thinks to make belief in miracles impossible, is itself belief in miracles—in the miracles best authenticated by history and by daily life.

Santayana, Life of Reason, III, 2

20.12 Superstition

The condemnation of superstition is shared equally by those who defend religion or are apologists for it and by those who reject religion itself, the latter on the ground that it is nothing but superstition. The reader will find Lucretius in antiquity, Gibbon in the eighteenth century (the so-called "age of reason"), and Freud in our own time to be eloquent exponents of this view. Those who take the opposite view,

that a sharp line can be drawn between superstitious beliefs and practices, on the one hand, and valid religious beliefs and genuine religious rites, on the other, differ among themselves about precisely where and how to draw the line.

For example, some of the writers represented here regard the belief in miracles as superstitious; others, the belief in sorcerers; others, the belief in omens or portents and in astrological predictions; and still others call idolaters superstitious or those who believe in magic, witchcraft, and the influence of demons. Such writers include outstanding Christian theologians as well as secular philosophers who tend to be skeptical about many of the doctrines or dogmas of orthodox religion. All alike agree that superstition is a vice directly opposed to religion, and that superstition must be overcome to purify religion of the dross that encrusts it. Even Voltaire admits that the horrible crimes with which religion is often charged should be attributed to superstition, not true religion; though he also remarks that a people not at all superstitious would have to be a community of philosophers and that true faith for one sect is superstition for another.

Since the discussion here turns on the line that divides superstition from religion, the reader would do well to compare what is said here with what is said in Section 20.1 on The Distinguishing Features of Religion.

■ ■ ■

- 1 When human life to view lay foully prostrate upon earth
crushed down under the weight of religion, who showed
her head from the quarters of heaven with hideous aspect

lowering upon mortals, a man of Greece [Epicurus] ventured first to lift up his mortal eyes to her face and first to withstand her to her face. Him neither story of gods nor thunderbolts nor heaven with threatening roar could quell: they only chafed the more the eager courage of his soul, filling him with desire to be the first to burst the fast bars of nature's portals. Therefore the living force of his soul gained the day: on he passed far beyond the flaming walls of the world and traversed throughout in mind and spirit the immeasurable universe; whence he returns a conqueror to tell us what can, what cannot come into being; in short on what principle each thing has its powers defined, its deepset boundary mark. Therefore religion is put under foot and trampled upon in turn; us his victory brings level with heaven.

Lucretius, Nature of Things, I

- 2 Often and often that very religion has given birth to sinful and unholy deeds. Thus in Aulis the chosen chieftains of the Danai, foremost of men, foully polluted with Iphianassa's blood the altar of the Trivian maid. Soon as the fillet encircling her maiden tresses shed itself in equal lengths adown each cheek, and soon as she saw her father standing sorrowful before the altars and beside him the ministering priests hiding the knife and her countrymen at sight of her shedding tears, speechless in terror she dropped down on her knees and sank to the ground. Nor aught in such a moment could it avail the luckless girl that she had first bestowed the name of father on the king. For lifted up in the hands of the men she was carried shivering to the altars, not after due performance of the customary rites to be escorted by the clear-ringing bridal song, but in the very season of

marriage, stainless maid mid the stain of blood, to fall a sad victim by the sacrificing stroke of a father, that thus a happy and prosperous departure might be granted to the fleet. So great the evils to which religion could prompt!

Lucretius, Nature of Things, I

- 3 Fear in sooth holds so in check all mortals, because they see many operations go on in earth and heaven, the causes of which they can in no way understand, believing them therefore to be done by power divine.

Lucretius, Nature of Things, I

- 4 If you shall suppose that the deeds of Hercules surpass his, you will be carried still farther away from true reason. For what would yon great gaping maw of Nemean lion now harm us and the bristled Arcadian boar? Ay or what could the bull of Crete do and the hydra plague of Lerna, fenced round with its envenomed snakes? Or how could the triple-breasted might of threefold Gcryon, how could the birds with brazen arrowy feathers that dwelt in the Stymphalian swamps do us such mighty injury, and the horses of Thracian Diomedes breathing fire from their nostrils along the Bistonian borders and Ismara? And the serpent which guards the bright golden apples of the Hes-perides, fierce, dangerous of aspect, girding the tree's stem with his enormous body, what harm pray could he do us beside the Atlantic shore and its sounding main, which none of us goes near and no barbarian ventures to approach? And all other monsters of the kind which have been destroyed, if they had not been vanquished, what harm could they do, I ask, though now alive? None methinks: the earth even now so abounds to

repletion in wild beasts and is filled with troublous terror throughout woods and great mountains and deep forests; places which we have it for the most part in our own power to shun. But unless the breast is cleared, what battles and dangers must then find their way into us in our own despite! What poignant cares inspired by lust then rend the distressful man, and then also what mighty fears! And pride, filthy lust and wantonness? What disasters they occasion, and luxury and all sorts of sloth?

Lucretius, Nature of Things, V

5 And since I have shown that the quarters of ether are mortal and that heaven is formed of a body that had a birth, and since of all the things which go on and must go on in it, I have unravelled most, hear further what remains to be told; since once for all I have willed to mount the illustrious chariot of the Muses, and ascending to heaven to explain the true law of winds and storms, which men foolishly lay to the charge of the gods, telling how, when they are angry, they raise fierce tempests; and, when there is a lull in the fury of the winds, how that anger is appeased, how the omens which have been are again changed, when their fury has thus been appeased; I have willed at the same time to explain all the other things which mortals observe to go on upon earth and in heaven, when often they are in anxious suspense of mind, and which abase their souls with fear of the gods and weigh and press them down to earth, because ignorance of the causes constrains them to submit things to the empire of the gods and to make over to them the kingdom. For they who have been rightly taught that the gods lead a life without care, if nevertheless they wonder on what plan all things can be carried on, above all in

regard to those things which are seen overhead in the ethereal borders, are borne back again into their old religious scruples and take unto themselves hard taskmasters, whom they poor wretches believe to be almighty, not knowing what can, what cannot be, in short on what principle each thing has its powers defined, its deep-set boundary mark; and therefore they are led all the farther astray by blind reason.

Lucretius, Nature of Things, VI

- 6 A ready acceptance of error is harmful to the reputation, especially in the matter of how much credence is to be given to omens, sacred rites, and other religious observances. We risk offending the gods if we pay no attention to such things. And we risk being considered superstitious if we rely on them completely.

Cicero, Divination, I, 4

- 7 We are obligated to propagate true religion, since it is closely associated with the knowledge of nature. It is also our duty to eradicate superstition. For superstition dogs our heels at every turn. When you listen to a prophet, regard an omen, offer sacrifices, or watch a flight of birds, go to an astrologer or fortune teller, when there is thunder and lightning during a storm, or when some prodigy appears, superstition is at your side. And since such signs are usually all around us, no one who believes them can have peace of mind.

Cicero, Divination, II, 72

- 8 Paul stood in the midst of Mars' hill, and said, Ye men of Athens, I perceive that in all things ye are too

superstitious.

For as I passed by, and beheld your devotions, I found an altar with this inscription. *To the Unknown God*. Whom therefore ye ignorantly worship, him declare I unto you.

God that made the world and all things therein, seeing that he is Lord of heaven and earth, dwelleth not in temples made with hands;

Neither is worshipped with men's hands, as though he needed any thing, seeing he giveth to all life, and breath, and all things.

Acts 17:22-25

- 9 We ourselves could relate divers wonderful things, which we have been told by men of our own time, that are not lightly to be rejected; but to give too easy credit to such things, or wholly to disbelieve them, is equally dangerous, so incapable is human infirmity of keeping any bounds, or exercising command over itself, running off sometimes to superstition and dotage, at other times to the contempt and neglect of all that is supernatural. But moderation is best, and to avoid all extremes.

Plutarch, Camillus

- 10 An ignorant wonder at appearances ... in the heavens, possesses the minds of people unacquainted with their causes, eager for the supernatural, and excitable through an inexperience which the knowledge of natural causes removes, replacing wild and timid superstition by the good hope and assurance of an intelligent piety.

Plutarch, Pericles

- 11 All the arrangements made by men for the making and worshipping of idols are superstitious, pertaining as they do either to the worship of what is created or of some part of it as God, or to consultations and arrangements about signs and leagues with devils, such, for example, as are employed in the magical arts, and which the poets are accustomed not so much to teach as to celebrate.

Augustine, Christian Doctrine, II, 20

- 12 It comes to pass that men who lust after evil things are, by a secret judgment of God, delivered over to be mocked and deceived, as the just reward of their evil desires. For they are deluded and imposed on by the false angels, to whom the lowest part of the world has been put in subjection by the law of God's providence, and in accordance with His most admirable arrangement of things. And the result of these delusions and deceptions is, that through these superstitious and baneful modes of divination, many things in the past and future are made known, and turn out just as they are foretold; and in the case of those who practise superstitious observances, many things turn out agreeably to their observances, and ensnared by these successes, they become more eagerly inquisitive, and involve themselves further and further in a labyrinth of most pernicious error. And to our advantage, the Word of God is not silent about this species of fornication of the soul; and it does not warn the soul against following such practices on the ground that those who profess them speak lies, but it says, "Even if what they tell you should come to pass, hearken not unto them."

Augustine, Christian Doctrine, II, 23

- 13 Superstition is a vice contrary to religion by excess, not that it offers more to the divine worship than true religion, but because it offers divine worship either to whom it ought not, or in a manner it ought not.

Aquinas, Summa Theologica, II—II, 92, 1

- 14 The species of superstition are differentiated, first on the part of the mode, secondly on the part of the object. For the divine worship may be given either to whom it ought to be given, namely, to the true God, but *in an undue mode*, and this is the first species of superstition; or to whom it ought not to be given, namely, to any creature whatsoever, and this is another genus of superstition, divided into many species in respect of the various ends of divine worship. For the end of divine worship is in the first place to give reverence to God, and in this respect the first species of this genus is *idolatry*, which unduly gives divine honor to a creature. The second end of religion is that man may be taught by God Whom he worships; and to this must be referred *divinatory* superstition, which consults the demons through compacts made with them, whether tacit or explicit. Thirdly, the end of divine worship is a certain direction of human acts according to the precepts of God the object of that worship: and to this must be referred the superstition of certain *observances*.

Aquinas, Summa Theologica, II—II, 92, 2

- 15 Superstition is a confession of unbelief by external worship. Such a confession is signified by the term idolatry, but not by the term heresy, which only means a

false opinion. Therefore heresy is a species of unbelief, but idolatry is a species of superstition.

Aquinas, Summa Theologica, II-II, 94, 1

- 16 The magic art is to be absolutely repudiated and avoided by a Christian, even as other arts of vain and noxious superstition.

Aquinas, Summa Theologica, II-II, 96, 1

- 17 It is easy to see how superstition mocks God with hypocritical services, while it attempts to please him. For, embracing only those things which he declares he disregards, it either contemptuously practises, or even openly rejects, what he prescribes and declares to be pleasing in his sight. Persons who introduce newly-invented methods of worshipping God, really worship and adore the creature of their distempered imaginations; for they would never have dared to trifle in such a manner with God, if they had not first feigned a god conformable to their own false and foolish notions.

Calvin, Institutes of Christian Religion, I, 4

- 18 It is probable that the principal credit of miracles, visions, enchantments, and such extraordinary occurrences comes from the power of imagination, acting principally upon the minds of the common people, which are softer. Their belief has been so strongly seized that they think they see what do not see.

Montaigne, Essays, I, 21, Power of the Imagination

- 19 *Horatio*. In the most high and palmy state of Rome,
A little ere the mightiest Julius fell,

The graves stood tenantless and the sheeted dead
Did squeak and gibber in the Roman streets.
As stars with trains of fire and dews of blood,
Disasters in the sun; and the moist star
Upon whose influence Neptune's empire stands
Was sick almost to doomsday with eclipse.
And even the like precursor of fierce events,
As harbingers preceding still the fates
And prologue to the omen coming on,
Have heaven and earth together demonstrated
Unto our climatures and countrymen.

Shakespeare, Hamlet, I, i, 113

- 20 The corruption of philosophy by the mixing of it up with superstition and theology, is of a much wider extent, and is most injurious to it both as a whole and in parts.

Bacon, Novum Organum, I, 65

- 21 Superstition, without a veil, is a deformed thing; for, as it addeth deformity to an ape to be so like a man, so the similitude of superstition to religion makes it the more deformed.

Bacon, Of Superstition

- 22 From . . . ignorance of how to distinguish dreams, and other strong fancies, from vision and sense, did arise the greatest part of the religion of the Gentiles in time past, that worshipped satyrs, fauns, nymphs, and the like; and nowadays the opinion that rude people have of fairies, ghosts, and goblins, and of the power of witches. For, as for witches, I think not that their witchcraft is any real power, but yet that they are justly punished for the false

belief they have that they can do such mischief, joined with their purpose to do it if they can, their trade being nearer to a new religion than to a craft or science. And for fairies, an walking ghosts, the opinion of them has, I think, been on purpose either taught, or not confuted, to keep in credit the use of exorcism, of crosses, of holy water, and other such inventions of ghostly men. Nevertheless, there is no doubt but God can make unnatural apparitions: but that He does it so often as men need to fear such things more than they fear the slay, or change, of the course of Nature, which he also can stay, and change, is no point of Christian faith. But evil men, under pretext that God can do anything, are so bold as to say anything when it serves their turn, though they think it untrue; it is the part of a wise man to believe them no further than right reason makes that which they say appear credible. If this superstitious fear of spirits were taken away, and with it prognostics from dreams, false prophecies, and many other things depending thereon, by which crafty ambitious persons abuse the simple people, men would be much more fitted than they are for civil obedience.

Hobbes, Leviathan, I, 2

- 23 They that make little or no inquiry into the natural causes of things, yet from the fear that proceeds from the ignorance itself of what it is that hath the power to do them much good or harm are inclined to suppose, and feign unto themselves, several kinds of powers invisible, and to stand in awe of their own imaginations, and in time of distress to invoke them; as also in the time of an expected good success, to give them thanks, making the creatures of their own fancy their gods. By which means

it hath come to pass that from the innumerable variety of fancy, men have created in the world innumerable sorts of gods. And this fear of things invisible is the natural seed of that which every one in himself calleth *religion*; and in them that worship or fear that power otherwise than they do, *superstition*.

Hobbes, Leviathan, 1,11

- 24 Men would never be superstitious, if they could govern all their circumstances by set rules, or if they were always favoured by fortune; but being frequently driven into straits where rules are useless, and being often kept fluctuating pitiably between hope and fear by the uncertainty of fortune's greedily coveted favours, they are consequently, for the most part, very' prone to credulity.

Spinoza, Theologico-Political Treatise, Pref.

- 25 That *the corruption of the best of things produces the worst*, is grown into a maxim, and is commonly proved, among other instances, by the pernicious effects of *superstition* and *enthusiasm*, the corruptions of true religion.

These two species of false religion, though both pernicious, are yet of a very different, and even of a contrary nature. The mind of man is subject to certain unaccountable terrors and apprehensions, proceeding either from the unhappy situation of private or public affairs, from ill health, from a gloomy and melancholy disposition, or from the concurrence of all these circumstances. In such a state of mind, infinite unknown evils are dreaded from unknown agents; and where real

objects of terror are wanting, the soul, active to its own prejudice, and fostering its predominant inclination, finds imaginary ones, to whose power and malevolence it sets no limits. As these enemies are entirely invisible and unknown, the methods taken to appease them are equally unaccountable, and consist in ceremonies, observances, mortifications, sacrifices, presents, or in any practice, however absurd or frivolous, which either folly or knavery recommends to a blind and terrified credulity. Weakness, fear, melancholy, together with ignorance, are, therefore, the true sources of Superstition.

Hume, Of Superstition and Enthusiasm

- 26 Those who ridicule vulgar superstitions, and expose the folly of particular regards to meats, days, places, postures, apparel, have an easy task; while they consider all the qualities and relations of the objects, and discover no adequate cause for that affection or antipathy, veneration or horror, which have so mighty an influence over a considerable part of mankind.

Hume, Concerning Principles of Morals, III

- 27 The superstitious man is to the rogue what the slave is to the tyrant. Further, the superstitious man is governed by the fanatic and becomes fanatic. Superstition born in Paganism, adopted by Judaism, infested the Christian Church from the earliest times. All the fathers of the Church, without exception, believed in the power of magic. The Church always condemned magic, but she always believed in it: she did not excommunicate sorcerers as madmen who were mistaken, but as men who were really in communication with the devil....

Up to what point does statecraft permit superstition to be destroyed? This is a very thorny question; it is like asking up to what point one should make an incision in a dropsical person, who may die under the operation. It is a matter for the doctor's discretion.

Can there exist a people free from all superstitious prejudices? That is to ask—Can there exist a nation of philosophers? It is said that there is no superstition in the magistrature of China, it is probable that none will remain in the magistrature of a few towns of Europe.

Then the magistrates will stop the superstition of the people from being dangerous. These magistrates' example will not enlighten the mob, but the principal persons of the middle classes will hold the mob in check. There is not perhaps a single riot, a single religious outrage in which the middle classes were not formerly imbrued, because these middle classes were then the mob; but reason and time will have changed them. Their softened manners will soften those of the lowest and most savage populace; it is a thing of which we have striking examples in more than one country. In a word, less superstition, less fanaticism; and less fanaticism, less misery.

Voltaire, Philosophical Dictionary: Superstition

28 Science is the great antidote to the poison of enthusiasm and superstition; and where all the superior ranks of people were secured from it, the inferior ranks could not be much exposed to it.

Adam Smith, Wealth of Nations, V, 1

29 From the first of the fathers to the last of the popes, a succession of bishops, of saints, of martyrs, and of miracles, is continued without interruption; and the progress of superstition was so gradual and almost imperceptible, that we know not in what particular link we should break the chain of tradition.

Gibbon, Decline and Fall of the Roman Empire, XV

30 The decline of ancient prejudice exposed a very numerous portion of human kind to the danger of a painful and comfortless situation. A state of scepticism and suspense may amuse a few inquisitive minds. But the practice of superstition is so congenial to the multitude that, if they are forcibly awakened, they still regret the loss of their pleasing vision. Their love of the marvellous and supernatural, their curiosity with regard to future events, and their strong propensity to extend their hopes and fears beyond the limits of the visible world, were the principal causes which favoured the establishment of Polytheism. So urgent on the vulgar is the necessity of believing, that the fall of any system of mythology will most probably be succeeded by the introduction of some other mode of superstition. Some deities of a more recent and fashionable cast might soon have occupied the deserted temples of Jupiter and Apollo, if, in the decisive moment, the wisdom of Providence had not interposed a genuine revelation fitted to inspire the most rational esteem and conviction, whilst, at the same time, it was adorned with all that could attract the curiosity, the wonder, and the veneration of the people.

Gibbon, Decline and Fall of the Roman Empire, XV

3) The objects which had been transformed by the magic of superstition appeared to the eyes of the Paulicians in their genuine and naked colours. An image made without hands was the common workmanship of a mortal artist, to whose skill alone the wood and canvas must be indebted for their merit or value. The miraculous relics were a heap of bones and ashes, destitute of life or virtue, or of any relation, perhaps, with the person to whom they were ascribed. The true and vivifying cross was a piece of sound or rotten timber; the body and blood of Christ, a loaf of bread and a cup of wine, the gifts of nature and the symbols of grace. The mother of God was degraded from her celestial honours and immaculate virginity; and the saints and angels were no longer solicited to exercise the laborious office of mediation in heaven and ministry upon earth. In the practice, or at least in the theory, of the sacraments, the Paulicians were inclined to abolish all visible objects of worship, and the words of the Gospel were, in their judgment, the baptism and communion of the faithful.

Gibbon, Decline and Fall of the Roman Empire, LIV

32 The services of Luther and his rivals are solid and important; and the philosopher must own his obligations to these fearless enthusiasts. By their hands the lofty fabric of superstition, from the abuse of indulgences to the intercession of the Virgin, has been levelled with the ground. Myriads of both sexes of the monastic profession were restored to the liberty and labours of social life. A hierarchy of saints and angels, of imperfect and subordinate deities, were stripped of their temporal power, and reduced to the enjoyment of celestial happiness: their images and relics were banished from

the church; and the credulity of the people was no longer nourished with the daily repetition of miracles and visions. The imitation of paganism was supplied by a pure and spiritual worship of prayer and thanksgiving, the most worthy of man, the least unworthy of the Deity.

Gibbon, Decline and Fall of the Roman Empire, LIV

- 33 Humility, taking the form of an uncompromising judgement upon his shortcomings, which, with consciousness of good intentions, might readily be glossed over on the ground of the frailty of human nature, is a sublime temper of the mind voluntarily to undergo the pain of remorse as a means of more and more effectually eradicating its cause. In this way religion is intrinsically distinguished from superstition, which latter rears in the mind, not reverence for the sublime, but dread and apprehension of the all-powerful Being to whose will terror-stricken man sees himself subjected, yet without according Him due honour. From this nothing can arise but grace-begging and vain adulation, instead of a religion consisting in a good life.

Kant, Critique of Aesthetic Judgement, 28

- 34 *Idolatry*, ... is a superstitious delusion that one can make oneself acceptable to the Supreme Being by other means than that of having the moral law at heart.

Kant, Critique of Teleological Judgment, 89

- 35 It is hardly surprising that geniuses, and criminals too ... in short all those who, in one way or another, are placed outside the normal, should be superstitious. They have no *impressa vestigia* for their feet, they go forward along

unknown or forbidden paths, and so they are observant in quite a different degree from others, and moreover of very different things. The mass of people do not really live, they are mere repetitions, live in the security of the probable, and so they are not superstitious, that is to say that they do not notice that this belief of theirs in the probable, and their security within the probable is, in another sense, a tremendous superstition.

Kierkegaard, Journals (1851)

- 36 The same high mental faculties which first led man to believe in unseen spiritual agencies, then in fetishism, polytheism, and ultimately in monotheism, would infallibly lead him, as long as his reasoning powers remained poorly developed, to various strange superstitions and customs. Many of these are terrible to think of—such as the sacrifice of human beings to a blood-loving god; the trial of innocent persons by the ordeal of poison or fire; witchcraft, etc.—yet it is well occasionally to reflect on these superstitions, for they shew us what an infinite debt of gratitude we owe to the improvement of our reason, to science, and to our accumulated knowledge.

Darwin, Descent of Man, I, 3

- 37 As philosophy has at times corrupted her divines, so has paganism corrupted her worshippers; and as the more intellectual have been involved in heresy, so have the ignorant been corrupted by superstition.

Newman, Essay on the Development of Christian Doctrine, Ft. II, VIII, 2

38 You know how tenaciously anything that has once found psychological expression persists. You will, therefore, not be surprised to hear that a great many manifestations of animism have lasted up to the present day, mostly as what are called superstitions, side by side with and behind religion. But more than that, you can hardly avoid coming to the conclusion that our philosophy has preserved essential traits of animistic modes of thought, such as the overestimation of the magic of words and the belief that real processes in the external world follow the lines laid down by our thoughts. It is, to be sure, an animism without magical practices. On the other hand we should expect to find that in the age of animism there must already have been some kind of morality, some rules governing the intercourse of men with one another. But there is no evidence that they were closely bound up with animistic beliefs. Probably they were the immediate expression of the distribution of power and of practical necessities.

It would be very interesting to know what determined the transition from animism to religion; but you may imagine in what darkness this earliest epoch in the evolution of the human mind is still shrouded. It seems to be a fact that the earliest form in which religion appeared was the remarkable one of totemism, the worship of animals, in the train of which followed the first ethical commands, the taboos, ... I once worked out a suggestion, in accordance with which this change is to be traced back to an upheaval in the relationships in the human family. The main achievement of religion, as compared with animism, lies in the psychic binding of the fear of demons. Nevertheless, the evil spirit still has a place in the religious system as a relic of the previous age.

*Freud, New Introductory Lectures on Psycho-Analysis,
XXXV*

39 We sometimes speak as if superstition or belief in the miraculous was disbelief in law and was inspired by a desire to disorganise experience and defeat intelligence. No supposition could be more erroneous. Every superstition is a little science, inspired by the desire to understand, to foresee, or to control the real world. No doubt its hypothesis is chimerical, arbitrary, and founded on a confusion of efficient causes with ideal results. But the same is true of many a renowned philosophy.

Santayana, Life of Reason, III, 2

20.13 Sin and Temptation

Temptation is treated here along with sin because, according to the theologians who discuss the matter, temptation is primarily to be understood as providing the occasion for sin. The clause in the Lord's Prayer that beseeches God to lead us not into temptation asks for exemption from the occasions to sin.

In one contemporary revision of the language of that prayer, the words "forgive us our sins, as we forgive those who sin against us" have been erroneously substituted for the words "forgive us our trespasses, as we forgive those who trespass against us"—erroneously, at least according to the traditional conception of sin as exclusively an offense against God or a violation of the divine law, never merely the injuring of one man by another in contravention of the human law.

With the exception of Hobbes, who blurs the distinction between sin and crime by regarding the violation of the civil law as a sin, the view that prevails in the quotations gathered below conceives sin in theological not political or moral terms. For the consideration of the moral counterpart of sin in the form of moral iniquity or vice, the reader should consult Section 9.7 on Right and Wrong and Section 9.10 on Virtue and Vice; and for the political or social counterpart of sin in the form of crime, the reader should go to Section 12.4 on Crime and Punishment.

The quotations collected here cover many aspects of the subject, but not all; and many that are mentioned are barely

touched on, not treated in detail. The reader will find some discussion of the temptation of Adam and the consequences of his sin, not only for him but for all his descendants; the distinction between original or inherited sin and individual or acquired sin; the distinction between mortal and venial sins, together with the classification of mortal sins and the consideration of which among them is primary and the root of all the rest; the denial of collective responsibility for the sins of the fathers; and man's need for a redeemer to be saved from his proneness to sin that is a defect of fallen human nature, in consequence of Adam's sin. This whole subject of redemption and salvation is more fully treated in Section 20.14.

There are, of course, among the writers quoted below those, such as Spinoza or Freud, who reject the very notion of sin, or who interpret the sense of sin as having its origins in feelings of guilt that can be accounted for psychologically. The reader's attention should also be drawn to the fact that some of the most interesting passages quoted are taken from the two great poems that are concerned with sin, its causes and consequences, the gradations of sin and of the punishments thereof. The two poems are Dante's *Divine Comedy* and Milton's *Paradise Lost*. They are a principal source of quotations for Section 20.7 on Angels and Devils and for Section 20.15 on Heaven and Hell, as well as here.

In the Christian tradition, certain human vices or weaknesses are considered (at least in some circumstances) to be major, or mortal, sins. Among these are anger, avarice, envy, lust, and pride. Consideration of these sins from other points of view than that taken here will be found in Sections 4.3 on Anger, 4.9 on Greed and Avarice (and in Section 11.2 on Wealth and Poverty), 4.8 on Pity and Envy, 3.3 on Sexual Love, and 4.11 on Pride and Humility.

■ ■ ■

1 And the Lord God planted a garden eastward in Eden; and there he put the man whom he had formed.

And out of the ground made the Lord God to grow every tree that is pleasant to the sight, and good for food; the tree of life also in the midst of the garden, and the tree of knowledge of good and evil. . .

And the Lord God took the man, and put him into the garden of Eden to dress it and to keep it.

And the Lord God commanded the man, saying, Of every tree of the garden thou mayest freely eat:

But of the tree of the knowledge of good and evil, thou shalt not eat of it: for in the day that thou eatest thereof thou shalt surely die.

Genesis 2:8-17

2 Now the serpent was more subtil than any beast of the field which the Lord God had made. And he said unto the woman. Yea, hath God said, Ye shall not cat of every tree of the garden?

And the woman said unto the serpent. We may cat of the fruit of the trees of the garden;

But of the fruit of the tree which is in the midst of the garden, God hath said. Ye shall not cat of it, neither shall ye touch it, lest ye die.

And the serpent said unto the woman, Ye shall not surely die.

For God doth know that in the day ye eat thereof, then your eyes shall be opened, and ye shall be as gods, knowing good and evil.

And when the woman saw that the tree was good for food, and that it was pleasant to the eyes, and a tree to be desired to make one wise, she took of the fruit thereof, and did eat, and gave also unto her husband with her; and he did eat.

Genesis 3:1-6

3 The Lord is longsuffering, and of great mercy, forgiving iniquity and transgression, and by no means clearing the guilty, visiting the iniquity of the fathers upon the children unto the third and fourth generation.

Numbers 14:18

4 Be sure your sin will find you out.

Numbers 32:23

5 Have mercy upon me, O God, according to thy lovingkindness: according unto the multitude of thy tender mercies blot out my transgressions.

Wash me thoroughly from mine iniquity, and cleanse me from my sin.

For I acknowledge my transgressions: and my sin is ever before me.

Against thee, thee only, have I sinned, and done this evil in thy sight: that thou mightest be justified when thou speakest, and be clear when thou judgest.

Behold, I was shapen in iniquity; and in sin did my mother conceive me.

Psalms 51:1-5

6 My son, if sinners entice thee, consent thou not.

If they say, Come with us, let us lay wait for blood, let us lurk privily for the innocent without cause:

Let us swallow them up alive as the grave; and whole, as those that go down into the pit:

We shall find all precious substance, we shall fill our houses with spoil;

Cast in thy lot among us; let us all have one purse:

My son, walk not thou in the way with them; refrain thy foot from their path:

For their feet run to evil, and make haste to shed blood.

Surely in vain the net is spread in the sight of any bird.

And they lay wait for their own blood; they lurk privily for their own lives.

So are the ways of every one that is greedy of gain; which taketh away the life of the owners thereof.

Proverbs 1:10-19

7 He that covereth his sins shall not prosper: but whoso confesseth and forsaketh them shall have mercy.

Proverbs 28:13

8 Remove far from me vanity and lies: give me neither poverty nor riches; feed me with food convenient for me:

Lest I be full, and deny thee, and say, Who is the Lord? or lest I be poor, and steal, and take the name of my God in vain.

Proverbs 30:8-9

9 For there is not a just man upon earth, that doeth good, and sinneth not.

Ecclesiastes 7:20

- 10 What mean ye, that ye use this proverb concerning the land of Israel, saying, The fathers have eaten sour grapes, and the children's teeth are set on edge?

As I live, saith the Lord God, ye shall not have occasion any more to use this proverb in Israel.

Behold, all souls are mine; as the soul of the father, so also the soul of the son is mine: the soul that sinneth, it shall die.

Ezekiel 18:2-4

- 11 *Chorus*, A man thought
the gods deigned not to punish mortals
who trampled down the delicacy of things
inviolable. That man was wicked.
The curse on great daring
shines clear; it wrings atonement
from those high hearts that drive to evil,
from houses blossoming to pride
and peril. Let there be
wealth without tears; enough for
the wise man who will ask no further.
There is not any armor
in gold against perdition
for him who spurns the high altar
of Justice down to the darkness.

Aeschylus, Agamemnon, 369

- 12 *Theseus*. The mind of man—how far will it advance?
Where will its daring impudence find limits?
If human villainy and human life
shall wax in due proportion, if the son

shall always grow in wickedness past his father,
the Gods must add another world to this
that all the sinners may have space enough.

Euripides, Hippolytus, 936

- 13 When you look over your own vices, winking at them, as it were, with sore eyes; why are you with regard to those of your friends as sharp-sighted as an eagle, or the Epidaurian serpent?

Horace, Satires, I, 3

- 14 We have committed some sins; others we have considered committing. Some we have desired; others we have encouraged. Some transgressions we are innocent of only because they did not succeed. With this in mind, we should be more forbearing toward transgressors and pay more attention to those who reprove us.

Seneca, On Anger, II, 28

- 15 Thou shalt not tempt the Lord thy God.

Matthew 4:7

- 16 Watch and pray, that ye enter not into temptation: the spirit indeed is willing, but the flesh is weak.

Matthew 26:41

- 17 And Jesus being full of the Holy Ghost returned from Jordan, and was led by the Spirit into the wilderness,
Being forty days tempted of the devil. And in those days he did eat nothing: and when they were ended, he afterward hungered.

And the devil said unto him, If thou be the Son of God, command this stone that it be made bread.

And Jesus answered him, saying, It is written, That man shall not live by bread alone, but by every word of God.

And the devil, taking him up into an high mountain, shewed unto him all the kingdoms of the world in a moment of time.

And the devil said unto him, All this power will I give thee, and the glory of them: for that is delivered unto me; and to whomsoever I will I give it.

If thou therefore wilt worship me, all shall be thine.

And Jesus answered and said unto him, Get thee behind me, Satan: for it is written, Thou shalt worship the Lord thy God, and him only shalt thou serve.

And he brought him to Jerusalem, and set him on a pinnacle of the temple, and said unto him, If thou be the Son of God, cast thyself down from hence:

For it is written, He shall give his angels charge over thee, to keep thee:

And in their hands they shall bear thee up, lest at any time thou dash thy foot against a stone.

And Jesus answering said unto him, It is said, Thou shalt not tempt the Lord thy God.

And when the devil had ended all the temptation, he departed from him for a season.

Luke 4:1-13

18 Joy shall be in heaven over one sinner that repenteth, more than over ninety and nine just persons, which need no repentance.

Luke 15:7

19 The wrath of God is revealed from heaven against all ungodliness and unrighteousness of men, who hold the truth in unrighteousness;

Because that which may be known of God is manifest in them, for God hath shewed it unto them.

For the invisible things of him from the creation of the world are clearly seen, being understood by the things that are made, even his eternal power and Godhead; so that they are without excuse:

Because that, when they knew God, they glorified him not as God, neither were thankful; but became vain in their imaginations, and their foolish heart was darkened.

Professing themselves to be wise, they became fools,
And changed the glory of the uncorruptible God into an image made like to corruptible man, and to birds, and fourfooted beasts, and creeping things.

Wherefore God also gave them up to uncleanness through the lusts of their own hearts, to dishonour their own bodies between themselves:

Who changed the truth of God into a lie, and worshipped and served the creature more than the Creator, who is blessed for ever. Amen.

For this cause God gave them up unto vile affections: for even their women did change the natural use into that which is against nature:

And likewise also the men, leaving the natural use of the woman, burned in their lust one toward another; men with men working that which is unseemly, and receiving in themselves that recompence of their error which was meet.

And even as they did not like to retain God in their knowledge, God gave them over to a reprobate mind, to do those things which are not convenient;

Being filled with all unrighteousness, fornication, wickedness, covetousness, maliciousness; full of envy, murder, debate, deceit, malignity; whisperers,

Backbiters, haters of God, despiteful, proud, boasters, inventors of evil things, disobedient to parents,

Without understanding, covenantbreakers, without natural affection, implacable, unmerciful:

Who knowing the judgment of God, that they which commit such things are w'orthy of death, not only do the same, but have pleasure in them that do them.

Romans 1:18-32

20 Reckon ye also yourselves to be dead indeed unto sin, but alive unto God through Jesus Christ our Lord.

Let not sin therefore reign in your mortal body, that ye should obey it in the lusts thereof.

Neither yield ye your members as instruments of unrighteousness unto sin: but yield yourselves unto God, as those that are alive from the dead, and your members as instruments of righteousness unto God.

For sin shall not have dominion over you: for ye are not under the law, but under grace.

What then? shall we sin, because we are not under the law, but under grace? God forbid.

Know ye not, that to whom ye yield yourselves servants to obey, his servants ye are to whom ye obey; whether of sin unto death, or of obedience unto righteousness?

But God be thanked, that ye were the servants of sin, but ye have obeyed from the heart that form of doctrine which was delivered you.

Being then made free from sin, ye became the servants of righteousness.

Romans 6:11-18

21 For the wages of sin is death.

Romans 6:23

22 Wherefore let him that thinketh he standeth take heed lest he fall.

There hath no temptation taken you but such as is common to man: but God is faithful, who will not suffer you to be tempted above that ye are able; but will with the temptation also make a way to escape, that ye may be able to bear it.

I Corinthians 10:12—13

23 Now the works of the flesh are manifest, which are these; Adultery, fornication, uncleanness, lasciviousness.

Idolatry, witchcraft, hatred, variance, emulations, wrath, strife, seditions, heresies,

Envyings, murders, drunkenness, revellings, and such like: of the which I tell you before, as I have also told you in time past, that they which do such things shall not inherit the kingdom of God.

Galatians 5:19-21

24 Blessed is the man that endureth temptation: for when he is tried, he shall receive the crown of life, which the Lord hath promised to them that love him.

Let no man say when he is tempted, I am tempted of God: for God cannot be tempted with evil, neither tempteth he any man:

But every man is tempted, when he is drawn away of his own lust, and enticed.

Then when lust hath conceived, it bringeth forth sin:
and sin, when it is finished, bringeth forth death.

James 1:12-15

25 If we say that we have no sin, we deceive ourselves, and the truth is not in us.

If we confess our sins, he is faithful and just to forgive us our sins, and to cleanse us from all unrighteousness.

If we say that we have not sinned, we make him a liar, and his word is not in us.

1 John 1:8-10

26 All that is in the world, the lust of the flesh, and the lust of the eyes, and the pride of life, is not of the Father, but is of the world.

1 John 2:16

27 Whosoever is born of God doth not commit sin; for his seed remaineth in him: and he cannot sin, because he is born of God.

1 John 3:9

28 Men are no doubt involuntary sinners in the sense that they do not actually desire to sin; but this does not alter the fact that wrong-doers, of their own choice, are, themselves, the agents; it is because they themselves act that the sin is in their own; if they were not agents they could not sin.

Plotinus, Third Ennead, II, 10

29 I grew in vice through desire of praise; and when I lacked opportunity to equal others in vice, I invented things I

had not done, lest I might be held cowardly for being innocent, or contemptible for being chaste. With the basest companions I walked the streets of Babylon [the city of this World as opposed to the city of God] and wallowed in its filth as if it had been a bed of spices and precious ointments. To make me cleave closer to that city's very center, the invisible Enemy trod me down and seduced me, for I was easy to seduce.

Augustine, Confessions, II, 3

30 Your law, O Lord, punishes theft; and this law is so written in the hearts of men that not even the breaking of it blots it out: for no thief bears calmly being stolen from—not even if he is rich and the other steals through want. Yet I chose to steal, and not because want drove me to it—unless a want of justice and contempt for it and an excess for iniquity. For I stole things which I already had in plenty and of better quality. Nor had I any desire to enjoy the things I stole, but only the stealing of them and the sin.

Augustine, Confessions, II, 4

31 Pride wears the mask of loftiness of spirit, although You alone, O God, are high over all. Ambition seeks honor and glory, although You alone are to be honored before all and glorious forever. By cruelty the great seek to be feared, yet who is to be feared but God alone: from His power what can be wrested away, or when or where or how or by whom? The caresses by which the lustful seduce are a seeking for love: but nothing is more caressing than Your charity, nor is anything more healthfully loved than Your supremely lovely, supremely

luminous Truth. Curiosity may be regarded as a desire for knowledge, whereas You supremely know all things. Ignorance and sheer stupidity hide under the names of simplicity and innocence: yet no being has simplicity like to Yours: and none is more innocent than You, for it is their own deeds that harm the wicked. Sloth pretends that it wants quietude: but what sure rest is there save the Lord? Luxuriousness would be called abundance and completeness; but You are the fullness and inexhaustible abundance of incorruptible delight. Wastefulness is a parody of generosity: but You are the infinitely generous giver of all good. Avarice wants to possess overmuch: but You possess all. Enviousness claims that it strives to excel: but what can excel before You? Anger clamors for just vengeance: but whose vengeance is so just as Yours? Fear is the recoil from a new and sudden threat to something one holds dear, and a cautious regard for one's own safety: but nothing new or sudden can happen to You, nothing can threaten Your hold upon things loved, and where is safety secure save in You? Grief pines at the loss of things in which desire delighted: for it wills to be like to You from whom nothing can be taken away.

Thus the soul is guilty of fornication when she turns from You and seeks from any other source what she will nowhere find pure and without taint unless she returns to You. Thus even those who go from You and stand up against You are still perversely imitating You. But by the mere fact of their imitation, they declare that You are the creator of all that is, and that there is nowhere for them to go where You are not.

So once again what did I enjoy in that theft of mine? Of what excellence of my Lord was I making perverse and vicious imitation? Perhaps it was the thrill of acting

against Your law—at least in appearance, since I had no power to do so in fact, the delight a prisoner might have in making some small gesture of liberty—getting a deceptive sense of omnipotence from doing something forbidden without immediate punishment. I was that slave, who fled from his Lord and pursued his Lord's shadow. O rottenness, O monstrosity of life and abyss of death! Could you find pleasure only in what was forbidden, and only because it was forbidden?

Augustine, Confessions, 11, 6

- 32 Men are separated from God only by sins, from which we are in this life cleansed not by our own virtue, but by the divine compassion; through His indulgence, not through our own power. For, whatever virtue we call our own is itself bestowed upon us by His goodness.

Augustine, City of God, X, 22

- 33 God was not ignorant that man would sin, and that, being himself made subject now to death, he would propagate men doomed to die, and that these mortals would run to such enormities in sin that even the beasts devoid of rational will, and who were created in numbers from the waters and the earth, would live more securely and peaceably with their own kind than men, who had been propagated from one individual for the very purpose of commending concord. For not even lions or dragons have ever waged with their kind such wars as men have waged with one another.

Augustine, City of God, XII, 22

34 The first men were... so created that if they had not sinned, they would not have experienced any kind of death; but . . . having become sinners, they were so punished with death that whatsoever sprang from their stock should also be punished with the same death. For nothing else could be born of them than that which they themselves had been. Their nature was deteriorated in proportion to the greatness of the condemnation of their sin, so that what existed as punishment in those who first sinned, became a natural consequence in their children.

Augustine, City of God, XIII, 3

35 As man the parent is, such is man the offspring. In the first man, therefore, there existed the whole human nature, which was to be transmitted by the woman to posterity, when that conjugal union received the divine sentence of its own condemnation; and what man was made, not when created, but when he sinned and was punished, this he propagated, so far as the origin of sin and death are concerned.

Augustine, City of God, XIII, 3

36 The corruption of the body, which weighs down the soul, is not the cause but the punishment of the first sin; and it was not the corruptible flesh that made the soul sinful, but the sinful soul that made the flesh corruptible.

Augustine, City of God, XIV, 3

37 It is not without meaning said that all sin is a lie. For no sin is committed save by that desire or will by which we desire that it be well with us, and shrink from it being ill with us. That, therefore, is a lie which we do in order that

it may be well with us, but which makes us more miserable than we were. And why is this, but because the source of man's happiness lies only in God, Whom he abandons when he sins, and not in himself, by Using according to whom he sins?

Augustine, City of God, XIV, 4

38 Our first parents fell into open disobedience because already they were secretly corrupted; for the evil act had never been done had not an evil will preceded it. And what is the origin of our evil will but pride? For "pride is the beginning of sin." And what is pride but the craving for undue exaltation? And this is undue exaltation, when the soul abandons Him to whom it ought to cleave as its end, and becomes a kind of end to itself. This happens when it become its own satisfaction. And it does so when it falls away from that unchangeable good which ought to satisfy it more than itself. This falling away is spontaneous; for if the will had remained steadfast in the love of that higher and changeless good by which it was illumined to intelligence and kindled into love, it would not have turned away to find satisfaction in itself and so become frigid and benighted.

Augustine, City of God, XIV, 13

39 That the whole human race has been condemned in its first origin, this life itself, if life it is to be called, bears witness by the host of cruel ills with which it is filled. Is not this proved by the profound and dreadful ignorance which produces all the errors that enfold the children of Adam, and from which no man can be delivered without toil, pain, and fear? Is it not proved by his love of so many

vain and hurtful things, which produces gnawing cares, disquiet, griefs, fears, wild joys, quarrels, lawsuits, wars, treasons, angers, hatreds, deceit, flattery, fraud, theft, robbery, perfidy, pride, ambition, envy, murders, parricides, cruelty, ferocity, wickedness, luxury, insolence, impudence, shamelessness, fornications, adulteries, incests, and the numberless uncleannesses and unnatural acts of both sexes, which it is shameful so much as to mention; sacrileges, heresies, blasphemies, perjuries, oppression of the innocent, calumnies, plots, falsehoods, false witnessings, unrighteous judgments, violent deeds, plunderings, and whatever similar wickedness has found its way into the lives of men. . . . These are indeed the crimes of wicked men, yet they spring from that root of error and misplaced love which is born with every son of Adam. For who is there that has not observed with what profound ignorance, manifesting itself even in infancy, and with what superfluity of foolish desires, beginning to appear in boyhood, man comes into this life, so that, were he left to live as he pleased, and to do whatever he pleased, he would plunge into all, or certainly into many of those crimes and iniquities.

Augustine, City of God, XXII, 22

- 40 Mortal sin occurs in two ways in the act of free choice. First, when something evil is chosen; as man sins by choosing adultery, which is evil of itself. Such sin always comes of ignorance or error. Otherwise what is evil would never be chosen as good. The adulterer errs in the particular, choosing this delight of a disordered act as something good to be performed now, from the inclination of passion or of habit, even though he does not err in his universal judgment, but retains a right

opinion in this respect. In this way there can be no sin in the angel, because there are no passions in the angels to fetter reason or intellect.... Nor, again, could any habit inclining to sin precede their first sin. In another way sin comes of free choice by choosing something good in itself, but not according to the order of due measure or rule, so that the defect which induces sin is only on the part of the choice which does not have its due order (except on the part of the thing chosen); as if one were to pray without heeding the order established by the Church. Such a sin does not presuppose ignorance, but merely absence of consideration of the things which ought to be considered. In this way the angel sinned, by seeking his own good, from his own free choice, without being ordered to the rule of the Divine will.

Aquinas, Summa Theologica, I, 63, 1

- 41 If God had deprived the world of all those things which proved an occasion of sin, the universe would have been imperfect. Nor was it fitting for the common good to be destroyed in order that individual evil might be avoided, especially as God is so powerful that He can direct any evil to a good end.

Aquinas, Summa Theohgica, I, 92, 1

- 42 The theologian considers sin chiefly as an offence against God. and the moral philosopher as something contrary to reason. Hence Augustine defines sin with reference to its being "contrary to the eternal law" more fittingly than with reference to its being contrary to reason; the more so, as the eternal law directs us in many things that surpass human reason, for example in matters of faith.

Aquinas, Summa Theologica, I-II, 71, 6

- 43 Habit and despair are stages following the complete species of sin, even as boyhood and youth follow the complete generation of a man.

Aquinas, Summa Theologica, I-II, 72, 7

- 44 A sin is so much the graver according as the disorder occurs in a principle which is higher in the order of reason.... Therefore a sin which is about the very substance of man, for example murder, is graver than a sin which is about external things, for instance theft; and graver still is a sin committed directly against God, for example unbelief, blasphemy, and the like; and in each of these grades of sin, one sin will be graver than another according as it is about a higher or a lower principle.

Aquinas, Summa Theologica, I-II, 73, 3

- 45 Charity is not any kind of love, but the love of God. Hence not any kind of hatred is opposed to it directly, but the hatred of God, which is the most grievous of all sins.

Aquinas, Summa Theologica, I—II, 73, 4

- 46 Every sinful act proceeds from inordinate desire for some temporal good. Now the fact that anyone desires a temporal good inordinately, is due to the fact that he loves himself inordinately, for to wish anyone some good is to love him. Therefore it is evident that inordinate love of self is the cause of every sin.

Aquinas, Summa Theologica, I-II, 77, 4

- 47 The first sin infects nature with a human corruption pertaining to nature; but other sins infect it with a corruption pertaining only to the person.

Aquinas, Summa Theologica, I—II, 81, 2

- 48 The weak should avoid associating with sinners, on account of the danger in which they stand of being perverted by them. But it is commendable for the perfect, of whose corruption there is no fear, to associate with sinners that they may convert them.

Aquinas, Summa Theologica, II-II, 25, 6

- 49 By sinning man departs from the order of reason, and consequently falls away from the dignity of his manhood, in so far as he is naturally free, and exists for himself, and he falls into the slavish state of the beasts, by being disposed of according as he is useful to others.

Aquinas, Summa Theologica, II-II, 64, 2

- 30 Whilst I was rushing downwards, there appeared before my eyes one who seemed hoarse from long silence.

When I saw him in the great desert, I cried: "Have pity on me, whate'er thou be, whether shade or veritable man!"

He answered me: "Not man, a man I once was; and my parents were Lombards, and both of Mantua by country.

I was born *sub Julio*, though it was late; and lived at Rome under the good Augustus, in the time of the false and lying Gods.

A poet I was; and sang of that just son of Anchises, who came from Troy after proud Ilium was burnt.

But thou, why returnest thou to such disquiet? why
ascendest not the delectable mountain, which is the
beginning and the cause of all gladness?"

"Art thou then that Virgil, and that fountain which
pours abroad so rich a stream o! speech?" I answered
him, with bashful front,

"O glory, and light of other poets! May the long zeal
avail me, and the great love, that made me search thy
volume.

Thou art my master and my author; thou alone art he
from whom I took the good style that hath done me
honour.

See the beast from which I turned back; help me from
her, thou famous sage; for she makes my veins and
pulses tremble."

"Thou must take another road," he answered, when he
saw me weeping, "if thou desirest to escape from this wild
place:

because this beast, for which thou criest, lets not men
pass her way; but so entangles that she slays them;

and has a nature so perverse and vicious, that she
never satiates her craving appetite; and after feeding,
she is hungrier than before,"

Dante, Inferno, I, 61

51 *Sordello*. Through all the circles of the woeful realm...
came I here. A virtue from heaven moved me, and with it
I come.

Not for doing, but for not doing, have I lost the vision
of the high Sun, whom thou desirest, and who too late by
me was known,

Down there is a place not sad with torments, but with
darkness alone, where the lamentations sound not as

wailings, but are sighs.

There [in Limbo] do I abide with the innocent babes,
bitten by the fangs of death, ere they were exempt from
human sin.

There dwell I with those who clad them not with the
three holy virtues, and without offence knew the others
and followed them all.

Dante, Purgatorio, VII, 22

52 We [Virgil and Dante] drew nigh, and were at a place,
whence there where first appeared to me a break just like
a fissure which divides a wall,

I espied a gate, and three steps beneath to go to it, of
divers colours, and a warder who as yet spake no word.

And as more I opened mine eyes there, I saw him
seated upon the topmost step, such in his countenance
that I endured him not;

and in hand he held a naked sword which reflected the
rays so towards us, that I directed mine eyes to it oft in
vain.

"Tell, there where ye stand, what would ye?" he began
to say; "where is the escort? Beware lest coming upward
be to your hurt!"

"A heavenly lady who well knows these things," my
Master answered him, "even now did say to us: 'Go ye
thither, there is the gate.' "

"And may she speed your steps to good," again began
the courteous door-keeper; "come then forward to our
stairs."

There where we came, at the first step, was white
marble so polished and smooth that I mirrored me therein
as I appear.

The second darker was than perse, of a stone, rugged and calcined, cracked in its length and in its breadth.

The third, which is massy above, seemed to me of porphyry so flaming red as blood that spurts from a vein.

Upon this God's angel held both his feet, sitting upon the threshold, which seemed to me adamantine stone.

Up by the three steps, with my good will, my Leader brought me, saying: "Humbly ask that the bolt be loosed."

Devoutly I flung me at the holy feet; for mercy I craved that he would open to me; but first on my breast thrice I smote me.

Seven P's upon my forehead he described with the point of his sword and: "Do thou wash these wounds when thou art within," he said.

Ashes, or earth which is dug out dry, would be of one colour with his vesture, and from beneath it he drew forth two keys.

One was of gold and the other was of silver; first with the white and then with the yellow he did so to the gate that I was satisfied.

"Whensoever one of these keys fails so that it turns not aright in the lock," said he to us, "this passage opens not.

More precious is one, but the other requires exceeding art and wit ere it unlocks, because it is the one which unties the knot.

From Peter I hold them; and he told me to err rather in opening, than in keeping it locked, if only the people fell prostrate at my feet."

Then he pushed the door of the sacred portal, saying: "Enter, but I make you ware that he who looketh behind returns outside again."

Dante, Purgatorio, IX, 73

53 Now were we mounting up by the sacred steps, and
meseemed I was exceeding lighter, than meseemed
before on the flat;

wherefore I: "Master, say, what heavy thing has been
lifted from me, that scarce any toil is perceived by me in
journeying?"

He [Virgil] answered: "When the P's which have
remained still nearly extinguished on thy face, ah, like
the one, be wholly rased out,

thy feet shall be so vanquished by goodwill, that not
only will they feel it no toil, but it shall be a delight to
them to be urged upward."

Dante, Purgatorio, XII, 115

54 Short time Beatrice left me thus; and began, casting the
ray upon me of a smile such as would make one blessed
though in the flame:

"According to my thought that cannot err, how just
vengeance justly was avenged, hath set thee pondering;
but I will speedily release thy mind; and do thou
hearken, for my words shall make thee gift of an august
pronouncement.

Because he not endured for his own good a rein upon
the power that wills, that man who ne'er was born, as he
condemned himself, condemned his total offspring;

wherefore the human race lay sick down there for
many an age, in great error, till it pleased the Word of
God to descend

where he joined that nature which had gone astray
from its Creator to himself, in person, by sole act of his
eternal Love.

Now turn thy sight to what I now discourse: This nature, so united to its Maker, as it was when created was unalloyed and good;

but by its own self had it been exiled from Paradise, because it swerved from the way of truth, and from its proper life.

As for the penalty, then, inflicted by the cross,—if it be measured by the Nature taken on, never did any other bite as justly;

and, in like manner, ne'er was any so outrageous if we look to the Person who endured it, in whom this nature was contracted.

So from one act issued effects apart; God and the Jews rejoiced in one same death; thereat shuddered the earth and heaven opened.

No more, now, should it seem hard saying to thee that just vengeance was afterward avenged by a just court."

Dante, Paradiso, VII, 16

55 *Adam*. Now know, my son, that not the tasting of the tree was in itself the cause of so great exile, but only the transgressing of the mark.

Dante, Paradiso, XXVI, 115

56 *Pandar*. To prove my point, recall how those great clerks
Who most have erred against a certain law,
And are converted from their wicked works
By God's good grace that doth them to him draw,
Are just the ones who hold God most in awe,
And grow into his most believing band,
For they know best all error to withstand.

Chaucer, Troilus and Cressida, I, 144

57 Hearken this word, be warned by this one case;
The lion lies in wait by night and day
To slay the innocent, if he but may.
Dispose your hearts in grace, that you withstand
The Fiend, who'd make you thrall among his band
He cannot tempt more than beyond your might;
For Christ will be your champion and knight.

Chaucer, Canterbury Tales: Friar's Tale

58 Forsooth, sin is of two kinds; it is either venial or mortal
sin. Verily, when man loves any creature more than he
loves Jesus Christ our Creator, then is it mortal sin. And
venial sin it is if a man love Jesus Christ less than he
ought.

Chaucer, Canterbury Tales: Parson's Tale

59 Now it is a needful thing to tell which are the mortal sins,
that is to say, the principal sins; they are all leashed
together, but are different in their ways. Now they are
called principal sins because they are the chief sins and
the trunk from which branch all others. And the root of
these seven sins is pride, which is the general root of all
evils; for from this root spring certain branches, as anger,
envy, acedia or sloth, avarice (or covetousness, for vulgar
understanding), gluttony, and lechery.

Chaucer, Canterbury Tales: Parson's Tale

60 After baptism original sin is like a wound which has
begun to heal. It is really a wound, yet it is becoming
better and is constantly in the process of healing,
although it is still festering, is painful, etc. So original sin
remains in the baptized until their death, although it is in

the process of being rooted out. It is rendered harmless, and so it cannot accuse or damn us.

Luther, Table Talk, 138

- 61 When you feel that something is wrong and you have a bad conscience about it, this is not the sin against the Holy Spirit, but when you sin and have a good conscience about it, this is the sin against the Holy Spirit.

Luther, Table Talk, 388

- 62 Sins against the Holy Ghost are, first, presumption; second, despair; third, opposition to and condemnation of the known truth; fourth, not to wish well, but to grudge one's brother or neighbour the grace of God; fifth, to be hardened; sixth, to be impenitent.

Luther, Table Talk, H245

- 63 These two sins, hatred and pride, deck and trim themselves out, as the devil clothed himself, in the Godhead. Hatred will be godlike; pride will be truth. These two are right deadly sins: hatred is killing; pride is lying.

Luther Table Talk, H253

- 64 The sins of common, untutored people are nothing in comparison with the sins committed by great and high persons, that are in spiritual and temporal offices.

Luther, Table Talk, H255

- 65 When I am assailed with heavy tribulations, I rush out among my pigs, rather than remain alone by myself. The human heart is like a millstone in a mill; when you put

wheat under it, it turns and grinds and bruises the wheat to flour; if you put no wheat, it still grinds on, but then 'tis itself it grinds and wears away. So the human heart, unless it be occupied with some employment, leaves space for the devil, who wriggles himself in, and brings with him a whole host of evil thoughts, temptations, and tribulations, which grind out the heart.

Luther, Table Talk, H654

66 The mind of man is so completely alienated from the righteousness of God, that it conceives, desires, and undertakes every thing that is impious, perverse, base, impure, and flagitious; ... his heart is so thoroughly infected by the poison of sin, that it cannot produce any thing but what is corrupt; and ... if at any time men do any thing apparently good, yet the mind always remains involved in hypocrisy and fallacious obliquity, and the heart enslaved by its inward perverseness.

Calvin, Institutes of the Christian Religion, II, 5

67 The corrupt conceptions of the mind, provoking us to transgressions of the law% whether suggested by our own concupiscence or excited by the devil, are temptations; and things not evil in themselves, nevertheless become temptations through the subtlety of the devil, when they are obtruded on our eyes in such a manner that their intervention occasions our seduction or declension from God. And these temptations are either from prosperous, or from adverse events. From prosperous ones, as riches, power, honours; which generally dazzle men's eyes by their glitter and external appearance of goodness, and insnare them with their blandishments,

that, caught with such delusions and intoxicated with such delights, they forget their God. From unpropitious ones, as poverty, reproaches, contempt, afflictions, and other things of this kind; overcome with the bitterness and difficulty of which, they fall into despondency, cast away faith and hope, and at length become altogether alienated from God.

Calvin, Institutes of the Christian Religion, III, 20

63 From all inordinate and sinful affections; and from all the deceits of the world, the flesh, and the devil,
Good Lord, deliver us.

Book of Common Prayer

69 *Escalus*. Some rise by sin, and some by virtue fall.

Shakespeare, Measure for Measure, II, i, 38

70 Most dangerous
Is that temptation that doth goad us on
To sin in loving virtue.

Shakespeare, Measure for Measure, II, ii, 181

71 *Lear*. Plate sin with gold,
And the strong lance of justice hurtless breaks;
Arm it in rags, a pigmy's straw does pierce it.

Shakespeare, Lear, VI, vi, 169

72 *Pericles*. One sin, I know, another doth provoke;
Murder's as near to lust as flame to smoke.

Shakespeare, Pericles, I, i, 137

73 Then, as mankinde, so is the worlds whole frame
Quite out of joynt, almost created lame:
For, before God had made up all the rest,
Corruption entred, and deprav'd the best:
It seis'd the Angels, and then first of all
The world did in her cradle take a fall,
And turn'd her braines, and tooke a generall maime,
Wronging each joynt of th'universall frame.
The noblest pan, man, fell it first; and then
Both beasts and plants, curst in the curse of man.
So did the world from the first houre decay,
That evening was beginning of the day,
And now the Springs and Sommers which we see,
Like sonnes of women after fiftie bee.

Donne, First Anniversary

74 Thou hast made me, And shall thy worke decay?
Repaire me now, for now mine end doth haste,
I runne to death, and death meets me as fast,
And all my pleasures are like yesterday;
I dare not move my dim me eyes any way,
Despaire behind, and death before doth cast
Such terrour, and my feeble flesh doth waste
By sinne in it, which it t'wards hell doth weigh;
Onely thou art above, and when towards thee
By thy leave I can lookc, I rise againe;
But our old subtle foe so tempteth me,
That not one houre my selfe I can sustaine;
Thy Grace may wing me to prevent his art,
And thou like Adamant draw mine iron heart.

Donne, Holy Sonnet I

75 I am a little world made cunningly
Of Elements, and an Angelike spright,
But black sinne hath betraid to endlesse night
My worlds both pans, and (oh) both parts must die.

Donne, Holy Sennet V

76 Man, by the fall, lost at once his state of innocence, and his empire over creation, both of which can be partially recovered even in this life, the first by religion and faith, the second by the arts and sciences.

Bacon, Novum Organum, II, 52

77 A *sin* is not only a transgression of a law, but also any contempt of the legislator. For such contempt is a breach of all his laws at once, and therefore may consist, not only in the *commission* of a fact, or in the speaking of words by the laws forbidden, or in the *omission* of what the law commandeth, but also in the *intention* or purpose to transgress. For the purpose to break the law is some degree of contempt of him to whom it belongeth to see it executed. To be delighted in the imagination only of being possessed of another man's goods, servants, or wife, without any intention to take them from him by force or fraud, is no breach of the law, that saith, "'Thou shalt not covet"; nor is the pleasure a man may have in imagining or dreaming of the death of him from whose life he expecteth nothing but damage and displeasure, a sin; but the resolving to put some act in execution that tendeth thereto. For to be pleased in the fiction of that which would please a man if it were real is a passion so adherent to the nature both of man and every other

living creature, as to make it a sin were to make sin of being a man.

Hobbes, Leviathan, 11, 27

78 It is... an astonishing thing that the mystery furthest removed from our knowledge, namely, that of the transmission of sin, should be a fact without which we can have no knowledge of ourselves. For it is beyond doubt that there is nothing which more shocks our reason than to say that the sin of the first man has rendered guilty those who, being so removed from this source, seem incapable of participation in it. This transmission does not only seem to us impossible, it seems also very unjust. For what is more contrary to the rules of our miserable justice than to damn eternally an infant incapable of will, for a sin wherein he seems to have so little a share that it was committed six thousand years before he was in existence? Certainly nothing offends us more rudely than this doctrine; and yet, without this mystery, the most incomprehensible of all, we are incomprehensible to ourselves. The knot of our condition takes its twists and turns in this abyss, so that man is more inconceivable without this mystery than this mystery is inconceivable to man.

Pascal, Pensées, VII, 434

79 If there is one sole source of everything, there is one sole end of everything; everything through Him, everything for Him. The true religion, then, must teach us to worship Him only, and to love Him only. But as we find ourselves unable to worship what we know not, and to love any other object but ourselves, the religion which instructs us

in these duties must instruct us also of this inability, and teach us also the remedies for it. It teaches us that by one man all was lost, and the bond broken between God and us, and that by one man the bond is renewed.

We are born so averse to this love of God, and it is so necessary, that we must be born guilty, or God would be unjust.

Pascal, Pensees, VII, 489

80 There are only two kinds of men: the righteous who believe themselves sinners; the rest, sinners, who believe themselves righteous.

Pascal, Pensées, VII, 534

81 *Comus*. O foolishnes of men! that lend their ears
To those budge doctors of the *Stoick* Furr,
And fetch their precepts from the *Cynick* Tub,
Praising the lean and sallow Abstinence.
Wherefore did Nature powre her bounties forth.
With such a full and unwithdrawing hand,
Covering the earth with odours, fruits, and flocks,
Thronging the Seas with spawn innumerable,
But all to please, and sate the curious taste?
And set to work millions of spinning Worms,
That in their green shops weave the smooth-hair'd silk
To deck her Sons, and that no comer might
Be vacant of her plenty, in her own loyns
She hutch't th'all-worshipt ore, and precious gems
To store her children with; if all the world
Should in a pet of temperance feed on Pulse,
Drink the clear stream, and nothing wear but Freize,
Th'all-giver would be unthank't, would be unprais'd.

Not half his riches known, and yet despis'd.
And we should serve him as a grudging master,
As a penurious niggard of his wealth,
And live like Natures bastards, not her sons.

Milton, Comus, 706

82 Of mans First Disobedience, and the Fruit
Of that Forbidden Tree, whose mortal tast
Brought Death into the World, and all our woe,
With loss of *Eden*, till one greater Man
Restore us, and regain the blissful Seat,
Sing Heav'nly Muse.

Milton, Paradise Lost, I, 1

83 Say first, for Heav'n hides nothing from thy view
[O Heavenly Muse]
Nor the deep Tract of Hell, say first what cause
Mov'd our Grand Parents in that happy State,
Favour'd of Heav'n so highly, to fall off
From their Creator, and transgress his Will
For one restraint, Lords of the World besides?
Who first seduc'd them to that fowl revolt?
Th' infernal Serpent; he it was, whose guile
Stird up with Envy and Revenge, deceiv'd
The Mother of Mankind, what time his Pride
Had cast him out from Heav'n, with all his Host
Of Rebel Angels, by whose aid aspiring
To set himself in Glory above his Peers,
He trusted to have equal'd the most High,
If he oppos'd; and with ambitious aim
Against the Throne and Monarchy of God

Rais'd impious War in Heav'n and Battel proud
With vain attempt.

Milton, Paradise Lost, I, 27

84 *God*. Oncly begotten Son, seest thou what rage
Transports our adversarie, whom no bounds
Prescrib'd, no barrs of Hell, nor all the chains
Heapt on him there, nor yet the main Abyss
Wide interrupt can hold; so bent he seems
On desperat revenge, that shall redound
Upon his own rebellious head. And now
Through all restraint broke loose [Satan] wings his way
Not farr off Heav'n, in the Precincts of light,
Directly towards the new created World,
And Man there plac't, with purpose to assay
If him by force he can destroy, or worse,
By som false guile pervert; and shall pervert;
For man will heark'n to his glozing lyes.
And easily transgress the sole Command,
Sole pledge of his obedience; So will fall
Hee and his faithless Progenie: whose fault?
Whose but his own?

Milton, Paradise Lost, III, 80

85 Her rash hand in evil hour
Forth reaching to the Fruit, [Eve] pluck'd, she eat:
Earth felt the wound, and Nature from her seat
Sighing through all her Works gave signs of woe,
That all was lost.

Milton, Paradise Lost, IX, 780

86 *God*. Thy sorrow I will greatly multiplie
By thy Conception; Childern thou shall bring
In sorrow forth, and to thy Husbands will
Thine shall submit, hee over thee shall rule.

On *Adam* last thus judgement he pronounc'd.
Because thou has heark'nd to the voice of thy Wife,
And eaten of the Tree concerning which
I charg'd thee, saying: Thou shall not eate thereof.
Curs'd is the ground for thy sake, thou in sorrow
Shalt eate thereof all the days of thy Life;
Thornes also and Thistles it shall bring thee forth
Unbid, and thou shalt eate th' Herb of th' Field,
In the sweat of thy Face shalt thou eate Bread,
Till thou return unto the ground, for thou
Out of the ground wast taken, know thy Birth,
For dust thou art, and shalt to dust returne.

Milton, Paradise Lost, X, 193

87 They are not skilful considerers of human things, who
imagine to remove sin by removing the matter of sin; for,
besides that it is a huge heap increasing under the very
act of diminishing, though some part of it may for a time
be withdrawn from some persons, it cannot from all, in
such a universal thing as books are; and when this is
done, yet the sin remains entire. Though ye take from a
covetous man all his treasure, he has yet one jewel left,
ye cannot bereave him of his covetousness. Banish all
objects of lust, shut up all youth into the severest
discipline that can be exercised in any hermitage, ye
cannot make them chaste, that came not thither so: such
great care and wisdom is required to the right managing
of this point. Suppose we could expel sin by this means;
look how much we thus expel of sin, so much we expel of

virtue: for the matter of them both is the same; remove that, and ye remove them both alike.

Milton, Areopagitica

88 I cannot admit that sin and evil have any positive existence, far less that anything can exist, or come to pass, contrary to the will of God. On the contrary, not only do I assert that sin has no positive existence, I also maintain that only in speaking improperly, or humanly, can we say that we sin against God, as in the expression that men offend God.

Spinoza, Letter to William de Blyenbergh (Jan, 5, 1665)

89 There is no original sin in the human heart, the how and why of the entrance of every vice can be traced. The only natural passion is self-love or selfishness taken in a wider sense.

Rousseau, Emile, II

90 Adam bit the apple, and thereupon sin fell on the human race. Its origin is supposed to be explained when it is told as an anecdote of the past. In times long gone by there were two sorts of people: one, the diligent, intelligent, and, above all, frugal *elite*; the other, lazy rascals, spending their substance, and more, in riotous living. The theological legend of original sin tells us certainly how man came to be condemned to eat his bread in the sweat of his brow; but the history of economic original sin reveals to us that there are people to whom this is by no means essential. Never mind! Thus it came to pass that the former sort accumulated wealth, and the latter sort had at last nothing to sell except their own skins. And

from this original sin dates the poverty of the great majority that, despite all its labour, has up to now nothing to sell but itself, and the wealth of the few that increases constantly although they have long ceased to work. Such insipid childishness is every day preached to us in the defence of property.

Marx, Capital, Vol. I, VIII, 26

- 91 She [the Catholic Church] holds that it were better for sun and moon to drop from heaven, for the earth to fail, and for all the many millions who are upon it to die of starvation in extremest agony, as far as temporal affliction goes, than that one soul, I will not say, should be lost, but should commit one single venial sin, should tell one wilful untruth, ... or steal one poor farthing without excuse.

Newman, Lectures on Anglican Difficulties, VIII

- 92 *Grand Inquisitor*. The wise and dread spirit, the spirit of self-destruction and non-existence... the great spirit talked with Thee in the wilderness, and we are told in the books that he "tempted" Thee. Is that so? And could anything truer be said than what he revealed to Thee in three questions and what Thou didst reject, and what in the books is called "the temptation"? And yet if there has ever been on earth a real stupendous miracle, it took place on that day, on the day of the three temptations. The statement of those three questions was itself the miracle. If it were possible to imagine simply for the sake of argument that those three questions of the dread spirit had perished utterly from the books, and that we had to restore them and to invent them anew, and to do so had

gathered together all the wise men of the earth—rulers, chief priests, learned men, philosophers, poets—and had set them the task to invent three questions, such as would not only fit the occasion, but express in three words, three human phrases, the whole future history of the world and of humanity—dost Thou believe that all the wisdom of the earth united could have invented anything in depth and force equal to the three questions which were actually put to Thee then by the wise and mighty spirit in the wilderness? From those questions alone, from the miracle of their statement, we can see that we have here to do not with the fleeting human intelligence, but with the absolute and eternal. For in those three questions the whole subsequent history of mankind is, as it were, brought together into one whole, and foretold, and in them are united all the unsolved historical contradictions of human nature. At the time it could not be so clear, since the future was unknown; but now that fifteen hundred years have passed, we see that everything in those three questions was so justly divined and foretold, and has been so truly fulfilled, that nothing can be added to them or taken from them.

Judge Thyself who was right—Thou or he who questioned Thee then?

Dostoevsky, Brothers Karamazov, Pt, II, V, 5

93 Adam was but human—this explains it all. He did not want the apple for the apple's sake; he wanted it only because it was forbidden. The mistake was in not forbidding the serpent; then he would have eaten the serpent.

Mark Twain, Pudd'nhead Wilson's Calendar, II

94 The priest disvalues, *dissanctifies* nature: it is only at the price of this that he exists at all. —Disobedience of God, that is to say of the priest, of ‘the Law’, now acquires the name ‘sin’; the means of ‘becoming reconciled again with God’ are, as is only to be expected, means by which subjection to the priest is only more thoroughly guaranteed: the priest alone ‘redeems’.... From a psychological point of view, ‘sins’ are indispensable in any society organized by priests: they are the actual levers of power, the priest *lives* on sins, he needs ‘the commission of sins’.... Supreme law: ‘God forgives him who repents’—in plain language: *who subjects himself to the priest*.

Nietzsche, Antichrist, XXVI

95 Sin... that form *par excellence* of the self-violation of man, was invented to make science, culture, every kind of elevation and nobility of man impossible.

Nietzsche, Antichrist, XLIX

96 If the Son of God was obliged to sacrifice his life to redeem mankind from original sin, then by the law of the talion, the requital of like for like, that sin must have been a killing, a murder. Nothing else could call for the sacrifice of a life in expiation. And if the original sin was an offence against God the Father, the primal crime of mankind must have been a parricide, the killing of the primal father of the primitive human horde, whose image in memory was later transfigured into a deity.

Freud, Thoughts on War and Death, II

97 A relatively strict and vigilant conscience is the very sign of a virtuous man, and though saints may proclaim themselves sinners, they are not so wrong, in view of the temptations of instinctual gratifications to which they are peculiarly liable—since, as we know, temptations do but increase under constant privation, whereas they subside, at any rate temporarily, if they are sometimes gratified. The field of ethics is rich in problems, and another of the facts we find here is that misfortune, i.e., external deprivation, greatly intensifies the strength of conscience in the superego. As long as things go well with a man, his conscience is lenient and lets the ego do all kinds of things; when some calamity befalls, he holds an inquisition within, discovers his sin, heightens the standards of his conscience, imposes abstinences on himself and punishes himself with penances.

Freud, Civilisation and Its Discontents, VII

20.14 Redemption and Salvation

If the reader compares the quotations of this section with those of Section 20.13 on Sin and Temptation and of those of Section 20.15 on Heaven and Hell, the reader will find that the subjects treated in the three sections are so closely related that the allocation of texts to one rather than another place has been somewhat arbitrary. Within the Christian tradition at least, and perhaps also in other religions as well, it is the existence of sin that calls upon God to mete out either merciful forgiveness or just punishment. If men were without sin, there would be no need for a redeemer and savior; if the sins of all were automatically

washed away by the sacrificial atonement of a redeemer, there would be no damned in Hell; unless, with God's grace, salvation is attainable even if not fully merited, there would be no admission of the blessed to the company of the angelic choir in Heaven.

The mention of the angels reminds us that it was the sin of Satan or Lucifer that separated the good angels from the bad and populated Hell with its demons or devils, and Heaven with its nine hierarchies of angels. As the reader of Section 20.7 on Angels and Devils will discover, because the angelic substance is aeviternal and immutable, unlike that of the individual man, the sins of the fallen angels are irredeemable. They are irretrievably and forever damned from the first moment of their sin (which is also the first moment of creation), just as, from that moment too, the good angels are unchangeably in the presence of God.

The quotations below, including a large number from the Old and the New Testament, deal with atonement for sin, by sacrifice or other means; with the need for a mediator between man and God to reconcile God's mercy with his justice; with the reasons why man's redemption requires God to become man in the person of Jesus Christ, and to shed his blood on the cross to wash away the sins of the world; and with the healing power of God's grace to remove the wounds of original sin and to enable men to perform the good works that have some merit for salvation. The intricacies of the doctrine of grace, and the great debate over salvation through faith or through good works, have not been adequately represented here, and cannot be in view of their complexity and subtlety. As damnation is eternal death, so salvation is eternal life, the joys of which constitute the beatitude of the blessed united with God. For the difference between such eternal happiness and the

temporal happiness that all men seek and some attain in this earthly life, the reader must compare what is said here about beatitude with what is said about happiness in Section 9.8.

■ ■ ■

1 Salvation belongeth unto the Lord.

Psalm 3:8

2 The Lord is my shepherd; I shall not want.

He maketh me to lie down in green pastures: he leadeth me beside the still waters.

He restoreth my soul; he leadeth me in the paths of righteousness for his name's sake.

Yea, though I walk through the valley of the shadow of death, I will fear no evil: for thou art with me; thy rod and thy staff they comfort me.

Thou preparest a table before me in the presence of mine enemies: thou anointest my head with oil; my cup runneth over.

Surely goodness and mercy shall follow me all the days of my life: and I will dwell in the house of the Lord for ever.

Psalm 23:1-6

3 But the salvation of the righteous is of the Lord: he is their strength in the time of trouble.

And the Lord shall help them, and deliver them: he shall deliver them from the wicked, and save them, because they trust in him.

Psalm 37:39-40

4 Purge me with hyssop, and I shall be clean: wash me, and I shall be whiter than snow.

Make me to hear joy and gladness; that the bones which thou hast broken may rejoice.

Hide thy face from my sins, and blot out all mine iniquities.

Create in me a clean heart, O God; and renew a right spirit within me.

Cast me not away from thy presence; and take not thy holy spirit from me.

Restore unto me the joy of thy salvation; and uphold me with thy free spirit.

Psalm 51:7-12

5 O Zion, that bringest good tidings, get thee up into the high mountain; O Jerusalem, that bringest good tidings, lift up thy voice with strength; lift it up, be not afraid; say unto the cities of Judah, Behold your God!

Behold, the Lord God will come with strong hand, and his arm shall rule for him: behold, his reward is with him, and his work before him.

He shall feed his flock like a shepherd: he shall gather the lambs with his arm, and carry them in his bosom, and shall gently lead those that are with young.

Isaiah 40:9-11

6 For, behold, I create new heavens and a new earth: and the former shall not be remembered, nor come into mind.

But be ye glad and rejoice for ever in that which I create....

The wolf and the lamb shall feed together, and the lion shall eat straw like the bullock: and dust shall be the serpent's meat. They shall not hurt nor destroy in all my holy mountain, saith the Lord.

Isaiah 65:17-25

7 And they said every one to his fellow, Come, and let us cast lots, that we may know for whose cause this evil is upon us. So they cast lots, and the lot fell upon Jonah.

Then said they unto him, Tell us, we pray thee, for whose cause this evil is upon us; What is thine occupation? and whence comest thou? what is thy country? and of what people art thou?

And he said unto them, I am an Hebrew; and I fear the Lord, the God of heaven, which hath made the sea and the dry land.

Then were the men exceedingly afraid, and said unto him, Why hast thou done this? For the men knew that he fled from the presence of the Lord, because he had told them.

Then said they unto him, What shall we do unto thee, that the sea may be calm unto us? for the sea wrought, and was tempestuous.

And he said unto them, Take me up, and cast me forth into the sea; so shall the sea be calm unto you: for I know that for my sake this great tempest is upon you.

Nevertheless the men rowed hard to bring it to the land; but they could not: for the sea wrought, and was tempestuous against them.

Wherefore they cried unto the Lord, and said, We beseech thee, O Lord, we beseech thee, let us not perish for this man's life, and lay not upon us innocent blood: for thou, O Lord, hast done as it pleased thee.

So they took up Jonah, and cast him forth into the sea: and the sea ceased from her raging.

Then the men feared the Lord exceedingly, and offered a sacrifice unto the Lord, and made vows.

Now the Lord had prepared a great fish to swallow up Jonah. And Jonah was in the belly of the fish three days and three nights.

Then Jonah prayed unto the Lord his God out of the fish's belly,

And said, I cried by reason of mine affliction unto the Lord, and he heard me; out of the belly of hell cried I, and thou heardest my voice.

For thou hadst cast me into the deep, in the midst of the seas; and the floods compassed me about: all thy billows and thy waves passed over me.

Then I said, I am cast out of thy sight; yet I will look again toward thy holy temple.

The waters compassed me about, even to the soul: the depth closed me round about, the weeds were wrapped about my head.

I went down to the bottoms of the mountains; the earth with her bars was about me for ever: yet hast thou brought up my life from corruption, O Lord my God.

When my soul fainted within me I remembered, the Lord: and my prayer came in unto thee, into thine holy temple.

They that observe lying vanities forsake their own mercy.

But I will sacrifice unto thee with the voice of thanksgiving; I will pay that that I have vowed. Salvation is of the Lord.

And the Lord spake unto the fish, and it vomited out Jonah upon the dry land.

Jonah 1:7-17; 2:1-10

8 Behold, I will send my messenger, and he shall prepare the way before me: and the Lord, whom ye seek, shall suddenly come to his temple, even the messenger of the covenant, whom ye delight in: behold, he shall come, saith the Lord of hosts

But who may abide the day of his coming? and who shall stand when he appeareth? for he is like a refiner's fire, and like fullers' soap:

And he shall sit as a refiner and purifier of silver: and he shall purify the sons of Levi, and purge them as gold and silver, that they may offer unto the Lord an offering in righteousness.

Malachi 3:1-3

9 The last great age, foretold by sacred rhymes,
Renews its finished course: Saturnian times
Roll round again; and mighty years, begun
From their first orb, in radiant circles run.
The base degenerate iron offspring ends:
A golden progeny from heaven descends.
O chaste Lucina! speed the mother's pains;
And haste the glorious birth! thy own Apollo reigns!
The lovely boy, with his auspicious face,
Shall Pollio's consulship and triumph grace:
Majestic months set out with him to their appointed race.
The father banished virtue shall restore;
And crimes shall threat the guilty world no more.
The son shall lead the life of gods, and be
By gods and heroes seen, and gods and heroes see.
The jarring nations he in peace shall bind,
And with paternal virtues rule mankind.

Virgil, Eclogues, IV

- 10 Every valley shall be filled, and every mountain and hill shall be brought low; and the crooked shall be made straight, and the rough ways shall be made smooth; And all flesh shall see the salvation of God.

Luke 3:5-6

- 11 There shall be signs in the sun, and in the moon, and in the stars; and upon the earth distress o nations, with perplexity; the sea and the waves roaring; Men's hearts failing them for fear, and for looking after those things which are coming on the earth: for the powers of heaven shall be shaken.

And then shall they see the Son of man coming in a cloud with power and great glory.

And when these things begin to come to pass, then look up, and lift up your heads; for your redemption draweth nigh.

Luke 21:25-28

- 12 The next day John seeth Jesus coming unto him, and saith, Behold the Lamb of God, which taketh away the sin of the world.

John 1:29

- 13 And as Moses lifted up the serpent in the wilderness, even so must the Son of man be lifted up:

That whosoever believeth in him should not perish, but have eternal life.

For God so loved the world, that he gave his only begotten Son, that whosoever believeth in him should not perish, but have everlasting life.

John 3:14-16

14 Then Jesus said unto them. Verily, verily, I say unto you, Moses gave you not that bread from heaven; but my Father giveth you the true bread from heaven.

For the bread of God is he which cometh down from heaven, and giveth life unto the world.

Then said they unto him. Lord, evermore give us this bread.

And Jesus said unto them, I am the bread of life: he that cometh to me shall never hunger; and he that believeth on me shall never thirst.

But I said unto you. That ye also have seen me, and believe not.

All that the Father giveth me shall come to me; and him that cometh to me I will in no wise cast out.

For I came down from heaven, not to do mine own will, but the will of him that sent me.

And this is the Father's will which hath sent me, that of all which he hath given me I should lose nothing, but should raise it up again at the last day.

And this is the will of him that sent me, that every one which seeth the Son, and believeth on him, may have everlasting life: and I will raise him up at the last day.

John 6:32-40

15 If any man hear my words, and believe not, I judge him not: for I came not to judge the world, but to save the world.

John 12:47

16 Eye hath not seen, nor ear heard, neither have entered into the heart of man, the things which God hath

prepared for them that love him.

1 Corinthians 2:9

17 Ye are not your own. For ye are bought with a price: therefore glorify God in your body, and in your spirit, which are God's.

1 Corinthians 6:19-20

18 For by grace are ye saved through faith; and that not of yourselves; it is the gift of God.

Ephesians 2:8

19 Let the wicked in their restlessness go from Thee and flee away. Yet Thou dost see them, cleaving through their darkness. And all the universe is beautiful about them, but they are vile. What harm have they done Thee? Or have they brought dishonour upon Thy government, which from the heavens unto the latest things of earth is just and perfect? Where indeed did they flee to when they fled from Thy face? Or where dost Thou not find them? The truth is that they fled, that they might not see Thee who sawest them. And so with eyes blinded they stumbled against Thee—for Thou dost not desert any of the things that Thou hast made—they stumbled against Thee in their injustice and justly suffered, since they had withdrawn from Thy mercy and stumbled against Thy justice and fallen headlong upon Thy wrath. Plainly they do not know that Thou art everywhere whom no place compasses in, and that Thou alone art ever present even to those that go furthest from Thee. Let them therefore turn back and seek Thee because Thou hast not deserted Thy creatures as they have deserted their Creator. Let

them turn back, and behold Thou art there in their hearts, in the hearts of those that confess to Thee and cast themselves upon Thee and weep on Thy breast as they return from ways of anguish. Gently Thou dost wipe away their tears and they weep the more and are consoled in their weeping: because Thou, Lord, and not any man that is only flesh and blood, Thou, Lord who hast made them, dost remake them and give them comfort.

Augustine, Confessions, V, 2

20 The true Mediator, whom in the secret of Your mercy You have shown to men and sent to men, that by His example they might learn humility—the Mediator between God and men, the man Christ Jesus, appeared between sinful mortals and the immortal Just One: for like men He was mortal, like God He was Just; so that, the wages of justice being life and peace, He might, through the union of His own justice with God, make void the death of those sinners whom He justified by choosing to undergo death as they do. He was shown forth to holy men of old that they might be saved by faith in His Passion to come, as we by faith in His Passion now that He has suffered it. As man. He is Mediator; but as Word, He is not something in between, for He is equal to God, God with God, and together one God.

Augustine, Confessions, X, 43

21 How much Thou hast loved us, O good Father, *Who hast spared not even Thine own Son, but delivered Him up for us wicked men! How Thou hast loved us, for whom He who thought it not robbery to be equal with Thee became obedient even unto the death of the Cross, He who alone*

*was free among the dead, having power to lay down His life and power to take it up again: for us He was to Thee both Victor and Victim, and Victor because Victim; for us He was to Thee both Priest and Sacrifice, and Priest because Sacrifice: turning us from slaves into Thy sons, by being Thy Son and becoming a slave. Rightly is my hope strong in Him, who sits at Thy right hand and intercedes for us; otherwise I should despair. For many and great are my infirmities, many and great; but Thy medicine is of more power. We might well have thought Thy Word remote from union with man and so have despaired of ourselves, if It had not been *made flesh and dwelt among us*.*

Augustine, Confessions, X, 43

- 22 If ... it must needs be that all men, so long as they are mortal, are also miserable, we must seek an intermediate who is not only man, but also God, that, by the interposition of His blessed mortality, He may bring men out of their mortal misery to a blessed immortality. In this intermediate two things are requisite, that He become mortal and that He do not continue mortal. He did become mortal, not rendering the divinity of the Word infirm, but assuming the infirmity of flesh. Neither did He continue mortal in the flesh, but raised it from the dead; for it is the very fruit of His mediation that those, for the sake of whose redemption He became the Mediator, should not abide eternally in bodily death. Wherefore it became the Mediator between us and God to have both a transient mortality and a permanent blessedness, that by that which is transient He might be assimilated to mortals, and might translate them from mortality to that which is permanent.

Augustine, City of God, IX, 15

23 God's Son, assuming humanity without destroying His divinity, established and founded this faith, that there might be a way for man to man's God through a God-man. For this is the Mediator between God and men, the man Christ Jesus. For it is as man that He is the Mediator and the Way. Since, if the way lieth between him who goes and the place whither he goes, there is hope of his reaching it; but if there be no way, or if he know not where it is, what boots it to know whither he should go? Now the only way that is infallibly secured against all mistakes, is when the very same person is at once God and man, God our end, man our way.

Augustine, City of God, XI, 2

24 The salvation of man could not be achieved otherwise than through Christ.... *There is no other name ... given to men, whereby we must be saved.* Consequently the law that brings all in a perfect way to salvation could not be given until after the coming of Christ. But before His coming it was necessary to give to the people, of whom Christ was to be born, a law containing certain rudiments of saving justice, in order to prepare them to receive Him.

Aquinas, Summa Theologica, I-II, 91, 5

25 Man, by his natural endowments, cannot produce meritorious works proportionate to everlasting life, but for this a higher power is needed, namely, the power of grace. And thus without grace man cannot merit everlasting life. Yet he can perform works conducing to a good which is natural to man, as to toil in the fields, to drink, to eat, or to have friends, and the like.

Aquinas, Summa Theologica, I-II, 109, 5

26 There is a twofold grace: one whereby man himself is united to God, and this is called sanctifying grace; the other is that whereby one man co-operates with another in leading him to God, and this gift is called gratuitous grace, since it is bestowed on a man beyond the capability of nature, and beyond the merit of the person. But whereas it is bestowed on a man not to justify him, but rather that he may co-operate in the justification of another, it is not called sanctifying grace.

Aquinas, Summa Theologica, I-II, 111, 1

27 God does not justify us without ourselves, because whilst we are being justified we consent to God's justice by a movement of our free choice. Nevertheless this movement is not the cause of grace, but the effect; hence the whole operation pertains to grace.

Aquinas, Summa Theologica, I—II, 111, 2

28 By taking flesh, God did not lessen His majesty, and in consequence did not lessen the reason for reverencing Him, which is increased by the increase of knowledge of Him. But, on the contrary, because He wished to draw near to us by taking flesh. He drew us to know Him the more.

Aquinas, Summa Theologica, III, 1, 2

29 Although it belongs to Christ as God to take away sin as having the authority, yet it belongs to Him as man to satisfy for the sin of the human race. And in this sense He is called the Mediator of God and men.

Aquinas, Summa Theologica, III, 26, 2

30 After we were on the upper edge of the high cliff, out on the open hillside, "Master mine," said I, "what way shall we take?"

And he [Virgil] to me: "Let no step of thine descend, ever up the mount behind me win thy way, until some wise escort appear to us. . . . This mountain is such, that ever at the beginning below 'tis toilsome, and the more a man ascends the less it wearies.

Therefore when it shall seem to thee so pleasant that the ascending becomes to thee easy, even as in a boat to descend with the stream,

then shalt thou be at the end of this path: there hope to rest thy weariness."

Dante, Purgatorio, IV, 34

31 "But tell us, if thou knowest, why the mount gave before such shakings, and wherefore all seemed to shout with one voice down to its soft base."

Thus, by asking, did he [Virgil] thread the very needle's eye of my desire, and with the hope alone my thirst was made less fasting.

That spirit [Statius] began: "The holy rule of the mount suffereth naught that is arbitrary, or that is outside custom.

Here it is free from all terrestrial change; that which Heaven receives into itself from itself may here operate as cause, and naught else:

since neither rain, nor hail, nor snow, nor dew, nor hoarfrost, falls any higher than the short little stairway of the three steps.

Clouds, dense or thin, appear not, nor lightning flash,
nor Thaumás' daughter, who yonder oft changes her
region.

Dry vapour rises not higher than the top of the three
steps which I spake of, where Peter's vicar hath his feet.

It quakes perchance lower down little or much, but by
reason of wind which is hidden in the earth, I know not
how, it has never quaked up here.

It quakes here when some soul fceleth herself
cleansed, so that she may rise up, or set forth, to mount
on high, and such a shout follows her.

Of the cleansing the will alone gives proof, which fills
the soul, all free to change her cloister, and avails her to
will.

She wills indeed before, but that desire permits it not
which divine justice sets, counter to will, toward the
penalty, even as it was toward the sin.

And I who have lain under this torment five hundred
years and more, only now felt free will for a better
threshold.

Therefore didst thou feel the earthquake, and hear the
pious spirits about the mount give praises to that Lord—
soon may he send them above."

Dante, Purgatorio, XXI, 34

32 When the stairway was all sped beneath us, and we were
upon the topmost step, on me did Virgil fix his eyes,
and said: "Son, the temporal fire and the eternal, hast
thou seen, and art come to a place where I, of myself,
discern no further.

Here have I brought thee with wit and with art; now
take thy pleasure for guide; forth art thou from the steep
ways, forth art from the narrow.

Behold there the sun that shineth on thy brow behold the tender grass, the flowers, and the shrubs, which the ground here of itself alone brings forth.

While the glad fair eyes are coming, which weeping made me come to thee, thou canst sit thee down and canst go among them.

No more expect my word, nor my sign. Free, upright, and whole, is thy will, and 'twere a fault not to act according to its prompting; wherefore I do crown and mitre thee over thyself."

Dante, Purgatorio, XXVII, 124

- 33 Even if in the power of the Holy Spirit a man were to keep the law completely, he ought nevertheless to pray for divine mercy, for God has ordained that man should be saved not by the law but by Christ.

Luther, Table Talk, 85

- 34 There is nothing so easy, so gentle, and so favorable as the divine law; she calls us to herself, sinful and detestable as we are; she stretches out her arms to us and takes us to her bosom, no matter how vile, filthy, and besmirched we are now and are to be in the future. But still, in return, we must look on her in the right way. We must receive this pardon with thanksgiving, and, at least for that instant when we address ourselves to her, have a soul remorseful for its sins and at enmity with the passions that have driven us to offend her.

Montaigne, Essays, I, 56, Of Prayers

- 35 If we held to God by the mediation of a living faith, if we held to God through him and not through ourselves, if we

had a divine foothold and foundation, human accidents would not have the power to shake us as they do. Our fort would not be prone to surrender to so weak a battery; the love of novelty, the constraint of princes, the good fortune of one party, a heedless and accidental change in our opinions, would not have the power to shake and alter our belief; we would not allow it to be troubled by every new argument or by persuasion, not even by all the rhetoric there ever was; we should withstand those waves with inflexible and immobile firmness. ... If this ray of divinity touched us at all, it would appear all over: not only our words, but also our works would bear its light and luster. Everything that came from us would be seen to be illuminated by this noble brightness.

Montaigne, Essays, 11, 12, Apology for Raymond Sebond

36 *Lear*. No, no, no, no! Come, let's away to prison.
We two alone will sing like birds i' the cage;
When thou dost ask me blessing, I'll kneel down,
And ask of thee forgiveness; so we'll live,
And pray, and sing, and tell old tales, and laugh
At gilded butterflies, and hear poor rogues
Talk of court news; and we'll talk with them too,
Who loses and who wins; who's in, who's out;
And take upon's the mystery of things,
As if we were God's spies; and we'll wear out,
In a wall'd prison, packs and sects of great ones,
That ebb and flow by the moon.

Shakespeare, Lear, V, iii, 8

37 And now, my Friend, said he [Don Quixote], turning to *Sancho*, pardon me that I have brought upon thee, as well as my self, the Scandal of Madness, by drawing thee into my own Errors, and persuading thee that there have been and still are Knights-Errant in the World. Woe is me, my dear Master's Worship! cry'd *Sancho*, all in Tears, don't die this Bout, but e'en take My Counsel, and live on a many Years; 'tis the maddest Trick a Man can ever play in his whole Life, to let his Breath sneak out of his Body without any more ado, and without so much as a Rap o'er the Pate, or a Kick of the Guts; to go out *like the Snuff of a Farthing-Candle*, and die merely of the Mulligrubs, or the Sullens. For Shame, Sir, don't give way to Sluggishness, but get out of your doleful Dumps, and rise. Is this a Time to lie honing and groaning a Bed, when we shou'd be in the Fields in our Shepherd's Cloathing, as we had resolv'd? Ten to one but behind some Bush, or under some Hedge, we may find the Lady Madam *Dulcinea*, strip'd of her enchanted Rags, and as fine as a Queen. Mayhaps you take it to Heart, that you were unhors'd, and a little Crupper-scratched t'other Day; but if that be all, lay the Blame upon Me, and say 'twas My Fault, in not girting *Rosinante* tight enough. You know too, there's nothing more common in your Errantry-Books, than for the Knights to be every Foot jostl'd out of the Saddle. There's nothing but Ups and Downs in this World, and he that's cast down to Day, may be a cock-a-hoop to Morrow. Even so, said *Sampson*, honest *Sancho* has a right Notion of the Matter. Soft and fair. Gentleman, reply'd Don *Quixote*, ne'er look for Birds of this Year in the Nests of the last: I was mad, but I am now in my Senses; I was once Don *Quixote de la Mancha*, but am now (as I said before) the plain *Alonso Quixano*, and I hope the

Sincerity of my Words, and my Repentance, may restore me the same Esteem you have had for me before.

Cervantes, Don Quixote, II, 74

38 Salvation of a sinner supposeth a precedent *redemption*; for he that is once guilty of sin is obnoxious to the penalty of the same; and must pay, or some other for him, such ransom as he that is offended, and has him in his power, shall require. And seeing the person offended is Almighty God, in whose power are all things, such ransom is to be paid before salvation can be acquired, as God hath been pleased to require. By this ransom is not intended a satisfaction for sin equivalent to the offence, which no sinner for himself, nor righteous man can ever be able to make for another: the damage a man does to another he may make amends for by restitution or recompense, but sin cannot be taken away by recompense; for that were to make the liberty to sin a thing vendible.

Hobbes, Leviathan, III, 38

39 I believe many are saved, who to man seem reprobated; and many are reprobated, who in the opinion and sentence of man, stand elected: there will appear at the Last day, strange and unexpected examples both of his Justice and his Mercy.

Sir Thomas Browne, Religio Medici, I, 57

40 The Catholic religion does not bind us to confess our sins indiscriminately to everybody; it allows them to remain hidden from all other men save one, to whom she bids us reveal the innermost recesses of our heart and show

ourselves as we are. There is only this one man in the world whom she orders us to undeceive, and she binds him to an inviolable secrecy, which makes this knowledge to him as if it were not. Can we imagine anything more charitable and pleasant? And yet the corruption of man is such that he finds even this law harsh; and it is one of the main reasons which has caused a great part of Europe to rebel against the Church.

How unjust and unreasonable is the heart of man, which feels it disagreeable to be obliged to do in regard to one man what in some measure it were right to do to all men! For is it right that we should deceive men?

Pascal, Pensées, II, 100

- 41 Grace is indeed needed to turn a man into a saint; and he who doubts it does not know what a saint or a man is.

Pascal, Pensées, VII, 508

- 42 The Incarnation shows man the greatness of his misery by the greatness of the remedy which he required.

Pascal, Pensées, VII, 526

- 43 This is the Month, and this the happy morn
Wherin the Son of Heav'ns eternal King,
Of wedded Maid, and Virgin Mother born,
Our great redemption from above did bring;
For so the holy sages once did sing.

That he our deadly forfeit should release.
And with his Father work us a perpetual peace.

Milton, On the Morning of Christs Nativity, 1

44 *God.* Man falls deceiv'd

By the other [Satan] first: Man therefore shall find grace,
The other none: in Mercy and Justice both,
Through Heav'n and Earth, so shall my glorie excel,
But Mercy first and last shall brightest shine.

Milton, Paradise Lost, III, 130

45 *God.* Man disobeying,

Disloyal breaks his fealtie, and sinns
Against the high Supremacie of Heav'n,
Affecting God-head, and so loosing all,
To expiate his Treason hath naught left,
But to destruction sacred and devote,
He with his whole posteritie must die,
Die hce or Justice must; unless for him
Som other able, and as willing, pay
The rigid satisfaction, death for death.

Milton, Paradise Lost, III, 203

46 *Christ.* Behold mee, then, mee for him, life for life

I offer, on mee let thine anger fall;
Account mce man; I for his sake will leave
Thy bosom, and this glorie next to thee
Freely put off, and for him lastly die
Well pleas'd, on me let Death wreck all his rage.

Milton, Paradise Lost, III, 236

47 If salvation lay ready to hand and could be discovered
without great labour, how could it be possible that it
should be neglected almost by everybody? But all noble
things are as difficult as they are rare.

Spinoza, Ethics, V, Prop. 42, Schol.

48 When these men had thus bravely shewed themselves against Doubting Castle, and had slain *Giant Despair*, they went forward, and went on till they came to the *Delectable Mountains*, where *Christian* and *Hopeful* refreshed themselves with the Varieties of the Place. They also acquainted themselves with the Shepherds there, who welcomed them as they had done *Christian* before, unto the Delectable Mountains.

Bunyan, Pilgrim's Progress, II

49 It was noised abroad that Mr. *Valiant-for-truth* was taken with a Summons, by the same Post as the other, and had this for a Token that the Summons was true, *That his Pitcher was broken at the Fountain*. When he understood it, he called for his Friends, and told them of it. Then said he, I am going to my Fathers, and tho' with great Difficulty I am got hither, yet now I do not repent me of all the Trouble I have been at to arrive where I am. *My Sword*, I give to him that shall succeed me in my Pilgrimage, and my Courage and *Skill*, to him that can get it. *My Marks and Scars* I carry with me, to be a Witness for me, that I have fought his Battles who now will be my Rewarder. When the Day that he must go hence, was come, many accompanied him to the River side, into which, as he went, he said, *Death, where is thy Sting?* And as he went down deeper, he said, *Grave, where is thy Victory?* So he passed over, and all the Trumpets sounded for him on the other side.

Bunyan, Pilgrim's Progress, II

50 There are a thousand ways to wealth, but one only way to heaven.

Locke, Letter Concerning Toleration

51 No way whatsoever that I shall walk in against the dictates of my conscience will ever bring me to the mansions of the blessed. I may grow rich by an art that I take not delight in; I may be cured of some disease by remedies that I have not faith in; but I cannot be saved by a religion that I distrust and by a worship that I abhor. It is in vain for an unbeliever to take up the outward show of another man's profession. Faith only and inward sincerity are the things that procure acceptance with God.

Locke, Letter Concerning Toleration

52 He shall not die, by G—, cried my uncle Toby.

--The Accusing Spirit, which flew up to heaven's chancery with the oath, blushed as he gave it in;—and the Recording Angel, as he wrote it down, dropped a tear upon the word, and blotted it out for ever.

Sterne, Tristram Shandy, VI, 8

53 I proceeded: "What do you think, Sir, of Purgatory, as believed by the Roman Catholicks?" *Johnson*. "Why, Sir, it is a very harmless doctrine. They are of opinion that the generality of mankind are neither so obstinately wicked as to deserve everlasting punishment, nor so good as to merit being admitted into the society of blessed spirits; and therefore that God is graciously pleased to allow of a middle state, where they may be purified by certain degrees of suffering. You see, Sir, there is nothing unreasonable in this."

Boswell, Life of Johnson (Oct. 26, 1769)

54 Dr. Johnson surprised him [Dr. Adams] not a little, by acknowledging with a look of horror, that he was much oppressed by the fear of death. The amiable Dr. Adams suggested that God was infinitely good. *Johnson*. "That he is infinitely good, as far as the perfection of his nature will allow, I certainly believe; but it is necessary for good upon the whole, that individuals should be punished. As to an *individual*, therefore, he is not infinitely good; and as I cannot be *sure* that I have fulfilled the conditions on which salvation is granted, I am afraid I may be one of those who shall be damned," (looking dismally). *Dr. Adams*. "What do you mean by damned?" *Johnson*. (passionately and loudly,) "Sent to Hell, Sir, and punished everlastingly!" *Dr. Adams*. "I don't believe that doctrine." *Johnson*. "Hold, Sir, do you believe that some will be punished at all?" *Dr. Adams*. "Being excluded from Heaven will be a punishment; yet there may be no great positive suffering." *Johnson*. "Well, Sir; but, if you admit any degree of punishment, there is an end of your argument for infinite goodness simply considered; for, infinite goodness would inflict no punishment whatever. There is not infinite goodness physically considered; morally there is."

Boswell, Life of Johnson (June 12, 1784)

55 The Holy Ghost over the bent
World broods with warm breast and with ah! bright
wings.

G. M. Hopkins, God's Grandeur

56 The ordinary moralistic state of mind makes the salvation
of the world conditional upon the success with which

each unit does its part. Partial and conditional salvation is in fact a most familiar notion when taken in the abstract, the only difficulty being to determine the details. Some men are even disinterested enough to be willing to be in the unsaved remnant as far as their persons go, if only they can be persuaded that their cause will prevail—all of us are willing, whenever our activity-excitement rises sufficiently high. I think, in fact, that a final philosophy of religion will have to consider the pluralistic hypothesis more seriously than it has hitherto been willing to consider it. For practical life at any rate, the chance of salvation is enough. No fact in human nature is more characteristic than its willingness to live on a chance.

*William James, Varieties of Religious Experience,
Postscript*

20.15 Heaven and Hell

Whereas redemption and salvation through the intercession of a divine mediator is, for the most part, a Christian doctrine and a distinguishing feature of the Christian religion, heaven and hell figure significantly among the religious beliefs of pagan antiquity, though usually under other names, such as Hades and the Elysian Fields. Hence the ancient poets, and particularly Homer and Virgil who recount visits by their heroes to the abode of the shades, take their place here, along with Dante and Milton, among the authors depicting the joys of the blessed and the tortures of the damned. On the other hand, Plato, who, among ancient philosophers, is most concerned with the immortality of the soul and the judgment it is subject to after death, conceives divine rewards and punishments in terms of reincarnation, accompanied by a better or worse earthly life, rather than in terms of heaven and hell.

As the quotations below indicate, many are the questions asked and answered by medieval theologians concerning the state of the damned in hell and the condition of the blessed in heaven: such questions as whether the tortures of hell are mainly spiritual or physical; whether the pain of loss or deprivation or the pain of sense constitutes the reality of hell; whether references to "hell-fire" are to be interpreted literally or metaphorically; whether the blessed in heaven are aware of the tortures of the damned and whether they take pleasure in such awareness; whether there are lower and higher levels of beatitude in heaven as there are less

and more intense gradations of punishment in hell; and whether the reincarnation of the body and its being reunited with the soul in heaven increases the joys of the blessed.

In the secular literature of a later age, the joys of heaven and the terrors of hell tend to become less vivid and approach the vanishing point of unreality. Nevertheless, even with loss of belief in their reality, they remain as symbols of joy and misery, betokening the fulfillment of man's highest hopes or his abandonment to utter despair. There is also, in the quotations from more recent writers, a strain of satire concerning the preferability of hell to heaven in terms of who is there and what is going on in each place, summed up in a statement by Mark Twain not quoted here: "Heaven for climate, Hell for society."

For the discussion of closely related matters, the reader is referred to Section 20.7 on Angels and Devils, Section 20.13 on Sin and Temptation, and Section 20.14 on Redemption and Salvation.

■ ■ ■

1 The children of men put their trust under the shadow of thy wings.

They shall be abundantly satisfied with the fatness of thy house; and thou shalt make them drink of the river of thy pleasures.

For with thee is the fountain of life: in thy light shall we see light.

Psalms 36:7-9

2 I had rather be a doorkeeper in the house of my God, than to dwell in the tents of wickedness.

Psalm 84:10

3 Hell from beneath is moved for thee to meet thee at thy coming: it stirreth up the dead for thee, even all the chief ones of the earth; it hath raised up from their thrones all the kings of the nations.

All they shall speak and say unto thee, Art thou also become weak as we? art thou become like unto us?

Thy pomp is brought down to the grave, and the noise of thy viols: the worm is spread under thee, and the worms cover thee.

How art thou fallen from heaven, O Lucifer, son of the morning! how art thou cut down to the ground, which didst weaken the nations!

For thou hast said in thine heart, I will ascend into heaven, I will exalt my throne above the stars of God: I will sit also upon the mount of the congregation, in the sides of the north:

I will ascend above the heights of the clouds; I will be like the most High.

Yet thou shalt be brought down to hell, to the sides of the pit.

They that see thee shall narrowly look upon thee, and consider thee, saying, Is this the man that made the earth to tremble, that did shake kingdoms;

That made the world as a wilderness, and destroyed the cities thereof; that opened not the house of his prisoners?

All the kings of the nations, even all of them, lie in glory, every one in his own house.

But thou art cast out of thy grave like an abominable branch, and as the raiment of those that are slain, thrust through with a sword; that go down to the stones of the pit; as a carcase trodden under feet.

Thou shalt not be joined with them in burial, because thou hast destroyed thy land, and slain thy people: the seed of evildoers shall never be renowned.

Isaiah 14:9-20

4 [Hephaistos] spoke, and the goddess of the white arms
Hera smiled at him,

and smiling she accepted the goblet out of her son's
hand.

Thereafter beginning from the left he poured drinks for
the other

gods, dipping up from the mixing bowl the sweet
nectar.

But among the blessed immortals uncontrollable
laughter

went up as they saw Hephaistos bustling about the
palace.

Thus thereafter the whole day long until the sun went
under

they feasted, nor was anyone's hunger denied a fair
portion,

nor denied the beautifully wrought lyre in the hands of
Apollo

nor the antiphonal sweet sound of the Muses singing.

Afterwards when the light of the flaming sun went
under

they went away each one to sleep in his home where
for each one the far-renowned strong-handed
Hephaistos

had built a house by means of his craftsmanship and cunning.

Zeus the Olympian and lord of the lightning went to his own bed, where always he lay when sweet sleep came on him.

Going up to the bed he slept and Hera of the gold throne beside him.

Homer, Iliad, I, 595

5 *Poseidon*. We are three brothers born by Rheia to Kronos, Zeus, and I, and the third is Hades, lord of the dead men.

All was divided among us three ways, each given his domain.

I when the lots were shaken drew the grey sea to live in

forever; Hades drew the lot of the mists and the darkness,

and Zeus was allotted the wide sky, in the cloud and the bright air.

But earth and high Olympos are common to all three.

Homer, Iliad, XV, 187

6 She departed, grey-eyed Athena,
to where the gods have their eternal dwelling—
as men say—in the fastness of Olympos.

Never a tremor of wind, or a splash of rain,
no errant snowflake comes to stain that heaven,
so calm, so vaporless, the world of light.

Here, where the gay gods live their days of pleasure,
the grey-eyed one withdrew.

Homer, Odyssey, VI, 40

7 *Odysseus*. We made the land, put ram and ewe ashore,
and took our way along the Ocean stream
to find the place foretold for us by Kirke.
There Perimedes and Eurylokhos
pinioned the sacred beasts. With my drawn blade
I spaded up the votive pit, and poured
libations round it to the unnumbered dead:
sweet milk and honey, then sweet wine, and last
clear water; and I scattered barley down.
Then I addressed the blurred and breathless dead,
vowing to slaughter my best heifer for them
before she calved, at home in Ithaka,
and burn the choice bits on the altar fire;
as for Teiresias, I swore to sacrifice
a black lamb, handsomest of all our flock.
Thus to assuage the nations of the dead
I pledged these rites, then slashed the lamb and ewe,
letting their black blood stream into the wellpit.
Now the souls gathered, stirring out of Erebos,
brides and young men, and men grown old in pain,
and tender girls whose hearts were new to grief;
many were there, too, torn by brazen lanceheads,
battle-slain, bearing still their bloody gear.
From every side they came and sought the pit
with rustling cries; and I grew sick with fear.

Homer, Odyssey, XI, 20

8 *Odysseus*. Then I saw Tantalos put to the torture: in a cool
pond he stood, lapped round by water clear to the chin,
and being athirst he burned to slake his dry weasand
with drink, though drink he would not ever again. For
when the old man put his lips down to the sheet of water
it vanished round his feet, gulped underground, and

black mud baked there in a wind from hell. Boughs, too, drooped low above him, big with fruit, pear trees, pomegranates, brilliant apples, luscious figs, and olives ripe and dark; but if he stretched his hand for one, the wind under the dark sky tossed the bough beyond him.

Homer, Odyssey, XI, 581

- 9 *Odysseus*. Herakles, down the vistas of the dead, faded from sight; but I stood fast, awaiting other great souls who perished in times past. I should have met, then, god-begotten Theseus and Peirithoos, whom both I longed to see, but first came shades in thousands, rustling in a pandemonium of whispers, blown together, and the horror took me that Persephone had brought from darker hell some saurian death's head.

Homer, Odyssey, XI, 627

- 10 *Theonoe*. AH men, in the world below and in the world above must pay for acts committed here. The mind of those who have died, blown into the immortal air, immortally has knowledge, though all life is gone.

Euripides, Helen, 1013

- 11 *Socrates*. In the days of Cronos there existed a law respecting the destiny of man, which has always been, and still continues to be in Heaven—that he who has lived all his life in justice and holiness shall go, when he is dead, to the Islands of the Blessed, and dwell there in perfect happiness out of the reach of evil; but that he who has lived unjustly and impiously shall go to the house of vengeance and punishment, which is called Tartarus.

Plato, Gorgias, 523A

12 *Socrates*. I tell you a tale; not one of the tales which Odysseus tells to the hero Alcinous, yet this too is a tale of a hero, Er the son of Armenius, a Pamphylian by birth. He was slain in battle, and ten days afterwards, when the bodies of the dead were taken up already in a state of corruption, his body was found unaffected by decay, and carried away home to be buried. And on the twelfth day, as he was lying on the funeral pile, he returned to life and told them what he had seen in the other world. He said that when his soul left the body he went on a journey with a great company, and that they came to a mysterious place at which there were two openings in the earth; they were near together, and over against them were two other openings in the heaven above. In the intermediate space there were judges seated who commanded the just, after they had given judgment on them and had bound their sentences in front of them, to ascend by the heavenly way on the right hand; and in like manner the unjust were bidden by them to descend the lower way on the left hand; these also bore the symbols of their deeds, but fastened on their backs. He drew near, and they told him that he was to be the messenger who would carry the report of the other world to men, and they bade him hear and see all that was to be heard and seen in that place. Then he beheld and saw on one side the souls departing at either opening of heaven and earth when sentence had been given on them; and at the two other openings other souls, some ascending out of the earth dusty and worn with travel, some descending out of heaven clean and bright. And arriving ever and anon they seemed to have come from a

long journey, and they went forth with gladness into the meadow, where they encamped as at a festival; and those who knew one another embraced and conversed, the souls which came from earth curiously enquiring about the things above, and the souls which came from heaven about the things beneath. And they told one another of what had happened by the way, those from below weeping and sorrowing at the remembrance of the things which they had endured and seen in their journey beneath the earth (now the journey lasted a thousand years), while those from above were describing heavenly delights and visions of inconceivable beauty.

Plato, Republic, X, 614A

13 So pray'd the Trojan prince, and, while he pray'd,
His hand upon the holy altar laid.

Then thus replied the prophetess divine:
"O goddess-born of great Anchiscs' line,
The gates of hell are open night and day;
Smooth the descent, and easy is the way;
But to return, and view the cheerful skies,
In this the task and mighty labor lies.
To few great Jupiter imparts this grace,
And those of shining worth and heav'nly race,
Betwixt those regions and our upper light,
Deep forests and impenetrable night
Possess the middle space: th' infernal bounds
Cocytus, with his sable waves, surrounds.
But if so dire a love your soul invades,
As twice below to view the trembling shades;
If you so hard a toil will undertake,
As twice to pass th' innavigable lake;
Receive my counsel. In the neighb'ring grove

There stands a tree; the queen of Stygian Jove
Claims it her own; thick woods and gloomy night
Conceal the happy plant from human sight.
One bough it bears; but (wondrous to behold!)
The ductile rind and leaves of radiant gold:
This from the vulgar branches must be torn,
And to fair Proserpine the present borne,
Ere leave be giv'n to tempt the nether skies.
The first thus rent a second will arise,
And the same metal the same room supplies.
Look round the wood, with lifted eyes, to see
The lurking gold upon the fatal tree:
Then rend it off, as holy rites command;
The willing metal will obey thy hand.
Following with ease, if favor'd by thy fate.
Thou art foredoom'd to view the Stygian state:
If not, no labor can the tree constrain;
And strength of stubborn arms and steel are vain.
Besides, you know not, while you here attend,
Th' unworthy fate of your unhappy friend:
Breathless he lies; and his unburied ghost.
Depriv'd of fun'ral rites, pollutes your host.
Pay first his pious dues; and, for the dead,
Two sable sheep around his hearse be led;
Then, living turfs upon his body lay:
This done, securely take the destin'd way,
To find the regions destitute of day,"
She said, and held her peace.

Virgil, Aeneid, VI

- 14 Obscure they [Aeneas and the Prophetess] went thro'
dreary shades, that led
Along the waste dominions of the dead.

Thus wander travelers in woods by night,
By the moon's doubtful and malignant light,
When Jove in dusky clouds involves the skies,
And the faint crescent shoots by fits before their eyes.

Just in the gate and in the jaws of hell,
Revengeful Cares and sullen Sorrows dwell,
And pale Diseases, and repining Age,
Want, Fear, and Famine's unresisted rage;
Here Toils, and Death, and Death's half-brother, Sleep,
Forms terrible to view, their sentry keep;
With anxious Pleasures of a guilty mind,
Deep Frauds before, and open Force behind;
The Furies' iron beds; and Strife, that shakes
Her hissing tresses and unfolds her snakes.
Full in the midst of this infernal road,
An elm displays her dusky arms abroad:
The God of Sleep there hides his heavy head,
And empty dreams on ev'ry leaf are spread.
Of various forms unnumber'd specters more,
Centaur, and double shapes, besiege the door.
Before the passage, horrid Hydra stands,
And Briareus with all his hundred hands;
Gorgons, Geryon with his triple frame;
And vain Chimaera vomits empty flame.
The chief unsheath'd his shining steel, prepar'd,
Tho' seiz'd with sudden fear, to force the guard,
Off'ring his brandish'd weapon at their face;
Had not the Sibyl stopp'd his eager pace,
And told him what those empty phantoms were:
Forms without bodies, and impassive air.
Hence to deep Acheron they take their way,
Whose troubled eddies, thick with ooze and clay,
Are whirl'd aloft, and in Cocytus lost.

There Charon stands, who rules the dreary coast—
A sordid god: down from his hoary chin
A length of beard descends, uncomb'd, unclean;
His eyes, like hollow furnaces on fire;
A girdle, foul with grease, binds his obscene attire.
He spreads his canvas; with his pole he steers;
The freights of flitting ghosts in his thin bottom bears.
He look'd in years; yet in his years were seen
A youthful vigor and autumnal green.
An airy crowd came rushing where he stood,
Which fill'd the margin of the fatal flood:
Husbands and wives, boys and unmarried maids,
And mighty heroes' more majestic shades,
And youths, intomb'd before their fathers' eyes,
With hollow groans, and shrieks, and feeble cries.
Thick as the leaves in autumn strow the woods,
Or fowls, by winter forc'd, forsake the floods.
And wing their hasty flight to happier lands;
Such, and so thick, the shiv'ring army stands,
And press for passage with extended hands.
Now these, now those, the surly boatman bore:
The rest he drove to distance from the shore.
The hero, who beheld with wond'ring eyes
The tumult mix'd with shrieks, laments, and cries,
Ask'd of his guide, what the rude concourse meant;
Why to the shore the thronging people bent;
What forms of law among the ghosts were us'd:
Why some were ferried o'er, and some refus'd.

"Son of Anchises, offspring of the gods,"
The Sibyl said, "you see the Stygian floods,
The sacred stream which heav'n's imperial state
Attests in oaths, and fears to violate.
The ghosts rejected are th' unhappy crew

Depriv'd of sepulchers and fun'ral due:
The boatman, Charon; those, the buried host.
He ferries over to the farther coast;
Nor dares his transport vessel cross the waves
With such whose bones are not compos'd in graves.
A hundred years they wander on the shore;
At length, their penance done, are wafted o'er."

Virgil Aeneid, VI

15 No sooner landed, in his den they found
The triple porter of the Stygian sound.
Grim Cerberus, who soon began to rear
His crested snakes, and arm'd his bristling hair.
The prudent Sibyl had before prepar'd
A sop, in honey steep'd, to charm the guard;
Which, mix'd with pow'ful drugs, she cast before
His greedy grinning jaws, just op'd to roar.
With three enormous mouths he gapes; and straight,
With hunger press'd, devours the pleasing bait.
Long draughts of sleep his monstrous limbs enslave;
He reels, and, falling, fills the spacious cave.
The keeper charm'd, the chief without delay
Pass'd on, and took th' irremeable way.

Virgil, Aeneid, VI

16 Before the gates, the cries of babes new-born,
Whom fate had from their tender mothers torn,
Assault his ears: then those whom form of laws
Condemn'd to die, when traitors judg'd their cause.
Nor want they lots, nor judges to review
The wrongful sentence, and award a new.
Minos, the strict inquisitor, appears;

And lives and crimes, with his assessors, hears.
Round in his urn the blended balls he rolls.
Absolves the just, and dooms the guilty souls.
The next, in place and punishment, are they
Who prodigally throw their souls away;
Fools, who, repining at their wretched state,
And loathing anxious life, suborn'd their fate.
With late repentance now they would retrieve
The bodies they forsook, and wish to live;
Their pains and poverty desire to bear,
To view the light of heav'n, and breathe the vital air:
But Fate forbids; the Stygian floods oppose.
And with nine circling streams the captive souls inclose.

Virgil, Aeneid, VI

17 And they, perhaps, in words and tears had spent
The little time of stay which Heav'n had lent;
But thus the Sibyl chides their long delay:
"Night rushes down, and headlong drives the day:
'Tis here, in different paths, the way divides;
The right to Pluto's golden palace guides;
The left to that unhappy region tends,
Which to the depth of Tartarus descends;
The seat of night profound, and punish'd fiends."

Virgil, Aeneid, VI

18 They lie below, on golden beds display'd;
And genial feasts with regal pomp are made.
The Queen of Furies by their sides is set,
And snatches from their mouths th' untasted meat,
Which if they touch, her hissing snakes she rears,
Tossing her torch, and thund'ring in their ears.

Then they, who brothers' better claim disown,
Expel their parents, and usurp the throne;
Defraud their clients, and, to lucre sold,
Sit brooding on unprofitable gold;
Who dare not give, and e'en refuse to lend
To their poor kindred, or a wanting friend.
Vast is the throng of these; nor less the train
Of lustful youths, for foul adult'ry slain:
Hosts of deserters, who their honor sold,
And basely broke their faith for bribes of gold.
All these within the dungeon's depth remain,
Despairing pardon, and expecting pain.
Ask not what pains; nor farther seek to know
Their process, or the forms of law below.
Some roll a weighty stone; some, laid along,
And bound with burning wires, on spokes of wheels are
hung.
Unhappy Theseus, doom'd for ever there,
Is fix'd by Fate on his eternal chair;
And wretched Phlegyas warns the world with cries
 (Could warning make the world more just or wise):
'Learn righteousness, and dread th' avenging deities.'
To tyrants others have their country sold,
Imposing foreign lords, for foreign gold;
Some have old laws repeal'd, new statutes made,
Not as the people pleas'd, but as they paid;
With incest some their daughters' bed profan'd:
All dar'd the worst of ills, and, what they dar'd, attain'd.
Had I a hundred mouths, a hundred tongues,
And throats of brass, inspir'd with iron lungs,
I could not half those horrid crimes repeat,
Nor half the punishments those crimes have met.

Virgil, Aeneid, VI

19 They took their way

Where long extended plains of pleasure lay:
The verdant fields with those of heav'n may vie,
With ether vested, and a purple sky;
The blissful seats of happy souls below.
Stars of their own, and their own suns, they know;
Their airy limbs in sports they exercise,
And on the green contend the wrestler's prize.
Some in heroic verse divinely sing;
Others in artful measures lead the ring.
The Thracian bard, surrounded by the rest,
There stands conspicuous in his flowing vest;
His flying fingers, and harmonious quill,
Strikes sev'n distinguish'd notes, and sev'n at once they
fill....

To these the Sibyl thus her speech address'd,
And first to him surrounded by the rest
(Tow'ring his height, and ample was his breast):
"Say, happy souls, divine Musaeus, say,
Where lives Anchiscs, and where lies our way
To find the hero, for whose only sake
We sought the dark abodes, and cross'd the bitter lake?"
To this the sacred poet thus replied:
"In no fix'd place the happy souls reside.
In groves we live, and lie on mossy beds,
By crystal streams, that murmur thro' the meads:
But pass yon easy hill, and thence descend;
The pa tit conducts you to your journey's end."
This said, he led them up the mountain's brow,
And shews them all the shining fields below.
They wind the hill, and thro' the blissful meadow's go.

Virgil, Aeneid, VI

20 Nor death itself can wholly wash their stains;
But long-contracted filth e'en in the soul remains.
The relics of inveterate vice they wear,
And spots of sin obscene in ev'ry face appear.
For this are various penances enjoin'd;
And some are hung to bleach upon the wind,
Some plung'd in waters, others purg'd in fires,
Till all the dregs are drain'd, and all the rust expires.
All have their manes, and those manes bear:
The few, so cleans'd, to these abodes repair,
And breathe, in ample fields, the soft Elysian air.
Then are they happy, when by length of time
The scurf is worn away of each committed crime;
No speck is left of their habitual stains,
But the pure ether of the soul remains.

Virgil, Aeneid, VI

21 Lay not up for yourselves treasures upon earth, where
moth and rust doth corrupt, and where thieves break
through and steal:
But lay up for yourselves treasures in heaven, where
neither moth nor rust doth corrupt, and where thieves do
not break through nor steal:
For where your treasure is, there 'will your heart be
also.

Matthew 6:19-21

22 The kingdom of heaven is like unto a merchant man,
seeking goodly pearls:
Who, when he had found one pearl of great price, went
and sold all that he had, and bought it.

Matthew 13:45-46

23 The kingdom of heaven is like unto a net, that was cast into the sea, and gathered of every kind:

Which, when it was full, they drew to shore, and sat down, and gathered the good into vessels, but cast the bad away.

So shall it be at the end of the world: the angels shall come forth, and sever the wicked from among the just.

And shall cast them into the furnace of fire: there shall be wailing and gnashing of teeth.

Matthew 13:47-50

24 For the kingdom of heaven is like unto a man that is an householder, which went out early in the morning to hire labourers into his vineyard.

And when he had agreed with the labourers for a penny a day, he sent them into his vineyard.

And he went out about the third hour, and saw others standing idle in the marketplace,

And said unto them; Go ye also into the vineyard, and whatsoever is right I will give you. And they went their way.

Again he went out about the sixth and ninth hour, and did likewise.

And about the eleventh hour he went out, and found others standing idle, and saith unto them. Why stand ye here all the day idle?

They say unto him, Because no man hath hired us. He saith unto them. Go ye also into the vineyard; and whatsoever is right, that shall ye receive.

So when even was come, the lord of the vineyard saith unto his steward, Call the labourers, and give them their

hire, beginning from the last unto the first.

And when they came that were hired about the eleventh hour, they received every man a penny.

But when the first came, they supposed that they should have received more; and they likewise received every man a penny.

And when they had received it, they murmured against the goodman of the house,

Saying, These last have wrought but one hour, and thou hast made them equal unto us, which have borne the burden and heat of the day.

But he answered one of them, and said. Friend, I do thee no wrong: didst not thou agree with me for a penny?

Take that thine is, and go thy way: I will give unto this last, even as unto thee.

Is it not lawful for me to do what I will with mine own? Is thine eye evil, because I am good?

So the last shall be first, and the first last: for many be called, but few chosen.

Matthew 20:1-16

25 When the Son of man shall come in his glory, and all the holy angels with him, then shall he sit upon the throne of his glory:

And before him shall be gathered all nations: and he shall separate them one from another, as a shepherd divideth his sheep from the goats:

And he shall set the sheep on his right hand, but the goats on the left.

Then shall the King say unto them on his right hand, Come, ye blessed of my Father, inherit the kingdom prepared for you from the foundation of the world.

Matthew 25:31-34

26 There was a certain rich man, which was clothed in purple and fine linen, and fared sumptuously every day:

And there was a certain beggar named Lazarus, which was laid at his gate full of sores,

And desiring to be fed with the crumbs which fell from the rich man's table: moreover the dogs came and licked his sores.

And it came to pass, that the beggar died, and was carried by the angels into Abraham's bosom: the rich man also died, and was buried;

And in hell he lift up his eyes, being in torments, and seeth Abraham afar off, and Lazarus in his bosom.

And he cried and said, Father Abraham, have mercy on me, and send Lazarus, that he may dip the tip of his finger in water, and cool my tongue; for I am tormented in this flame.

But Abraham said, Son, remember that thou in thy lifetime receivedst thy good things, and likewise Lazarus evil things: but now he is comforted, and thou art tormented.

And beside all this, between us and you there is a great gulf fixed: so that they which would pass from hence to you cannot; neither can they pass to us, that would come from thence.

Luke 16:19-26

27 In my Father's house are many mansions: if it were not so, I would have told you.

John 14:2

28 Behold, I shew you a mystery; We shall not all sleep, but we shall all be changed,

In a moment, in the twinkling of an eye, at the last trump: for the trumpet shall sound, and the dead shall be raised incorruptible, and we shall be changed.

For this corruptible must put on incorruption, and this mortal must put on immortality.

So when this corruptible shall have put on incorruption, and this mortal shall have put on immortality, then shall be brought to pass the saying that is written. Death is swallowed up in victory.

1 Corinthians 15:51—54

29 One of the elders answered, saying unto me, What are these which are arrayed in white robes? and whence came they?

And I said unto him. Sir, thou knowest. And he said to me, These are they which came out of great tribulation, and have washed their robes, and made them white in the blood of the Lamb.

Therefore are they before the throne of God, and serve him day and night in his temple: and he that sitteth on the throne shall dwell among them.

They shall hunger no more, neither thirst any more; neither shall the sun light on them, nor any heat.

For the Lamb which is in the midst of the throne shall feed them, and shall lead them unto living fountains of waters: and God shall wipe away all tears from their eyes.

Revelation 7:13-17

30 I saw a new heaven and a new earth: for the first heaven and the first earth were passed away; and there was no

more sea.

And I John saw the holy city, new Jerusalem, coming down from God out of heaven, prepared as a bride adorned for her husband.

And I heard a great voice out of heaven saying. Behold, the tabernacle of God is with men, and he will dwell with them, and they shall be his people, and God himself shall be with them, and be their God.

And God shall wipe away all tears from their eyes; and there shall be no more death, neither sorrow, nor crying, neither shall there be any more pain: for the former things are passed away.

And he that sat upon the throne said, Behold, I make all things new. And he said unto me, Write: for these words are true and faithful.

And he said unto me, It is done. I am Alpha and Omega, the beginning and the end. I will give unto him that is athirst of the fountain of the water of life freely.

He that overcometh shall inherit all things; and I will be his God, and he shall be my son.

Revelation 21:1-7

- 31 We must not... contrary to nature, send the bodies ... of good men to heaven; but we must really believe that, according to their divine nature and law, their virtue and their souls are translated out of men into heroes, out of heroes into demi-gods, out of demi-gods, after passing, as in the rite of initiation, through a final cleansing and sanctification, and so freeing themselves from all that pertains to mortality and sense, are thus, not by human decree, but really and according to right reason, elevated into gods admitted thus to the greatest and most blessed perfection.

Plutarch, Romulus

32 If to any man the tumult of the flesh grew silent, silent the images of earth and sea and air: and if the heavens grew silent, and the very soul grew silent to herself and by not thinking of self mounted beyond self: if all dreams and imagined visions grew silent, and every tongue and every sign and whatsoever is transient—for indeed if any man could hear them, he should hear them saying with one voice: We did not make ourselves, but He made us who abides forever: but if, having uttered this and so set us to listening to Him who made them, they all grew silent, and in their silence He alone spoke to us, not by them but by Himself: so that we should hear His word, not by any tongue of flesh nor the voice of an angel nor the sound of thunder nor in the darkness of a parable, but that we should hear Himself whom in all these things we love, should hear Himself and not them... and if this could continue, and all other visions so different be quite taken away, and this one should so ravish and absorb and wrap the beholder in inward joys that his life should eternally be such as that one moment of understanding . . . would not this be: *Enter Thou into the joy of Thy Lord?* But when shall it be? Shall it be when *we shall all rise again and shall not all be changed?*

Augustine, Confessions, IX, 10

33 The bodies of the righteous... such as they shall be in the resurrection, shall need neither any fruit to preserve them from dying of disease or the wasting decay of old age, nor any other physical nourishment to allay the cravings of hunger or of thirst; for they shall be invested with so sure and every way inviolable an immortality, that they shall

not eat save when they choose, nor be under the necessity of eating, while they enjoy the power of doing so.

Augustine, City of God, XIII, 22

- 34 Hell, which also is called a lake of fire and brimstone, will be material fire, and will torment the bodies of the damned, whether men or devils—the solid bodies of the one, aerial bodies of the others; or if only men have bodies as well as souls, yet the evil spirits, though without bodies, shall be so connected with the bodily fires as to receive pain without imparting life,

Augustine, City of God, XXI, 10

- 35 It may very well be, and it is thoroughly credible, that we shall in the future world see the material forms of the new heavens and the new earth in such a way that we shall most distinctly recognize God everywhere present and governing all things, material as well as spiritual, and shall see Him, not as now we understand the invisible things of God, by the things which are made, and see Him darkly, as in a mirror, and in part, and rather by faith than by bodily vision of material appearances, but by means of the bodies we shall wear and which we shall see wherever we turn our eyes.

Augustine, City of God, XXII, 29

- 36 How great shall be that felicity, which shall be tainted with no evil, which shall lack no good, and which shall afford leisure for the praises of God, Who shall be all in all! For I know not what other employment there can be where no lassitude shall slacken activity, nor any want

stimulate to labour.... True peace shall be there, where no one shall suffer opposition either from himself or any other, God Himself, Who is the Author of virtue, shall there be its reward; for, as there is nothing greater or better, He has promised Himself. What else was meant by His word through the prophet, "I will be your God, and ye shall be my people," than, "I shall be their satisfaction, I shall be all that men honourably desire"—life, and health, and nourishment, and plenty, and glory, and honour, and peace, and all good things? This, too, is the right interpretation of the saying of the apostle, "That God may be all in all." He shall be the end of our desires who shall be seen without end, loved without cloy, praised without weariness. This outgoing of affection, this employment, shall certainly be, like eternal life itself, common to all.

But who can conceive, not to say describe, what degrees of honour and glory shall be awarded to the various degrees of merit? Yet it cannot be doubted that there shall be degrees. And in that blessed city there shall be this great blessing, that no inferior shall envy any superior, as now the archangels are not envied by the angels, because no one will wish to be what he has not received, though bound in strictest concord with him who has received; as in the body the finger does not seek to be the eye, though both members are harmoniously included in the complete structure of the body. And thus, along with his gift, greater or less> each shall receive this further gift of contentment to desire no more than he has.

Augustine, City of God, XXII, 30

- 37 As there is a kind of death of the soul, which consists in the putting away of former habits and former ways of life, and which comes through repentance, so also the death

of The body consists in the dissolution of the former principle of life. And just as the soul, after it has put away and destroyed by repentance its former habits, is created anew after a better pattern, so we must hope and believe that the body, after that death which we all owe as a debt contracted through sin, shall at the resurrection be changed into a better form; not that flesh and blood shall inherit the kingdom of God (for that is impossible), but that this corruptible shall put on incorruption, and this mortal shall put on immortality. And thus the body, being the source of no uneasiness because it can feel no want, shall be animated by a spirit perfectly pure and happy, and shall enjoy unbroken peace.

Augustine, Christian Doctrine, I, 19

- 38 In the lost there can be fear of punishment to a greater degree than hope of glory in the Blessed. Because in the lost there will be a succession of punishments, so that the notion of something future remains there, which is the object of fear. But the glory of the saints has no succession, by reason of its being a kind of participation of eternity, in which there is neither past nor future, but only the present.

Aquinas, Summa Theologica, I-II, 67, 4

- 39 Fulness of joy can be understood in two ways. First, on the part of the thing rejoiced in, so that one rejoice in it as much as it is fitting that one should rejoice in it, and thus God's joy alone in Himself is filled, because it is infinite, and this is wholly fitting to the infinite goodness of God; but the joy of any creature must be finite. Secondly, fulness of joy may be understood on the part of

the one who rejoices. Now joy is compared to desire as rest to movement. . . and rest is full when there is no more movement. Hence joy is full, when there remains nothing to be desired. But as long as we are in this world, the movement of desire does not cease in us, because it still remains possible for us to approach nearer to God by grace.... When once, however, perfect happiness has been attained, nothing will remain to be desired because then there will be full enjoyment of God, in which man will obtain whatever he had desired, even with regard to other goods.. . . Hence desire will be at rest, not only our desire for God, but all our desires, so that the joy of the blessed is full to perfection,—indeed over-full, since they will obtain more than they were capable of desiring.

Aquinas, Summa Theologica, II-II, 28, 3

- 40 The necessity of holding the resurrection arises from this—that man may obtain the last end for which he was made, for this cannot be accomplished in this life nor in the life of the separated soul, , . otherwise man would have been made in vain, if he were unable to obtain the end for which he was made. And since it is necessary for the end to be obtained by the selfsame thing that was made for that end, lest it appear to be made without purpose, it is necessary for the selfsame man to rise again; and this is effected by the selfsame soul being united to the selfsame body. For otherwise there would be no resurrection properly speaking, if the same man were not reformed. Hence to maintain that he who rises again is not the selfsame man is heretical, since it is contrary to the truth of Scripture which proclaims the resurrection.

Aquinas, Summa Theologica, III Suppl., 79, 2

41 A thing may be a matter of rejoicing in two ways. First, in itself, when one rejoices in a thing as such, and thus the saints will not rejoice in the punishment of the wicked. Secondly, accidentally, by reason namely of something joined to it; and in this way the saints will rejoice in the punishment of The wicked, by considering therein the order of Divine justice and their own deliverance, which will fill them with joy. And thus the Divine justice and their own deliverance will be the direct cause of the joy of the blessed, while the punishment of the damned will cause it indirectly.

Aquinas, Summa Theologica, III Suppl., 94, 3

42 The disposition of hell will be such as to be adapted to the utmost unhappiness of the damned.

Aquinas, Summa Theologica, III Suppl., 97, 4

43 Hell will never lack sufficient room to admit the bodies of the damned, since hell is accounted one of the three things that never are satisfied. Nor is it unreasonable that God's power should maintain within the bowels of the earth a hollow great enough to contain all the bodies of the damned.

Aquinas, Summa Theologica, III Suppl., 97, 7

44 The unhappiness of the damned surpasses all unhappiness of this world.

Aquinas, Summa Theologica, III Suppl., 98, 3

45 Even as in the blessed in heaven there will be most perfect charity, so in the damned there will be the most perfect hate. Therefore as the saints will rejoice in all

goods, so will the damned grieve for all goods. Consequently the sight of the happiness of the saints will give them very great pain.

... Therefore they will wish all the good were damned.

Aquinas, Summa Theologica, III Suppl., 98, 4

46 The appetite is moved by good or evil apprehended. Now God is apprehended in two ways, namely in Himself, as by the blessed, who see Him in His essence; and in His effects, as by us and by the damned. Since, then, He is goodness by His essence, He cannot in Himself be displeasing to any will; therefore whoever sees Him in His essence cannot hate Him. On the other hand, some of His effects are displeasing to the will in so far as they are opposed to any one, and accordingly a person may hate God not in Himself, but by reason of His effects. Therefore the damned, perceiving God in His punishment, which is the effect of His justice, hate Him, even as they hate the punishment inflicted on them.

Aquinas, Summa Theologica, III Suppl., 98, 5

47 After the judgment day there will be neither merit nor demerit. The reason for this is because merit or demerit is directed to the attainment of some further good or evil, and after the day of judgment good and evil will have reached their ultimate consummation, so that there will be no further addition to good or evil. Consequently, good will in the blessed will not be a merit but a reward, and evil will in the damned will be not a demerit but a punishment only.

Aquinas, Summa Theologica, III Suppl., 98, 6

48 The damned, before the judgment day, will see the blessed in glory, in such a way as to know, not what that glory is like, but only that they are in a state of glory that surpasses all thought. This will trouble them, both because they will, through envy, grieve for their happiness, and because they have forfeited that glory.... After the judgment day, however, they will be altogether deprived of seeing the blessed; nor will this lessen their punishment, but will increase it, because they will bear in remembrance the glory of the blessed which they saw at or before the judgment, and this will torment them. Moreover they will be tormented by finding themselves considered unworthy even to see the glory which the saints merit to have.

Aquinas, Summa Theologica, III Suppl., 98, 9

49 [One] reason may be given why the punishment of mortal sin is eternal, because thereby one offends God Who is infinite. Therefore since punishment cannot be infinite in intensity, because the creature is incapable of an infinite quality, it must be infinite at least in duration. And again there is a fourth reason for the same, because guilt remains for ever, since it cannot be remitted without grace, and men cannot receive grace after death; nor should punishment cease so long as guilt remains.

Aquinas, Summa Theologica, III Suppl., 99, 1

50 "Through me [the Gate of Hell] is the way into the doleful city; through me the way into the eternal pain; through me the way among the people lost.

Justice moved my High Maker; Divine Power made me.
Wisdom Supreme, and Primal Love.

Before me were no things created, but eternal; and eternal I endure: leave all hope, ye that enter."

These words, of colour obscure, saw I written above a gate; whereat I: "Master, their meaning to me is hard."

And he [Virgil] to me, as one experienced: "Here must all distrust be left; all cowardice must here be dead.

We are come to the place where I told thee thou shouldst see the wretched people, who have lost the good of the intellect."

Dante, Inferno, III, 1

51 And lo! an old man, white with ancient hair, comes towards us in a bark, shouting: "Woe to you, depraved spirits!

hope not ever to see Heaven: I come to lead you to the other shore; into the eternal darkness; into fire and into ice.

And thou who art there, alive, depart thee from these who are dead." But when he saw that I departed not,

he said: "By other ways, by other ferries, not here shall thou pass over; a lighter boat must carry thee."

And my guide to him; "Charon, vex not thyself: thus it is willed there, where what is willed can be done; and ask no more."...

Then all of them together, sorely weeping, drew to the accursed shore, which awaits every man that fears not God.

Charon the demon, with eyes of glowing coal, beckoning them, collects them all; smites with his oar whoever lingers.

As the leaves of autumn fall off one after the other, till the branch sees all its spoils upon the ground:

so one by one the evil seed of Adam cast themselves
from that shore at signals, as the bird at its call.

Thus they depart on the brown water; and ere they
have landed on the other shore, again a fresh crowd
collects on this.

"My son," said the courteous Master [Virgil], "those
who die under God's wrath, all assemble here from every
country;

and they are prompt to pass the river, for Divine
Justice spurs them so, that fear is changed into desire.

By this way no good spirit ever passes; and hence, if
Charon complains of thee, thou easily now mayest know
the import of his words."

Dante, Inferno, III, 82

52 "Ah! so may thy seed sometime have rest," I prayed him
[Farinata], "solve the knot which has here involved my
judgment.

It seems that you see beforehand what time brings
with it, if I rightly hear; and have a different manner with
the present."

"Like one who has imperfect vision, we see the things,"
he said, "which are remote from us; so much light the
Supreme Ruler still gives to us;

when they draw nigh, or are, our intellect is altogether
void; and except what others bring us, we know nothing
of your human state.

Therefore thou mayest understand that all our
knowledge shall be dead, from that moment when the
portal of the Future shall be closed."

Dante, Inferno, X, 94

53 "My Son, within these stones," he [Virgil] then began to say, "are three circlets in gradation, like those thou leavest.

They all are filled with spirits accurst; but, that the sight of these hereafter may of itself suffice thee, hearken how and wherefore they are pent up.

Of all malice, which gains hatred in Heaven, the end is injury; and every such end, either by force or by fraud, aggrieveth others.

But because fraud is a vice peculiar to man, it more displeases God; and therefore the fraudulent are placed beneath, and more pain assails them.

All the first circle is for the violent; but as violence may be done to three persons, it is formed and distinguished into three rounds.

To God, to one's self, and to one's neighbour, may violence be done; I say in them and in their things, as thou shall hear with evident discourse.

By force, death and painful wounds may be inflicted upon one's neighbour; and upon his substance, devastations, burnings, and injurious extortions;

wherefore the first round torments all homicides and every one who strikes maliciously, all plunderers and robbers, in different bands.

A man may lay violent hand upon himself, and upon his property: and therefore in the second round must every one repent in vain

who deprives himself of your world, gambles away and dissipates his wealth, and weeps there where he should be joyous.

Violence may be done against the Deity, in the heart denying and blaspheming Him; and disdaining Nature and her bounty:

and hence the smallest round seals with its mark both Sodom and Cahors, and all who speak with disparagement of God in their hearts.

Fraud, which gnaws every conscience, a man may practise upon who confide in him; and upon who repose no confidence.

This latter mode seems only to cut off the bond of love which Nature makes: hence in the second circle nests hypocrisy, flattery, sorcerers, cheating, theft and simony, pandars, barrators, and like filth.

In the other mode is forgotten that love which Nature makes, and also that which afterwards is added, giving birth to special trust:

hence in the smallest circle, at the centre of the universe and seat of Dis, every traitor is eternally consumed."

Dante, Inferno, XI, 16

54 I stood upon the bridge, *having* risen so to look, that, if I had not caught a rock, I should have fallen down without being pushed.

And the Guide [Virgil], who saw' me thus attent, said: "Within those fires are the spirits; each swathes himself with that which burns him."

"Master," I replied, "from hearing thee I feel more certain; but had already discerned it to be so, and already wished to say to thee:

Who is in that fire, which comes so parted at the top, as if it rose from the pyre where Eteocles with his brother was placed?"

He answered me: "Within it there Ulysses is tortured, and Diomed; and thus they run together in punishment, as erst in wrath;

and in their flame they groan for the ambush of the horse, that made the door by which the noble seed of the Romans came forth;

within it they lament the artifice, whereby Dcidamia in death still sorrow's for Achilles; and there for the Palladium they suffer punishment."

"If they within those sparks can speak," said I, "Master! I pray thee much, and repray that my prayer may equal a thousand,

deny me not to wait until the homed flame comes hither; thou seest how with desire I bend me towards it."

And he to me: "Thy request is worthy of much praise, and therefore I accept it; but do thou refrain thy tongue.

Let me speak; for I have conceived what thou wishest; and they, perhaps, because they were Greeks, might disdain thy words."

After the flame had come where time and place seemed fitting to my Guide, I heard him speak in this manner:

"O ye, two in one fire! if I merited of you whilst I lived, if I merited of you much or little,

when on earth I wrote the High Verses, move ye not; but let the one of you tell where he, having lost himself, went to die."

The greater horn of the ancient flame began to shake itself, murmuring, just like a *flame* that struggles with the wind.

Then carrying to and fro the top, as if it were the tongue that spake, threw forth a voice, and said: "When

I departed from Circe, who beyond a year detained me there near Gaeta, ere AEneas thus had named it,

neither fondness for my son, nor reverence for my aged father, nor the due love that should have cheered

Penelope,

could conquer in me the ardour that I had to gain
experience of the world, and of human vice and worth;

I put forth on the deep open sea, with but one ship,
and with that small company, which had not deserted
me.

Both the shores I saw as far as Spain, far as Morocco;
and saw Sardinia and the other isles which that sea
bathes round.

I and my companions were old and tardy, when we
came to that narrow pass, where Hercules assigned his
landmarks

to hinder man from venturing farther; on the right
hand, I left Seville; on the other, had already left Ceuta.

'O brothers!' I said, 'who through a hundred thousand
dangers have reached the West, deny not, to this the
brief vigil

of your senses that remains, experience of the un-
peopled world behind the Sun.

Consider your origin: ye were not formed to live like
brutes, but to follow virtue and knowledge.'

With this brief speech I made my companions so eager
for the voyage, that I could hardly then have checked
them;

and, turning the poop towards morning, we of our oars
made wings for the foolish flight, always gaining on the
left.

Night already saw the other pole, with all its stars; and
ours so low, that it rose not from the ocean floor.

Five times the light beneath the Moon had been
rekindled and quenched as oft, since we had entered on
the arduous passage,

when there appeared to us a Mountain, dim with distance; and to me it seemed the highest I had ever seen.

We joyed, and soon our joy was turned to grief: for a tempest rose from the new land, and struck the forepart of our ship.

Three times it made her whirl round with all the waters; at the fourth, made the poop rise up and prow go down, as pleased Another, till the sea was closed above us."

Dante, Inferno, XXVI, 43

55 Now eager to search within and around the divine forest dense and verdant, which to mine eyes was tempering the new day,

without waiting more I left the mountain-side, crossing the plain with lingering step, over the ground which gives forth fragrance on every side.

A sweet breeze, itself invariable, was striking on my brow with no greater force than a gentle wand,

before which the branches, responsively trembling, were all bending toward that quarter, where the holy mount casts its first shadow;

yet not so far bent aside from their erect state, that the little birds in the tops ceased to practise their every art;

but, singing, with full gladness they welcomed the first breezes within the leaves, which were murmuring the burden to their songs;

even such as from bough to bough is gathered through the pine wood on Chiassi's shore, when Aeolus looses Sirocco forth.

Dante, Purgatorio, XXVIII, 1

56 "In the world I was a virgin sister, and if thy memory be rightly searched, my greater beauty will not hide me from thee,

but thou wilt know me again for Piccarda, who, placed here with these other blessed ones, am blessed in the sphere that moveth slowest.

Our affections, which are aflame only in the pleasure of the Holy Spirit, rejoice to be informed after his order.

And this lot, which seemeth so far down, therefore is given us because our vows were slighted, and on some certain side were not filled in."

Whereon I to her: "In your wondrous aspects a divine somewhat regloweth that doth transmute you from conceits of former times.

Wherefore I lagged in calling thee to mind; now what thou tellest me giveth such help that more articulately I retrace thee.

But tell me, ye whose blessedness is here, do ye desire a more lofty place, to see more, or to make yourselves more dear?"

With those other shades first she smiled a little, then answered me so joyous that she seemed to burn in love's first flame:

"Brother, the quality of love stilleth our will, and maketh us long only for what we have, and giveth us no other thirst.

Did we desire to be more aloft, our longings were discordant from his will who here assorteth us,

and for that, thou wilt see, there is no room within these circles, if of necessity we have our being here in love, and if thou think again what is love's nature.

Nay, 'tis the essence of this blessed being to hold ourselves within the divine will, whereby our own wills are themselves made one.

So that our being thus, from threshold unto threshold throughout the realm, is a joy to all the realm as to the king, who draweth our wills to what he willeth;

and his will is our peace; it is that sea to which all moves that it createth and that nature maketh."

Dante, Paradiso, III, 46

57 *Aucassin*. In Paradise what have I to do? I care not to enter, but only to have Nicolette, my very sweet friend, whom I love so dearly well. For into Paradise go none but such people as I will tell you of. There go those aged priests and those old cripples, and the maimed, who all day long and all night cough before the altars, and in the crypts beneath the churches; those who go in worn old mantles and old tattered habits; who are naked, and barefoot, and full of sores; who are dying of hunger and of thirst, of cold and of wretchedness. Such as these enter in Paradise, and with them have I nought to do. But in Hell will I go. For to Hell go the fair clerks and the fair knights who are slain in the tourney and the great wars, and the stout archer and the loyal man. With them will I go. And there go the fair and courteous ladies who have friends, two or three, together with their wedded lords. And there pass the gold and the silver, the ermine and all rich furs, harpers and minstrels, and the happy of the world. With these will I go, so only that I have Nicolette, my very sweet friend, by my side.

Anon., Aucassin and Nicolette

58 This friar he boasts he knows somewhat of Hell,
And God He knows that it is little wonder;
Friars and fiends are never far asunder.
For, by gad, you have oftentimes heard tell
How such a friar was snatched down into Hell
In spirit, once, and by a vision blown;
And as an angel led him up and down
To show the pains and torments that there were,
In all the place he saw no friar there.
Of other folk he saw enough in woe;
And to the angel then he questioned so:
" 'Now, sir,' said he, 'have friars such a grace
That none of them shall come into this place?'
" 'Nay,' said the angel, 'millions here are thrown!'
And unto Sathanas he led him down.
" 'And now has Sathanas,' said he, 'a tail
Broader than of a galleon is the sail.
Hold up thy tail, thou Sathanas!' said he,
" 'Show forth thine arse and let the friar see
Where is the nest of friars in this place!'
And ere one might go half a furlong's space.
Just as the bees come swarming from a hive,
Out of the Devil's arse-hole there did drive
Full twenty thousand friars in a rout,
And through all Hell they swarmed and ran about,
And came again, as fast as they could run,
And in his arse they crept back, every one.
He clapped his tail to and then lay right still.
This friar, when he'd looked at length his fill
Upon the torments of that sorr>' place,
His spirit God restored, of His high grace,
Into his body, and he did awake;
Nevertheless for terror did he quake

So was the Devil's arse-hole in his mind,
Which is his future home, and like in kind.

Chaucer, Canterbury Tales: Summoner's Prologue

59 Truly the dark light that shall come out of the fire that
burns for ever shall turn him all to pain who is in Hell; for
it shall show unto him the horrible devils that torment
him.

Chaucer, Canterbury Tales: Parson's Tale

60 Certainly a shadow has the likeness of that whereof it is
the shadow, but the shadow is not the substance. Just so
it is with the pain of Hell; it is like unto death because of
the horrible anguish. And why? Because it pains for ever,
and as if they should die at every moment; but indeed
they shall not die.

Chaucer, Canterbury Tales: Parson's Tale

61 A thousand tymes have I herd men telle
That ther ys joy in hevene and peyne in helle,
And I acorde wel that it ys so;
But, natheles, yet wot I wel also
That ther nis noon dwellyng in this contree,
That eyther hath in hevene or helle ybe,
Ne may of hit noon other weyes witen,
But as he hath herd seyde, or founde it writen.

Chaucer, The Legend of Good Women: Prologue

62 I desire to go to Hell, not to Heaven. In Hell I shall enjoy
the company of popes, kings and princes, but in Heaven
are only beggars, monks, hermits and apostles.

Machiavelli, On his deathbed

63 I hold the gnashing of teeth of the damned to be an external pain following upon evil conscience, that is, despair, when men see themselves abandoned by God.

Luther, Table Talk, H800

64 Unto Almighty God we commend the soul of our *brother* departed, and we commit *his* body to the ground; earth to earth, ashes to ashes, dust to dust; in sure and certain hope of the Resurrection unto eternal life, through our Lord Jesus Christ; at whose coming in glorious majesty to judge the world, the earth and sea shall give up their dead; and the corruptible bodies of those who sleep in him shall be changed, and made like unto his own glorious body; according to the mighty working whereby he is able to subdue all things unto himself.

Book of Common Prayer

65 *Brakenbury*. Why looks your Grace so heavily today?

Clarence. O, I have pass'd a miserable night,
So full of ugly sights, of ghastly dreams,
That, as I am a Christian faithful man,
I would not spend another such a night,
Though 'twere to buy a world of happy days,
So full of dismal terror was the time!

Brak. What was your dream? I long to hear you tell it.

Clar. Methoughts that I had broken from the Tower,
And was embark'd to cross to Burgundy;
And, in my company, my brother Gloucester,
Who from my cabin tempted me to walk
Upon the hatches: thence we look'd toward England
And cited up a thousand fearful times,
During the wars of York and Lancaster

That had befall'n us. As we paced along
Upon the giddy footing of the hatches,
Methought that Gloucester stumbled; and, in falling,
Struck me, that thought to stay him, overboard,
Into the tumbling billows of the main.
Lord, Lord! methought what pain it was to drown!
What dreadful noise of waters in mine ears!
What ugly sights of death within mine eyes!
Methought I saw a thousand fearful wrecks;
Ten thousand men that fishes gnaw'd upon;
Wedges of gold, great anchors, heaps of pearl,
Inestimable stones, unvalued jewels,
All scatter'd in the bottom of the sea:
Some lay in dead men's skulls; and, in those holes
Where eyes did once inhabit, there were crept,
As 'twere in scorn of eyes, reflecting gems,
Which woo'd the slimy bottom of the deep
And mock'd the dead bones that lay scatter'd by.

Brak. Had you such leisure in the time of death
To gaze upon the secrets of the deep?

Clar. Methought I had; and often did I strive
To yield the ghost: but still the envious flood
Kept in my soul and would not let it forth
To seek the empty, vast, and wandering air;
But smother'd it within my panting bulk,
Which almost burst to belch it in the sea.

Brak. Awaked you not with this sore agony?

Clar. O, no, my dream was lengthen'd after life;
O, then began the tempest to my soul,
Who pass'd, methought, the melancholy flood,
With that grim ferryman which poets write of,
Unto the kingdom of perpetual night.
The first that there did greet my stranger soul

Was my great father-in-law, renowned Warwick,
Who cried aloud, "What scourge for perjury
Can this dark monarchy. afford false Clarence?"
And so he vanish'd: then came wandering by
A shadow like an angel, with bright hair
Dabbled in blood; and he squeak'd out aloud,
"Clarence is come; false, fleeting, perjured Clarence,
That stabb'd me in the field by Tewksbury;
Seize on him, Furies, take him to your torments!"
With that, methoughts, a legion of foul fiends
Environ'd me about, and howled in mine ears
Such hideous cries that with the very noise
I trembling waked, and for a season after
Could not believe but that I was in hell,
Such terrible impression made the dream.

Shakespeare, Richard III, I, iv, 1

66 *Ophelia*. Do not, as some ungracious pastors do,
Show me the steep and thorny way to heaven;
Whiles, like a puff'd and reckless libertine,
Himself the primrose path of dalliance treads.

Shakespeare, Hamlet, I, iii, 47

67 *Ghost*. I am thy father's spirit,
Doom'd for a certain term to walk the night.
And for the day confined to fast in fires.
Till the foul crimes done in my days of nature
Are burnt and purged away. But that I am forbid
To tell the secrets of my prison-house,
I could a tale unfold whose lightest word
Would harrow up thy soul, freeze thy young blood,
Make thy two eyes, like stars, start from their spheres,

Thy knotted and combined locks to part
And each particular hair to stand an end,
Like quills upon the fretful porpentine.
But this eternal blazon must not be
To ears of flesh and blood.

Shakespeare, Hamlet, I, v, 9

68 Well, well, Madam, quoth *Sancho*, I don't understand your Parts and Wholes! I saw it, and there's an End of the Story. Only you must think, that as we flew by Inchantment, so we saw by Inchantment; and thus I might see the Earth, and all the Men, which Way soever I look'd. I'll warrant, you won't believe me neither when I tell you, that when I thrust up the Kerchief above my Brows, I saw my self so near Heaven, that between the Top of my Cap and the main Sky, there was not a Span and a half. And, Heaven bless us! forsooth, what a hugeous great Place it is! And we happen'd to travel that Road where the seven She-Goatstars were: And Faith and Troth, I had such a Mind to play with 'em (having been once a Goatherd my self) that I fancy I'd have cry'd my self to Death, had I not done it. So soon as I spy'd 'em, what does me I, but sneaks down very soberly from behind my Master, without telling any living Soul, and play'd, and leap'd about for three quarters of an Hour by the Clock, with the pretty Nanny-Goats, who are as sweet and fine as so many Marigolds or Gilly-flowers; and honest *Wooden Peg* stirr'd not one Step all the while. And while *Sancho* employ'd himself with the Goats, ask'd the Duke, how was Don *Quixote* employ'd? Truly, answer'd the Knight, I am sensible all Things were alter'd from their natural Course; therefore what *Sancho* says, seems the less strange to me. But for my own Part, I neither saw

Heaven nor Hell, Sea nor Shore. I perceiv'd indeed we pass'd through the middle Region of the Air, and were pretty near that of Fire, but that we came so near Heaven, as *Sancho* says, is altogether incredible; because we then must have pass'd quite through the fiery Region, which lies between the Sphere of the Moon and the upper Region of the Air. Now it was impossible for us to reach that Part, where are the *Pleiades*, or the *Seven Goats*, as *Sancho* calls 'em, without being consum'd in the elemental Fire; and therefore since we escaped those Flames, certainly we did not soar so high, and *Sancho* either lies or dreams. I neither lie nor dream, reply'd *Sancho*. Uds Precious! I can tell you the Marks and Colour of every Goat among 'em. If you don't believe me, do but ask and try me. You'll easily see whether I speak Truth or no. Well, said the Dutchess, prithee tell them me, *Sancho*. Look you, answer'd *Sancho*, there were two of 'em green, two carnation, two blue, and one party-colour'd. Truly, said the Duke, that's a new Kind of Goats you have found out, *Sancho*, we have none of those Colours upon Earth. Sure, Sir, reply'd *Sancho*, you'll make some Sort of Difference between heavenly She-Goats, and the Goats of this World? But *Sancho*, said the Duke, among those She-Goats did you see never a He? not one horn'd Beast of the masculine Gender? Not one. Sir, I saw no other horn'd Thing but the Moon; and I have been told, that neither He-Goats nor any other cornuted Tups are suffer'd to lift their Horns beyond those of the Moon.

Cervantes, Don Quixote, II, 41

69 When God's hand is bent to strike, "it is a fearful thing to fall into the hands of the living God"; but to fall out of the hands of the living God is a horror beyond our expression,

beyond our imagination. That God should let my soul fall out of his hand into a bottomless pit and roll an unremovable stone upon it and leave it to that which it finds there (and it shall find that there which it never imagined till it came thither) and never think more of that soul, never have more to do with it; that of that providence of God that studies the life of every weed and worm and ant and spider and toad and viper there should never, never any beam flow out upon me; that that God who looked upon me when I was nothing and called me when I was not, as though I had been, out of the womb and depth of darkness, will not look upon me now, when though a miserable and a banished and a damned creature, yet I am his creature still and contribute something to his glory even in my damnation; that that God who hath often looked upon me in my foulest uncleanness and when I had shut out the eye of the day, the sun, and the eye of the night, the taper, and the eyes of all the world with curtains and windows and doors, did yet see me and see me in mercy by making me see that he saw me and sometimes brought me to a present remorse and (for that time) to a forbearing of that sin, should so turn himself from me to his glorious saints and angels as that no saint nor angel nor Christ Jesus himself should ever pray him to look towards me, never remember him that such a soul there is; that that God who hath so often said to my soul, *Quare morieris?* why wilt thou die? and so often sworn to my soul, *Vivit Dominus*, as the Lord liveth, I would not have thee die but live, will neither let me die nor let me live, but die an everlasting life and live an everlasting death; that that God who, when he could not get into me by standing and knocking, by his ordinary means of entering, by his word,

his mercies, hath applied his judgments and hath shaken the house, this body, with agues and palsies, and set this house on fire with fevers and calentures, and frightened the master of the house, my soul, with horrors and heavy apprehensions and so made an entrance into me; that that God should frustrate all his own purposes and practices upon me and leave me and cast me away as though I had cost him nothing; that this God at last should let this soul go away as a smoke, as a vapor, as a bubble; and that then this soul cannot be a smoke, a vapor, nor a bubble, but must lie in darkness as long as the Lord of light is light itself, and never spark of that light reach to my soul; what Tophet is not paradise, what brimstone is not amber, what gnashing is not a comfort, what gnawing of the worm is not a tickling, what torment is not a marriage bed to this damnation, to be secluded eternally, eternally, eternally from the sight of God?

Donne, Sermon LXXVI

70 Though Theologians commonly affirm that the damned are tortured by hell fire, they do not therefore believe that they are deceived by a false idea of a tormenting fire which God has implanted in them, but rather that they are tortured by real fire, for the reason that, just as the incorporeal spirit of the living man is naturally confined in the body, so by the divine power it is easily after death confined in corporeal fire.

Descartes, Objections and Replies, VI

71 Surely though we place Hell under Earth, the Devil's walk and purlue is about it: men speak too popularly who place it in those flaming mountains, which to grosser

apprehensions represent Hell. The heart of man is the place the Devils dwell in; I feel sometimes a Hell within my self; *Lucifer* keeps his Court in my breast; *Legion* is revived in me. There are as many Hells, as *Anaxagoras* conceited worlds; there was more than one Hell in *Magdalene*, when there were seven Devils; for every Devil is an Hell unto himself; he holds enough of torture in his own *ubi*, and needs not the misery of circumference to afflict him. And thus a distracted Conscience here, is a shadow or introduction unto Hell hereafter. Who can but pity the merciful intention of those hands that do destroy themselves? the Devil, were it in his power, would do the like; which being impossible, his miseries are endless, and he suffers most in that attribute wherein he is impassible, his immortality.

Sir Thomas Browne, Religio Medici, I, 51

72 I thank God that with joy I mention it, I was never afraid of Hell, nor never grew pale at the description of that place; I have so fixed my contemplations on Heaven, that I have almost forgot the Idea of Hell, and am afraid rather to lose the Joys of the one, than endure the misery of the other: to be deprived of them is a perfect Hell, and needs methinks no addition to compleat our afflictions; that terrible term hath never detained me from sin, nor do I owe any good action to the name thereof; I fear God, yet am not afraid of him; his mercies make me ashamed of my sins, before his Judgements afraid thereof: these are the forced and secondary method of his wisdom, which he useth but as the last remedy, and upon provocation; a course rather to deter the wicked, than incite the virtuous to his worship. I can hardly think there was ever any scared into Heaven; they go the fairest way to Heaven

that would serve God without a Hell; other Mercenaries,
that crouch into him in fear of Hell, though they term
themselves the servants, are indeed but the slaves of the
Almighty.

Sir Thomas Browne, Religio Medici, I, 52

73 And since there is something of us that will still live on,
join both lives together, and live in one but for the other.
He who thus ordereth the purposes of this Life will never
be far from the next, and is in some manner already in it,
by a happy conformity, and close apprehension of it. And
if, as we have elsewhere declared, any have been so
happy as personally to understand Christian Annihilation,
Extasy, Exolution, Transformation, the Kiss of the Spouse,
and Ingression into the Divine Shadow, according to
Mystical Theology, they have already had an handsome
Anticipation of Heaven; the World is in a manner over,
and the Earth in Ashes unto them.

Sir Thomas Browne, Christian Morals, III, 30

74 Weep no more, woful Shepherds weep no more,
For *Lycidas* your sorrow is not dead,
Sunk though he be beneath the watry floar.
So sinks the day-star in the Ocean bed,
And yet anon repairs his drooping head,
And tricks his beams, and with new spangled Ore,
Flames in the forehead of the morning sky:
So *Lycidas* sunk low, but mounted high,
Through the dear might of him that walk'd the waves
Where other groves, and other streams along,
With *Nectar* pure his oozy Lock's he laves.
And hears the unexpressive nuptiall Song,

In the blest Kingdoms meek of joy and love.
There entertain him all the Saints above,
In solemn troops, and sweet Societies
That sing, and singing in their glory move,
And wipe the tears for ever from his eyes.

Milton, Lycidas, 165

75 Him [Satan] the Almighty Power
Hurl'd headlong flaming from th' Ethereal Skie
With hideous mine and combustion down
To bottomless perdition, there to dwell
In Adamantine Chains and penal Fire,
Who durst defie th' Omnipotent to Arms.
Nine times the Space that measures Day and Night
To mortal men, he with his horrid crew
Lay vanquisht, rowling in the fiery Gulfe
Confounded though immortal: But his doom
Reserv'd him to more wrath; for now the thought
Both of lost happiness and lasting pain
Torments him; round he throws his baleful eyes
That witness'd huge affliction and dismay
Mixt with obdurate pride and stedfast hate:
At once as far as Angels kenn he views
The dismal Situation waste and wilde,
A Dungeon horrible, on all sides round
As one great Furnace flam'd, yet from those flames
No light, but rather darkness visible
Serv'd only to discover sights of woe.
Regions of sorrow, doleful shades, where peace
And rest can never dwell, hope never comes
That comes to all; but torture without end
Still urges, and a fiery Deluge, fed
With ever-burning Sulphur unconsum'd:

Such place Eternal Justice had prepar'd
For those rebellious, here their Prison ordain'd
In utter darkness, and their portion set
As far remov'd from God and light of Heav'n
As from the Center thrice to th' utmost Pole.
O how unlike the place from whence they fell!

Milton, Paradise Lost, I, 44

76 Is this the Region, this the Soil, the Clime,
Said then the lost Arch Angel [Satan], this the seat
That we must change for Heav'n, this mournful gloom
For that celestial light? Be it so, since hee
Who now is Sovran can dispose and bid
What shall be right: fardest from him is best
Whom reason hath equald, force hath made supream
Above his equals. Farewel happy Fields
Where Joy for ever dwells: Hail horrors, hail
Infernal world, and thou profoundest Hell
Receive thy new Possessor; One who brings
A mind not to be chang'd by Place or Time.

Milton, Paradise Lost, I, 242

77 Let none admire
That riches grow in Hell; that soyle may best
Deserve the pretious bane.

Milton, Paradise Lost, I, 690

78 Men call him [Satan] *Mulciber*; and how he fell
From Heav'n, they fabl'd, thrown by angry *Jove*
Sheer o're the Chrystal Battlements; from Morn
To Noon he fell, from Noon to dewy Eve,
A Summers day; and with the setting Sun

Dropt from the Zenith like a falling Star,
On *Lemnos* th' *AEgaean* He: thus they relate,
Erring; for he with this rebellious rout
Fell long before; nor aught avail'd him now
To have built in Heav'n high Towrs; nor did he scape
By all his Engins, but was headlong sent
With his industrious crew to build in hell.

Milton, Paradise Lost, I, 740

79 Thus roving on
In confus'd march forlorn, th' adventurous Bands
With shuddring horror pale, and eyes agast
View'd first thir lamentable lot, and found
No rest: through many a dark and drearie Vaile
They pass'd, and many a Region dolorous,
O're many a Frozen, many a Fierie Alpe,
Rocks, Caves, Lakes, Fens, Bogs, Dens, and shades of
death,
A Universe of death, which God by curse
Created evil, for evil only good,
Where all life dies, death lives, and nature breeds,
Perverse, all monstrous, all prodigious things,
Abominable, inutterable, and worse
Then Fables yet have feign'd, or fear conceiv'd,
Gorgons and *Hydra's*, and *Chimera's* dire.

Milton, Paradise Lost, II, 614

80 From her side the fatal Key,
Sad instrument of all our woe, she [the Portress of Hell
Gate] took;
And towards the Gate rouling her bestial train,
Forthwith the huge Portcullis high up drew,

Which but her self not all the *Stygian* powers
Could once have mov'd; then in the key-hole turns
Th' intricate wards, and every Bolt and Bar
Of massie Iron or sollid Rock with ease
Unfast'ns: on a sudden op'n flie
With impetuous recoile and jarring sound
Th' infernal dores and on thir hinges grate
Harsh Thunder, that the lowest bottom shook
Of *Erebus*. She op'nd, but to shut
Excel'd her power; the Gates wide op'n stood,
That with extended wings a Bannerd Host
Under spread Ensigns marching might pass through
With Horse and Chariots rankt in loose array;
So wide they stood, and like a Furnace mouth
Cast forth redounding smoak and ruddy flame.

Milton, Paradise Lost, II, 871

81 While God spake, ambrosial fragrance fill'd
All Heav'n, and in the blessed Spirits elect
Sense of new Joy ineffable diffus'd:
Beyond compare the Son of God was seen
Most glorious, in him all his Father shon
Substantially express'd, and in his face
Divine compassion visibly appeerd,
Love without end, and without measure Grace.

Milton, Paradise Lost, III, 135

82 All the multitude of Angels with a shout
Loud as from numbers without number, sweet
As from blest voices, uttering joy, Heav'n rung
With Jubilee, and loud Hosannas fill'd
Th' eternal Regions: lowly reverent

Towards either Throne they bow, & to the ground
With solemn adoration down they cast
Thir Crowns inwove with Amarant and Gold,
Immortal Amarant, a Flour which once
In Paradise, fast by the Tree of Life
Began to bloom, but soon for mans offence
To Heav'n remov'd where first it grew, there grows.
And flours aloft shading the Fount of Life,
And where the river of Bliss through midst of Heav'n
Rowls o're *Elisian* Flours her Amber stream;
With these that never fade the Spirits Elect
Bind thir resplendent locks inwreath'd with beams.
Now in loose Garlands thick thrown off, the bright
Pavement that like a Sea of Jasper shon
Impurpl'd with Celestial Roses smil'd.
Then Crown'd again thir gold'n Harps they took,
Harps ever tun'd, that glittering by thir side
Like Quivers hung, and with Praeamble sweet
Of charming symphonic they introduce
Thir sacred Song, and waken raptures high;
No voice exempt, no voice but well could joine
Melodious part, such concord is in Heav'n.

Milton, Paradise Lost, III, 344

83 Now while I was gazing upon all these things [within the Gates of Heaven], I turned my head to look back, and saw *Ignorance* come up to the River side; but he soon got over, and that without half that difficulty which the other two men met with. For it happened that there was then in that place one *Vain-hope* a Ferry-man, that with his Boat helped him over: so he, as the other I saw, did ascend the Hill to come up to the Gate, only he came alone; neither did any man meet him with the least encouragement.

When he was come up to the Gate, he looked up to the writing that was above; and then began to knock, supposing that entrance should have been quickly administered to him. But he was asked by the men that lookt over the top of the Gate, Whence came you? and what would you have? He answered, I have eat and drank in the presence of the King, and he has taught in our Streets. Then they asked him for his Certificate, that they might go in and shew it to the King. So he fumbled in his bosom for one, and found none. Then said they, Have you none? But the man answered never a word. So they told the King, but he would not come down to see him, but commanded the two shining Ones that con-ducted *Christian* and *Hopeful* to the City, to go out and take *Ignorance* and bind him hand and foot, and have him away. Then they took him up, and carried him through the air to the door that I saw in the side of the Hill, and put him in there. Then I saw that there was a way to Hell, even from the Gates of Heaven, as well as from the City of *Destruction*. So I awoke, and behold it was a Dream.

Bunyan, Pilgrim's Progress, I

84 As from the pow'r of sacred lays
The spheres began to move,
And sung the great Creator's praise
To all the blest above;
So, when the last and dreadful hour
This crumbling pageant shall devour,
The Trumpet shall be heard on high,
The dead shall live, the living die,
And Music shall untune the sky.

Dryden, A Song for St. Cecilia's Day

85 Hell was built on spite, and heav'n on pride.

Pope, Essay on Man, Epistle III, 262

86 Finding him in a very good humour, I ventured to lead him to the subject of our situation in a future state, having much curiosity to know his notions on that point. *Johnson*. "Why, Sir, the happiness of an unembodied spirit will consist in a consciousness of the favour of God, in the contemplation of truth, and in the possession of felicitating ideas."

Boswell, Life of Johnson (Mar. 1772)

87 No saint ... in the course of his religious warfare, was more sensible of the unhappy failure of pious resolves, than Johnson. He said one day, talking to an acquaintance on this subject, "Sir, Hell is paved with good intentions."

Boswell, Life of Johnson (Apr. 14, 1775)

88 It is incumbent on us diligently to remember that the kingdom of heaven was promised to the poor in spirit, and that minds afflicted by calamity and the contempt of mankind cheerfully listen to the divine promise of future happiness; while, on the contrary, the fortunate are satisfied with the possession of this world; and the wise abuse in doubt and dispute their vain superiority of reason and knowledge.

Gibbon, Decline and Fall of the Roman Empire, XV

89 The doctrine of the resurrection was first entertained by the Egyptians; and their mummies were embalmed, their pyramids were constructed, to preserve the ancient

mansion of the soul during a period of three thousand years. But the attempt is partial and unavailing; and it is with a more philosophic spirit that Mohammed relies on the omnipotence of the Creator, whose word can reanimate the breathless clay, and collect the innumerable atoms that no longer retain their form or substance. The intermediate state of the soul it is hard to decide; and those who most firmly believe her immaterial nature, are at a loss to understand how she can think or act without the agency of the organs of sense.

Gibbon, Decline and Fall of the Roman Empire, L

90 The human fancy can paint with more energy the misery than the bliss of a future life. With the two simple elements of darkness and fire we create a sensation of pain, which may be aggravated to an infinite degree by the idea of endless duration. But the same idea operates with an opposite effect on the continuity of pleasure; and too much of our present enjoyments is obtained from the relief, or the comparison, of evil.

Gibbon, Decline and Fall of the Roman Empire, L

91 Men are admitted into Heaven not because they have curbed & governd their Passions or have No Passions but because they have Cultivated their Understandings. The Treasures of Heaven are not Negations of Passion but Realities of Intellect from which AH the Passions Emanate Uncurbed in their Eternal Glory. The Fool shall not enter into Heaven let him be ever so Holy. Holiness is not The Price of Enterance into Heaven. Those who are cast out Are All Those who, having no Passions of their own because No Intellect, Have spent their lives in Curbing &

Governing other People's by the Various arts of Poverty & Cruelty of all kinds. Wo Wo Wo to you Hypocrites. Even Murder the Courts of Justice, more merciful than the Church, are compell'd to allow is not done in Passion but in Cold Blooded Design & Intention.

Blake, A Vision of The Last Judgment

92 Without Contraries is no progression. Attraction and Repulsion, Reason and Energy, Love and Hate, are necessary to Human existence. From these contraries spring what the religious call Good and Evil, Good is the passive that obeys Reason. Evil is the active springing from Energy.

Good is Heaven. Evil is Hell.

Blake, Marriage of Heaven and Hell, 3

93 *Faust*. Does Hell itself have its laws then?

That's fine! A compact in that case might be
Concluded safely with you gentlemen?

Mephistopheles. What's promised, you'll enjoy with
naught subtracted,

With naught unduly snipped off or exacted.

Goethe, Faust, I, 1413

94 *Chorus Mysticus*. All earth comprises

Is symbol alone;

What there ne'er suffices

As fact here is known;

All past the humanly

Wrought here in love;

The Eternal-Womanly

Draws us above.

Goethe, Faust, II, 5, 12104

95 Hell is a city much like London—
A populous and a smoky city;
There are all sorts of people undone,
And there is little or no fun done;
Small justice shown, and still less pity,

Shelley, Peter Bell the Third, III, 1

96 Knowledge, as the disannulling of the unity of mere nature, is the Fall, which is no casual conception, but the eternal history of spirit. For the state of innocence, the paradisaical condition, is that of the brute. Paradise is a park, where only brutes, not men, can remain.

Hegel, Philosophy of History, Pt. III, III, 2

97 I sent my Soul through the Invisible,
Some letter of that After-life to spell;
And by and by my Soul returned to me,
And answered, "I Myself am Heav'n and Hell"—

Heaven but the Vision of fulfilled Desire,
And Hell the Shadow from a Soul on fire
Cast on the Darkness into which Ourselves,
So late emerged from, shall so soon expire.

FitzGerald, Rubáiyát, LXVI-LXVII

98 My life closed twice before its close;
It yet remains to see
If Immortality unveil
A third event to me,

So huge, so hopeless to conceive

As these that twice befell.
Parting is all we know of heaven,
And all we need of hell.

Emily Dickinson, My Life Closed Twice

99 Ah, but a man's reach should exceed his grasp,
Or what's a heaven for?

Browning, Andrea Del Sarto

100 In our English popular religion, for instance, the common conception of a future state of bliss is just that of the Vision of Mirza: "Persons dressed in glorious habits with garlands on their heads, passing among the trees, lying down by the fountains, or resting on beds of flowers, amid a confused harmony of singing birds, falling waters, human voices, and musical instruments." Or, even, with many, it is that of a kind of perfected middle-class home, with labour ended, the table spread, goodness all around, the lost ones restored, hymnody incessant. . . . That this conception of immortality cannot possibly be true, we feel, the moment we consider it seriously. And yet who can devise any conception of a future state of bliss, which shall bear close examination better?

Arnold, Literature and Dogma, XII

101 "I don't believe in a future life," said Raskolnikov.
Svidrigailov sat lost in thought,
"And what if there are only spiders there, or something of that sort," he said suddenly.
"He is a madman," thought Raskolnikov,
"We always imagine eternity as something beyond our conception, something vast, vast! But why must it be

vast? Instead of all that, what if it's one little room, like a bathhouse in the country, black and grimy and spiders in every corner, and that's all eternity is? I sometimes fancy' it like that."

"Can it be you can imagine nothing juster and more comforting than that?" Raskolnikov cried, with a feeling of anguish.

"Juster? And how' can we tell, perhaps that is just, and do you know' it's what I would certainly have made it," answered Svidrigailov, with a vague smile.

Dostoevsky, Crime and Punishment, IV, 1

102 *Captain Stormfield*. Sandy, out with it. Come—no secrets among friends. I notice you don't ever wear wings—and plenty others don't. I've been making as ass of myself—is that it?

Sandy. That is about the size of it. But it is no harm. We all do it at first. It's perfectly natural. You see, on earth we jump to such foolish conclusions as to things up here. In the pictures we always saw the angels with wings on—and that was all right; but we jumped to the conclusion that that was their way of getting around—and that was all wrong. The wings ain't anything but a uniform, that's all. When they are in the field—so to speak—they always wear them; you never see an angel going with a message anywhere without his wings, anymore than you would see a military officer presiding at a court-martial without his uniform, or a postman delivering letters, or a policeman walking his beat in plain clothes. But they ain't to *fly* with! The wings are for show, not for use.

Mark Twain, Extract from Captain Stormfield's Visit to Heaven

103 *Captain Stormfield*. But what was it you was saying about unsacrilegious things, which people expect to get, and will be disappointed about?

Sandy. Oh, there are a lot of such things that people expect and don't get. For instance, there's a Brooklyn preacher by the name of Talmage, who is laying up a considerable disappointment for himself. He says, every now and then in his sermons, that the first thing he does when he gets to heaven will be to fling his arms around Abraham, Isaac, and Jacob, and kiss them and weep on them. There's millions of people down there on earth that are promising themselves the same thing. As many as sixty thousand people arrive here every single day that want to run straight to Abraham, Isaac, and Jacob, and hug them and weep on them. Now mind you, sixty thousand a day is a pretty heavy contract for those old people. If they were a mind to allow it, they wouldn't ever have anything to do, year in and year out but stand up and be hugged and wept on thirty-two hours in the twenty-four. They would be tired out and as wet as muskrats all the time.

What would heaven be, to *them*? It would be a mighty good place to get out of—you know that, yourself. Those are kind and gentle old Jews, but they ain't any fonder of kissing the emotional highlights of Brooklyn than you be. You mark my words, Mr. T.'s endearments are going to be declined, with thanks. There are limits to the privileges of the elect, even in heaven. Why, if Adam was to show himself to every newcomer that wants to call and gaze at him and strike him for his autograph, he would never have time to do anything else but just that.

Mark Twain, Extract from Captain Stormfield's Visit to Heaven

104 *Sandy*. Down there they talk of the heavenly King—and that is right—but then they go right on speaking as if this was a republic and everybody was on a dead level with everybody else, and privileged to fling his arms around anybody he comes across, and be hail-fellow-well-met with all the elect, from the highest down. How tangled up and absurd that is! How are you going to have a republic under a king? How are you going to have a republic at all, where the head of the government is absolute, holds his place forever, and has no parliament, no council to meddle or make in his affairs, nobody voted for, nobody elected, nobody in the whole universe with a voice in the government, nobody asked to take a hand in its matters, and nobody *allowed* to do it? Fine republic, ain't it?

Mark Twain, Extract from Captain Stormfield's Visit to Heaven

105 Everything human is pathetic. The secret source of Humor itself is not joy but sorrow. There is no humor in heaven.

Mark Twain, Pudd'nhead Wilson's New Calendar, X

106 *The Preacher*. Last and crowning torture of all the tortures of that awful place is the eternity of hell. Eternity! O, dread and dire word. Eternity! What mind of man can understand it? And remember, it is an eternity of pain. Even though the pains of hell were not so terrible as they are yet they would become infinite as they are destined to last for ever. But while they are everlasting they are at the same time, as you know, intolerably

intense, unbearably extensive. To bear even the sting of an insect for all eternity would be a dreadful torment. What must it be, then, to bear the manifold tortures of hell for ever? For ever! For all eternity! Not for a year or for an age but for ever. Try to imagine the awful meaning of this. You have often seen the sand on the seashore. How fine are its tiny grains! And how many of those tiny little grains go to make up the small handful which a child grasps in its play. Now imagine a mountain of that sand, a million miles high, reaching from the earth to the farthest heavens, and a million miles broad, extending to remotest space, and a million miles in thickness: and imagine such an enormous mass of countless particles of sand multiplied as often as there are leaves in the forest, drops of water in the mighty ocean, feathers on birds, scales on fish, hairs on animals, atoms in the vast expanse of the air: and imagine that at the end of every million years a little bird came to that mountain and carried away in its beak a tiny grain of that sand. How many millions upon million of centuries would pass before that bird had carried away even a square foot of that mountain, how many eons upon eons of ages before it had carried away all. Yet at the end of that immense stretch of time not even one instant of eternity could be said to have ended. At the end of all those billions and trillions of years eternity would have scarcely begun. And if that mountain rose again after it had been all carried away and if the bird came again and carried it all away again grain by grain: and if it so rose and sank as many times as there are stars in the sky, atoms in the air, drops of water in the sea, leaves on the trees, feathers upon birds, scales upon fish, hairs upon animals, at the end of all those innumerable risings and sinkings of that

immeasurably vast mountain not one single instant of eternity could be said to have ended; even then, at the end of such a period, after that eon of time the mere thought of which makes our very brain reel dizzily, eternity would have scarcely begun.

Joyce, Portrait of the Artist as a Young Man, III

107 Let me enjoy the earth no less
Because the all-enacting Might
That fashioned forth its loveliness
Had other aims than my delight.

About my path there flits a Fair,
Who throws me not a word or sign;
I'll charm me with her ignoring air,
And laud the lips not meant for mine.

From manuscripts of moving song
Inspired by scenes and dreams unknown
I'll pour out raptures that belong
To others, as they were my own.

And some day hence, towards Paradise
And all its blest—if such should be—
I will lift glad, afar-off eyes,
Though it contain no place for me.

Hardy, Let Me Enjoy

108 That night your great guns, unawares.
Shook all our coffins as we lay,
And broke the chancel window-squares,
We thought it was the Judgment Day

And sat upright. While drearishome
Arose the howl of wakened hounds:
The mouse let (all the altar-crumb.
The worms drew back into the mounds,

The glebe cow drooled. Till God called, "No;
It's gunnery practice out at sea
Just as before you went below;
The world is as it used to be:

"All nations striving strong to make
Red war yet redder. Mad as hatters
They do no more lor Christes sake
Than you who are helpless in such matters.

"That this is not the judgment hour
For some of them's a blessed thing,
For if it were they'd have to scour
Hell's floor for so much threatening, . . . ,

"Ha, ha. It will be warmer when
I blow the trumpet (if indeed
I ever do; for you are men,
And rest eternal sorely need),"

Hardy, Channel Firing

Table of Contents

Preface

Acknowledgments

Chapter 1 MAN

1.1 Man in the Universe The Grandeur and Misery of Man

1.2 The Human Condition

1.3 The Ages of Man YOUNG AND OLD

1.4 Self-Knowledge and Self-Love

1.5 Honor, Reputation, and Fame or Glory

1.6 Human Greatness THE HERO

1.7 Woman and Man

1.8 Life and Death THE FEAR OF DEATH

1.9 Suicide

Chapter 2 FAMILY

2.1 The Institution of the Family

2.2 Parents and Children

2.3 Marriage

Chapter 3 LOVE

3.1 The Nature, Kinds, and Power of Love

3.2 Hate

3.3 Sexual Love

3.4 Friendship

3.5 Charity and Mercy

3.6 Love of Country PATRIOTISM

Chapter 4 EMOTION

4.1 The Passions THE RANGE OF THE EMOTIONS

- 4.2 Fear
- 4.3 Anger
- 4.4 Desire
- 4.5 Hope and Despair
- 4.6 Joy and Sorrow
- 4.7 Pleasure and Pain
- 4.8 Pity and Envy
- 4.9 Greed and Avarice
- 4.10 Jealousy
- 4.11 Pride and Humility

Chapter 5 MIND

- 5.1 Intelligence and Understanding
- 5.2 The Senses and Sense Perception
- 5.3 Memory
- 5.4 Imagination
- 5.5 Dreams
- 5.6 Madness
- 5.7 Will Free Choice

Chapter 6 KNOWLEDGE

- 6.1 The Characteristics and Conditions of Human Knowledge
- 6.2 Experience
- 6.3 Truth
- 6.4 Error, Ignorance, and the Limits of Human Knowledge
- 6.5 Opinion, Belief, and Faith
- 6.6 Doubt and Skepticism
- 6.7 Reasoning, Demonstration, and Disputation

Chapter 7 LANGUAGE

- 7.1 The Nature of Language
- 7.2 The Arts of Language

Chapter 8 EDUCATION

- 8.1 The Ends and Means of Education

8.2 Habit

8.3 The Arts of Teaching and Learning

Chapter 9 ETHICS

9.1 Moral Philosophy and Morality

9.2 Custom

9.3 Moral Law

9.4 Moral Freedom

9.5 Conscience

9.6 Good and Evil

9.7 Right and Wrong

9.8 Happiness

9.9 Duty MORAL OBLIGATION

9.10 Virtue and Vice

9.11 Courage and Cowardice

9.12 Temperance and Intemperance

9.13 Prudence

9.14 Honesty

9.15 Wisdom and Folly

Chapter 10 POLITICS

10.1 Society and the State

10.2 The Realm of Politics

10.3 Government ITS NATURE, NECESSITY, AND FORMS

10.4 Government of and by the People REPUBLIC AND DEMOCRACY

10.5 Citizenship

10.6 Despotism and Tyranny

10.7 Slavery

10.8 Classes and Class Conflict

10.9 Revolution

Chapter 11 ECONOMICS

11.1 Property

11.2 Wealth and Poverty

11.3 Labor

11.4 Money

11.5 Trade, Commerce, and Industry

11.6 Taxation

Chapter 12 LAW and JUSTICE

12.1 Law and Lawyers

12.2 Justice and Injustice

12.3 Rights—Natural and Civil

12.4 Crime and Punishment

Chapter 13 LIBERTY and EQUALITY

13.1 Freedom in Society

13.2 Freedom of Thought and Expression

CENSORSHIP

13.3 Equality

Chapter 14 WAR and PEACE

14.1 Warfare and the State of War

14.2 The Instrumentalities of War THE MILITARY

14.3 The Conditions of Peace

Chapter 15 HISTORY

15.1 History: The Record of Events

15.2 Progress, Regress, and Cycles in History

15.3 Fate, Fortune, and Destiny

Chapter 16 ART and AESTHETICS

16.1 The Realm of Art

16.2 Books and Reading

16.3 Poetry and Poets

16.4 Tragedy and Comedy

16.5 Music

16.6 Beauty and the Beautiful

16.7 Criticism and the Standards of Taste

Chapter 17 PHILOSOPHY, SCIENCE, and MATHEMATICS

17.1 Philosophy and Philosophers

17.2 Science and Scientific Method

17.3 The Discipline of Mathematics

Chapter 18 MEDICINE and HEALTH

18.1 The Art and Science of Medicine

18.2 The Practice of Medicine PHYSICIANS AND PATIENTS

18.3 Health and Disease

Chapter 19 NATURE and the COSMOS

19.1 Nature and the Natural

19.2 The Nature of Life

19.3 Cause

19.4 Chance

19.5 Motion and Change

19.6 Space

19.7 Time

19.8 The Universe or Cosmos

Chapter 20 RELIGION

20.1 The Distinguishing Features of Religion

20.2 Judaism

20.3 Christianity

20.4 Church

20.5 God

20.6 Gods and Goddesses

20.7 Angels and Devils

20.8 Worship and Service

20.9 Heresy and Unbelief

20.10 Prophecy

20.11 Miracles

20.12 Superstition

20.13 Sin and Temptation

20.14 Redemption and Salvation

20.15 Heaven and Hell
